- Rebalance Frequency: Quarterly
- Primary Listing: Nasdaq

Index Facts
- Index Ticker: DWAMLVT
- Index Inception Date: 7/2/18
- Index Yield: 2.94%

Index Description
The Dorsey Wright Momentum Plus Low Volatility Index is a rules-based equity index that is designed to track the overall performance of 50 stocks within the NASDAQ US Large Mid Cap Index that exhibit the lowest levels of volatility while maintaining high levels of relative strength.

To construct the index, Dorsey, Wright & Associates (DWA) begins with the eligible constituents of the NASDAQ US Large Mid Cap Index.
- These eligible constituents are determined after meeting certain criteria, including maintaining a minimum average daily dollar volume of $1 million for the 30-day period prior to evaluation.
- Each security is assigned a relative strength score based on its forward price momentum compared to the momentum of a broad market benchmark index. Securities that exhibit a minimum level of relative strength are eligible for inclusion in the index.
- Eligible securities are then assigned a volatility score based on their daily percentage price changes over the trailing year. The top 50 securities with the lowest volatility scores are selected for inclusion in the index.
- The securities are then weighted using the inverse of each security’s one-year trailing volatility, with greater weights given to securities with lower volatility scores.
- The index is reconstituted and rebalanced quarterly.

Performance data quoted represents past performance. Past performance is not a guarantee of future results and current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and shares when sold or redeemed, may be worth more or less than their original cost. You can obtain performance information which is current through the most recent month-end by visiting www.ftportfolios.com.

*30-day SEC yield is calculated by dividing the net investment income per share earned during the most recent 30-day period by the maximum offering price per share on the last day of the period.

†Index yield represents the weighted average trailing 12-month dividend of the constituents of the Dorsey Wright Momentum Plus Low Volatility Index.

*NAV returns are based on the fund’s net asset value which represents the fund’s net assets (assets less liabilities) divided by the fund’s outstanding shares. After Tax Held returns represent return after taxes on distributions. Assumes shares have not been sold. After Tax Sold returns represent the return after taxes on distributions and the sale of fund shares. Returns do not represent the returns you would receive if you traded shares at other times. Market Price returns are based on the midpoint of the bid/ask spread on the stock exchange on which shares of the fund are listed for trading as of the time that the fund’s NAV is calculated. Returns are average annualized total returns, except those for periods of less than one year, which are cumulative. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor’s tax situation and may differ from those shown. The after-tax returns shown are not relevant to investors who hold their fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

**Performance information for the Dorsey Wright Momentum Plus Low Volatility Index is for illustrative purposes only and does not represent actual fund performance. Indexes do not charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown. Indexes are unmanaged and an investor cannot invest directly in an index.
ETF Characteristics

The fund lists and principally trades its shares on The Nasdaq Stock Market LLC. The fund's return may not match the return of the Dorsey Wright Momentum Plus Low Volatility Index. Securities held by the fund will generally not be bought or sold in response to market fluctuations.

Investors buying or selling fund shares on the secondary market may incur customary brokerage commissions. Market prices may differ to some degree from the net asset value of the shares. Investors who sell fund shares may receive less than the share's net asset value. Shares may be sold throughout the day on the exchange through any brokerage account. However, unlike mutual funds, shares may only be redeemed directly from the fund by authorized participants, in very large creation/redemption units. If the fund's authorized participants are unable to proceed with creation/redemption orders and no other authorized participant is able to step forward to create or redeem, fund shares may trade at a discount to the fund's net asset value and possibly face delisting.

Risk Considerations

The fund's shares will change in value, and you could lose money by investing in the fund. One of the principal risks of investing in the fund is market risk. Market risk is the risk that a particular stock owned by the fund, fund shares or stocks in general may fall in value. There can be no assurance that the fund's investment objective will be achieved.

The fund may invest in securities issued by companies concentrated in a particular industry or sector, which involves additional risks, including limited diversification. The fund may invest in small capitalization and mid capitalization companies. Such companies may experience greater price volatility than larger, more established companies. The fund is not actively managed and generally will not attempt to take defensive positions in declining markets.

A portfolio comprised of low volatility stocks may not produce investment exposure that has lower variability to changes in such stocks' price levels. Low volatility stocks are likely to underperform the broader market during periods of rapidly rising stock prices.

Definitions

The S&P 500 Index is an unmanaged index of 500 stocks used to measure large-cap U.S. stock market performance.
