>> Index Description

- >> The NIFTY 50 Equal Weight Index is an equally weighted index that consists of the same companies as the NIFTY 50 Index, an index that tracks the performance of the 50 largest and most liquid Indian securities listed on the National Stock Exchange of India.
- >> The NIFTY 50 Equal Weight Index gives equal exposure to all 50 constituents. The same weight, or importance, is given to each stock in the index, allowing for the performance of smaller companies to contribute as much as the larger companies within the index.
- >> To maintain the equal weight focus, the index is rebalanced quarterly and reconstituted semi-annually.

¹On April 17, 2018, the fund's underlying index changed from the NASDAQ AlphaDEX® Taiwan Index to the NIFTY 50 Equal Weight Index. On July 14, 2015, the fund's underlying index changed from the Defined Taiwan Index to the NASDAQ AlphaDEX® Taiwan Index. Therefore, the fund's performance and historical returns shown for the periods prior to these dates are not necessarily indicative of the performance that the fund, based on its current index, would have generated.

*NAV returns are based on the fund's net asset value which represents the fund's net assets (assets less liabilities) divided by the fund's outstanding shares. **After Tax Held** returns represent return after taxes on distributions. Assumes shares have not been sold. **After Tax Sold** returns represent the return after taxes on distributions and the sale of fund shares. Returns do not represent the returns you would receive if you traded shares at other times. **Market Price** returns are based on the midpoint of the bid/ask spread on the stock exchange on which shares of the fund are listed for trading as of the time that the fund's NAV is calculated. Returns are average annualized total returns, except those for periods of less than one year, which are cumulative. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown. The after-tax returns shown are not relevant to investors who hold their fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

ETF Characteristics

The fund lists and principally trades its shares on The Nasdaq Stock Market LLC. The fund's return may not match the return of the NIFTY 50 Equal Weight Index. Securities held by the fund will generally not be bought or sold in response to market fluctuations. Investors buying or selling fund shares on the secondary market may incur customary brokerage commissions. Market prices may differ to some degree from the net asset value of the shares. Investors who sell fund shares may receive less than the share's net asset value. Shares may be sold throughout the day on the exchange through any brokerage account. However, unlike mutual funds, shares may only be redeemed directly from the fund by authorized participants, in very large creation/redemption units. If the fund's authorized participants are unable to proceed with creation/redemption orders and no other authorized participant is able to step forward to create or redeem, fund shares may trade at a discount to the fund's net asset value and possibly face delisting.

Risk Considerations

The fund's shares will change in value, and you could lose money by investing in the fund. One of the principal risks of investing in the fund is market risk. Market risk is the risk that a particular stock owned by the fund, fund shares or stocks in general may fall in value. There can be no assurance that the fund's investment objective will be achieved.

Equity securities prices fluctuate for several reasons, including changes in investors' perceptions of the financial condition of an issuer or the general condition of the relevant stock market, such as market volatility, or when political or economic events affecting the issuers occur.

The fund may invest in securities issued by companies concentrated in a particular industry or sector, which involves additional risks including limited diversification. The fund may invest in small or mid capitalization companies. Such companies may experience greater price volatility than larger, more established companies.

An investment in a fund containing securities of non-U.S. issuers is subject to additional risks, including currency fluctuations, political risks, withholding, the lack of adequate financial information, and exchange control restrictions impacting non-U.S. issuers. These risks may be heightened for securities of companies located in, or with significant operations in, emerging market countries. The fund may invest in depository receipts which may be less liquid than the underlying shares in their primary trading market.

Indian companies are subject to certain risks, including greater price volatility, substantially less liquidity and significantly smaller market capitalization of securities markets, more substantial governmental involvement in the economy, higher rates of inflation, and greater political, economic and social uncertainty. Government controls have been reduced on imports and foreign investment, and privatization of domestic output has proceeded slowly. Rapid economic growth has put heavy stress on India's infrastructural facilities. Furthermore, businesses still have to deal with an inefficient and sometimes slow-moving bureaucracy.

Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the fund's investment and the value of fund shares.

The fund will be subject to tax in India on the purchase and sale of Indian securities held by the fund, which will reduce the fund's returns.

The fund currently has fewer assets than larger funds, and like other relatively new funds, large inflows and outflows may impact the fund's market exposure for limited periods of time.

As the use of Internet technology has become more prevalent in the course of business, the fund has become more susceptible to potential operational risks through breaches in cyber security.

The fund may, under certain circumstances, effect a significant portion of creations and redemptions for cash, rather than in-kind securities. As a result, the fund may be less tax-efficient.

The fund is registered in India as a Foreign Portfolio Investor ("FPI") with the Securities and Exchange Board of India ("SEBI"). Investment by FPIs in Indian securities are subject to certain limits and restrictions under the applicable law which could adversely impact the ability of the fund to make investments in India.
