The listing of "Largest Holdings" is not a complete list of all securities in the strategy or which First Trust Advisors L.P. may be currently recommending. Furthermore, application of the investment strategy as of a later date will likely result in changes to the listing.

References to Morningstar Investment Management are made pursuant to a license obtained by First Trust Advisors L.P. (FTA), which is solely responsible for the content of this document and is the sole investment manager of the portfolios referred to herein. FTA is the investment adviser responsible for the day-to-day management of the FTA/Morningstar Multi-Discipline strategies. Morningstar Investment Management will provide FTA with a recommended asset allocation, which FTA will consider in managing a client's portfolio. FTA will then select the specific securities utilizing its investment process.

Portfolio Objective

The FTA/Morningstar Multi-Discipline All Equity is an aggressive strategy that seeks to provide capital appreciation by investing across approximately 9 equity asset classes using U.S. traded securities.

Investment Selection Process

Asset Allocation

Equity Sector Allocation

Strategy Management Process

Asset class weightings are readjusted and rebalanced annually to reflect the most recent Morningstar Strategic Asset Allocation Model. FTA retains flexible sector and industry weights and its weightings in such categories are principally a result of its stock selection process.

Equity Sell Discipline - positions are continually reviewed and may be sold if the share price reaches or exceeds our estimate of intrinsic value; the company's fundamentals deteriorate; there is a significant change in company management; there is a corporate action affecting the holding; and/or more attractive opportunities exist elsewhere.

Key Investment Personnel

- David McGarel, CFA, CPA
- Daniel Lindquist, CFA
- Jon Erickson, CFA
- Roger Testin, CFA, CPA
- John Sherren, CFA
- Chris Peterson, CFA

First Trust Advisors L.P. (FTA) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS® standards. FTA has been independently verified for the periods August 1, 1999 through June 30, 2017. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS® standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS® standards. The FTA/Morningstar Multi-Discipline All Equity Composite has been examined for periods January 1, 2006 through June 30, 2017. The verification and performance examination reports are available upon request.

* Pure gross-of-fees returns are presented as supplemental information to the disclosures required by GIPS®.

Notes:

1. First Trust Advisors L.P. (FTA) was founded in 1991 and is a registered investment advisor with the Securities and Exchange Commission (SEC). FTA provides investment advisory services using equity, fixed-income and balanced strategies for individuals, organizations and institutions. The firm consists of all portfolios managed by FTA. Since 2011, the Total Firm Assets are presented net and have been reduced for the effects of leverage. Prior to 2011, the Total Firm Assets are presented gross and have not been reduced for the effects of leverage.
2. The FTA/Morningstar Multi-Discipline All Equity Composite is for the aggressive growth investor who seeks capital appreciation by investing across multiple equity asset classes. Prior to 4/1/16, the composite was called the FTA/Ibbotson Multi-Discipline All Equity Composite. The composite creation date was June 2007. A complete list of composites and descriptions is available upon request.
3. The composite includes 100% wrap portfolios since inception for which FTA has full discretionary investment authority and are fee-paying portfolios. The composite does not utilize a material level of leverage.
4. Composite net-of-fees returns are presented net of actual fees, but in instances where actual fees are not identifiable, a maximum model fee of 3% is applied. Net-of-fees returns include investment management fees, custodian fees, trading costs and all other administrative fees. Pure gross-of-fees returns do not reflect the deduction of any expenses, including investment management fees, custodian fees, trading costs and other administrative fees. Prior to 12/31/11, quarterly and annual composite returns were calculated by linking monthly returns. Each portfolio in the composite was valued at least on a monthly basis. If cash flows exceed 10% of the composite's value, the composite was revalued on the day prior to the cash flow and the return was calculated for the interim period. Starting 1/1/12, composite returns are calculated on a daily basis.
5. Valuations and returns are computed and stated in U.S. Dollars. Returns are calculated net of foreign taxes recorded on a cash basis and dividend accruals do not include pending withholding tax reclaims. Additional information regarding policies for valuing portfolios, calculating performance and preparing compliant presentations is available upon request.
6. The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The standard deviation is not presented prior to 2011 because it was not required.
7. Composite dispersion is measured by standard deviation, which is an asset-weighted calculation that measures the consistency of composite performance with respect to the individual portfolio returns within the composite. Dispersion of portfolios in the composite is not applicable if the period presented is less than a full year or if there were fewer than five portfolios in the composite for the entire year.
8. The benchmark return is a blend of the following indexes; Russell 3000 Index (70%) - composed of 3000 large U.S. companies, as determined by market capitalization, and MSCI All Country World ex U.S. Net Return Index (30%) - a free float-adjusted market capitalization index that is designed to measure equity market performance in the global developed and emerging markets, excluding the United States.
9. The securities comprising the benchmark are not identical to those in any portfolio in the composite, but FTA believes they may be useful in evaluating performance. Unlike the composite, the benchmark is not actively managed and does not reflect the deduction of advisory fees. Differences in composite performance versus benchmark performance may also result due to high concentrations of individual securities holdings in certain portfolios, timing of security transactions and tax considerations. Such factors may contribute to higher standard deviation of portfolio returns within the composite. The benchmark is rebalanced daily. Benchmark returns have not been examined by the verifier.
10. The FTA management fee schedule is an annual fee of 0.55%. FTA, at its discretion, may negotiate a management fee which is different from the standard fee schedule listed here. The overall wrap fee expense for accounts in the composite will typically range from 1.00% to 3.00%.
11. Past performance is not indicative of future results. Other methods may produce different results, and the results for individual portfolios and for different periods may vary depending on market conditions and the composition of the portfolio. Care should be used when comparing these results to those published by other investment advisers, other investment vehicles and unmanaged indices due to possible differences in calculation methods.
