SUMMARY INFORMATION

Investment Objectives

The First Trust Short Duration High Income Fund (the "Fund") seeks to provide a high level of current income. As a secondary objective, the Fund seeks capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund or in other First Trust Advisors L.P. mutual funds. More information about these and other discounts, as well as eligibility requirements for each share class, is available from your financial advisor and in "Share Classes" on page 18 of this prospectus, "Investment in Fund Shares" on page 20 of this prospectus and "Purchase and Redemption of Fund Shares" on page 32 of the Fund's statement of additional information ("SAI").

Shareholder Fees

(fees paid directly from your investment)

	Class A	Class C	Class I
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	3.50%	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of the lesser of purchase price or redemption proceeds) ⁽¹⁾	None	1.00%	None
Maximum Sales Charge (Load) Imposed on Reinvested Dividends	None	None	None
Exchange Fee	None	None	None

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Class I
Management Fees	0.65%	0.65%	0.65%
Distribution and Service (12b-1) Fees	0.25%	1.00%	–
Other Expenses ⁽²⁾	0.31%	0.31%	0.31%
Total Annual Fund Operating Expenses	1.21%	1.96%	0.96%
Fee Waiver and Expense Reimbursement ⁽³⁾	0.04%	0.04%	0.04%
Total Annual Fund Operating Expenses After Fee Waivers and Expense Reimbursements	1.25%	2.00%	1.00%

(1) For Class A shares purchased at net asset value without a sales charge because the purchase amount exceeded \$250,000, a contingent deferred sales charge of 1% may be imposed on any redemption within 12 months of purchase. The contingent deferred sales charge on Class C shares applies only to redemption within 12 months of purchase.

(2) Expenses have been restated to reflect the current fiscal year.

(3) The Fund's investment advisor has agreed to waive fees and reimburse expenses through February 28, 2019 so that Total Annual Fund Operating Expenses (excluding 12b-1 distribution and service fees, interest expenses, taxes, fees incurred in acquiring and disposing of portfolio securities, and extraordinary expenses) do not exceed 1.00% of the average daily net assets of any class of Fund shares. Total Annual Fund Operating Expenses (excluding 12b-1 distribution and service fees, interest expenses, taxes, fees incurred in acquiring and disposing of portfolio securities, and extraordinary expenses) will not exceed 1.35% from March 1, 2019 through February 28, 2028. Fees waived or expenses borne by the Fund's investment advisor are subject to reimbursement by the Fund for up to three years from the date the fee was waived or expense was incurred, but no reimbursement payment will be made by the Fund at any time if it would result in the Fund's expenses exceeding (i) the applicable expense limitation in place for the most recent fiscal year for which such expense limitation was in place, (ii) the applicable expense limitation in place at the time the fees were waived, or (iii) the current expense limitation. Expense limitations may be terminated or modified prior to their expiration only with the approval of the Board of Trustees of the First Trust Series Fund.

Example

The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated. The example also assumes that your investment has a 5% return each year and that the Fund's annual operating expenses (excluding 12b-1 distribution and service fees, interest expense, taxes, fees incurred in acquiring and disposing of portfolio securities, and extraordinary expenses) remain at current levels until February 28, 2019 and then will not exceed 1.35% from March 1, 2019 through February 28, 2028. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

Redemption				No Redemption			
Share Class	A	C	I	Share Class	A	C	I
1 Year	\$ 473	\$ 303	\$ 102	1 Year	\$ 473	\$ 203	\$ 102
3 Years	724	619	310	3 Years	724	619	310
5 Years	995	1,061	535	5 Years	995	1,061	535
10 Years	1,768	2,288	1,182	10 Years	1,768	2,288	1,182

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 100% of the average value of its portfolio.

Principal Investment Strategies

Under normal market conditions, the Fund invests at least 80% of its net assets (including investment borrowings) in high yield debt securities and bank loans that are rated below-investment grade or unrated. High yield debt securities are below-investment grade debt securities, commonly known as "junk bonds." For purposes of determining whether a security is below-investment grade, the lowest available rating is used.

The Fund has a short duration investment strategy, which seeks to maintain, under normal market conditions, a blended (or weighted average) portfolio duration of three years or less. Duration is a mathematical calculation of the average life of a debt security (or portfolio of debt securities) that serves as a measure of its price risk. In general, each year of duration represents an expected 1% change in the value of a security for every 1% immediate change in interest rates. For example, if a portfolio of bank loans and fixed income securities has an average duration of three years, its value can be expected to fall about 3% if interest rates rise by 1%. Conversely, the portfolio's value can be expected to rise about 3% if interest rates fall by 1%. As a result, prices of instruments with shorter durations tend to be less sensitive to interest rate changes than instruments with longer durations. As the value of a security changes over time, so will its duration.

Bank loans have relatively low durations, *i.e.*, close to zero, which means that the interest rates on loans reset approximately every 30-90 days, on average, however, the inclusion of London Interbank Offered Rate ("*LIBOR*") floors on certain senior loans or other factors may cause interest rate duration to be longer than 90 days. Accordingly, the Fund's investment in such securities will likely reduce the blended duration of the portfolio and in turn the Fund's overall interest rate sensitivity. "Average duration" is the measure of a debt instrument's or a portfolio's price sensitivity with respect to changes in market yields. The blended duration is the sum of the dollar weighted average duration of the Fund's positions.

Under normal market conditions, the Fund may invest up to 15% of its net assets in non-U.S. securities denominated in non-U.S. currencies. The Fund may also invest in investment grade debt securities and convertible bonds.

Principal Risks

You could lose money by investing in the Fund. There can be no assurance that the Fund will achieve its investment objectives. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency.

BANK LOANS RISK. An investment in bank loans subjects the Fund to credit risk, which is heightened for bank loans in which the Fund invests because companies that issue such loans tend to be highly leveraged and thus are more susceptible to the risks of interest deferral, default and/or bankruptcy. Senior floating rate loans, in which the Fund may invest, are usually rated below investment grade but may also be unrated. As a result, the risks associated with these senior floating rate loans are similar to the risks of high yield fixed income instruments. An economic downturn would generally lead to a higher non-payment rate, and a senior floating rate loan may lose significant market value before a default occurs. Moreover, any specific collateral used to secure a senior floating rate loan may decline in value or become illiquid, which would adversely affect the senior floating rate loan's value. Unlike the securities markets, there is no central clearinghouse for loan trades, and the loan market has not established enforceable settlement standards or remedies for failure to settle. Therefore, portfolio transactions in senior floating rate loan may have uncertain settlement time periods. Senior floating rate loans are subject to a number of risks described elsewhere in this prospectus, including liquidity risk and the risk of investing in below investment grade fixed income instruments.

CALL RISK. If an issuer calls higher-yielding securities held by the Fund, performance could be adversely impacted. During periods of falling interest rates, issuers of callable securities may call (redeem) securities with higher coupon rates or interest rates before their maturity dates. The Fund would then lose any price appreciation above the bond's call price and would be forced to reinvest the unanticipated proceeds at lower interest rates, resulting in a decline in the Fund's income. Such redemptions and subsequent reinvestments would also increase the Fund's portfolio turnover rate.

CONVERTIBLE BONDS RISK. The market values of convertible bonds tend to decline as interest rates increase and, conversely, to increase as interest rates decline. A convertible bond's market value also tends to reflect the market price of the common stock of the issuing company.

CREDIT RISK. Credit risk is the risk that an issuer of a security may be unable or unwilling to make dividend, interest and principal payments when due and the related risk that the value of a security may decline because of concerns about the issuer's ability or willingness to make such payments. Credit risk may be heightened for the Fund because it invests a substantial portion of its net assets in high yield or "junk" debt. Such securities, while generally offering higher yields than investment grade debt with similar maturities, involve greater risks, including the possibility of dividend or interest deferral, default or bankruptcy, and are regarded as predominantly speculative with respect to the issuer's capacity to pay dividends or interest and repay principal. Credit risk is heightened for loans in which the Fund invests because companies that issue such loans tend to be highly leveraged and thus are more susceptible to the risks of interest deferral, default and/or bankruptcy.

CURRENCY RISK. Because the Fund's net asset value is determined on the basis of U.S. dollars and the Fund invests in non-U.S. dollar-denominated securities, you may lose money if the local currency of a foreign market depreciates against the U.S. dollar, even if the local currency value of the Fund's holdings goes up. The Fund may hedge certain of its non-U.S. dollar holdings.

CYBER SECURITY RISK. As the use of Internet technology has become more prevalent in the course of business, the Fund has become more susceptible to potential operational risks through breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity. Such events could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. Cyber security breaches may involve unauthorized access to the Fund's digital information systems through "hacking" or malicious software coding, but may also result from outside attacks such as denial-of-service attacks through efforts to make network services unavailable to intended users. In addition, cyber security breaches of the Fund's third party service providers, such as its administrator, transfer agent, custodian, or sub-advisor, as applicable, or issuers in which the Fund invests, can also subject the Fund to many of the same risks associated with direct cyber security breaches. The Fund has established risk management systems designed to reduce the risks associated with cyber security. However, there is no guarantee that such efforts will succeed, especially because the Fund does not directly control the cyber security systems of issuers or third party service providers.

EXTENSION RISK. Extension risk is the risk that, when interest rates rise, certain obligations will be paid off by the issuer (or obligor) more slowly than anticipated, causing the value of these securities to fall. Rising interest rates tend to extend the duration of securities, making them more sensitive to changes in interest rates. The value of longer-term securities generally changes more in response to changes in interest rates than shorter-term securities. As a result, in a period of rising interest rates, securities may exhibit additional volatility and may lose value.

HIGH YIELD SECURITIES RISK. High yield securities, or "junk" bonds, are subject to greater market fluctuations and risk of loss than securities with higher ratings, and therefore, are considered to be highly speculative. These securities are issued by companies that may have limited operating history, narrowly focused operations and/or other impediments to the timely

payment of periodic interest and principal at maturity. If the economy slows down or dips into recession, the issuers of high yield securities may not have sufficient resources to continue making timely payment of periodic interest and principal at maturity. The market for high yield securities is smaller and less liquid than that for investment grade securities. High yield securities are generally not listed on a national securities exchange but trade in the over-the-counter markets. Due to the smaller, less liquid market for high yield securities, the bid-offer spread on such securities is generally greater than it is for investment grade securities and the purchase or sale of such securities may take longer to complete. In general, high yield securities may have a greater risk of default than other types of securities.

ILLIQUID SECURITIES RISK. Illiquid securities involve the risk that the securities will not be able to be sold at the time desired by the Fund or at prices approximately the value at which the Fund values the securities.

INCOME RISK. If interest rates fall, the income from the Fund's portfolio will likely decline if the Fund holds floating rate debt that will adjust lower with falling interest rates. For loans, interest rates typically reset periodically.

INTEREST RATE RISK. Interest rate risk is the risk that the value of the debt securities in the Fund will decline because of rising market interest rates. Interest rate risk is generally lower for shorter-term investments and higher for longer-term investments. Duration is a measure of the expected price volatility of a debt instrument as a result of changes in market rates of interest, based on, among other factors, the weighted average timing of the instrument's expected principal and interest payments. In general, duration represents the expected percentage change in the value of a security for an immediate 1% change in interest rates. Therefore, prices of debt securities with shorter durations tend to be less sensitive to interest rate changes than debt securities with longer durations. As the value of a debt security changes over time, so will its duration.

LIQUIDITY RISK. The Fund invests a substantial portion of its assets in lower-quality debt issued by companies that are highly leveraged. Lower-quality debt tends to be less liquid than higher-quality debt. Moreover, smaller debt issues tend to be less liquid than larger debt issues. If the economy experiences a sudden downturn, or if the debt markets for such companies become distressed, the Fund may have particular difficulty selling its assets in sufficient amounts, at reasonable prices and in a sufficiently timely manner to raise the cash necessary to meet any potentially heavy redemption requests by Fund shareholders.

MARKET RISK. Market risk is the risk that a particular security owned by the Fund or shares of the Fund in general may fall in value. Securities are subject to market fluctuations caused by such factors as economic, political, regulatory or market developments, changes in interest rates and perceived trends in securities prices. Shares of the Fund could decline in value or underperform other investments.

NON-U.S. SECURITIES RISK. Non-U.S. securities are subject to higher volatility than securities of domestic issuers due to possible adverse political, social or economic developments, restrictions on foreign investment or exchange of securities, lack of liquidity, currency exchange rates, excessive taxation, government seizure of assets, different legal or accounting standards, and less government supervision and regulation of exchanges in foreign countries.

OTHER DEBT SECURITIES RISK. Secured loans that are not first lien loans, unsecured loans and other debt securities are subject to many of the same risks that affect Senior Loans; however they are often unsecured and/or lower in the issuer's capital structure than Senior Loans, and thus may be exposed to greater risk of default and lower recoveries in the event of a default. This risk can be further heightened in the case of below investment grade instruments. Additionally, most fixed income securities are fixed-rate and thus are generally more susceptible than floating rate loans to price volatility related to changes in prevailing interest rates.

PORTFOLIO TURNOVER RISK. The Fund's strategy may frequently involve buying and selling portfolio securities to rebalance the Fund's exposure to various market sectors. High portfolio turnover may result in the Fund paying higher levels of transaction costs and generating greater tax liabilities for shareholders. Portfolio turnover risk may cause the Fund's performance to be less than you expect.

PREPAYMENT RISK. Loans and other fixed income investments are subject to prepayment risk. The degree to which borrowers prepay loans, whether as a contractual requirement or at their election, may be affected by general business conditions, the financial condition of the borrower and competitive conditions among loan investors, among others. As such, prepayments cannot be predicted with accuracy. Upon a prepayment, either in part or in full, the actual outstanding debt on which the Fund derives interest income will be reduced. The Fund may not be able to reinvest the proceeds received on terms as favorable as the prepaid loan.

Annual Total Return

The bar chart and table below illustrate the calendar year returns of the Fund’s Class A shares of the Fund based on net asset value as well as the average annual Fund and Index returns. The bar chart and table provide an indication of the risks of investing in the Fund by showing changes in the Fund’s performance from year-to-year and by showing how the Fund’s Class A shares’ average annual total returns compare to those of a blended benchmark index and two specialized securities market indices, a specialized securities market index and a broad based index. See “Total Return Information” for additional performance information regarding the Fund. The Fund’s performance information is accessible on the Fund’s website at www.ftportfolios.com.

Returns before taxes do not reflect the effects of any income or capital gains taxes. All after-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of any state or local tax. Returns after taxes on distributions reflect the taxed return on the payment of dividends and capital gains. Returns after taxes on distributions and sale of shares assume you sold your shares at period end, and, therefore, are also adjusted for any capital gains or losses incurred. Returns for the market indices do not include expenses, which are deducted from Fund returns, or taxes.

Your own actual after-tax returns will depend on your specific tax situation and may differ from what is shown here. After-tax returns are not relevant to investors who hold Fund shares in tax-deferred accounts such as individual retirement accounts (IRAs) or employee-sponsored retirement plans.

Imposition of the Fund’s sales load is not reflected in the bar chart below. If the sales load was reflected, returns would be less than those shown.

**First Trust Short Duration High Income Fund – Class A Shares
Calendar Year Total Returns as of 12/31**

The Fund’s calendar year-to-date total return based on net asset value for the period 12/31/17 to 3/31/18 was 0.74%.

During the periods shown in the chart above:

Best Quarter		Worst Quarter	
3.78%	March 31, 2013	-1.83%	December 31, 2015

The Fund’s past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

Average Annual Total Returns for the Periods Ended December 31, 2017

	1 Year	5 Years	Since Inception	Inception Date
Class A - Return Before Taxes	0.39%	3.40%	3.49%	11/1/2012
Class C - Return Before Taxes	2.29%	3.38%	3.44%	11/1/2012
Class I - Return Before Taxes	4.32%	4.41%	4.48%	11/1/2012
Class A - Return After Taxes on Distributions	-1.56%		1.60%	11/1/2012
Class A - Return After Taxes on Distributions and Sale of Shares	0.21%		1.79%	11/1/2012
Blended Index ^{(1),(2)} (reflects no deduction for fees, expenses or taxes)	5.78%	4.93%	5.10%	11/1/2012
ICE BofAML US High Yield Constrained Index ^{(2),(3)} (reflects no deduction for fees, expenses or taxes)	7.47%	5.81%	6.07%	11/1/2012
S&P/LSTA Leveraged Loan Index ⁽²⁾ (reflects no deduction for fees, expenses or taxes)	4.11%	4.02%	4.11%	11/1/2012

(1) The Blended Index return is a 50/50 split between the ICE BofAML US High Yield Constrained Index and the S&P/LSTA Leveraged Loan Index returns.

(2) Since Inception Index returns are based on inception date of the Fund.

(3) As of October 22, 2017, the index name changed from BofA Merrill Lynch US High Yield Constrained Index to ICE BofAML US High Yield Constrained Index.

Management

Investment Advisor

First Trust Advisors L.P. ("First Trust" or the "Advisor")

Portfolio Managers

- William Housey, CFA, Senior Vice President and Senior Portfolio Manager of First Trust
- Scott D. Fries, CFA, Senior Vice President and Portfolio Manager of First Trust
- Peter Fasone, Vice President of First Trust

The portfolio managers are primarily and jointly responsible for the day-to-day management of the Fund. Each portfolio manager has served as part of the portfolio management team of the Fund since 2012.

Purchase and Sale of Fund Shares

You may purchase, redeem or exchange shares of the Fund through a financial advisor on any day the New York Stock Exchange ("NYSE") is open for business. The minimum initial purchase or exchange into the Fund is \$2,500 (\$750 for a Traditional/Roth IRA account; \$500 for an Education IRA account; and \$250 for accounts opened through fee-based programs). The minimum subsequent investment is \$50. Class I shares are subject to higher minimums for certain investors. There are no minimums for purchases or exchanges into the Fund through employer-sponsored retirement plans.

Tax Information

The Fund's distributions will generally be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account, in which case, your distribution will be taxed upon withdrawal from the tax-deferred account. Additionally, a sale of Fund shares is generally a taxable event.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), First Trust and related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Additional Information on the Fund's Investment Objectives and Strategies

The Fund's investment objectives are fundamental and may not be changed without approval by the holders of a majority of the outstanding voting securities of the Fund. Unless an investment policy is identified as being fundamental, all investment policies included in this prospectus and in the Fund's SAI are non-fundamental and may be changed by the Board of Trustees (the "Board") of the First Trust Series Fund (the "Trust"), of which the Fund is a series, without shareholder approval upon 60 days' prior written notice. If there is a material change to the Fund's principal investment strategies, you should consider whether the Fund remains an appropriate investment for you. There is no guarantee that the Fund will achieve its investment objective.

The Fund pursues its objectives by investing in debt securities and bank loans that are rated below-investment grade or unrated at the time of purchase. In addition, the Fund may invest in other debt securities including convertible bonds, senior floating rate loans, secured and unsecured loans, second lien loans and other junior or bridge loans. Although many of the Fund's investments may consist of securities rated below-investment grade, the Fund reserves the right to invest in debt securities, including senior floating rate loans, of any credit quality, maturity and duration. The Fund may also invest in investment grade debt securities or preferred stocks. "Investment grade" is defined as those securities that have a long-term credit rating of "BBB - " or higher by S&P, or "Baa3" or higher by Moody's or comparably rated by another nationally recognized statistical rating organization ("NRSRO"). The Fund may also invest in securities that are unrated by an NRSRO if such securities are of comparable credit quality. The Fund may also invest in securities of other open-end or closed-end investment companies, including exchange-traded funds ("ETFs"), that invest primarily in securities of the types in which the Fund may invest directly. Furthermore, the Fund may invest in certain derivatives, including, but not limited to, when-issued securities, forward commitments, futures contracts and interest rate swaps. The Fund has a short duration investment strategy, which seeks to maintain, under normal market conditions, a blended (or weighted average) portfolio duration of three years or less. "Average duration" is the measure of a debt instrument's or a portfolio's price sensitivity with respect to changes in market yields. There is no guarantee that the Fund will achieve its investment objectives.

Fund Investments

Principal Investments

Bank Loans

The Fund invests in bank loans, including senior secured bank loans, unsecured and/or subordinated bank loans, loan participations and unfunded contracts. The Fund may invest in such loans by purchasing assignments of all or a portion of loans or loan participations from third parties. These loans are made by or issued to corporations primarily to finance acquisitions, refinance existing debt, support organic growth, or pay out dividends, and are typically originated by large banks and are then syndicated out to institutional investors as well as to other banks. Bank loans typically bear interest at a floating rate although some loans pay a fixed rate. Due to their subordination in the borrower's capital structure, unsecured and/or subordinated loans involve a higher degree of overall risk than senior bank loans of the same borrower. Unfunded contracts are commitments by lenders (such as the Fund) to loan an amount in the future or that is due to be contractually funded in the future.

Senior floating rate loans are typically rated below-investment grade. Senior floating rate loans hold a first lien priority and typically pay interest at rates which are determined periodically on the basis of a floating base lending rate, primarily the LIBOR, plus a premium. Senior floating rate loans are typically made to U.S. and, to a limited extent, non-U.S. corporations, partnerships and other business entities which operate in various industries and geographical regions. Borrowers may obtain these loans to, among other reasons, refinance existing debt and for acquisitions, dividends, leveraged buyouts, and general corporate purposes.

Convertible Bonds

The Fund may invest in convertible bonds. Convertible bonds combine the investment characteristics of bonds and common stocks. Convertible bonds typically consist of debt securities or preferred securities that may be converted within a specified period of time (typically for the entire life of the security) into a certain amount of common stock or other equity security of the same or a different issuer at a predetermined price. They also include debt securities with warrants or common stock attached and derivatives combining the features of debt securities and equity securities. Convertible bonds entitle the holder to receive interest paid or accrued on debt, or dividends paid or accrued on preferred securities, until the securities mature or are redeemed, converted or exchanged.

Corporate Debt Securities

The Fund may invest corporate debt securities issued by U.S. and non-U.S. companies of all kinds, including those with small, mid and large capitalizations. Corporate debt securities are fixed income securities issued by businesses to finance their operations. Notes, bonds, debentures and commercial paper are the most common types of corporate debt securities, with the primary differences being their maturities and secured or unsecured status. Commercial paper has the shortest term and is usually unsecured. Corporate debt may be rated investment grade or below investment grade and may carry fixed, floating or hybrid rates of interest.

High Yield Debt

The Fund invests primarily in debt instruments (e.g., bonds, loans and convertible bonds) that are rated below investment grade, or unrated securities deemed by the Advisor to be of comparable quality. Debt securities rated below investment grade are commonly referred to as "high yield" or "junk" debt. For purposes of determining whether a security is below investment grade, the lowest available rating will be considered. High yield debt may be issued by companies without long track records of sales and earnings, or by issuers that have questionable credit strength. High yield debt and comparable unrated debt securities: (a) will likely have some quality and protective characteristics that, in the judgment of the rating agency evaluating the instrument, are outweighed by large uncertainties or major risk exposures to adverse conditions; and (b) are predominantly speculative with respect to the issuer's capacity to pay dividends or interest and repay principal in accordance with the terms of the obligation.

Illiquid Securities

The Fund may invest up to 15% of its net assets in securities and other instruments that are, at the time of investment, illiquid (determined using the Securities and Exchange Commission's standard applicable to investment companies, i.e., securities that cannot be disposed of by the Fund within seven days in the ordinary course of business at approximately the amount at which the Fund has valued the securities). For this purpose, illiquid securities may include, but are not limited to, certain restricted securities (securities the disposition of which is restricted under the federal securities laws), certain securities that may only be resold pursuant to Rule 144A under the Securities Act that are deemed to be illiquid, and certain repurchase agreements.

Non-U.S. Investments

The Fund may invest up to 15% of its net assets in non-U.S. securities denominated in non-U.S. currencies. Non-U.S. debt securities in which the Fund may invest include debt securities issued or guaranteed by companies organized under the laws of countries other than the United States (including emerging markets), debt securities issued or guaranteed by foreign, national, provincial, state, municipal or other governments with taxing authority or by their agencies or instrumentalities and debt obligations of supranational governmental entities such as the World Bank or European Union. These debt securities may be U.S. dollar-denominated or non-U.S. dollar-denominated. Non-U.S. debt securities also include U.S. dollar-denominated debt obligations, such as "Yankee Dollar" obligations, of foreign issuers and of supra-national government entities. Yankee Dollar obligations are U.S. dollar-denominated obligations issued in the U.S. capital markets by foreign corporations, banks and governments. Foreign debt securities also may be traded on foreign securities exchanges or in over-the-counter capital markets. To the extent the Fund invests in such instruments, the value of the assets of the Fund as measured in U.S. dollars will be affected by changes in exchange rates. Generally, the Fund's currency exchange transactions will be conducted on a spot (i.e., cash) basis at the spot rate prevailing in the currency exchange market. The cost of the Fund's currency exchange transactions will generally be the difference between the bid and offer spot rate of the currency being purchased or sold. In order to protect against uncertainty in the level of future currency exchange rates, the Fund is authorized to enter into various currency exchange transactions.

Non-Principal Investments

Cash Equivalents and Short-Term Investments

Normally, the Fund invests substantially all of its assets to meet its investment objectives. The Fund may invest the remainder of its assets in securities with maturities of less than one year or cash equivalents, or it may hold cash. The percentage of the Fund invested in such holdings varies and depends on several factors, including market conditions. For temporary defensive purposes and during periods of high cash inflows or outflows, the Fund may depart from its principal investment strategies and invest part or all of its assets in these securities, or it may hold cash. During such periods, the Fund may not be able to achieve its investment objectives. The Fund may adopt a defensive strategy when the portfolio managers believe securities

in which the Fund normally invests have elevated risks due to political or economic factors and in other extraordinary circumstances. For more information on eligible short-term investments, see the SAI.

Derivatives

The Fund may use futures, total return swaps, non-U.S. currency swaps, loan credit default swaps, credit default swaps, options, puts, calls and other derivative instruments to seek to enhance return, to hedge some of the risks of its investments in securities, as a substitute for a position in the underlying asset, to reduce transaction costs, to maintain full market exposure (which means to adjust the characteristics of its investments to more closely approximate those of the markets in which it invests), to manage cash flows, to limit exposure to losses due to changes to non-U.S. currency exchange rates or to preserve capital.

The Fund will comply with the regulatory requirements of the Securities and Exchange Commission and the Commodity Futures Trading Commission ("CFTC") with respect to coverage of options and futures positions by registered investment companies and, if the guidelines so require, will earmark or set aside cash, U.S. government securities, high grade liquid debt securities and/or other liquid assets permitted by the Securities and Exchange Commission and CFTC in a segregated custodial account in the amount prescribed (or take such other actions permitted by law). Securities earmarked or held in a segregated account cannot be sold while the futures or options position is outstanding, unless replaced with other permissible assets, and will be marked to market daily.

Investment Companies

The Fund may invest in securities of other open-end or closed-end investment companies, including ETFs, that invest primarily in securities of the types in which the Fund may invest directly. The Fund's ability to invest in other investment companies is limited by the 1940 Act and the related rules and interpretations. The Fund may invest in other investment companies in excess of the limits imposed under the 1940 Act pursuant to exemptive orders obtained by certain investment companies and their sponsors from the Securities and Exchange Commission, subject to certain conditions and pursuant to a contractual arrangement between the Fund and such investment companies. ETFs trade on a securities exchange and their shares may, at times, trade at a premium or discount to their net asset value.

As a shareholder in an investment company, the Fund will bear its ratable share of such investment company's expenses, and would remain subject to payment of the investment company's advisory and administrative fees with respect to assets so invested. Shareholders would therefore be subject to duplicative expenses to the extent the Fund invests in other investment companies. In addition, the Fund will incur brokerage costs when purchasing and selling shares of ETFs and closed-end investment companies. Closed-end investment companies may be leveraged, in which case the value and/or yield of their shares will tend to be more volatile than shares of unleveraged funds.

Mortgage-Backed Securities

The Fund may invest in mortgage-backed securities. Mortgage-backed securities represent direct or indirect participations in, or are secured by and payable from, mortgage loans secured by real property and can include single- and multi-class pass-through securities and collateralized mortgage obligations. Mortgage-backed securities are based on different types of mortgages, including those on commercial real estate or residential properties. These securities often have stated maturities of up to thirty years when they are issued, depending upon the length of the mortgages underlying the securities.

Preferred Securities

The Fund may invest in preferred securities, which generally pay fixed or adjustable-rate dividends or interest to investors and have preference over common stock in the payment of dividends or interest and the liquidation of a company's assets, which means that a company typically must pay dividends or interest on its preferred securities before paying any dividends on its common stock. Preferred securities are generally junior to all forms of the company's debt, including both senior and subordinated debt.

While some preferred securities are issued with a final maturity date, others are perpetual in nature. In certain instances, a final maturity date may be extended and/or the final payment of principal may be deferred at the issuer's option for a specified time without any adverse consequence to the issuer. No redemption can typically take place unless all cumulative payment obligations to preferred security investors have been met, although issuers may be able to engage in open-market repurchases without regard to any cumulative dividends or interest payable. A portion of the portfolio may include investments in non-cumulative preferred securities, whereby the issuer does not have an obligation to make up any arrearages to holders of such securities. Should an issuer default on its obligations under such a security, the amount of income earned by the Fund may be adversely affected.

Preferred securities may be issued by trusts or other special purpose entities established by operating companies, and therefore may not be direct obligations of operating companies. At the time a trust or special purpose entity sells its preferred securities to investors, the trust or special purpose entity generally purchases debt of the operating company (with terms comparable to those of the trust or special purpose entity securities). The trust or special purpose entity, as the holder of the operating company's debt, has priority with respect to the operating company's earnings and profits over the operating company's common shareholders, but is typically subordinated to other classes of the operating company's debt. Typically a preferred share has a rating that is below that of its corresponding operating company's senior debt securities due to its subordinated nature.

Disclosure of Portfolio Holdings

A description of the policies and procedures with respect to the disclosure of the Fund's portfolio securities is included in the Fund's SAI, which is available on the Fund's website at www.ftportfolios.com.

Additional Risks of Investing in the Fund

Risk is inherent in all investing. Investing in the Fund involves risk, including the risk that you may lose all or part of your investment. There can be no assurance that the Fund will meet its stated objective. Before you invest, you should consider the following supplemental disclosure pertaining to the Principal Risks set forth above as well as additional Non-Principal Risks set forth below in this prospectus.

Principal Risks

BANK LOANS RISK. The bank loans in which the Fund may invest may not (i) be rated at the time of investment, (ii) be registered with the Securities and Exchange Commission, (iii) be listed on a securities exchange or (iv) have sufficient collateral securing the loan or the collateral may not be available in the event of bankruptcy. In addition, the amount of public information available with respect to such bank loans may be less extensive than that available for more widely rated, registered and exchange-listed securities. Because no active trading market may exist for some of the bank loans in which the Fund may invest, such bank loans may be illiquid and more difficult to value than more liquid instruments for which a trading market does exist. Unlike the securities markets, there is no central clearinghouse for bank loan trades, and the bank loan market has not established enforceable settlement standards or remedies for failure to settle. Therefore, portfolio transactions in bank loans may have uncertain settlement time periods. Because the interest rates of floating rate loans in which the Fund may invest may reset frequently, if market interest rates fall, the loans' interest rates will be reset to lower levels, potentially reducing the Fund's income.

First Trust or its affiliates may participate in the primary and secondary market for bank loans. Because of limitations imposed by applicable law, the presence of such affiliates in the bank loan market may restrict the Fund's ability to acquire some loans or affect the timing or price of loan acquisitions. Also, because First Trust may wish to invest in the publicly traded securities of an obligor, the Fund may not have access to material non-public information regarding the obligor to which other investors have access.

CONVERTIBLE BONDS RISK. Convertible bonds have characteristics of both equity and debt securities and, as a result, are exposed to certain additional risks. The market values of convertible bonds tend to decline as interest rates increase and, conversely, to increase as interest rates decline. However, a convertible bond's market value also tends to reflect the market price of the common stock of the issuing company, particularly when the stock price is greater than the convertible bond's conversion price (*i.e.*, the predetermined price or exchange ratio at which the convertible bond can be converted or exchanged for the underlying common stock). Convertible bonds are also exposed to the risk that an issuer is unable to meet its obligation to make dividend or principal payments when due as a result of changing financial or market conditions. Convertible bonds generally offer lower interest or dividend yields than non-convertible debt securities of similar credit quality because of their potential for capital appreciation.

Mandatory convertible bonds are a subset of convertible bonds. The conversion of such securities is not optional, and the conversion price at maturity is based solely upon the market price of the underlying common stock, which may be significantly less than par or the price (above or below par) paid. Mandatory convertible bonds generally are subject to a greater risk of loss of value than securities convertible at the option of the holder.

CREDIT RISK. Credit risk is the risk that an issuer of a debt instrument may be unable or unwilling to make dividend, interest and/or principal payments when due and the related risk that the value of an instrument may decline because of concerns about the issuer's ability or unwillingness to make such payments. High yield and comparable unrated debt securities, while

generally offering higher yields than investment grade debt with similar maturities, involve greater risks, including the possibility of dividend or interest deferral, default or bankruptcy, and are regarded as predominantly speculative with respect to the issuer's capacity to pay dividends or interest and repay principal. Credit risk is heightened for loans in which the Fund invests because companies that issue such loans tend to be highly leveraged and thus are more susceptible to the risks of interest deferral, default and/or bankruptcy.

CURRENCY RISK. An investment in non-U.S. securities involves further risk due to currency exchange rates. Changes in currency exchange rates may affect the Fund's net asset value, the value of dividends and interest earned, and gains and losses realized on the sale of securities. An increase in the strength of the U.S. dollar relative to other currencies may cause the value of the Fund to decline. Certain non-U.S. currencies may be particularly volatile, and non-U.S. governments may intervene in the currency markets, causing a decline in value or liquidity in the Fund's non-U.S. holdings whose value is tied to the affected non-U.S. currency.

DISTRESSED SECURITIES RISK. The Fund may invest in distressed securities, including stressed, distressed and bankrupt issuers and debt obligations that are in default. In any investment involving distressed securities, there exists the risk that the transaction involving such securities will be unsuccessful. Distressed securities might be repaid only after lengthy workout or bankruptcy proceedings, during which the issuer might not make any interest or other payments. Many distressed securities are illiquid or trade in low volumes and thus may be more difficult to value.

FIXED INCOME SECURITIES RISK. An investment in the Fund also involves risk associated with an investment in fixed-income securities including the risk that certain of the securities in the Fund may not have the benefit of covenants which would prevent the issuer from engaging in capital restructurings or borrowing transactions in connection with corporate acquisitions, leveraged buyouts or restructurings which could have the effect of reducing the ability of the issuer to meet its payment obligations and might result in increased credit risk. In addition, certain of the securities may be redeemed or prepaid by the issuer, resulting in lower interest payments received by the Fund and reduced distributions to shareholders.

HIGH YIELD SECURITIES RISK. The Fund's investment in high yield, high risk, fixed rate, domestic and foreign obligations, or "junk" securities, may entail increased credit risks (as discussed below) and the risk that the value of Fund's assets will decline, and may decline precipitously, with increases in interest rates. In recent years there have been wide fluctuations in interest rates and thus in the value of fixed rate obligations generally.

Securities such as those included in the Fund are, under most circumstances, subject to greater market fluctuations and risk of loss of income and principal than are investments in lower-yielding, higher-rated securities, and their value may decline precipitously because of increases in interest rates. A slowdown in the economy, or a development adversely affecting an issuer's creditworthiness, may result in the issuer being unable to maintain earnings or sell assets at the rate and at the prices, respectively, that are required to produce sufficient cash flow to meet its interest and principal requirements. For an issuer that has outstanding both senior commercial bank debt and subordinated high yield, high risk securities, an increase in interest rates will increase that issuer's interest expense insofar as the interest rate on the bank debt is fluctuating. Many leveraged issuers enter into interest rate protection agreements to fix or cap the interest rate on a large portion of their bank debt, which reduces exposure to increasing rates, but reduces the benefit to the issuer of declining rates. The Advisor cannot predict future economic policies or their consequences or therefore, the course or extent of any similar market fluctuations in the future.

High yield debt may be issued by companies without long track records of sales and earnings, or by issuers that have questionable credit strength. High yield debt and comparable unrated debt securities: (i) will likely have some quality and protective characteristics that, in the judgment of the rating agency evaluating the instrument, are outweighed by large uncertainties or major risk exposures to adverse conditions; and (ii) are predominantly speculative with respect to the issuer's capacity to pay dividends or interest and repay principal in accordance with the terms of the obligation. Many lower-quality debt securities are subject to legal or contractual restrictions limiting the Fund's ability to resell the securities to the general public.

ILLIQUID SECURITIES RISK. An investment in the Fund involves further risk due to the fact that the Fund may invest a substantial portion of its assets in lower-quality debt instruments issued by companies that are highly leveraged. Lower-quality debt tends to be less liquid than higher-quality debt. If the economy experiences a sudden downturn, or if the debt markets for such issuers become distressed, the Fund may have particular difficulty selling its assets in sufficient amounts, at reasonable prices and in a sufficiently timely manner to raise the cash necessary to meet any potentially heavy redemption requests by Fund shareholders. In such event, there would be a greater chance that the Fund may be forced to curtail or suspend

redemptions, in which case you might experience a delay or inability to liquidate your investment at the desired time or in the desired amount.

LIBOR RISK. In 2012, regulators in the United States and the United Kingdom alleged that certain banks, including some banks serving on the panel for U.S. dollar LIBOR, engaged in manipulative acts in connection with their submissions to the British Bankers Association. Manipulation of the LIBOR rate-setting process would raise the risk to the Fund of being adversely impacted if the Fund received a payment based upon LIBOR and such manipulation of LIBOR resulted in lower resets than would have occurred had there been no manipulation. In 2017, the head of the United Kingdom's Financial Conduct Authority announced a desire to phase out the use of LIBOR by the end of 2021. Due to the recency of this announcement, there remains uncertainty regarding the future utilization of LIBOR and the nature of any replacement rate. As such, the potential effect of a transition away from LIBOR on the Fund or the financial instruments in which the Fund invests cannot yet be determined.

NON-U.S. SECURITIES RISK. An investment in securities or instruments of non-U.S. issuers involves risk not associated with domestic issuers. Non-U.S. countries may impose higher withholding taxes on dividends and interest than the United States. Non-U.S. countries may also impose limitations on the use of or transfer of portfolio assets. Enforcing legal rights may be more difficult, expensive and time consuming in non-U.S. countries, and investors may face unique problems enforcing claims against non-U.S. governments.

PREPAYMENT RISK. During periods of falling interest rates, an issuer of a loan may exercise its right to pay principal on an obligation earlier than expected. This may result in the Fund reinvesting proceeds at lower interest rates, resulting in a decline in the Fund's income.

Non-Principal Risks

BORROWING AND LEVERAGE RISK. The Fund may borrow for temporary or emergency purposes, including to meet redemption requests, pay dividends or clear portfolio transactions. Such borrowing may, in some instances, effectively leverage the Fund's portfolio, which could exaggerate changes in the net asset value of the Fund's shares and affect the Fund's net income. If the Fund borrows money, it must pay interest and other fees, which may reduce the Fund's returns if such costs exceed the returns on the portfolio securities purchased or retained with such borrowings. Any such borrowings are intended to be temporary. However, under certain market conditions, including periods of low demand or decreased liquidity, such borrowings might be outstanding for longer periods of time. As prescribed by the 1940 Act, the Fund will be required to maintain specified asset coverage of at least 300% with respect to any bank borrowing immediately following such borrowing. The Fund may be required to dispose of assets on unfavorable terms if market fluctuations or other factors reduce the Fund's asset coverage to less than the prescribed amount.

CREDIT RATING AGENCY RISK. Credit ratings are determined by credit rating agencies such as Standard & Poor's, Inc., Moody's Investors Services, Inc. and Fitch Inc., and are only the opinions of such entities. Ratings assigned by a rating agency are not absolute standards of credit quality and do not evaluate market risk or the liquidity of securities. Any shortcomings or inefficiencies in credit rating agencies' processes for determining credit ratings may adversely affect the credit ratings of securities held by the Fund and, as a result, may adversely affect those securities' perceived or actual credit risk.

DEPENDENCE ON KEY PERSONNEL. The Advisor is dependent upon the experience and expertise of Messrs. Housey, Fries and Fasone in providing advisory services with respect to the Fund's investments. If the Advisor were to lose the services of any of these individuals, its ability to service the Fund could be adversely affected. There can be no assurance that a suitable replacement could be found for any of Messrs. Housey, Fries or Fasone in the event of their death, resignation, retirement or inability to act on behalf of the Advisor.

DERIVATIVES RISK. The use of derivatives presents risks different from, and possibly greater than, the risks associated with investing directly in traditional securities. Among the risks presented are market risk, credit risk, management risk and liquidity risk. The use of derivatives can lead to losses because of adverse movements in the price or value of the underlying asset, index or rate, which may be magnified by certain features of the derivatives. In addition, when the Fund invests in certain derivative securities, including, but not limited to, when-issued securities, forward commitments, futures contracts and interest rate swaps, it is effectively leveraging its investments, which could result in exaggerated changes in the net asset value of the Fund's shares and can result in losses that exceed the amount originally invested. The success of the Advisor's derivatives strategies will depend on its ability to assess and predict the impact of market or economic developments on the underlying asset, index or rate, and the derivative itself, without the benefit of observing the performance of the derivative under all possible market conditions. Liquidity risk exists when a security cannot be purchased or sold at the time desired, or cannot be purchased or sold without adversely affecting the price.

EMERGING MARKETS RISK. An investment in emerging market companies involves certain further risks not associated with investing in developed market countries because emerging market countries are often in the initial stages of their industrialization cycles and have low per capita income. These increased risks include the possibility of investment and trading limitations, greater liquidity concerns, higher price volatility, greater delays and possibility of disruptions in settlement transactions, greater political uncertainties and greater dependence on non-U.S. trade or development assistance. In addition, emerging market countries may be subject to overburdened infrastructures and environmental problems.

EQUITY SECURITIES RISK. Equity securities may decline significantly in price over short or extended periods of time, and such declines may occur in the equity market as a whole, or they may occur in only a particular country, company, industry or sector of the market.

EXPENSE REIMBURSEMENT AND RECOUPMENT RISK. First Trust has entered into an agreement with the Trust in which the Advisor has agreed to waive certain fees and/or reimburse the Fund for expenses exceeding an agreed upon amount. First Trust is also entitled to recoup from the Fund any waived or reimbursed amounts pursuant to the agreement for a period of up to three years from the date of waiver or reimbursement. Any such recoupment or modification or termination of the agreement could negatively affect the Fund's returns.

FAILURE TO QUALIFY AS A REGULATED INVESTMENT COMPANY. If, in any year, the Fund fails to qualify as a regulated investment company under the applicable tax laws, the Fund would be taxed as an ordinary corporation. In such circumstances, the Fund could be required to recognize unrealized gains, pay substantial taxes and interest and make substantial distributions before requalifying as a regulated investment company that is accorded special tax treatment. If the Fund fails to qualify as a regulated investment company, distributions to the Fund's shareholders generally would be eligible for the dividends received deduction in the case of corporate shareholders. See "Federal Tax Matters."

INFLATION RISK. Inflation risk is the risk that the value of assets or income from investments will be less in the future as inflation decreases the value of money. As inflation increases, the value of the Fund's assets can decline as can the value of the Fund's distributions. Common stock prices may be particularly sensitive to rising interest rates, as the cost of capital rises and borrowing costs increase.

INVESTMENT COMPANIES RISK. If the Fund invests in investment companies, Fund shareholders bear both their proportionate share of Fund expenses and, indirectly, the expenses of the investment companies. Also, the investment companies are subject to the risks of the underlying securities that they hold. In addition, the Fund will incur brokerage costs when purchasing and selling shares of ETFs and closed-end investment companies. Closed-end investment companies may be leveraged, in which case the value and/or yield of their shares will tend to be more volatile than shares of unleveraged funds. In addition, for index-based ETFs, the performance of an ETF may diverge from the performance of such index (commonly known as tracking error). Moreover, shares of closed-end investment companies and ETFs may be sold at a discount from their net asset value.

ISSUER SPECIFIC CHANGES RISK. The value of an individual security or particular type of security can be more volatile than the market as a whole and can perform differently from the value of the market as a whole.

LEGISLATION/LITIGATION RISK. From time to time, various legislative initiatives are proposed in the United States and abroad which may have a negative impact on certain companies represented owned by the Fund. In addition, litigation regarding any of the issuers of the securities owned by the Fund, or industries represented by these issuers, may negatively impact the value of the securities. Such legislation or litigation may cause the Fund to lose value or may result in higher portfolio turnover if the Sub-Advisor determines to sell such a holding.

MANAGEMENT RISK. The Fund is subject to management risk because it has an actively managed portfolio. The portfolio managers will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that the Fund will achieve its investment objectives.

MORTGAGE-BACKED SECURITIES RISK. The Fund may invest in mortgage-backed securities. Mortgage-backed securities may have less potential for capital appreciation than comparable fixed-income securities, due to the likelihood of increased prepayments of mortgages as interest rates decline. If the Fund buys mortgage-backed securities at a premium, mortgage foreclosures and prepayments of principal by mortgagors (which usually may be made at any time without penalty) may result in some loss of the Fund's principal investment to the extent of the premium paid. Alternatively, in a rising interest rate environment, the value of mortgage-backed securities may be adversely affected when payments on underlying mortgages do not occur as anticipated, resulting in the extension of the security's effective maturity and the related increase in interest rate sensitivity of a longer-term instrument. In addition, mortgage-backed securities are subject to the credit risk associated

with the performance of the underlying mortgage properties. In certain instances, third-party guarantees or other forms of credit support can reduce the credit risk.

PREFERRED SECURITIES RISK. An investment in Preferred Securities involves the further risks not associated with an investment in common stocks set forth below.

- **Limited Voting Rights.** Generally, holders of preferred securities (such as the Fund) have no voting rights with respect to the issuing company unless preferred dividends have been in arrears for a specified number of periods, at which time the preferred security holders may elect a number of directors to the issuer's board. Generally, once the issuer pays all the arrearages, the Preferred Security holders no longer have voting rights.
- **Special Redemptions Rights.** In certain circumstances, an issuer of preferred securities may redeem the securities prior to a specified date. For instance, for certain types of preferred securities, a redemption may be triggered by a change in federal income tax or securities laws. As with call provisions, a special redemption by the issuer may negatively impact the return of the security held by the Fund.
- **Deferral.** Preferred Securities may include provisions that permit the issuer, at its discretion, to defer distributions for a stated period without any adverse consequences to the issuer. If the Fund owns a Preferred Security that is deferring its distributions, the Fund may be required to report income for federal income tax purposes although it has not yet received such income in cash.
- **Subordination.** Preferred Securities are subordinated to bonds and other debt instruments in a company's capital structure in terms of priority to corporate income and liquidation payments and therefore will be subject to greater credit risk than those debt instruments.
- **Liquidity.** Preferred Securities may be substantially less liquid than many other securities, such as common stocks or U.S. government securities.

VALUATION RISK. Unlike publicly traded securities that trade on national exchanges, there is no central place or exchange for fixed income securities trading. Fixed income securities generally trade on an "over-the-counter" market which may be anywhere in the world where the buyer and seller can settle on a price. Due to the lack of centralized information and trading, the valuation of fixed income securities may carry more uncertainty and risk than that of publicly traded securities. Accordingly, determinations of the fair value of fixed income securities may be based on infrequent and dated information. Also, because the available information is less reliable and more subjective, elements of judgment may play a greater role in valuation of debt securities than for other types of securities. Typically, fixed income securities are valued using information provided by a third party pricing service, which primarily uses broker quotes to value the securities.

Fund Organization

The Fund is a series of the Trust, an investment company registered under the 1940 Act. The Fund is treated as a separate fund with its own investment objectives and policies. The Trust is organized as a Massachusetts business trust. The Trust's Board is responsible for the overall management and direction of the Trust. The Board elects the Trust's officers and approves all significant agreements, including those with First Trust, the custodian, the transfer agent and the fund administration and accounting agent.

Management of the Fund

First Trust Advisors L.P., 120 East Liberty Drive, Wheaton, Illinois 60187, is the investment advisor to the Fund. In this capacity, First Trust is responsible for the selection and ongoing monitoring of the securities in the Fund's portfolio, managing the Fund's business affairs and providing certain clerical, bookkeeping and other administrative services.

First Trust is a limited partnership with one limited partner, Grace Partners of DuPage L.P., and one general partner, The Charger Corporation. Grace Partners of DuPage L.P. is a limited partnership with one general partner, The Charger Corporation, and a number of limited partners. The Charger Corporation is an Illinois corporation controlled by James A. Bowen, the Chief Executive Officer of First Trust and Chairman of the Board of the Trust. First Trust discharges its responsibilities subject to the policies of the Board.

First Trust serves as advisor or sub-advisor for seven mutual fund portfolios, 10 exchange-traded funds consisting of 130 series and 16 closed-end funds. It is also the portfolio supervisor of certain unit investment trusts sponsored by First Trust Portfolios

L.P. (“FTP”), an affiliate of First Trust, 120 East Liberty Drive, Wheaton, Illinois 60187. FTP specializes in the underwriting, trading and distribution of unit investment trusts and other securities. FTP is the principal underwriter of the shares of the Fund.

To implement the investment strategy, the Advisor combines a rigorous fundamental credit selection process with top down relative value analysis when selecting investment opportunities. The Advisor believes that an evolving investment environment offers varying degrees of investment risk opportunities in the high yield, bank loan, and derivative and fixed income instrument markets. In order to capitalize on attractive investments and effectively manage potential risk, the Advisor believes that the combination of thorough and continuous credit analysis, market evaluation, diversification and the ability to reallocate investments among senior and subordinated debt and derivatives is critical to achieving higher risk-adjusted returns. Fundamental analysis involves the evaluation of industry trends, management quality, collateral adequacy, and the consistency of corporate cash flows. The key considerations of portfolio construction include liquidity, diversification, relative value assessment, and ongoing monitoring. Through fundamental credit analysis the Advisor believes it can position the Fund’s portfolio in bank loans and high yield securities that offer an attractive risk adjusted return profile. Moreover, such fundamental credit analysis may result in a higher credit quality portfolio when compared to a benchmark.

The portfolio managers of the Fund are William Housey, Scott D. Fries and Peter Fasone, and they share responsibilities for the day-to-day management of the Fund’s investment portfolio.

- William Housey, CFA, joined First Trust in June 2010 as Senior Portfolio Manager for the Leveraged Finance Investment Team and has 22 years of investment experience. Mr. Housey is a Senior Vice President of First Trust. Prior to joining First Trust, Mr. Housey was at Morgan Stanley/Van Kampen Funds, Inc. for 11 years and served as Executive Director and Co-Portfolio Manager. Mr. Housey has extensive experience in portfolio management of both leveraged and unleveraged credit products, including bank loans, high yield bonds, credit derivatives and corporate restructurings. Mr. Housey received a BS in Finance from Eastern Illinois University and an MBA in Finance and Management and Strategy from Northwestern University’s Kellogg School of Business. He holds the FINRA Series 7, Series 52 and Series 63 licenses and the Chartered Financial Analyst designation. He is a member of the CFA Institute and the CFA Society of Chicago.
- Scott D. Fries, CFA, joined First Trust in June 2010 as a Portfolio Manager in the Leveraged Finance Investment Team and has 23 years of investment industry experience. Mr. Fries is a Senior Vice President of First Trust. Prior to joining First Trust, Mr. Fries spent 15 years at Morgan Stanley/Van Kampen Funds, Inc., where he most recently served as Executive Director and Co-Portfolio Manager of Institutional Separately Managed Accounts. Mr. Fries received a BA in International Business from Illinois Wesleyan University and an MBA in Finance from DePaul University. Mr. Fries holds the Chartered Financial Analyst designation. He is a member of the CFA Institute and the CFA Society of Chicago.
- Peter Fasone, CFA, joined First Trust in December 2011 as Co-Portfolio Manager for the Leveraged Finance Investment Team and has 32 years of industry experience, most recently as Senior Global Credit Analyst with BNP Paribas Asset Management. He is a Vice President of First Trust. Since 1996, his focus has been primarily on investing in high yield and investment grade bonds for total return and structured credit portfolios. Prior to BNP, Mr. Fasone served as Portfolio Manager and Senior Analyst for Fortis Investments. From 2001 to 2008 he was Vice President and Senior Analyst at ABN AMRO Asset Management, where he assumed a leadership role in designing and implementing a disciplined investment process for ABN’s \$1 billion global high yield fund. Mr. Fasone received a BS degree from Arizona State University and an MBA from DePaul University. He holds the Chartered Financial Analyst designation and the Certified Public Accountant designation. He is a member of the CFA Institute and the CFA Society of Chicago.

Additional information about the portfolio managers’ compensation, other accounts managed by the portfolio managers and the portfolio managers’ ownership of securities in the Fund is provided in the SAI.

Management Fees

For providing management services, the Fund pays First Trust an annual fund management fee of 0.65% of average daily net assets. Information regarding the Board’s approval of the continuation of the Fund’s investment management agreement is available in the Fund’s Annual Report for the fiscal year ended October 31, 2017.

The Fund pays for its own operating expenses such as custodial, transfer agent, administrative, accounting and legal fees; brokerage commissions; distribution and service fees; any extraordinary expenses; and its portion of the Trust’s operating expenses. First Trust has agreed to limit fees and/or pay expenses to the extent necessary through February 28, 2019, to

prevent the Fund's Total Annual Operating Expenses (excluding 12b-1 distribution and service fees, interest expense, taxes, fees incurred in acquiring and disposing of portfolio securities, and extraordinary expenses) from exceeding 1.00% of the average daily net assets of any class of shares of the Fund. From March 1, 2019 through February 28, 2028, the Fund's Total Annual Operating Expenses (excluding 12b-1 distribution and service fees, interest expense, taxes, fees incurred in acquiring and disposing of portfolio securities, and extraordinary expenses) will not exceed 1.35% of the average daily net assets of any class of shares of the Fund. Expenses borne by First Trust are subject to reimbursement by the Fund for up to three years from the date the fee or expense was incurred, but no reimbursement payment will be made by the Fund at any time if it would result in the Fund's expenses exceeding (i) the applicable expense limitation in place for the most recent fiscal year for which such expense limitation was in place, (ii) the applicable expense limitation in place at the time the fees were waived, or (iii) the current expense limitation.

Share Classes

The Fund offers three classes of shares: Class A, Class C and Class I. Each class represents an interest in the same portfolio of investments but with a different combination of sales charges, fees, eligibility requirements and other features. Consult with your financial intermediary representative for additional information on whether the shares are an appropriate investment choice. The Fund may not be available through certain of these intermediaries and not all financial intermediaries offer all classes of shares. Contact your financial intermediary or refer to your plan documents for instructions on how to purchase, exchange, or redeem shares. With certain limited exceptions, the Fund is available only to U.S. citizens or residents.

Please refer to the SAI for more information about Class A, Class C and Class I shares, including more detailed program descriptions and eligibility requirements. If your financial intermediary offers more than one class of shares, you should carefully consider which class of shares to purchase. Certain classes have higher expenses than other classes, which may lower the return on your investment. Additional information is also available from your financial intermediary. Information regarding the sales charge applicable to the purchase of Fund shares is included in this prospectus and the Fund's SAI, both of which are available free of charge at www.ftportfolios.com/Retail/MF/MFSummary.aspx?Ticker=FDHAX. Information regarding the sales charge applicable to the purchase of Fund shares is not available on the Fund's website separately from the Fund's prospectus and SAI.

Class A Shares

You can purchase Class A shares at the offering price, which is the net asset value per share plus an up-front sales charge. The sales charge may be waived, as described in "Class A Sales Charge Waivers." Class A shares are also subject to an annual service fee of 0.25% of the Fund's average daily net assets attributable to Class A shares, which compensates your financial advisor and other entities for providing ongoing service to you. FTP retains the up-front sales charge and the service fee on accounts with no financial intermediary of record. The up-front Class A sales charges for the Fund are as follows:

Amount of Purchase	Sales Charge as % of Public Offering Price	Sales Charge as % of Net Amount Invested	Maximum Financial Intermediary Commission as % of Public Offering Price
Less than \$50,000	3.50%	3.62%	3.00%
\$50,000 but less than \$100,000	3.25%	3.35%	2.75%
\$100,000 but less than \$250,000	2.50%	2.56%	2.00%
\$250,000 and over	—	—	1.00%

* You can purchase \$250,000 or more of Class A shares at net asset value without an up-front sales charge. First Trust pays financial intermediaries of record a commission equal to 1.00% of the first \$2.5 million, plus 0.50% of the next \$2.5 million, plus 0.25% of the amount over \$5 million. You may be assessed a contingent deferred sales charge of 1.00% if you redeem any of your shares within 12 months of purchase. The contingent deferred sales charge is calculated on the lower of your purchase price or your redemption proceeds. You do not pay a contingent deferred sales charge on any Class A shares you purchase by reinvesting dividends or capital gains.

For purposes of determining whether you qualify for a reduced sales charge as set forth in the table above, you may include purchases by (i) you, (ii) your spouse (or legal equivalent if recognized under local law) and your children under 21 years of age, and (iii) a corporation, partnership or sole proprietorship that is 100% owned by any of the persons in or (ii). In addition, a trustee or other fiduciary can count all shares purchased for a single trust, estate or other single fiduciary account that has multiple accounts (including one or more employee benefit plans of the same employer). See the SAI for more information.

Class C Shares

You can purchase Class C shares at the offering price, which is the net asset value per share without any up-front sales charge. Class C shares are subject to annual distribution and service fees of 1.00% of the Fund's average daily net assets attributable to Class C shares. The annual 0.25% service fee compensates your financial advisor for providing ongoing service to you. The annual 0.75% distribution fee compensates FTP for paying your financial advisor an ongoing sales commission as well as an advance of the first year's service and distribution fees. FTP retains the service and distribution fees on accounts with no financial intermediary of record. If you redeem your shares within 12 months of purchase, you will normally pay a 1.00% contingent deferred sales charge ("CDSC"), which is calculated on the lower of your purchase price or your redemption proceeds. You do not pay a CDSC on any Class C shares you purchase by reinvesting dividends or capital gains.

The Fund has established a limit to the amount of Class C shares that may be purchased by an individual investor. See the SAI for more information.

Class I Shares

You can purchase Class I shares at the offering price, which is the net asset value per share without any up-front sales charge. Class I shares are not subject to sales charges or ongoing service or distribution fees. Class I shares have lower ongoing expenses than the other classes. Class I shares are available for purchase in an amount of \$1 million or more, or using dividends and capital gains distributions on Class I shares. Class I shares may also be purchased by the following categories of investors:

- Certain employees, officers, directors and affiliates of First Trust.
- Certain financial intermediary personnel.
- Certain bank or broker affiliated trust departments, pursuant to an agreement.
- Certain employer-sponsored retirement plans.
- Certain additional categories of investors, including certain advisory accounts of First Trust and its affiliates, and qualifying clients of investment advisors, financial planners, or other financial intermediaries that charge periodic or asset-based fees for their services.

See the SAI for more information.

Class A Sales Charge Waivers

Class A shares of the Fund may be purchased at net asset value without a sales charge as follows:

- Purchases of \$250,000 or more.
- Reinvestment of distributions from Class A Shares of the Fund.
- Purchases by officers, trustees and former trustees of the First Trust Mutual Funds, as well as full-time and retired employees of First Trust, any parent company of First Trust, and subsidiaries thereof, and such employees' immediate family members (as defined in the SAI).
- Purchases by any person who, for at least the last 90 days, has been an officer, director, or full-time employee of any financial intermediary or any such person's immediate family member.
- Purchases by bank or broker-affiliated trust departments investing funds over which they exercise exclusive discretionary investment authority and that are held in a fiduciary, agency, advisory, custodial, or similar capacity.
- Purchases made by investors purchasing on a periodic fee, asset based fee, or no transaction fee basis through a broker-dealer sponsored mutual fund purchase program; and clients of investment advisors, financial planners, or other financial intermediaries that charge periodic or asset-based fees for their services.

Morgan Stanley Smith Barney LLC ("Morgan Stanley") Class A Sales Charge Waivers. Notwithstanding the list above, effective July 1, 2018, shareholders purchasing Class A shares of the Fund through a Morgan Stanley Wealth Management transactional brokerage account will only be eligible for a waiver of the up-front sales charge applicable to Class A shares under the following circumstances (these conditions differ from and may be more limited than those disclosed above and elsewhere in the Fund's prospectus or statement of additional information):

- Purchases by employer-sponsored retirement plans (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans). For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans.
- Purchases by Morgan Stanley employee and employee-related accounts according to Morgan Stanley's account linking rules.

- Shares purchased through reinvestment of dividends and capital gains distributions when purchasing shares of the same Fund.
- Shares purchased through a Morgan Stanley self-directed brokerage account.
- Class C shares that are no longer subject to a contingent deferred sales charge and are converted to Class A shares of the same Fund pursuant to Morgan Stanley Wealth Management's share class conversion program.
- Shares purchased from the proceeds of redemptions of other First Trust Mutual Funds; provided that, (i) the repurchase occurs within 90 days following the redemption, (ii) the redemption and purchase occur in the same account, and (iii) the redeemed shares were subject to an up-front or deferred sales charge.

You may need to provide the Fund or your financial advisor information or records, such as account statements, in order to verify your eligibility for a sales charge waiver (or reduction as set forth in the table above in "Share Classes – Class A Shares"). This may include account statements of family members and information regarding First Trust Mutual Fund shares held in accounts with other financial advisors. You or your financial advisor must notify First Trust at the time of each purchase if you are eligible for any of these programs that result in a sales charge waiver or reduction. The Fund may modify or discontinue these programs at any time.

Right of Accumulation. You may purchase Class A shares of the Fund at a reduced sales charge determined by aggregating the dollar amount of the new purchase (measured by the offering price) and the total prior day's net asset value (net amount invested) of all eligible shares (as set forth herein) and applying the sales charge applicable to such aggregate amount. Shares eligible for aggregation include Class A shares of the Fund and other First Trust Mutual Funds then held by (i) you, (ii) your spouse (or legal equivalent if recognized under local law) and your children under 21 years of age, and (iii) a corporation, partnership or sole proprietorship that is 100% owned by any of the persons in (i) or (ii). In order for your purchases and holdings to be aggregated for purposes of qualifying for such discount, they must have been made through one financial intermediary and you must provide sufficient information to your financial intermediary at the time of initial purchase of shares that qualify for the rights of accumulation to permit verification that the purchase qualifies for the reduced sales charge. The right of accumulation is subject to modification or discontinuance at any time with respect to all shares purchased thereafter.

Letter of Intent. You can also reduce the sales charge on the purchase of Class A shares by signing a Letter of Intent indicating your intention to purchase \$50,000 or more of Class A shares (including Class A shares in other First Trust funds) over a 13-month period. The term of the Letter of Intent will commence upon the date you sign the Letter. In order to apply purchases towards the intended amount, you must refer to such Letter when placing all orders.

When calculating the applicable sales charge to a purchase pursuant to a Letter of Intent, the amount of investment for purposes of applying the sales load schedule includes: (i) the historical cost (what you actually paid for the shares at the time of purchase, including any sales charges) of all Class A shares acquired during the term of the Letter of Intent; minus the value of any redemptions of Class A shares made during the term of the Letter of Intent. Each investment made during the period receives the reduced sales charge applicable to the total amount of the investment goal. A portion of shares purchased may be held in escrow to pay for any applicable sales charge. If the goal is not achieved within the period, you must pay the difference between the sales charges applicable to the purchases made and the charges previously paid, or an appropriate number of escrowed shares will be redeemed. Please contact your financial intermediary to obtain a Letter of Intent application.

Investment in Fund Shares

Shares of the Fund may be purchased on any business day, which is any day the NYSE is open for business. Generally, the NYSE is closed on weekends and national holidays. The share price you pay depends on when the transfer agent or authorized intermediary receives your order. Orders received before the close of trading on a business day (normally, 4:00 p.m. Eastern Time) will receive that day's closing share price; otherwise, you will receive the next business day's price.

Fund shares may be purchased only through a financial intermediary. The Fund has authorized one or more financial intermediaries, or the designees of such intermediaries, to receive purchase and redemption orders on the Fund's behalf. The Fund will be deemed to have received a purchase or redemption order when an authorized financial intermediary, or the designee of an authorized financial intermediary, receives the order.

A financial intermediary, such as a financial advisor or broker, is paid for providing investment advice and services, either from the Fund sales charges and fees or by charging you a separate fee in lieu of a sales charge. Financial intermediaries may charge a service fee in connection with the purchase or redemption of the Fund shares. Service fees typically are fixed dollar amounts

and are in addition to the sales and other charges described in this prospectus and the SAI. For more information, please contact your financial intermediary.

For purposes of the 1940 Act, the Fund is treated as a registered investment company, and, absent an available exemption or exemptive relief, the acquisition of shares by other registered investment companies and companies relying on Sections 3(c)(1) or 3(c)(7) of the 1940 Act is subject to the restrictions of Section 12(d)(1) of the 1940 Act. The Trust, on behalf of the Fund, has received an exemptive order from the Securities and Exchange Commission that permits certain registered investment companies to invest in the Fund beyond the limits set forth in Section 12(d)(1), subject to certain terms and conditions, including that any such investment companies enter into an agreement with the Fund regarding the terms of any investment and the Fund does not rely on Sections 12(d)(1)(F) or 12(d)(1)(G) of the 1940 Act to invest in other investment companies.

Investment Minimums

The minimum initial purchase or exchange into the Fund is \$2,500 (\$750 for a Traditional/Roth IRA account; \$500 for an Education IRA account; and \$250 for accounts opened through fee based programs). Subsequent investments must be in amounts of \$50 or more. Class I shares are subject to higher minimums for certain investors. There are no minimums for purchases or exchanges into the Fund through employer-sponsored retirement plans. The Fund reserves the right to reject purchase or exchange orders and to waive or increase the minimum investment requirements.

Account Services

The following is a description of additional account services available to investors at no additional cost. Investors can obtain copies of the necessary forms from their financial advisor.

Exchanging Shares

Shares of the Fund may be exchanged into an identically registered account for the same class of another First Trust Mutual Fund available in your state. The exchange must meet the minimum purchase requirements of the fund into which you are exchanging. You may also, under certain limited circumstances, exchange between certain classes of shares of the same Fund, subject to the payment of any applicable CDSC. Please consult the SAI for details.

The Fund may change or cancel its exchange policy at any time upon 60 days' notice. The Fund reserves the right to revise or suspend the exchange privilege, limit the amount or number of exchanges, or reject any exchange. See "Frequent Trading and Market Timing" below.

Because an exchange between funds is treated for tax purposes as a purchase and sale, any gain may be subject to tax. An exchange between classes of shares of the Fund may not be considered a taxable event. Please consult a tax advisor about the tax consequences of exchanging your shares.

Reinstatement Privilege

If shares of the Fund are redeemed, you may reinvest all or part of your redemption proceeds in the Fund up to one year later without incurring any additional charges. You may only reinvest into the same share class you redeemed. The reinvestment privilege does not extend to Class A shares or Class C shares, where the redemption of the shares triggered the payment of a CDSC. This reinstatement privilege may be used only once for any redemption.

Redemption of Fund Shares

An investor may redeem shares on any business day. Investors will receive the share price next determined after the Fund has received a redemption request. Redemption requests must be received before the close of trading on the NYSE (normally, 4:00 p.m. Eastern Time) in order to receive that day's price. The Fund will normally mail a check the next business day after a redemption request is received, but in no event more than seven days after a request is received. Redemption requests for payment by a method other than by check will typically be processed the next business day after a redemption request is received, but in no event more than seven days after a request is received. If you are selling shares purchased recently with a check, your redemption proceeds will not be mailed until your check has cleared, which may take up to ten days from your purchase date. Proceeds from a written redemption request will be sent to you by check unless another form of payment is requested. The Fund typically expects to meet redemption requests through holdings of cash or cash equivalents and the sale

of portfolio assets in both regular and stressed market conditions. Under unusual circumstances that make cash payments unwise and for the protection of existing shareholders, the Fund may meet redemption requests in-kind.

Shares of the Fund must be redeemed through your financial intermediary. A financial intermediary may charge a fee for this service.

Contingent Deferred Sales Charge

If Class A or Class C shares that are subject to a CDSC are redeemed, an investor may be assessed a CDSC. When an investor is subject to a CDSC, the Fund will first redeem any shares that are not subject to a CDSC, and then redeem the shares owned for the longest period of time, unless requested otherwise. No CDSC is imposed on shares bought through the reinvestment of dividends and capital gains. The CDSC holding period is calculated on a monthly basis and begins on the first day of the month in which the purchase was made. When you redeem shares subject to a CDSC, the CDSC is calculated on the lower of your purchase price or redemption proceeds, deducted from your redemption proceeds, and paid to FTP. The CDSC may be waived under certain special circumstances as described below.

Reduction or Elimination of Class A and Class C Contingent Deferred Sales Charge

Class A shares are normally redeemed at net asset value, without any CDSC. However, in the case of Class A shares purchased at net asset value without a sales charge because the purchase amount exceeded \$250,000, a CDSC of 1% may be imposed on any redemption within 12 months of purchase. Class C shares are redeemed at net asset value, without any CDSC, except that a CDSC of 1% is imposed upon redemption of Class C shares that are redeemed within 12 months of purchase (except in cases where the shareholder's financial advisor agreed to waive the right to receive an advance of the first year's distribution and service fee).

In determining whether a CDSC is payable, the Fund will first redeem shares not subject to any charge and then will redeem shares held for the longest period, unless the shareholder specifies another order. No CDSC is charged on shares purchased as a result of automatic reinvestment of dividends or capital gains paid. In addition, no CDSC will be charged on exchanges of shares into another First Trust non-ETF open-end fund. The holding period is calculated on a monthly basis and begins on the date of purchase. The CDSC is assessed on an amount equal to the lower of the then current market value or the cost of the shares being redeemed. Accordingly, no sales charge is imposed on increases of net asset value above the initial purchase price. FTP receives the amount of any CDSC shareholders pay.

The CDSC may be waived or reduced under the following circumstances: (i) in the event of total disability (as evidenced by a determination by the federal Social Security Administration) of the shareholder (including a registered joint owner) occurring after the purchase of the shares being redeemed; (ii) in the event of the death of the shareholder (including a registered joint owner); (iii) for redemptions made pursuant to a systematic withdrawal plan, up to 1% monthly, 3% quarterly, 6% semiannually or 12% annually of an account's net asset value depending on the frequency of the plan as designated by the shareholder; (iv) involuntary redemptions caused by operation of law; (v) redemptions in connection with a payment of account or plan fees; (vi) redemptions in connection with the exercise of a reinstatement privilege whereby the proceeds of a redemption of the Fund's shares subject to a sales charge are reinvested in shares of certain funds within a specified number of days; (vii) redemptions in connection with the exercise of the Fund's right to redeem all shares in an account that does not maintain a certain minimum balance or that the Board of Trustees has determined may have material adverse consequences to the Fund; (viii) in whole or in part for redemptions of shares by shareholders with accounts in excess of specified breakpoints that correspond to the breakpoints under which the up-front sales charge on Class A shares is reduced pursuant to Rule 22d-1 under the Act; (ix) redemptions of shares purchased under circumstances or by a category of investors for which Class A shares could be purchased at net asset value without a sales charge; (x) redemptions of Class A or Class C shares if the proceeds are transferred to an account managed by an affiliated advisor and the advisor refunds the advanced service and distribution fees to FTP; and (xi) redemptions of Class C shares in cases where (a) you purchase shares after committing to hold the shares for less than one year and (b) your advisor consents up front to receiving the appropriate service and distribution fee on the Class C shares on an ongoing basis instead of having the first year's fees advanced by FTP. If the Fund waives or reduces the CDSC, such waiver or reduction would be uniformly applied to all Fund shares in the particular category. In waiving or reducing a CDSC, the Fund will comply with the requirements of Rule 22d-1 under the 1940 Act.

In addition, the CDSC will be waived in connection with the following redemptions of shares held by an employer-sponsored qualified defined contribution retirement plan: (i) partial or complete redemptions in connection with a distribution without penalty under Section 72(t) of the Code from a retirement plan: (a) upon attaining age 59½, (b) as part of a series of substantially equal periodic payments, or (c) upon separation from service and attaining age 55; (ii) partial or complete redemptions in connection with a qualifying loan or hardship withdrawal; (iii) complete redemptions in connection with termination of

employment, plan termination or transfer to another employer's plan or IRA; and (iv) redemptions resulting from the return of an excess contribution. The CDSC will also be waived in connection with the following redemptions of shares held in an IRA account: (i) for redemptions made pursuant to an IRA systematic withdrawal based on the shareholder's life expectancy including, but not limited to, substantially equal periodic payments described in Code Section 72(t)(A)(iv) prior to age 59½; and (ii) for redemptions to satisfy required minimum distributions after age 70½ from an IRA account (with the maximum amount subject to this waiver being based only upon the shareholder's First Trust IRA accounts).

Involuntary Redemption

From time to time, the Fund may establish minimum account size requirements. The Fund reserves the right to liquidate your account upon 30 days' written notice if the value of your account falls below an established minimum. Accounts may be involuntarily redeemed when the value of the account falls below the minimum either because of redemptions or because of market action. The Fund has set a minimum balance of \$250. You will not be assessed a CDSC on an involuntary redemption. This policy does not apply to retirement accounts (IRA, 401(k)).

From the time to time, certain dealers that do not have dealer agreements with the Fund's principal underwriter, FTP, may purchase shares of the Fund. Upon 30 days' written notice to such dealers, the Fund reserves the right to involuntarily redeem these accounts if a dealer agreement is not executed within the 30-day period. The account will not be assessed a CDSC on an involuntary redemption.

Redemptions In-Kind

The Fund generally pays redemption proceeds in cash. Under unusual conditions that make cash payment unwise and for the protection of existing shareholders, the Fund may pay all or a portion of your redemption proceeds in securities or other Fund assets. Although it is unlikely that your shares would be redeemed in-kind, you would probably have to pay brokerage costs to sell the securities distributed to you, as well as taxes on any capital gains from that sale. While the Fund does not intend to effect redemptions in-kind under normal circumstances, if the Fund does so, you may receive a pro-rata share of the Fund's securities, individual securities held by the Fund, or a representative basket of securities in the Fund's portfolio. See the SAI for additional information.

Medallion Signature Guarantee Program

Certain transactions, including establishing or modifying certain services such as changing bank information on an account, will require a signature guarantee or signature verification from a Medallion Signature Guarantee Program member or other acceptable form of authentication from a financial institution source. In addition to the situations described above, the Fund reserves the right to require a signature guarantee, or another acceptable form of signature verification, in other instances based on the circumstances of a particular situation.

A signature guarantee assures that a signature is genuine and protects shareholders from unauthorized account transfers. Banks, savings and loan associations, trust companies, credit unions, broker-dealers and member firms of a national securities exchange may guarantee signatures. Call your financial intermediary to determine if it has this capability. A notary public is not an acceptable signature guarantor. Proceeds from a written redemption request will be sent to you by check unless another form of payment is requested.

Dividends, Distributions and Taxes

Dividends from net investment income, if any, are declared daily and paid monthly by the Fund. The Fund distributes its net realized capital gains, if any, to shareholders at least annually.

Unless you request otherwise, the Fund reinvests your dividends and capital gain distributions in additional Fund shares of the same class of shares with respect to which such dividends or distributions are paid. If you do not want your dividends and capital gain distributions reinvested in Fund shares in this manner, you may contact your financial advisor to request that your dividends and capital gain distributions be paid to you by check or deposited directly into your bank account. If adequate information is not received from a shareholder or its financial advisor to permit the Fund to direct reinvestment proceeds into the account from which they were paid, the Fund reserves the right to redirect such amounts into the appropriate account at a later date. For further information, contact your financial advisor.

Federal Tax Matters

This section summarizes some of the main U.S. federal income tax consequences of owning shares of the Fund. This section is current as of the date of this prospectus. Tax laws and interpretations change frequently, and these summaries do not describe all of the tax consequences to all taxpayers. For example, these summaries generally do not describe your situation if you are a corporation, a non-U.S. person, a broker-dealer, or other investor with special circumstances. In addition, this section does not describe your state, local or non-U.S. tax consequences.

This federal income tax summary is based in part on the advice of counsel to the Fund. The Internal Revenue Service could disagree with any conclusions set forth in this section. In addition, counsel to the Fund was not asked to review, and has not reached a conclusion with respect to, the federal income tax treatment of the assets to be included in the Fund. This may not be sufficient for you to use for the purpose of avoiding penalties under federal tax law.

As with any investment, you should seek advice based on your individual circumstances from your own tax advisor.

Fund Status

The Fund intends to continue to qualify as a "regulated investment company" under the federal tax laws. If the Fund qualifies as a regulated investment company and distributes its income as required by the tax law, the Fund generally will not pay federal income taxes.

Distributions

The Fund's distributions are generally taxable. After the end of each year, you will receive a tax statement that separates the distributions of the Fund into two categories, ordinary income distributions and capital gain dividends. Ordinary income distributions are generally taxed at your ordinary tax rate. Generally, you will treat all capital gain dividends as long-term capital gains regardless of how long you have owned your shares. To determine your actual tax liability for your capital gain dividends, you must calculate your total net capital gain or loss for the tax year after considering all of your other taxable transactions, as described below. In addition, the Fund may make distributions that represent a return of capital for tax purposes and thus will generally not be taxable to you; however, such distributions may reduce your tax basis in your shares, which could result in you having to pay higher taxes in the future when shares are sold, even if you sell the shares at a loss from your original investment. The tax status of your distributions from the Fund is not affected by whether you reinvest your distributions in additional shares or receive them in cash. The income from the Fund that you must take into account for federal income tax purposes is not reduced by amounts used to pay a deferred sales fee, if any. The tax laws may require you to treat distributions made to you in January as if you had received them on December 31 of the previous year.

Income from the Fund may also be subject to a 3.8% "Medicare tax." This tax generally applies to your net investment income if your adjusted gross income exceeds certain threshold amounts, which are \$250,000 in the case of married couples filing joint returns and \$200,000 in the case of single individuals.

Dividends Received Deduction

A corporation that owns shares generally will not be entitled to the dividends received deduction with respect to many dividends received from the Fund because the dividends received deduction is generally not available for distributions from regulated investment companies.

Capital Gains and Losses

If you are an individual, the maximum marginal stated federal tax rate for net capital gain is generally 20% (15% or 0% for taxpayers with taxable income below certain thresholds). Some portion of your capital gain dividends may be taxed at a higher maximum stated tax rate. Capital gains may also be subject to the Medicare tax described above.

Net capital gain equals net long-term capital gain minus net short-term capital loss for the taxable year. Capital gain or loss is long-term if the holding period for the asset is more than one year and is short-term if the holding period for the asset is one year or less. You must exclude the date you purchase your shares to determine your holding period. However, if you receive a capital gain dividend from the Fund and sell your shares at a loss after holding it for six months or less, the loss will be recharacterized as long-term capital loss to the extent of the capital gain dividend received. The tax rates for capital gains realized from assets held for one year or less are generally the same as for ordinary income. The Internal Revenue Code of 1986, as amended, treats certain capital gains as ordinary income in special situations.

Sale of Shares

If you sell or redeem your shares, you will generally recognize a taxable gain or loss. To determine the amount of this gain or loss, you must subtract your tax basis in your shares from the amount you receive in the transaction. Your tax basis in your shares is generally equal to the cost of your shares, generally including sales charges. In some cases, however, you may have to adjust your tax basis after you purchase your shares.

Treatment of Fund Expenses

Expenses incurred and deducted by the Fund will generally not be treated as income taxable to you. In some cases, however, you may be required to treat your portion of these Fund expenses as income. You may not be able to deduct some or all of these expenses.

Non-U.S. Tax Credit

Because the Fund invests in non-U.S. securities, the tax statement that you receive may include an item showing non-U.S. taxes the Fund paid to other countries. In this case, dividends taxed to you will include your share of the taxes the Fund paid to other countries. You may be able to deduct or receive a tax credit for your share of these taxes.

Non-U.S. Investors

If you are a non-U.S. investor (*i.e.*, an investor other than a U.S. citizen or resident or a U.S. corporation, partnership, estate or trust), you should be aware that, generally, subject to applicable tax treaties, distributions from the Fund will be characterized as dividends for federal income tax purposes (other than dividends which the Fund properly reports as capital gain dividends) and will be subject to U.S. federal income taxes, including withholding taxes, subject to certain exceptions described below. However, distributions received by a non-U.S. investor from the Fund that are properly reported by the Fund as capital gain dividends may not be subject to U.S. federal income taxes, including withholding taxes, provided that the Fund makes certain elections and certain other conditions are met. Distributions from the Fund that are properly reported by the Fund as an interest-related dividend attributable to certain interest income received by the Fund or as a short-term capital gain dividend attributable to certain net short-term capital gain income received by the Fund may not be subject to U.S. federal income taxes, including withholding taxes when received by certain non-U.S. investors, provided that the Fund makes certain elections and certain other conditions are met.

Distributions may be subject to a U.S. withholding tax of 30% in the case of distributions to (i) certain non-U.S. financial institutions that have not entered into an agreement with the U.S. Treasury to collect and disclose certain information and are not resident in a jurisdiction that has entered into such an agreement with the U.S. Treasury and (ii) certain other non-U.S. entities that do not provide certain certifications and information about the entity's U.S. owners. Dispositions of shares by such persons may be subject to such withholding after December 31, 2018.

Distribution and Service Plan

FTP serves as the selling agent and distributor of the Fund's shares. In this capacity, FTP manages the offering of the Fund's shares and is responsible for all sales and promotional activities. In order to reimburse FTP for its costs in connection with these activities, including compensation paid to financial intermediaries, the Fund has adopted a distribution and service plan under Rule 12b-1 under the 1940 Act. See "Share Classes" for a description of the distribution and service fees paid under this plan.

FTP receives a service fee for Class A and Class C shares to compensate financial intermediaries, including FTP, for providing ongoing account services to shareholders. These services may include establishing and maintaining shareholder accounts, answering shareholder inquiries, and providing other personal services to shareholders. Under the plan, FTP receives a distribution fee for Class C shares for providing compensation to financial intermediaries, including FTP, in connection with the distribution of shares. These fees also compensate FTP for other expenses, including printing and distributing prospectuses to persons other than shareholders, and preparing, printing and distributing advertising and sales literature and reports to shareholders used in connection with the sale of shares. Because these fees are paid out of the Fund's assets on an ongoing basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of sales charges. Long-term holders of Class C shares may pay more in Rule 12b-1 fees than the economic equivalent of the maximum front-end sales charge permitted under the Financial Industry Regulatory Authority Conduct Rules.

Other Payments to Financial Intermediaries

In addition to the sales commissions and certain payments related to 12b-1 distribution and service fees paid by FTP to financial intermediaries as previously described, First Trust or its affiliates may from time to time make additional payments, out of their own resources, to certain financial intermediaries that sell shares of First Trust Mutual Funds in order to promote the sales and retention of fund shares by those firms and their customers. The amounts of these payments vary by financial intermediary and, with respect to a given firm, are typically calculated by reference to the amount of the firm's recent gross sales of First Trust Mutual Fund shares and/or total assets of First Trust Mutual Funds held by the firm's customers. The level of payments that First Trust is willing to provide to a particular financial intermediary may be affected by, among other factors, the firm's total assets held in and recent net investments into First Trust Mutual Funds, the firm's level of participation in First Trust Mutual Fund sales and marketing programs, the firm's compensation program for its registered representatives who sell fund shares and provide services to fund shareholders, and the asset class of the First Trust Mutual Funds for which these payments are provided. First Trust or its affiliates may also make payments to financial intermediaries in connection with sales meetings, due diligence meetings, prospecting seminars and other meetings at which First Trust or its affiliates promotes its products and services. First Trust may also make payments to certain financial intermediaries for certain administrative services, including record keeping and sub-accounting of shareholder accounts pursuant to a sub-transfer agency, omnibus account service or sub-accounting agreement. All fees payable by First Trust under this category of services may be charged back to the Fund, subject to approval by the Board.

In connection with the availability of First Trust Mutual Funds within selected mutual fund no transaction fee institutional platforms and fee based wrap programs (together, "*Platform Programs*") at certain financial intermediaries, First Trust or an affiliate also makes payments out of its own assets to those firms as compensation for certain recordkeeping, shareholder communications and other account administration services provided to First Trust Mutual Fund shareholders who own their fund shares in these Platform Programs. These payments are in addition to the 12b-1 service fee and any applicable omnibus sub-accounting fees paid to these firms with respect to these services by the First Trust Mutual Funds out of Fund assets.

Net Asset Value

The net asset value is determined for each class of shares of the Fund as of the close of trading (normally 4:00 p.m., Eastern Time) on each day the NYSE is open for business. Net asset value for each class is calculated for the Fund by taking the market price of the Fund's total assets attributable to such class, including interest or dividends accrued but not yet collected, less all liabilities attributable to such class, and dividing such amount by the total number of shares of the class outstanding. The result, rounded to the nearest cent, is the net asset value per share. Differences in net asset value of each class of the Fund's shares are generally expected to be due to the daily expense accruals of the specified distribution and service fees and transfer agency costs applicable to such class of shares and the differential in the dividends that may be paid on each class of shares. All valuations are subject to review by the Board or its delegate.

The Fund's investments are valued daily at market value or, in the absence of market value with respect to any portfolio securities, at fair value, in accordance with valuation procedures adopted by the Board and in accordance with the 1940 Act. Portfolio securities listed on any exchange other than The Nasdaq Stock Market LLC ("*Nasdaq*") and the London Stock Exchange Alternative Investment Market ("*AIM*") are valued at the last sale price on the business day as of which such value is being determined. Securities listed on the Nasdaq or the AIM are valued at the official closing price on the business day as of which such value is being determined. If there has been no sale on such day, or no official closing price in the case of securities traded on Nasdaq or the AIM, the securities are fair valued at the mean of the most recent bid and ask prices on such day. Portfolio securities traded on more than one securities exchange are valued at the last sale price or official closing price, as applicable, on the business day as of which such value is being determined at the close of the exchange representing the principal market for such securities. Portfolio securities traded in the over-the-counter market, but excluding securities trading on Nasdaq and the AIM, are fair valued at the mean of the most recent bid and asked price, if available, and otherwise at the closing bid price. Short-term investments that mature in less than 60 days when purchased are fair valued at amortized cost.

Bank loans in which the Fund invests are not listed on any securities exchange or board of trade. Bank loans are typically bought and sold by institutional investors in individually negotiated private transactions that function in many respects like an over-the-counter secondary market, although typically no formal market-makers exist. This market, while having grown substantially since its inception, generally has fewer trades and less liquidity than the secondary market for other types of securities. Some Bank loans have few or no trades, or trade infrequently, and information regarding a specific Senior Loan may not be widely available or may be incomplete. Accordingly, determinations of the market value of Bank loans may be based on infrequent and dated information. Because there is less reliable, objective data available, elements of judgment may

play a greater role in valuation of Bank loans than for other types of securities. Typically, Bank loans are fair valued using information provided by a third-party pricing service. The third-party pricing service primarily uses over-the-counter pricing from dealer runs and broker quotes from indicative sheets to value the Bank loans.

Certain securities may not be able to be priced by pre-established pricing methods. Such securities may be valued by the Board or its delegate, the Advisor's Pricing Committee, at fair value. The use of fair value pricing by the Fund is governed by valuation procedures adopted by the Board and in accordance with the provisions of the 1940 Act. These securities generally include, but are not limited to, restricted securities (securities which may not be publicly sold without registration under the Securities Act) for which a pricing service is unable to provide a market price; securities whose trading has been formally suspended; a security whose market or fair value price is not available from a pre-established pricing source; a security with respect to which an event has occurred that is likely to materially affect the value of the security after the market has closed but before the calculation of net asset value of each class of shares of the Fund or make it difficult or impossible to obtain a reliable market quotation; and a security whose price, as provided by the pricing service, does not reflect the security's fair value. As a general principle, the current fair value of a security would appear to be the amount which the owner might reasonably expect to receive for the security upon its current sale. When fair value prices are used, generally they will differ from the current market quotations or official closing prices on the applicable exchange. A variety of factors may be considered in determining the fair value of such securities. See the SAI for details.

Because foreign securities exchanges may be open on different days than the days during which an investor may purchase or sell shares of a Fund, the value of the Fund's securities may change on days when investors are not able to purchase or sell shares of the Fund. The value of securities denominated in foreign currencies is converted into U.S. dollars at the exchange rates in effect at the time of valuation.

Fixed income securities will be valued by the fund accounting agent using a pricing service. Fixed income securities with a remaining maturity of 60 days or less when purchased will be valued at cost adjusted for amortization of premiums and accretion of discounts. When price quotes are not available, fair market value is based on prices of comparable securities.

Repurchase agreements will be valued as follows: Overnight repurchase agreements will be fair valued at cost. Term repurchase agreements (*i.e.*, those whose maturity exceeds seven days) will be fair valued by the pricing committee at the average of the bid quotations obtained daily from at least two recognized dealers.

Currency-linked notes, credit-linked notes, interest rate swaps, credit default swaps, and other similar instruments will be valued by the Fund by using a pricing service or, if the pricing service does not provide a value, by quotes provided by the selling dealer or financial institution. When price quotes are not available, fair market value is based on prices of comparable securities. Absent a material difference between the exit price for these instruments and the market rates for similar instruments, currency-linked notes, credit-linked notes, etc. will be valued at the exit price.

Fund Service Providers

The Bank of New York Mellon is the custodian, administrator and fund accounting agent for the Fund. BNY Mellon Investment Servicing (US) Inc. is the transfer agent for the Fund. Chapman and Cutler LLP, 111 West Monroe Street, Chicago, Illinois 60603, serves as legal counsel to the Fund.

Shareholder Inquiries

All inquiries regarding the Fund should be directed your financial advisor who can contact the Fund on your behalf by calling (888) 373-5776, or by mail to the Trust, c/o BNY Mellon Investment Servicing (US) Inc., P.O. Box 9788, Providence, RI 02940.

Frequent Trading and Market Timing

The Fund is intended for long-term investment and should not be used for excessive trading. Excessive trading in the Fund's shares can disrupt portfolio management, lead to higher operating costs and cause other operating inefficiencies for the Fund. However, the Fund is also mindful that shareholders may have valid reasons for periodically purchasing and redeeming the Fund shares.

Accordingly, the Trust has adopted a Frequent Trading Policy that seeks to balance the Fund's need to prevent excessive trading in Fund shares while offering investors the flexibility in managing their financial affairs to make periodic purchases and redemptions of the Fund's shares.

The Trust's Frequent Trading Policy generally limits an investor to two "round trip" trades within a 90-day period. A "round trip" is the purchase and subsequent redemption of the Fund's shares, including by exchange. Each side of a round trip may be comprised of either a single transaction or a series of closely spaced transactions. The Trust may also suspend the trading privileges of any investor who makes a round trip within a 30-day period if the purchase and redemption are of substantially similar dollar amounts.

The Fund primarily receives share purchase and redemption orders through third party financial intermediaries, some of whom rely on the use of omnibus accounts. An omnibus account typically includes multiple investors and provides the Fund only with a net purchase or redemption amount on any given day where multiple purchases, redemptions and exchanges of shares occur in the account. The identity of individual purchasers, redeemers and exchangers whose orders are aggregated in omnibus accounts, and the size of their orders, will generally not be known by the Fund. Despite the Fund's efforts to detect and prevent frequent trading, the Fund may be unable to identify frequent trading because the netting effect in omnibus accounts often makes it more difficult to identify frequent traders. FTP, the Fund's distributor, has entered into agreements with financial intermediaries that maintain omnibus accounts with the Fund's transfer agent. Under the terms of these agreements, the financial intermediaries undertake to cooperate with FTP in monitoring purchase, exchange and redemption orders by their customers in order to detect and prevent frequent trading in the Fund through such accounts. Technical limitations in operational systems at such intermediaries or at FTP may also limit the Fund's ability to detect and prevent frequent trading. In addition, the Trust may permit certain financial intermediaries, including broker-dealer and retirement plan administrators, among others, to enforce their own internal policies and procedures concerning frequent trading. Such policies may differ from the Trust's Frequent Trading Policy and may be approved for use in instances where the Fund reasonably believes that the intermediary's policies and procedures effectively discourage inappropriate trading activity. Shareholders holding their accounts with such intermediaries may wish to contact the intermediary for information regarding its frequent trading policy. Although the Trust does not knowingly permit frequent trading, it cannot guarantee that it will be able to identify and restrict all frequent trading activity.

The Trust reserves the right in its sole discretion to waive unintentional or minor violations (including transactions below certain dollar thresholds) if it determines that doing so would not harm the interests of the respective Fund's shareholders. In addition, certain categories of redemptions may be excluded from the application of the Frequent Trading Policy, as described in more detail in the statement of additional information. These include, among others, redemptions pursuant to systematic withdrawal plans, redemptions in connection with the total disability or death of the investor, involuntary redemptions by operation of law, redemptions in payment of account or plan fees, and certain redemptions by retirement plans, including redemptions in connection with qualifying loans or hardship withdrawals, termination of plan participation, return of excess contributions, and required minimum distributions. The Trust may also modify or suspend the Frequent Trading Policy without notice during periods of market stress or other unusual circumstances.

The Trust reserves the right to impose restrictions on purchases or exchanges that are more restrictive than those stated above if it determines, in its sole discretion, that a transaction or a series of transactions involves market timing or excessive trading that may be detrimental to Fund shareholders. The Trust also reserves the right to reject any purchase order, including exchange purchases, for any reason. For example, the Trust may refuse purchase orders if the Fund would be unable to invest the proceeds from the purchase order in accordance with the Fund's investment policies and/or objective, or if the Fund would be adversely affected by the size of the transaction, the frequency of trading in the account or various other factors. For more information about the Trust's Frequent Trading Policy and its enforcement, see "Purchase and Redemption of Fund Shares – Frequent Trading Policy" in the SAI.

Total Return Information

The information presented for the Fund is for the period indicated. The total returns would have been lower if certain fees had not been waived and expenses reimbursed by First Trust.

"Average annual total returns" represent the average annual change in the value of an investment over the period indicated. The returns shown in the table below assume reinvestment of all dividend distributions and do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption or sale of shares of the Fund. The investment return and principal value of shares of the Fund will vary with changes in market conditions. Shares of the Fund may be worth more or less than their original cost when they are redeemed or sold in the market. The Fund's past performance does not predict future results.

First Trust Short Duration High Income Fund
Total Returns as of October 31, 2017

	Without Sales Charge		With Sales Charge		
	Average Annual		Average Annual		
	1 Year	Since Inception	1 Year	Since Inception	Inception
Class A	4.79%	4.35%	1.14%	3.61%	11/1/2012
Class C	4.01%	3.57%	3.01%	3.57%	11/1/2012
Class I	5.06%	4.61%	—	—	11/1/2012

Financial Highlights

The financial highlights table is intended to help you understand the Fund's financial performance for the periods shown. Certain information reflects financial results for a single share of the Fund. The total returns represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). The information for the periods indicated, excluding the unaudited information for the six months ended April 30, 2018, has been derived from financial statements audited by Deloitte & Touche LLP, whose report, along with the Fund's financial statements, is included in the Fund's Annual Report to Shareholders dated October 31, 2017 and is incorporated by reference in the Fund's SAI, which is available upon request. The information with respect to the six months ended April 30, 2018 is unaudited and is included in the Fund's semi-annual report, which is available upon request.

(a) Class A Shares were initially seeded and commenced operations on November 1, 2012.

(b) Per share amounts have been calculated using the average shares method.

- (c) *Assumes reinvestment of all distributions for the period and does not include payment of the maximum sales charge of 3.50% or contingent deferred sales charge (CDSC). On purchases of \$1 million or more, a CDSC of 1% may be imposed on certain redemptions made within twelve months of purchase. If the sales charges were included, total returns would be lower. These returns include Rule 12b-1 service fees of 0.25% and do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. The total returns would have been lower if certain fees had not been waived and expenses reimbursed by the investment advisor. Total return is calculated for the time period presented and is not annualized for periods of less than one year.*
- (d) *The Fund received a payment from First Trust Advisors L.P. (the "Advisor") in the amount of \$1,079 in connection with a trade error. The payment from the Advisor represents less than \$0.01 per share and had no effect on the total return of the Class A Shares.*
- (e) *Annualized.*
- (f) *Includes excise tax. If this excise tax expense was not included, the net expense ratio would have been 1.25%.*
