The strategy is based on these important elements:
- Higher Dividend Yields – Blue-chip stocks with higher dividend yields may indicate that the stocks are out of favor or may be undervalued.
- Industry Leaders – The companies included in the DJIA, HSI, and the FT Index are some of the most widely-held and well-capitalized companies in their markets.

If this strategy had been applied since 1987, investors would have realized higher total returns than by investing in an even combination of the DJIA, HSI, and the FT Index (combined indices). It is important to note that the past performance of the strategy is hypothetical and it is not indicative of the future performance of the Global Target 15 Portfolio. Although this unit investment trust terminates in approximately 15 months, the strategy is long-term. Investors should consider their ability to pursue investing in successive portfolios, if available. There may be tax consequences unless units are purchased in an IRA or other qualified plan.

Portfolio Objective
This unit investment trust seeks above-average total return; however, there is no assurance the objective will be met.

You should consider the portfolio's investment objective, risks, and charges and expenses carefully before investing. Contact your financial advisor or call First Trust Portfolios L.P. at the number listed below to request a prospectus, which contains this and other information about the portfolio. Read it carefully before you invest.

Determining whether investments are appropriate for their clients. Internal Revenue Code or any other regulatory framework. Advice in any fiduciary capacity within the meaning of ERISA, the Global Target 15 3Q '19 - Term 10/9/20 (Global Target 15 Portfolio) is a unit investment trust which invests in a fixed portfolio of stocks for approximately 15 months. The portfolio adheres to a strategy of investing in an approximately equally weighted portfolio of the five lowest-priced of the ten highest dividend-yielding stocks from each of the Dow Jones Industrial Average (DJIA), Hang Seng Index (HSI), and the Financial Times Industrial Ordinary Share Index (FT Index).

The strategy is based on these important elements:
- Higher Dividend Yields – Blue-chip stocks with higher dividend yields may indicate that the stocks are out of favor or may be undervalued.
- Industry Leaders – The companies included in the DJIA, HSI, and the FT Index are some of the most widely-held and well-capitalized companies in their markets.

Financial advisors are responsible for evaluating investment risks independently and for exercising independent judgment in determining whether investments are appropriate for their clients.

The DJIA consists of U.S. stocks chosen by the editors of The Wall Street Journal as being representative of American industry. The HSI is an unmanaged index of stocks currently listed on the Stock Exchange of Hong Kong Ltd. The FT Index is an unmanaged index of stocks chosen by the editors of The Financial Times as being representative of the British industry and commerce. None of the indices can be purchased directly by investors.

Standard Deviation is a measure of price variability (risk). A higher degree of variability indicates more volatility and therefore greater risk.

Please see the reverse side for risk considerations.
An investment in this unmanaged unit investment trust should be made with an understanding of the risks involved with owning common stocks, such as an economic recession and the possible deterioration of either the financial condition of the issuers. Risks associated with investing in foreign securities may be more pronounced in emerging markets where the securities markets are substantially smaller, less liquid, less regulated and more volatile than the U.S. and developed foreign markets. An investment in a portfolio containing small-cap and mid-cap companies is subject to additional risks, as the share prices of small-cap companies and certain mid-cap companies are often more volatile than those of larger companies due to several factors, including limited trading volumes, products, financial resources, management inexperience and less publicly available information. Because the portfolio is concentrated in securities issued by companies headquartered in China and the United Kingdom, the portfolio may present more risks than a portfolio which is broadly diversified over several regions. The value of the securities held by the trust may be subject to steep declines or increased volatility due to changes in performance or perception of the issuers. Information, and exchange control restrictions impacting foreign issuers. Risks associated with volatile than those of larger companies due to several factors, including limited trading volumes, products, financial resources, management inexperience and less publicly available information. An investment in a portfolio containing small-cap and mid-cap companies is subject to additional risks, including currency fluctuations, political risks, withholding, the lack of adequate financial

**SALES CHARGES (BASED ON A $10 PUBLIC OFFERING PRICE)**

**STANDARD ACCOUNTS**

Transaction Sales Charges: Initial 0.00% Deferred 1.35%

Creation & Development Fee: Maximum Sales Charge: 0.50%

The deferred sales charge will be deducted in three monthly installments commencing 10/18/19. When the public offering price is less than or equal to $10.00 per unit, there will be no initial sales charge. If the price exceeds $10.00 per unit, you will pay an initial sales charge.

**FEE/WRAP ACCOUNTS**

Maximum Sales Charge: 0.50%

The maximum sales charge for investors in fee accounts consists of the creation and development fee. Investors in fee accounts are not assessed any transactional sales charges. Standard accounts sales charges apply to units purchased as an ineligible asset. The creation and development fee is a charge of $0.050 per unit collected at the end of the initial offering period. If the price you pay exceeds $10.00 per unit, the creation and development fee will be less than 0.50%; if the price you pay is less than $10.00 per unit, the creation and development fee will exceed 0.50%. In addition to the sales charges listed, UITs are subject to annual operating expenses and organization costs.
