This chart is for illustrative purposes only and not indicative of any actual investment. The illustration excludes the effects of taxes and brokerage commissions and other expenses incurred when investing. Investors cannot invest directly in an index. The S&P 500 Index is a capitalization-weighted index comprised of 500 stocks used to measure large-cap U.S. stock market performance, while the 10 major S&P 500 Sector Indices are capitalization-weighted and comprised of S&P 500 constituents representing a specific sector. The S&P 100 Index is a capitalization-weighted index based on 100 highly capitalized stocks selected from the S&P 500 for which options are listed. The S&P 400 Index is a capitalization-weighted index that tracks U.S. stocks with a small market capitalization. The MSCI World (ex-U.S.) Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. The MSCI Europe Index is a free-float weighted index designed to measure the performance of the developed equity markets in Europe. The Nikkei 225 Index is a price-weighted average of 225 top-rated Japanese companies listed in the First Section of the Tokyo Stock Exchange.
