Index Ticker: LUNTFCTR
Index Inception Date: 7/9/18

Index Description
The Lunt Capital Large Cap Factor Rotation Index is designed to provide exposure to U.S. large-cap equities, rotating among four select factors (momentum, value, volatility and quality) when they come into favor using the proprietary Lunt Factor Allocation Methodology.

Index construction begins with a universe of eight factor-oriented sub-indices, representing the highest and lowest ranking stocks in each of the four factors.

- Each sub-index is comprised of 50 securities selected from the Nasdaq US 500 Large Cap Index.
- Using the Lunt Factor Allocation proprietary methodology, the eight sub-indices are ranked to determine which side of each factor (high or low) is exhibiting stronger risk-adjusted relative strength.
- Each of the sub-indices is given a score and the top four scoring sub-indices are selected for inclusion in the index.
  - A high and a low sub-index from the same factor cannot be selected during the same monthly period.
  - Each sub-index selected will hold a 25% weight in the index at the time of inclusion. If a selected sub-index is currently in the index, its weight remains unchanged. Newly selected sub-index(es) inherit the weighting of the outgoing sub-index(es). If all four sub-indexes change, each will receive a 25% weight.
- The eight sub-indices are evaluated monthly. The momentum, value and volatility sub-indices are rebalanced semi-annually and the quality sub-indices are rebalanced annually.

Performance data quoted represents past performance. Past performance is not a guarantee of future results and current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and shares when sold or redeemed, may be worth more or less than their original cost. You can obtain performance information which is current through the most recent month-end by visiting www.ftportfolios.com.

*NAV returns are based on the fund’s net asset value which represents the fund’s net assets (assets less liabilities) divided by the fund’s outstanding shares. After Tax Held returns represent return after taxes on distributions. Assumes shares have not been sold. After Tax Sold returns represent the return after taxes on distributions and the sale of fund shares. Returns do not represent the returns you would receive if you traded shares at other times. Market Price returns are based on the midpoint of the bid/ask spread on the stock exchange on which shares of the fund are listed for trading as of the time that the fund’s NAV is calculated. Returns are average annualized total returns, except those for periods of less than one year, which are cumulative. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor’s tax situation and may differ from those shown. The after-tax returns shown are not relevant to investors who hold their fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

**Performance information for the Lunt Capital Large Cap Factor Rotation Index is for illustrative purposes only and does not represent actual fund performance. Indexes do not charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown. Indexes are unmanaged and an investor cannot invest directly in an index.
ETF Characteristics

The fund lists and principally trades its shares on the Cboe BZX Exchange, Inc. The fund’s return may not match the return of the Lunt Capital Large Cap Factor Rotation Index. Securities held by the fund will generally not be bought or sold in response to market fluctuations. Investors buying or selling fund shares on the secondary market may incur customary brokerage commissions. Market prices may differ to some degree from the net asset value of the shares. Shares may be sold throughout the day on the exchange through any brokerage account. However, unlike mutual funds, shares may only be redeemed directly from the fund by authorized participants, in very large creation/redemption units. If the fund’s authorized participants are unable to proceed with creation/redemption orders and no other authorized participant is able to step forward to create or redeem, fund shares may trade at a discount to the fund’s net asset value and possibly face delisting.

Risk Considerations

The fund’s shares will change in value, and you could lose money by investing in the fund. One of the principal risks of investing in the fund is market risk. Market risk is the risk that a particular security owned by the fund, fund shares or stocks in general may fall in value. There can be no assurance that the fund’s investment objective will be achieved. The fund may invest in securities issued by companies concentrated in a particular industry or particular security owned by the fund, fund shares or stocks in general may fall in value. There can be no assurance that the fund’s investment objective will be achieved.

The fund is not actively managed and generally will not attempt to take defensive positions in declining markets. Because of market movement, there can be no assurance that the securities held by the fund will stay within the given market capitalization range.

You should consider the fund’s investment objectives, risks, and charges and expenses carefully before investing. Contact First Trust Portfolios L.P. at 1-800-621-1675 or visit www.ftportfolios.com to obtain a prospectus or summary prospectus which contains this and other information about the fund. The prospectus or summary prospectus should be read carefully before investing.

Definitions

The NASDAQ US 500 Large Cap Index is a float modified market capitalization weighted index that contains the top 500 securities from the NASDAQ US Benchmark Index.
