## Factoids for the week of May 31st - June 4th

## Monday, May 31, 2010

Memorial Day Holiday, Markets Closed

## Tuesday, June 1, 2010

Standard and Poor's uses four categories to classify sell-offs in equities: noise (decline up to 4.9\%); pullback (decline of $5.0 \%$ to $9.9 \%$ ); correction (decline of $10.0 \%$ to $19.9 \%$ ); and bear market (decline of $20 \%$ or more). It refers to bear markets with losses exceeding $40.0 \%$ as mega-meltdowns. Since 1946, the S\&P 500 has experienced 53 pullbacks with an average decline of 7\%, 18 corrections with an average decline of $14 \%$, and 12 bear markets with an average decline of $33 \%$ (three were mega-meltdowns), according to Sam Stovall, Chief Investment Strategist at S\&P. With respect to the 18 corrections, once they bottomed it took only four months, on average, to climb back above the pre-correction level.

## Wednesday, June 2, 2010

The United Nations suggests that individuals require 20 to 50 liters of safe freshwater a day to ensure their basic needs of drinking, cooking and cleaning, according to the World Water Assessment Programme. Unfortunately, more than one out of six people worldwide (894 million) do not have access to this amount of safe freshwater. The goal of the UN's Millennium Development Target 7.C. is to cut that number in half by 2015. The UN-Water GLAAS Report 2010 (Global Annual Assessment of Sanitation and Drinking Water) noted that a World Health Organization study estimates that if that goal were to be achieved there would be the potential for economic benefits ranging from \$3 to \$34 - depending on the region - for every \$1 invested in sanitation and drinking water.

## Thursday, June 3, 2010

Renewable energy currently makes up about $7 \%$ of the total power consumption in the U.S., according to Forbes. Fossil fuels account for $84 \%$ of consumption and nuclear power comes in at around 9\%. The oil leak in the Gulf is breathing life back into the push for clean technology. The KerryLieberman Climate Bill, for example, seeks to reduce the use of fossil fuels from $84 \%$ to $70 \%$. It calls for an increase in renewable and nuclear usage from around $7 \%$ and $9 \%$, respectively, to $14 \%$ and $16 \%$, respectively. This is an aggressive goal considering that both solar and wind energy accounted for less than $1 \%$ of energy consumption in 2008, according to the latest data from the Department of Energy.

## Friday, June 4, 2010

In May, the dividend-payers (368) in the S\&P 500 (equal weight) posted a total return of $-7.75 \%$, vs. $-6.41 \%$ for the non-payers (132), according to Standard \& Poor's. Year-to-date through May, the payers were up $3.20 \%$, vs. a gain of $3.11 \%$ for the non-payers. For the 12-month period ended May, payers were up $55.98 \%$, vs. a gain of $77.39 \%$ for the non-payers. The number of dividend increases year-to-date totaled 119, up from 77 increases a year ago. One company decreased its dividend, down from 54 a year ago. One company suspended its dividend, down from nine a year ago.
