Municipal Advantage Closed-End and ETF Portfolio, Series 54

FT 8160

FT 8160 is a series of a unit investment trust, the FT Series. FT 8160 consists of a single portfolio known as Municipal Advantage Closed-End and ETF Portfolio, Series 54 (the “Trust”). The Trust invests in a diversified portfolio of shares of closed-end investment companies (“Closed-End Funds”) and shares issued by exchange-traded funds (“ETFs”). Collectively, the Closed-End Funds and ETFs are referred to as the “Securities” or “Funds.” The Closed-End Funds and ETFs invest in municipal bonds. Certain of the Funds invest in high-yield municipal securities. See “Risk Factors” for a discussion of the risks of investing in high-yield securities or “junk” bonds. An investment can be made in the underlying Funds directly rather than through the Trust. These direct investments can be made without paying the sales charge, operating expenses and organizational costs of the Trust. The Trust seeks monthly income that is exempt from federal income taxes.

The Securities and Exchange Commission (“SEC”) has not approved or disapproved of these Securities or passed upon the adequacy of this prospectus. Any representation to the contrary is a criminal offense.

**Income Distribution Date (7)** ........................................ Twenty-fifth day of each month, commencing August 25, 2019.

---

(1) As of the Evaluation Time on the Initial Date of Deposit, we may adjust the number of Units of the Trust so that the Public Offering Price per Unit will equal approximately $10.00. If we make such an adjustment, the fractional undivided interest per Unit will vary from the amount indicated above.

(2) The Public Offering Price shown above reflects the value of the Securities on the business day prior to the Initial Date of Deposit. No investor will purchase Units at this price. The price you pay for your Units will be based on their valuation at the Evaluation Time on the date you purchase your Units. On the Initial Date of Deposit, the Public Offering Price per Unit will not include any accumulated dividends on the Securities. After this date, a pro rata share of any accumulated dividends on the Securities will be included.

(3) You will pay a maximum sales charge of 2.75% of the Public Offering Price per Unit (equivalent to 2.75% of the net amount invested) which consists of an initial sales charge, a deferred sales charge and a creation and development fee. The sales charges are described in the “Fee Table.”

(4) Each listed Security is valued at its last closing sale price at the Evaluation Time on the business day prior to the Initial Date of Deposit. If a Security is not listed, or if no closing sale price exists, it is valued at its closing ask price on such date. See “Public Offering—The Value of the Securities.” Evaluations for purposes of determining the purchase, sale or redemption price of Units are made as of the close of trading on the New York Stock Exchange (“NYSE”) (generally 4:00 p.m. Eastern time) on each day on which it is open (the “Evaluation Time”).

(5) The creation and development fee will be deducted from the assets of the Trust at the end of the initial offering period and the estimated organization costs per Unit will be deducted from the assets of the Trust at the earlier of six months after the Initial Date of Deposit or the end of the initial offering period. If Units are redeemed prior to any such reduction, these fees will not be deducted from the redemption proceeds. See “Redeeming Your Units.”

(6) See “Amending or Terminating the Indenture.”

(7) The Trustee will distribute money from the Capital Account monthly on the twenty-fifth day of each month to Unit holders of record on the tenth day of each month if the amount available for distribution equals at least $1.00 per 100 Units. In any case, the Trustee will distribute any funds in the Capital Account in December of each year and as part of the final liquidation distribution. See “Income and Capital Distributions.”
This Fee Table describes the fees and expenses that you may, directly or indirectly, pay if you buy and hold Units of the Trust. See “Public Offering” and “Expenses and Charges.” Although the Trust has a term of approximately two years and is a unit investment trust rather than a mutual fund, this information allows you to compare fees.

### Unit Holder Sales Fees (as a percentage of public offering price)

<table>
<thead>
<tr>
<th>Description</th>

</tr>
</thead>
<tbody>
<tr>
<td><strong>Maximum Sales Charge</strong></td>
<td></td>
</tr>
<tr>
<td>Initial sales charge</td>
<td>0.00% (a) $0.00</td>
</tr>
<tr>
<td>Deferred sales charge</td>
<td>2.25% (b) $0.225</td>
</tr>
<tr>
<td>Creation and development fee</td>
<td>0.50% (c) $0.050</td>
</tr>
<tr>
<td>Maximum sales charge (including creation and development fee)</td>
<td>2.75% $0.275</td>
</tr>
</tbody>
</table>

### Organization Costs (as a percentage of public offering price)

<table>
<thead>
<tr>
<th>Description</th>
<th>Amount per Unit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Estimated organization costs</td>
<td>3.20% (d) $0.0320</td>
</tr>
</tbody>
</table>

### Estimated Annual Trust Operating Expenses (e)

<table>
<thead>
<tr>
<th>Description</th>
<th>Amount per Unit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Portfolio supervision, bookkeeping, administrative and evaluation fees</td>
<td>0.80% $0.080</td>
</tr>
<tr>
<td>Trustee’s fee and other operating expenses</td>
<td>1.38% (f) $0.0138</td>
</tr>
<tr>
<td>Acquired Fund fees and expenses</td>
<td>4.24% (g) $0.0425</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td>6.42% $0.0643</td>
</tr>
</tbody>
</table>

### Example

This example is intended to help you compare the cost of investing in the Trust with the cost of investing in other investment products. The example assumes that you invest $10,000 in the Trust for the periods shown. The example also assumes a 5% return on your investment each year and that the Trust’s operating expenses stay the same. The example does not take into consideration transaction fees which may be charged by certain broker/dealers for processing redemption requests. Although your actual costs may vary, based on these assumptions your costs, assuming you sell or redeem your Units at the end of each period, would be:

<table>
<thead>
<tr>
<th>Year</th>
<th>Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>$371</td>
</tr>
<tr>
<td>2</td>
<td>$436</td>
</tr>
</tbody>
</table>

The example will not differ if you hold rather than sell your Units at the end of each period.

(a) The combination of the initial and deferred sales charge comprises what we refer to as the “transactional sales charge.” The initial sales charge is actually equal to the difference between the maximum sales charge of 2.75% and the sum of any remaining deferred sales charge and creation and development fee. When the Public Offering Price per Unit equals $10, there is no initial sales charge. If the price you pay for your Units exceeds $10 per Unit, you will pay an initial sales charge.

(b) The deferred sales charge is a fixed dollar amount equal to $.225 per Unit which, as a percentage of the Public Offering Price, will vary over time. The deferred sales charge will be deducted in three monthly installments commencing November 20, 2019.

(c) The creation and development fee compensates the Sponsor for creating and developing the Trust. The creation and development fee is a charge of $.050 per Unit collected at the end of the initial offering period, which is expected to be approximately three months from the Initial Date of Deposit. If the price you pay for your Units exceeds $10 per Unit, the creation and development fee will be less than 0.50%; if the price you pay for your Units is less than $10 per Unit, the creation and development fee will exceed 0.50%. If you purchase Units after the initial offering period, you will not be assessed the creation and development fee.

(d) Estimated organization costs will be deducted from the assets of the Trust at the earlier of six months after the Initial Date of Deposit or the end of the initial offering period. Estimated organization costs are assessed on a fixed dollar amount per Unit basis which, as a percentage of average net assets, will vary over time.

(e) With the exception of the underlying Fund expenses, each of the fees listed herein is assessed on a fixed dollar amount per Unit basis which, as a percentage of average net assets, will vary over time.

(f) Other operating expenses do not include brokerage costs and other portfolio transaction fees. In certain circumstances the Trust may incur additional expenses not set forth above. See “Expenses and Charges.”

(g) Although not actual Trust operating expenses, the Trust, and therefore Unit holders, will indirectly bear similar operating expenses of the Funds in which the Trust invests in the estimated amounts set forth in the table. These expenses are estimated based on the actual Fund expenses disclosed in a Fund’s most recent SEC filing but are subject to change in the future. An investor in the Trust will therefore indirectly pay higher expenses than if the underlying Fund shares were held directly.
To the Unit Holders and the Sponsor, First Trust Portfolios L.P., of FT 8160

Opinion on the Statement of Net Assets

We have audited the accompanying statement of net assets of FT 8160, comprising Municipal Advantage Closed-End and ETF Portfolio, Series 54 (the “Trust”), one of the series constituting the FT Series, including the schedule of investments, as of the opening of business on July 23, 2019 (Initial Date of Deposit), and the related notes. In our opinion, the statement of net assets presents fairly, in all material respects, the financial position of the Trust as of the opening of business on July 23, 2019 (Initial Date of Deposit), in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

This statement of net assets is the responsibility of the Trust’s Sponsor. Our responsibility is to express an opinion on this statement of net assets based on our audit. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Trust in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the statement of net assets is free of material misstatement, whether due to error or fraud. The Trust is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audit we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Trust’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audit included performing procedures to assess the risks of material misstatement of the statement of net assets, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the statement of net assets. Our audit also included evaluating the accounting principles used and significant estimates made by the Trust’s Sponsor, as well as evaluating the overall presentation of the statement of net assets. Our procedures included confirmation of the irrevocable letter of credit held by The Bank of New York Mellon, the Trustee, and deposited in the Trust for the purchase of securities, as shown in the statement of net assets, as of the opening of business on July 23, 2019, by correspondence with the Trustee. We believe that our audit provides a reasonable basis for our opinion.

NOTES TO STATEMENT OF NET ASSETS

The Trust is registered as a unit investment trust under the Investment Company Act of 1940. The Sponsor is responsible for the preparation of financial statements in accordance with accounting principles generally accepted in the United States which require the Sponsor to make estimates and assumptions that affect amounts reported herein. Actual results could differ from those estimates. The Trust intends to comply in its initial fiscal year and thereafter with provisions of the Internal Revenue Code applicable to regulated investment companies and as such, will not be subject to federal income taxes on otherwise taxable income (including net realized capital gains) distributed to Unit holders.

(1) The Trust invests in a diversified portfolio of Closed-End Funds and ETFs. Aggregate cost of the Securities listed under “Schedule of Investments” for the Trust is based on their aggregate underlying value. The Trust has a Mandatory Termination Date of July 23, 2021.

(2) An irrevocable letter of credit issued by The Bank of New York Mellon, of which approximately $200,000 has been allocated to the Trust, has been deposited with the Trustee as collateral, covering the monies necessary for the purchase of the Securities according to their purchase contracts.

(3) A portion of the Public Offering Price consists of an amount sufficient to reimburse the Sponsor for all or a portion of the costs of establishing the Trust. These costs have been estimated at $.0320 per Unit. A payment will be made at the earlier of six months after the Initial Date of Deposit or the end of the initial offering period to an account maintained by the Trustee from which the obligation of the investors to the Sponsor will be satisfied. To the extent that actual organization costs of the Trust are greater than the estimated amount, only the estimated organization costs added to the Public Offering Price will be reimbursed to the Sponsor and deducted from the assets of the Trust.

(4) Represents the amount of mandatory deferred sales charge distributions of $.225 per Unit, payable to the Sponsor in three equal monthly installments beginning on November 20, 2019 and on the twentieth day of each month thereafter (or if such date is not a business day, on the preceding business day) through January 17, 2020. If Unit holders redeem Units before January 17, 2020, they will have to pay the remaining amount of the deferred sales charge applicable to such Units when they redeem them.

(5) The creation and development fee ($.050 per Unit) is payable by the Trust on behalf of Unit holders out of assets of the Trust at the end of the initial offering period. If Units are redeemed prior to the close of the initial offering period, the fee will not be deducted from the proceeds.

(6) Net asset value per Unit is calculated by dividing the Trust’s net assets by the number of Units outstanding. This figure includes organization costs and the creation and development fee, which will only be assessed to Units outstanding at the earlier of six months after the Initial Date of Deposit or the end of the initial offering period in the case of organization costs or the close of the initial offering period in the case of the creation and development fee.

(7) The aggregate cost to investors in the Trust includes a maximum sales charge (comprised of an initial and a deferred sales charge and the creation and development fee) computed at the rate of 2.75% of the Public Offering Price (equivalent to 2.75% of the net amount invested, exclusive of the deferred sales charge and the creation and development fee), assuming no reduction of the maximum sales charge as set forth under “Public Offering.”

Total Investments: 100.00% $151,967

See “Notes to Schedule of Investments” on page 8.
NOTES TO SCHEDULE OF INVESTMENTS

(1) All Securities are represented by regular way contracts to purchase such Securities which are backed by an irrevocable letter of credit deposited with the Trustee. The Sponsor entered into purchase contracts for the Securities on July 22, 2019. Such purchase contracts are expected to settle within two business days.

(2) The cost of the Securities to the Trust represents the aggregate underlying value with respect to the Securities acquired (generally determined by the closing sale prices of the listed Securities and the ask prices of over-the-counter traded Securities at the Evaluation Time on the business day prior to the Initial Date of Deposit). The cost of Securities to the Trust may not compute due to rounding the market value per share. The valuation of the Securities has been determined by the Evaluator, an affiliate of the Sponsor. In accordance with Financial Accounting Standards Board Accounting Standards Codification 820, “Fair Value Measurement,” the Trust’s investments are classified as Level 1, which refers to securities traded in an active market. The cost of the Securities to the Sponsor and the Sponsor’s loss (which is the difference between the cost of the Securities to the Sponsor and the cost of the Securities to the Trust) are $152,155 and $188, respectively.
The FT Series Defined.

We, First Trust Portfolios L.P. (the “Sponsor”), have created hundreds of similar yet separate series of a unit investment trust which we have named the FT Series. The series to which this prospectus relates, FT 8160, consists of a single portfolio known as Municipal Advantage Closed-End and ETF Portfolio, Series 54.

The Trust was created under the laws of the State of New York by a Trust Agreement (the “Indenture”) dated the Initial Date of Deposit. This agreement, entered into among First Trust Portfolios L.P., as Sponsor, The Bank of New York Mellon as Trustee and First Trust Advisors L.P. as Portfolio Supervisor and Evaluator, governs the operation of the Trust.

You may get more specific details concerning the nature, structure and risks of this product in an “Information Supplement” by calling the Sponsor at 800–621–1675, dept. code 2.

How We Created the Trust.

On the Initial Date of Deposit, we deposited a portfolio of Closed-End Funds and ETFs with the Trustee and, in turn, the Trustee delivered documents to us representing our ownership of the Trust in the form of units (“Units”).

After the Initial Date of Deposit, we may deposit additional Securities in the Trust, or cash (including a letter of credit or the equivalent) with instructions to buy more Securities in order to create new Units for sale. If we create additional Units, we will attempt, to the extent practicable, to maintain the percentage relationship established among the Securities on the Initial Date of Deposit (as set forth under “Schedule of Investments”), adjusted to reflect the sale, redemption or liquidation of any of the Securities or any stock split or merger or other similar event affecting the issuer of the Securities.

Since the prices of the Securities will fluctuate daily, the ratio of Securities in the Trust, on a market value basis, will also change daily. The portion of Securities represented by each Unit will not change as a result of the deposit of additional Securities or cash in the Trust. If we deposit cash, you and new investors may experience a dilution of your investment. This is because prices of Securities will fluctuate between the time of the cash deposit and the purchase of the Securities, and because the Trust pays the associated brokerage fees. To reduce this dilution, the Trust will try to buy the Securities as close to the Evaluation Time and as close to the evaluation price as possible. In addition, because the Trust pays the brokerage fees associated with the creation of new Units and with the sale of Securities to meet redemption and exchange requests, frequent redemption and exchange activity will likely result in higher brokerage expenses.

An affiliate of the Trustee may receive these brokerage fees or the Trustee may retain and pay us (or our affiliate) to act as agent for the Trust to buy Securities. If we or an affiliate of ours act as agent to the Trust, we will be subject to the restrictions under the Investment Company Act of 1940, as amended (the “1940 Act”). When acting in an agency capacity, we may select various broker/dealers to execute securities transactions on behalf of the Trust, which may include broker/dealers who sell Units of the Trust. We do not consider sales of Units of the Trust or any other products sponsored by First Trust as a factor in selecting such broker/dealers.

We cannot guarantee that the Trust will keep its present size and composition for any length of time. Securities may be periodically sold under certain circumstances to satisfy Trust obligations, to meet redemption requests and, as described in “Removing Securities from the Trust,” to maintain the sound investment character of the Trust, and the proceeds received by the Trust will be used to meet Trust obligations or distributed to Unit holders, but will not be reinvested. However, Securities will not be sold to take advantage of market fluctuations or changes in anticipated rates of appreciation or depreciation, or if they no longer meet the criteria by which they were selected. You will not be able to dispose of or vote any of the Securities in the Trust. As the holder of the Securities, the Trustee will vote the Securities and, except as described in “Removing Securities from the Trust,” will endeavor to vote the Securities such that the Securities are voted as closely as possible in the same manner and the same general proportion as are the Securities held by owners other than such Trust.

Neither we nor the Trustee will be liable for a failure in any of the Securities. However, if a contract for the purchase of any of the Securities initially deposited in the Trust fails, unless we can purchase substitute Securities (“Replacement Securities”), we will refund to you that portion of the purchase price and transactional sales charge resulting from the failed contract on the next Income Distribution Date. Any Replacement Security the Trust acquires will be identical to those from the failed contract.
Objective.

The Trust seeks monthly income that is exempt from federal income taxes by investing in a well-diversified pool of Closed-End Funds and ETFs that invest in tax-exempt municipal bonds. Under normal circumstances, the Trust will invest at least 80% of its assets in Closed-End Funds and ETFs that invest at least 80% of their assets in municipal bonds. In addition the Trust has a fundamental policy to invest its assets so that at least 80% of its income that it distributes will be exempt from federal income taxes. In addition, none of the Funds which are selected for the portfolio are reporting the use of structural leverage. However, certain or all of these Closed-End Funds may have utilized structural leverage in the past and may elect to utilize structural leverage in the future. Structural leverage creates a systematic level of additional investment exposure through a closed-end fund’s issuance of preferred shares or debt securities, or through borrowing money. By not employing structural leverage, the volatility of the funds is reduced. In addition, certain of the Closed-End Funds do employ structural or effective leverage, the Trust’s Units may be subject to additional volatility.

The Trust invests in Funds that invest in tax-exempt municipal bonds in order to seek monthly income that is exempt from federal income taxes. Municipal bonds are debt obligations issued by states or by political subdivisions or authorities of states. Municipal bonds are typically designated as general obligation bonds, which are general obligations of a governmental entity that are backed by the taxing power of such entity, or revenue bonds, which are payable from the income of a specific project or authority and are not supported by the issuer’s power to levy taxes. Municipal bonds are long-term fixed rate debt obligations that generally decline in value with increases in interest rates, when an issuer’s financial condition worsens or when the rating on a bond is decreased.

It is important to note that certain Funds held by the Trust may hold securities, distributions from which would subject Unit holders to federal income tax. Under normal circumstances, this will not account for more than 20% of the income distributed by the Trust. In addition, certain of the Funds may hold tax-exempt securities, distributions from which may be taken into account for alternative minimum tax purposes. Each year you will receive a tax statement which identifies what portion of your distributions, if any, are subject to federal income taxes or the alternative minimum tax. Please refer to the “Tax Status” section of this prospectus for more information.

Portfolio Advantage.

Diversification. Investing in both closed-end funds and exchange-traded funds provides an efficient way to achieve diversification across municipal bonds. The broad range of closed-end funds and exchange-traded funds in which the portfolio invests are further diversified across hundreds of individual issues. It is important to note that diversification does not guarantee a profit or protect against loss.

What is an ETF?

ETFs offer investors the opportunity to buy and sell an entire basket of securities with a single transaction throughout the trading day. ETFs combine the characteristics of a mutual fund with the convenience and trading flexibility of stocks. Below is a list of other ETF features.

- Diversification—ETFs hold a basket of securities which helps to mitigate single security risk. It is important to note that diversification does not guarantee a profit or protect against loss.
- Transparency—ETF holdings are available daily so investors know what they own.
- Tax Efficiency—The ETF structure allows for increased tax efficiency.
- Fully Invested—Unlike a traditional mutual fund, ETFs do not need to hold cash in order to satisfy investor redemptions which allows them to better adhere to their investment objective.

Exchange-Traded Funds. ETFs are investment pools that hold other securities. ETFs are either passively-managed index funds that seek to replicate the performance or composition of a recognized securities index or actively-managed funds that seek to achieve a stated investment objective. ETFs are either open-end management investment companies or unit investment trusts registered under the 1940 Act. Unlike typical open-end funds or unit investment trusts, ETFs generally do not sell or redeem their individual shares at net asset value. ETFs generally sell and redeem shares in large blocks (often known as “Creation Units”); however, the Sponsor does not intend to sell or redeem ETFs in this manner. In addition, securities exchanges list ETF shares for trading, which allows investors to purchase and sell individual ETF shares at current market prices.
throughout the day. The Trust will purchase and sell ETF shares on these securities exchanges. ETFs therefore possess characteristics of traditional open-end funds and unit investment trusts, which issue redeemable shares, and of corporate common stocks or closed-end funds, which generally issue shares that trade at negotiated prices on securities exchanges and are not redeemable.

Why Closed-End Funds?

Since Closed-End Funds maintain a relatively fixed pool of investment capital, portfolio managers are better able to adhere to their investment philosophies through greater flexibility and control. In addition, Closed-End Funds don't have to manage fund liquidity to meet potentially large redemptions.

Because they are not subjected to cash inflows and outflows, which can dilute distributions over time, Closed-End Funds can generally provide a more stable income stream than other managed investment products. However, stable income cannot be assured. The Trust will only purchase shares of exchange-traded Closed-End Funds.

Closed-End Fund and ETF Selection.

The Closed-End Funds and ETFs were selected by our research department based on a number of factors including, but not limited to, the size and liquidity of the Closed-End Fund or ETF, the current dividend yield of the Closed-End Fund or ETF, the quality and character of the securities or other assets held by the Closed-End Fund or ETF, and the expense ratio of the Closed-End Fund or ETF, while attempting to limit the overlap of the securities held by the Closed-End Funds and ETFs.

In selecting the Funds for the Trust, we did not require any specific credit quality, duration or maturity for the underlying municipal bonds. Certain funds held by the Trust may invest in municipal bonds rated below investment grade by one or more rating agencies (high-yield securities or “junk” bonds). High-yield securities should be considered speculative as these ratings indicate a quality of less than investment grade, and therefore carry an increased risk of default as compared to investment grade issues.

You should be aware that predictions stated herein may not be realized. Of course, as with any similar investments, there can be no guarantee that the objective of the Trust will be achieved. See “Risk Factors” for a discussion of the risks of investing in the Trust.

---

### Risk Factors

**Principal Risks.**

The following is a discussion of the principal risks of investing in the Trust.

**Price Volatility.** The Trust invests in Closed-End Funds and ETFs. The value of the Trust’s Units will fluctuate with changes in the value of these Securities. The value of a security fluctuates for several reasons including changes in investors’ perceptions of the financial condition of an issuer or the general condition of the relevant stock market, such as market volatility, or when political or economic events affecting the issuers occur.

Because the Trust is not managed, the Trustee will not sell Securities in response to or in anticipation of market fluctuations, as is common in managed investments. As with any investment, we cannot guarantee that the performance of the Trust will be positive over any period of time or that you won’t lose money. Units of the Trust are not deposits of any bank and are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

**Current Economic Conditions.** The global economy continues to experience moderate growth. At the same time developed and developing economies outside the United States are broadly experiencing economic recoveries on a regional and global perspective. Worldwide, central bank monetary policy is trending towards policies of interest rate normalization though at different levels of commitment and in varying degrees of progress.

As economies around the world have begun to reflate, inflation has trended modestly higher but so far not to worrisome levels. Inflation remains relatively tame worldwide, partly reflecting unemployment rates, worker participation rates and a continuation of the process of financial deleveraging in major developed economies. The global employment situation has improved but upside to wage growth remains challenged, as the effects of globalization and technology continue to weigh on labor markets in many countries and regions. Prices of most primary commodities, a driving force behind some emerging market economies, have come off their highs recently due to a number of factors including regional economic slowdowns and concerns tied to trade skirmish/war risk. Recent strength of the U.S. dollar against a number of foreign currencies has negatively impacted sentiment towards foreign assets and attracted investors to U.S. assets. Concern about the continued strength in the price of oil would appear somewhat overstated.
considering the effects of technology on production, distribution and usage, which are counter-inflationary over the intermediate to long term.

Monetary risk remains a concern should central banks raise their benchmark rates suddenly at a quicker pace and to unexpectedly higher levels.

Tax reform in the United States, in the form of tax cuts and opportunity for repatriation of earnings for corporations, could provide liquidity as the Federal Reserve removes stimulus via the process of normalization. In effect, this could enable companies to navigate the process of interest rate normalization without as much disruption as some expect.

Tariff risk could possibly recede quickly should resolution appear on the horizon. For now, fundamentals state side (economic and corporate revenue and earnings) do not appear to be showing signs of deterioration but rather look to have further room for improvement.

Due to the current state of uncertainty in the economy, the value of the Securities held by the Trust may be subject to steep declines or increased volatility due to changes in performance or perception of the issuers.

**Distributions.** As stated under “Summary of Essential Information,” the Trust will generally make monthly distributions of income. The Funds held by the Trust make distributions on a monthly or quarterly basis. As a result of changing interest rates, refundings, sales or defaults on the underlying securities held by the Funds, and other factors, there is no guarantee that distributions will either remain at current levels or increase over time.

**Municipal Bonds.** All of the Funds held by the Trust invest in tax-exempt municipal bonds. Municipal bonds are debt obligations issued by states or by political subdivisions or authorities of states. Municipal bonds are typically designated as general obligation bonds, which are general obligations of a governmental entity that are backed by the taxing power of such entity, or revenue bonds, which are payable from the income of a specific project or authority and are not supported by the issuer’s power to levy taxes. Municipal bonds are long-term fixed rate debt obligations that generally decline in value with increases in interest rates, when an issuer’s financial condition worsens or when the rating on a bond is decreased. Many municipal bonds may be called or redeemed prior to their stated maturity, an event which is more likely to occur when interest rates fall. In such an occurrence, a Fund may not be able to reinvest the money it receives in other bonds that have as high a yield or as long a maturity.

Many municipal bonds are subject to continuing requirements as to the actual use of the bond proceeds or manner of operation of the project financed from bond proceeds that may affect the exemption of interest on such bonds from federal income taxation. The market for municipal bonds is generally less liquid than for other securities and therefore the price of municipal bonds may be more volatile and subject to greater price fluctuations than securities with greater liquidity. In addition, an issuer’s ability to make income distributions generally depends on several factors including the financial condition of the issuer and general economic conditions. Any of these factors may negatively impact the price of municipal bonds held by a Fund and would therefore impact the price of both the Securities and the Units.

Acts of terrorism and any resulting damage may not be covered by insurance on the bonds. Issuers of the bonds may therefore be at risk of default due to losses sustained as a result of terrorist activities.

Certain of the Funds held by the Trust may invest in insured municipal bonds. Insurance guarantees the timely payment, when due, of all principal and interest on the insured securities. Such insurance is effective so long as the insured security is outstanding and the insurer remains in business. Insurance relates only to the particular security and not to the Units offered hereby or to their market value. There can be no assurance that any insurer listed will be able to satisfy its commitments in the event claims are made in the future. Certain significant providers of insurance for municipal securities have recently incurred significant losses as a result of exposure to sub-prime mortgages and other lower credit quality investments that have experienced recent defaults or otherwise suffered extreme credit deterioration. As a result, such losses have reduced the insurers’ capital and called into question their continued ability to perform their obligations under such insurance if they are called upon to do so in the future. While an insured municipal security will typically be deemed to have the rating of its insurer, if the insurer of a municipal security suffers a downgrade in its credit rating or the market discounts the value of the insurance provided by the insurer, the rating of the underlying municipal security will be more relevant and the value of the municipal security would more closely, if not entirely, reflect such rating. In such a case, the value of insurance associated with a municipal security would decline and may not add any value.

Insurance companies are subject to extensive regulation and supervision where they do business by state insurance commissioners who regulate the standards of solvency which must be maintained, the nature of and
limitations on investments, reports of financial condition, and requirements regarding reserves for unearned premiums, losses and other matters. A significant portion of the assets of insurance companies is required by law to be held in reserve against potential claims on policies and is not available to general creditors. Although the federal government does not regulate the business of insurance, federal initiatives including pension regulation, controls on medical care costs, minimum standards for no-fault automobile insurance, national health insurance, tax law changes affecting life insurance companies and repeal of the antitrust exemption for the insurance business can significantly impact the insurance business.

**Alternative Minimum Tax.** While distributions of interest from the Trust are generally exempt from federal income taxes, a portion of such interest may be taken into account in computing the alternative minimum tax.

**Closed-End Funds.** The Trust invests in shares of Closed-End Funds. Closed-end funds are actively managed investment companies which invest in various types of securities. Closed-end funds issue shares of common stock that are traded on a securities exchange. Closed-end funds are subject to various risks, including management’s ability to meet the closed-end fund’s investment objective, and to manage the closed-end fund portfolio when the underlying securities are redeemed or sold, during periods of market turmoil and as investors’ perceptions regarding closed-end funds or their underlying investments change.

Shares of closed-end funds frequently trade at a discount from their net asset value in the secondary market. This risk is separate and distinct from the risk that the net asset value of closed-end fund shares may decrease. The amount of such discount from net asset value is subject to change from time to time in response to various factors.

**Exchange-Traded Funds.** The Trust invests in shares of ETFs. ETFs are subject to various risks, including management’s ability to meet the fund’s investment objective, and to manage the fund’s portfolio when the underlying securities are redeemed or sold, during periods of market turmoil and as investors’ perceptions regarding ETFs or their underlying investments change. The Trust and the underlying funds have management and operating expenses. You will bear not only your share of your Trust’s expenses, but also the expenses of the underlying funds. By investing in other funds, the Trust incurs greater expenses than you would incur if you invested directly in the funds.

Shares of ETFs may trade at a discount from their net asset value in the secondary market. This risk is separa-rate and distinct from the risk that the net asset value of the ETF shares may decrease. The amount of such discount from net asset value is subject to change from time to time in response to various factors.

**Investment in Other Investment Companies Risk.** Because the Trust holds Funds, Unit holders are subject to the risk that the securities selected by the Funds’ investment advisors will underperform the markets, the relevant indices or the securities selected by other funds. Further, Funds may in the future invest in other types of securities which involve risk which may differ from those set forth below. In addition, because the Trust holds Funds, Unit holders bear both their proportionate share of the expenses of the Trust and, indirectly the expenses of the Funds. Certain of the Funds held by the Trust may invest a relatively high percentage of their assets in a limited number of issuers. As a result, these Funds may be more susceptible to a single adverse economic or regulatory occurrence affecting one or more of these issuers, experience increased volatility and be highly concentrated in certain issuers.

**Index Correlation Risk.** Index correlation risk is the risk that the performance of an index-based ETF will vary from the actual performance of the fund’s target index, known as “tracking error.” This can happen due to transaction costs, market impact, corporate actions (such as mergers and spin-offs) and timing variances. Some index-based ETFs use a technique called “representative sampling,” which means that the ETF invests in a representative sample of securities in its target index rather than all of the index securities. This could increase the risk of a tracking error.

**High-Yield Securities.** Certain of the Funds held by the Trust invest in securities rated below investment grade by one or more rating agencies (high-yield securities or “junk” bonds). High-yield securities held by Funds represent approximately 5.91% of the underlying assets of the Trust. High-yield, high-risk securities are subject to greater market fluctuations and risk of loss than securities with higher investment ratings. The value of these securities will decline significantly with increases in interest rates, not only because increases in rates generally decrease values, but also because increased rates may indicate an economic slowdown. An economic slowdown, or a reduction in an issuer’s creditworthiness, may result in the issuer being unable to maintain earnings at a level sufficient to maintain interest and principal payments.

High-yield securities or “junk” bonds, the generic names for securities rated below “BBB–” by Standard & Poor’s or below “Baa3” by Moody’s, are frequently
issued by corporations in the growth stage of their development or by established companies that are highly leveraged or whose operations or industries are depressed. Obligations rated below “BBB−” should be considered speculative as these ratings indicate a quality of less than investment grade, and therefore carry an increased risk of default as compared to investment grade issues. The Funds held by the Trust may invest in securities of any high-yield credit quality, including securities rated as low as “D” by Standard and Poor’s or “C” by Moody’s. Because high-yield securities are generally subordinated obligations and are perceived by investors to be riskier than higher rated securities, their prices tend to fluctuate more than higher rated securities and are affected by short-term credit developments to a greater degree.

The market for high-yield securities is smaller and less liquid than that for investment grade securities. High-yield securities are generally not listed on a national securities exchange but trade in the over-the-counter markets. Due to the smaller, less liquid market for high-yield securities, the bid-offer spread on such securities is generally greater than it is for investment grade securities and the purchase or sale of such securities may take longer to complete.

Distressed debt securities are speculative and involve substantial risks in addition to the risks of investing in high-yield securities that are not in default. Generally, holders of distressed debt securities will not receive interest payments, and there is a substantial risk that the principal will not be repaid. In any reorganization or liquidation proceeding related to a distressed debt security, holders may lose their entire investment in the security.

**Investment Grade Securities.** All of the Funds held by the Trust invest in investment grade securities. The value of these securities will decline with increases in interest rates, not only because increases in rates generally decrease values, but also because increased rates may indicate an economic slowdown. An economic slowdown, or a reduction in an issuer’s creditworthiness, may result in the issuer being unable to maintain earnings at a level sufficient to maintain interest and principal payments.

**Interest Rate Risk.** Interest rate risk is the risk that the value of the securities held by the Funds held by the Trust will fall if interest rates increase. Securities typically fall in value when interest rates rise and rise in value when interest rates fall. Securities with longer periods before maturity are often more sensitive to interest rate changes.

**Credit Risk.** Credit risk is the risk that a security’s issuer is unable or unwilling to make dividend, interest or principal payments when due and the related risk that the value of a security may decline because of concerns about the issuer’s ability or willingness to make such payments.

**Call Risk.** Call risk is the risk that the issuer prepay or “calls” a bond before its stated maturity. An issuer might call a bond if interest rates fall and the bond pays a higher than market interest rate or if the issuer no longer needs the money for its original purpose. A bond’s call price could be less than the price the Fund paid for the bond and could be below the bond’s par value. This means a Fund could receive less than the amount paid for the bond and may not be able to reinvest the proceeds in securities with as high a yield as the called bond. A Fund may contain bonds that have “make whole” call options that generally cause the bonds to be redeemable at any time at a designated price. Such bonds are generally more likely to be subject to early redemption and may result in the reduction of income received by the Fund.

**Extension Risk.** If interest rates rise, certain obligations may be paid off by the obligor at a slower rate than expected, which will cause the value of such obligations to fall.

**Leverage Risk.** Certain of the Funds held by the Trust employ the use of leverage in their portfolios. Leverage may be structural leverage, through borrowings or the issuance of preferred stock, or effective leverage, which results from a Fund’s investment in derivative instruments that are inherently leveraged. While leverage often serves to increase the yield of a Fund, this leverage also subjects the Fund to increased risks, including the likelihood of increased volatility and the possibility that the Fund’s common share income will fall if the dividend rate on the preferred shares or the interest rate on any borrowings rises.

**Liquidity Risk.** Liquidity risk is the risk that the value of a fixed-income security held by a Fund will fall if trading in the security is limited or absent. No one can guarantee that a liquid trading market will exist for any fixed-income security because these securities generally trade in the over-the-counter market (they are not listed on a securities exchange). During times of reduced market liquidity, the Funds held by the Trust may not be able to sell the underlying securities readily at prices reflecting the values at which the underlying securities are carried on a Fund’s books. Sales of large blocks of securities by market participants that are seeking liquidity can further reduce security prices in an illiquid market.
**Market Risk.** Market risk is the risk that the value of the Securities held by the Trust will fluctuate. Market value fluctuates in response to various factors. These can include changes in interest rates, inflation, the financial condition of a Security’s issuer, perceptions of the issuer, ratings on a bond, or political or economic events affecting the issuer. Because the Trust is not managed, the Trustee will not sell Securities in response to or in anticipation of market fluctuations, as is common in managed investments.

**Prepayment Risk.** Many types of debt instruments are subject to prepayment risk, which is the risk that the issuer will repay principal prior to the maturity date. Debt instruments allowing prepayment may offer less potential for gains during a period of declining interest rates.

**Authorized Participant Concentration Risk.** Only an authorized participant may engage in creation or redemption transactions directly with an ETF. ETFs have a limited number of institutions that act as authorized participants. To the extent that these institutions exit the business or are unable to proceed with creation and/or redemption orders with respect to an ETF and no other authorized participant is able to step forward to create or redeem, in either of these cases, ETF shares may trade at a discount to the ETF’s net asset value and possibly face delisting.

**Fluctuation of Net Asset Value Risk.** The net asset value of shares of a Fund will generally fluctuate with changes in the market value of the Fund’s holdings. The market prices of shares will generally fluctuate in accordance with changes in net asset value as well as the relative supply of and demand for shares on the exchange on which they trade. The Trust cannot predict whether shares will trade below, at or above their net asset value because the shares trade on an exchange at market prices and not at net asset value. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for shares will be closely related to, but not identical to, the same forces influencing the prices of the holdings of a Fund trading individually or in the aggregate at any point in time.

**Management Risk.** Actively managed Funds are subject to management risk. In managing a Fund’s investment portfolio, the Fund’s investment advisor will apply investment techniques and risk analyses that may not have the desired result. There can be no guarantee that the Funds will meet their investment objectives.

**Market Maker Risk.** If a Fund has lower average daily trading volumes, it may rely on a small number of third-party market makers to provide a market for the purchase and sale of shares. Any trading halt or other problem relating to the trading activity of these market makers could result in a dramatic change in the spread between a Fund’s net asset value and the price at which the Fund’s shares are trading on the exchange, which could result in a decrease in value of the Fund’s shares. In addition, decisions by market makers to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying values of a Fund’s portfolio securities and the Fund’s market price. This reduced effectiveness could result in a Fund’s shares trading at a discount to net asset value and also in greater than normal intraday bid-ask spreads for Fund shares.

**Trading Issues Risk.** Although the shares of a Fund are listed for trading on a securities exchange, there can be no assurance that an active trading market for such shares will develop or be maintained. Trading in shares on such exchanges may be halted due to market conditions or for reasons that, in the view of an exchange, make trading in shares inadvisable. In addition, trading in shares on an exchange is subject to trading halts caused by extraordinary market volatility pursuant to the exchange’s “circuit breaker” rules. Market makers are under no obligation to make a market in a Fund’s shares. There can be no assurance that the requirements of the exchange necessary to maintain the listing of a Fund will continue to be met or will remain unchanged. In particular, if a Fund does not comply with any provision of the listing standards of an exchange that are applicable to the Fund, and cannot bring itself into compliance within a reasonable period after discovering the matter, the exchange may remove the shares of the Fund from listing. The Funds may have difficulty maintaining their listing on an exchange in the event that a Fund’s assets are small or the Fund does not have enough shareholders.

**Cybersecurity Risk.** As the use of Internet technology has become more prevalent in the course of business, the Trust has become more susceptible to potential operational risks through breaches in cybersecurity. A breach in cybersecurity refers to both intentional and unintentional events that may cause the Trust to lose proprietary information, suffer data corruption or lose operational capacity. Such events could cause the Sponsor of the Trust to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. Cybersecurity breaches may involve unauthorized access to digital information systems utilized by the Trust through “hacking” or malicious software coding, but may also result from outside attacks such as denial-of-
service attacks through efforts to make network services unavailable to intended users. In addition, cybersecurity breaches of the Trust’s third-party service providers, or issuers in which the Trust invests, can also subject the Trust to many of the same risks associated with direct cybersecurity breaches. The Sponsor of, and third-party service provider to, the Trust have established risk management systems designed to reduce the risks associated with cybersecurity. However, there is no guarantee that such efforts will succeed, especially because the Trust does not directly control the cybersecurity systems of issuers or third-party service providers.

Legislation/Litigation. From time to time, various legislative initiatives are proposed in the United States and abroad which may have a negative impact on certain of the Trust’s investments. Any legislation that proposes to reduce or eliminate the exemption of interest on municipal bonds from federal income taxation would negatively impact the value of the municipal bonds held by the Funds held by the Trust. In addition, litigation regarding any of the issuers of the Securities, or the industries represented by these issuers, or litigation affecting the validity of certain municipal bonds or the tax-free nature of the interest thereon, may negatively impact the value of the Securities. We cannot predict what impact any pending or proposed legislation or pending or threatened litigation will have on the value of the Trust’s investments.

Additional Risks.

The following is a discussion of additional risks of investing in the Trust.

Common Stocks. Certain of the Funds held by the Trust invest in common stocks. Common stocks represent a proportional share of ownership in a company. Common stock prices fluctuate for several reasons including changes in investors’ perceptions of the financial condition of an issuer or the general condition of the relevant stock market, such as market volatility, or when political or economic events affecting the issuers occur. Common stock prices may also be particularly sensitive to rising interest rates, as the cost of capital rises and borrowing costs increase.

Large Capitalization Companies. Certain of the Funds held by the Trust may invest in securities of large capitalization companies. The return on investment in stocks of large capitalization companies may be less than the return on investment in stocks of small and/or mid capitalization companies. Large capitalization companies may also grow at a slower rate than the overall market.

Money Market Securities. Certain of the Funds held by the Trust invest in money market or similar securities as a defensive measure when the Fund’s investment advisor anticipates unusual market or other conditions. If market conditions improve while a Fund has temporarily invested some or all of its assets in high quality money market securities, the potential gain from the market upswing may be reduced, thus limiting the Fund’s opportunity to achieve its investment objective.

Short Sales Risk. A Fund may engage in “short sale” transactions. A Fund will lose value if the security or instrument that is the subject of a short sale increases in value. A Fund also may enter into a short derivative position through a futures contract. If the price of the security or derivative that is the subject of a short sale increases, then the Fund will incur a loss equal to the increase in price from the time that the short sale was entered into plus any premiums and interest paid to a third party in connection with the short sale. Therefore, short sales involve the risk that losses may be exaggerated, potentially losing more money than the actual cost of the investment. Also, there is the risk that the third party to the short sale may fail to honor its contract terms, causing a loss to the Fund.

U.S. Treasury Obligations. Certain of the Funds held by the Trust invest in U.S. Treasury obligations. U.S. Treasury obligations are direct obligations of the United States which are backed by the full faith and credit of the United States. U.S. Treasury obligations are generally not affected by credit risk, but are subject to changes in market value resulting from changes in interest rates. The value of U.S. Treasury obligations will be adversely affected by decreases in bond prices and increases in interest rates, not only because increases in interest rates generally decrease values, but also because increased interest rates may indicate an economic slowdown.

Public Offering

The Public Offering Price.

Units will be purchased at the Public Offering Price, the price per Unit of which is comprised of the following:

• The aggregate underlying value of the Securities;
• The amount of any cash in the Income and Capital Accounts;
• Dividends receivable on Securities; and
• The maximum sales charge (which combines an initial upfront sales charge, a deferred sales charge and the creation and development fee).
The price you pay for your Units will differ from the amount stated under “Summary of Essential Information” due to various factors, including fluctuations in the prices of the Securities and changes in the value of the Income and/or Capital Accounts.

Although you are not required to pay for your Units until two business days following your order (the “date of settlement”), you may pay before then. You will become the owner of Units (“Record Owner”) on the date of settlement if payment has been received. If you pay for your Units before the date of settlement, we may use your payment during this time and it may be considered a benefit to us, subject to the limitations of the Securities Exchange Act of 1934, as amended.

**Organization Costs.** Securities purchased with the portion of the Public Offering Price intended to be used to reimburse the Sponsor for the Trust’s organization costs (including costs of preparing the registration statement, the Indenture and other closing documents, registering Units with the SEC and states, the initial audit of the Trust’s statement of net assets, legal fees and the initial fees and expenses of the Trustee) will be purchased in the same proportionate relationship as all the Securities contained in the Trust. Securities will be sold to reimburse the Sponsor for the Trust’s organization costs at the earlier of six months after the Initial Date of Deposit or the end of the initial offering period (a significantly shorter time period than the life of the Trust). During the period ending with the earlier of six months after the Initial Date of Deposit or the end of the initial offering period, there may be a decrease in the value of the Securities. To the extent the proceeds from the sale of these Securities are insufficient to repay the Sponsor for Trust organization costs, the Trustee will sell additional Securities to allow the Trust to fully reimburse the Sponsor. In that event, the net asset value per Unit of the Trust will be reduced by the amount of additional Securities sold. Although the dollar amount of the reimbursement due to the Sponsor will remain fixed and will never exceed the per Unit amount set forth for the Trust in “Notes to Statement of Net Assets,” this will result in a greater effective cost per Unit to Unit holders for the reimbursement to the Sponsor. To the extent actual organization costs are less than the estimated amount, only the actual organization costs will ultimately be charged to the Trust. When Securities are sold to reimburse the Sponsor for organization costs, the Trustee will sell Securities, to the extent practicable, which will maintain the same proportionate relationship among the Securities contained in the Trust as existed prior to such sale.

**Minimum Purchase.**

The minimum amount per account you can purchase of the Trust is generally $1,000 worth of Units ($500 if you are purchasing Units for your Individual Retirement Account or any other qualified retirement plan), but such amounts may vary depending on your selling firm.

**Maximum Sales Charge.**

The maximum sales charge is comprised of a transactional sales charge and a creation and development fee. After the initial offering period the maximum sales charge will be reduced by 0.50%, to reflect the amount of the previously charged creation and development fee.

**Transactional Sales Charge.**

The transactional sales charge you will pay has both an initial and a deferred component.

**Initial Sales Charge.** The initial sales charge, which you will pay at the time of purchase, is equal to the difference between the maximum sales charge of 2.75% of the Public Offering Price and the sum of the maximum remaining deferred sales charge and creation and development fee (initially $.275 per Unit). On the Initial Date of Deposit, and any other day the Public Offering Price per Unit equals $10.00, there is no initial sales charge. Thereafter, you will pay an initial sales charge when the Public Offering Price per Unit exceeds $10.00 and as deferred sales charge and creation and development fee payments are made.

**Monthly Deferred Sales Charge.** In addition, three monthly deferred sales charges of $.075 per Unit will be deducted from the Trust’s assets on approximately the twentieth day of each month from November 20, 2019 through January 17, 2020. If you buy Units at a price of less than $10.00 per Unit, the dollar amount of the deferred sales charge will not change, but the deferred sales charge on a percentage basis will be more than 2.25% of the Public Offering Price.

If you purchase Units after the last deferred sales charge payment has been assessed, your transactional sales charge will consist of a one-time initial sales charge of 2.25% of the Public Offering Price (equivalent to 2.302% of the net amount invested).

**Creation and Development Fee.**

As Sponsor, we will also receive, and the Unit holders will pay, a creation and development fee. See “Expenses and Charges” for a description of the services provided for this fee. The creation and development fee is a charge of $.050 per Unit collected at the end of the initial offering period. If you buy Units at a price of less than $10.00 per Unit, the dollar amount of the creation and development fee will not change, but the creation
and development fee on a percentage basis will be more than 0.50% of the Public Offering Price.

Discounts for Certain Persons.

The maximum sales charge is 2.75% per Unit and the maximum dealer concession is 2.00% per Unit.

If you are purchasing Units for an investment account, the terms of which provide that your registered investment advisor or registered broker/dealer (a) charges periodic fees in lieu of commissions; (b) charges for financial planning, investment advisory or asset management services; or (c) charges a comprehensive “wrap fee” or similar fee for these or comparable services (“Fee Accounts”), you will not be assessed the transactional sales charge described above on such purchases. These Units will be designated as Fee Account Units and, depending upon the purchase instructions we receive, assigned either a Fee Account Cash CUSIP Number, if you elect to have distributions paid to you, or a Fee Account Reinvestment CUSIP Number, if you elect to have distributions reinvested into additional Units of the Trust. Certain Fee Account Unit holders may be assessed transaction or other account fees on the purchase and/or redemption of such Units by their registered investment advisor, broker/dealer or other processing organizations for providing certain transaction or account activities. Fee Account Units are not available for purchase in the secondary market. We reserve the right to limit or deny purchases of Units not subject to the transactional sales charge by investors whose frequent trading activity we determine to be detrimental to the Trust.

Employees, officers and directors (and immediate family members) of the Sponsor, our related companies, and dealers and their affiliates will purchase Units at the Public Offering Price less the applicable dealer concession, subject to the policies of the related selling firm. Immediate family members include spouses, or the equivalent if recognized under local law, children or step-children under the age of 21 living in the same household, parents or step-parents and trustees, custodians or fiduciaries for the benefit of such persons. Only employees, officers and directors of companies that allow their employees to participate in this employee discount program are eligible for the discounts.

You will be charged the deferred sales charge per Unit regardless of the price you pay for your Units or whether you are eligible to receive any discounts. However, if the purchase price of your Units was less than $10.00 per Unit or if you are eligible to receive a discount such that the maximum sales charge you must pay is less than the applicable maximum deferred sales charge, including Fee Account Units, you will be credited additional Units with a dollar value equal to the difference between your maximum sales charge and the maximum deferred sales charge at the time you buy your Units. If you elect to have distributions reinvested into additional Units of the Trust, in addition to the reinvestment Units you receive you will also be credited additional Units with a dollar value at the time of reinvestment sufficient to cover the amount of any remaining deferred sales charge and creation and development fee to be collected on such reinvestment Units. The dollar value of these additional credited Units (as with all Units) will fluctuate over time, and may be less on the dates deferred sales charges or the creation and development fee are collected than their value at the time they were issued.

The Value of the Securities.

The Evaluator will determine the aggregate underlying value of the Securities in the Trust as of the Evaluation Time on each business day and will adjust the Public Offering Price of the Units according to this valuation. This Public Offering Price will be effective for all orders received before the Evaluation Time on each such day. If we or the Trustee receive orders for purchases, sales or redemptions after that time, or on a day which is not a business day, they will be held until the next determination of price. The term “business day” as used in this prospectus shall mean any day on which the NYSE is open. For purposes of Securities and Unit settlement, the term business day does not include days on which U.S. financial institutions are closed.

The aggregate underlying value of the Securities in the Trust will be determined as follows: if the Securities are listed on a national or foreign securities exchange or The NASDAQ Stock Market, LLC®, their value shall generally be based on the closing sale price on the exchange or system which is the principal market therefore (“Primary Exchange”), which shall be deemed to be the NYSE if the Securities are listed thereon (unless the Evaluator deems such price inappropriate as the basis for evaluation). In the event a closing sale price on the Primary Exchange is not published, the Securities will be valued based on the last trade price on the Primary Exchange. If no trades occur on the Primary Exchange for a specific trade date, the value will be based on the closing sale price from, in the opinion of the Evaluator, an appropriate secondary exchange, if any. If no trades occur on the Primary Exchange or any appropriate secondary exchange on a specific trade date, the Evaluator will determine the value of the Securities using the best information available to the Evaluator, which may
include the prior day’s evaluated price. If the Security is an American Depositary Receipt/ADR, Global Depositary Receipt/GDR or other similar security in which no trade occurs on the Primary Exchange or any appropriate secondary exchange on a specific trade date, the value will be based on the evaluated price of the underlying security, determined as set forth above, after applying the appropriate ADR/GDR ratio, the exchange rate and such other information which the Evaluator deems appropriate. For purposes of valuing Securities traded on The NASDAQ Stock Market, LLC®, closing sale price shall mean the Nasdaq® Official Closing Price as determined by The NASDAQ Stock Market, LLC®. If the Securities are not so listed or, if so listed and the principal market therefore is other than on the Primary Exchange or any appropriate secondary exchange, the value shall generally be based on the current ask price on the over-the-counter market (unless the Evaluator deems such price inappropriate as a basis for evaluation). If current ask prices are unavailable, the value is generally determined (a) on the basis of current ask prices for comparable securities, (b) by appraising the value of the Securities on the ask side of the market, or (c) any combination of the above. If such prices are in a currency other than U.S. dollars, the value of such Security shall be converted to U.S. dollars based on current exchange rates (unless the Evaluator deems such prices inappropriate as a basis for evaluation). If the Evaluator deems a price determined as set forth above to be inappropriate as the basis for evaluation, the Evaluator shall use such other information available to the Evaluator which it deems appropriate as the basis for determining the value of a Security.

After the initial offering period is over, the aggregate underlying value of the Securities will be determined as set forth above, except that bid prices are used instead of ask prices when necessary.

### Distribution of Units

We intend to qualify Units of the Trust for sale in a number of states. All Units will be sold at the then current Public Offering Price.

The Sponsor compensates intermediaries, such as broker/dealers and banks, for their activities that are intended to result in sales of Units of the Trust. This compensation includes dealer concessions described in the following section and may include additional concessions and other compensation and benefits to broker/dealers and other intermediaries.

### Dealer Concessions.

Dealers and other selling agents can purchase Units at prices which represent a concession or agency commission of 2.00% of the Public Offering Price per Unit, subject to reductions set forth in “Public Offering—Discounts for Certain Persons.”

Eligible dealer firms and other selling agents who, during the previous consecutive 12-month period through the end of the most recent month, sold primary market units of unit investment trusts sponsored by us in the dollar amounts shown below will be entitled to up to the following additional sales concession on primary market sales of units during the current month of unit investment trusts sponsored by us:

<table>
<thead>
<tr>
<th>Total sales (in millions)</th>
<th>Additional Concession</th>
</tr>
</thead>
<tbody>
<tr>
<td>$25 but less than $100</td>
<td>0.035%</td>
</tr>
<tr>
<td>$100 but less than $150</td>
<td>0.050%</td>
</tr>
<tr>
<td>$150 but less than $250</td>
<td>0.075%</td>
</tr>
<tr>
<td>$250 but less than $1,000</td>
<td>0.100%</td>
</tr>
<tr>
<td>$1,000 but less than $5,000</td>
<td>0.125%</td>
</tr>
<tr>
<td>$5,000 but less than $7,500</td>
<td>0.150%</td>
</tr>
<tr>
<td>$7,500 or more</td>
<td>0.175%</td>
</tr>
</tbody>
</table>

Dealers and other selling agents will not receive a concession on the sale of Units which are not subject to a transactional sales charge, but such Units will be included in determining whether the above volume sales levels are met. Eligible dealer firms and other selling agents include clearing firms that place orders with First Trust and provide First Trust with information with respect to the representatives who initiated such transactions. Eligible dealer firms and other selling agents will not include firms that solely provide clearing services to other broker/dealer firms or firms who place orders through clearing firms that are eligible dealers. We reserve the right to change the amount of concessions or agency commissions from time to time. Certain commercial banks may be making Units of the Trust available to their customers on an agency basis. A portion of the transactional sales charge paid by these customers is kept by or given to the banks in the amounts shown above.

### Other Compensation and Benefits to Broker/Dealers.

The Sponsor, at its own expense and out of its own profits, currently provides additional compensation and benefits to broker/dealers who sell Units of this Trust and other First Trust products. This compensation is intended to result in additional sales of First Trust products and/or compensate broker/dealers and financial advisors for past
sales. A number of factors are considered in determining whether to pay these additional amounts. Such factors may include, but are not limited to, the level or type of services provided by the intermediary, the level or expected level of sales of First Trust products by the intermediary or its agents, the placing of First Trust products on a preferred or recommended product list, access to an intermediary’s personnel, and other factors. The Sponsor makes these payments for marketing, promotional or related expenses, including, but not limited to, expenses of entertaining retail customers and financial advisors, advertising, sponsorship of events or seminars, obtaining information about the breakdown of unit sales among an intermediary’s representatives or offices, obtaining shelf space in broker/dealer firms and similar activities designed to promote the sale of the Sponsor’s products. The Sponsor makes such payments to a substantial majority of intermediaries that sell First Trust products. The Sponsor may also make certain payments to, or on behalf of, intermediaries to defray a portion of their costs incurred for the purpose of facilitating Unit sales, such as the costs of developing or purchasing trading systems to process Unit trades. Payments of such additional compensation described in this and the preceding paragraph, some of which may be characterized as “revenue sharing,” create a conflict of interest by influencing financial intermediaries and their agents to sell or recommend a First Trust product, including the Trust, over products offered by other sponsors or fund companies. These arrangements will not change the price you pay for your Units.

Advertising and Investment Comparisons.

Advertising materials regarding the Trust may discuss several topics, including: developing a long-term financial plan; working with your financial professional; the nature and risks of various investment strategies and unit investment trusts that could help you reach your financial goals; the importance of discipline; how the Trust operates; how securities are selected; various unit investment trust features such as convenience and costs; and options available for certain types of unit investment trusts. These materials may include descriptions of the principal businesses of the companies represented in the Trust, research analysis of why they were selected and information relating to the qualifications of the persons or entities providing the research analysis. In addition, they may include research opinions on the economy and industry sectors included and a list of investment products generally appropriate for pursuing those recommendations.

From time to time we may compare the estimated returns of the Trust (which may show performance net of the expenses and charges the Trust would have incurred) and returns over specified periods of other similar trusts we sponsor in our advertising and sales materials, with (1) returns on other taxable investments such as the common stocks comprising various market indexes, corporate or U.S. Government bonds, bank CDs and money market accounts or funds, (2) performance data from Morningstar, Inc. or (3) information from publications such as Money, The New York Times, U.S. News and World Report, Bloomberg Businessweek, Forbes or Fortune. The investment characteristics of the Trust differ from other comparative investments. You should not assume that these performance comparisons will be representative of the Trust’s future performance. We may also, from time to time, use advertising which classifies trusts or portfolio securities according to capitalization and/or investment style.

The Sponsor’s Profits

We will receive a gross sales commission equal to the maximum transactional sales charge per Unit of the Trust less any reduction as stated in “Public Offering.” We will also receive the amount of any collected creation and development fee. Also, any difference between our cost to purchase the Securities and the price at which we sell them to the Trust is considered a profit or loss (see Note 2 of “Notes to Schedule of Investments”). During the initial offering period, dealers and others may also realize profits or sustain losses as a result of fluctuations in the Public Offering Price they receive when they sell the Units.

In maintaining a market for the Units, any difference between the price at which we purchase Units and the price at which we sell or redeem them will be a profit or loss to us.

The Secondary Market

Although not obligated, we may maintain a market for the Units after the initial offering period and continuously offer to purchase Units at prices based on the Redemption Price per Unit.

We will pay all expenses to maintain a secondary market, except the Evaluator fees and Trustee costs to transfer and record the ownership of Units. We may discontinue purchases of Units at any time. If you wish to dispose of your Units, you should ask us for the current market prices before making a tender for
redemption to the Trustee. If you sell or redeem your Units before you have paid the total deferred sales charge on your Units, you will have to pay the remainder at that time.

How We Purchase Units

The Trustee will notify us of any tender of Units for redemption. If our bid at that time is equal to or greater than the Redemption Price per Unit, we may purchase the Units. You will receive your proceeds from the sale no later than if they were redeemed by the Trustee. We may tender Units that we hold to the Trustee for redemption as any other Units. If we elect not to purchase Units, the Trustee may sell tendered Units in the over-the-counter market, if any. However, the amount you will receive is the same as you would have received on redemption of the Units.

Expenses and Charges

The estimated annual expenses of the Trust are listed under “Fee Table.” If actual expenses of the Trust exceed the estimate, the Trust will bear the excess. The Trustee will pay operating expenses of the Trust from the Income Account if funds are available, and then from the Capital Account. The Income and Capital Accounts are non-interest-bearing to Unit holders, so the Trustee may earn interest on these funds, thus benefitting from their use. In addition, investors will also indirectly pay a portion of the expenses of the underlying Funds.

First Trust Advisors L.P., an affiliate of ours, acts as Portfolio Supervisor and Evaluator and will be compensated for providing portfolio supervisory services and evaluation services as well as bookkeeping and other administrative services to the Trust. In providing portfolio supervisory services, the Portfolio Supervisor may purchase research services from a number of sources, which may include underwriters or dealers of the Trust. As Sponsor, we will receive brokerage fees when the Trust uses us (or an affiliate of ours) as agent in buying or selling Securities. As authorized by the Indenture, the Trustee may employ a subsidiary or affiliate of the Trustee to act as broker to execute certain transactions for the Trust. The Trust will pay for such services at standard commission rates.

The fees payable to First Trust Advisors L.P. and the Trustee are based on the largest aggregate number of Units of the Trust outstanding at any time during the calendar year, except during the initial offering period, in which case these fees are calculated based on the largest number of Units outstanding during the period for which compensation is paid. These fees may be adjusted for inflation without Unit holders’ approval, but in no case will the annual fees paid to us or our affiliates for providing services to all unit investment trusts be more than the actual cost of providing such services in such year.

As Sponsor, we will receive a fee from the Trust for creating and developing the Trust, including determining the Trust’s objectives, policies, composition and size, selecting service providers and information services and for providing other similar administrative and ministerial functions. The “creation and development fee” is a charge of $.050 per Unit outstanding at the end of the initial offering period. The Trustee will deduct this amount from the Trust’s assets as of the close of the initial offering period. We do not use this fee to pay distribution expenses or as compensation for sales efforts. This fee will not be deducted from your proceeds if you sell or redeem your Units before the end of the initial offering period.

In addition to the Trust’s operating expenses and those fees described above, the Trust may also incur the following charges:

- All legal expenses of the Trustee according to its responsibilities under the Indenture;
- The expenses and costs incurred by the Trustee to protect the Trust and your rights and interests;
- Fees for any extraordinary services the Trustee performed under the Indenture;
- Payment for any loss, liability or expense the Trustee incurred without negligence, bad faith or willful misconduct on its part, in connection with its acceptance or administration of the Trust;
- Payment for any loss, liability or expenses we incurred without negligence, bad faith or willful misconduct in acting as Sponsor of the Trust;
- Foreign custodial and transaction fees (which may include compensation paid to the Trustee or its subsidiaries or affiliates), if any; and/or
- All taxes and other government charges imposed upon the Securities or any part of the Trust.

The above expenses and the Trustee’s annual fee are secured by a lien on the Trust. In addition, if there is not enough cash in the Income or Capital Account, the Trustee has the power to sell Securities to make cash available to pay these charges which may result in capital gains or losses to you. See “Tax Status.”
Federal Tax Matters.

This section discusses some of the main U.S. federal income tax consequences of owning Units of the Trust as of the date of this prospectus. Tax laws and interpretations change frequently, and this summary does not describe all of the tax consequences to all taxpayers. For example, this summary generally does not describe your situation if you are a broker/dealer or other investor with special circumstances. In addition, this section may not describe your state, local or non-U.S. tax consequences.

This federal income tax summary is based in part on the advice of counsel to the Sponsor. The Internal Revenue Service (“IRS”) could disagree with any conclusions set forth in this section. In addition, our counsel may not have been asked to review, and may not have reached a conclusion with respect to the federal income tax treatment of the assets to be deposited in the Trust. This summary may not be sufficient for you to use for the purpose of avoiding penalties under federal tax law.

As with any investment, you should seek advice based on your individual circumstances from your own tax advisor.

Trust Status.

Unit investment trusts maintain both Income and Capital Accounts, regardless of tax structure. Please refer to the “Income and Capital Distributions” section of the prospectus for more information.

The Trust intends to qualify as a “regulated investment company,” commonly known as a “RIC,” under the federal tax laws. If the Trust qualifies as a RIC and distributes its income as required by the tax law, the Trust generally will not pay federal income taxes. For federal income tax purposes, you are treated as the owner of the Trust Units and not of the assets held by the Trust.

Income from the Trust.

After the end of each year, you will receive a tax statement that separates the Trust’s distributions into ordinary income dividends, capital gain dividends, exempt-interest dividends and return of capital. Income that is categorized as exempt-interest dividends generally is excluded from your gross income for federal income tax purposes. Some or all of the exempt-interest dividends may be taken into account for alternative minimum tax purposes and may have other tax consequences. Income reported is generally net of expenses (but see “Treatment of Trust Expenses” below). Ordinary income dividends are generally taxed at your ordinary income tax rate. Generally, all capital gain dividends are treated as long-term capital gains regardless of how long you have owned your Units. In addition, the Trust may make distributions that represent a return of capital for tax purposes and will generally not be currently taxable to you, although they generally reduce your tax basis in your Units and thus increase your taxable gain or decrease your loss when you dispose of your Units. The tax laws may require you to treat distributions made to you in January as if you had received them on December 31 of the previous year.

Some distributions from the Trust may qualify as long-term capital gains, which, if you are an individual, is generally taxed at a lower rate than your ordinary income and short-term capital gain income. The distributions from the Trust that you must take into account for federal income tax purposes is not reduced by the amount used to pay a deferred sales charge, if any. Distributions from the Trust, including capital gains but not exempt-interest dividends, may also be subject to a “Medicare tax” if your adjusted gross income exceeds certain threshold amounts.

Sale of Units.

If you sell your Units (whether to a third party or to the Trust), you will generally recognize a taxable gain or loss. To determine the amount of this gain or loss, you must subtract your (adjusted) tax basis in your Units from the amount you receive from the sale. Your original tax basis in your Units is generally equal to the cost of your Units, including sales charges. In some cases, however, you may have to adjust your tax basis after you purchase your Units, in which case your gain would be calculated using your adjusted basis.

The tax statement you receive in regard to the sale or redemption of your Units may contain information about your basis in the Units and whether any gain or loss recognized by you should be considered long-term or short-term capital gain. The information reported to you is based upon rules that do not take into consideration all of the facts that may be known to you or to your advisors. You should consult with your tax advisor about any adjustments that may need to be made to the information reported to you in determining the amount of your gain or loss.

Distribution Reinvestment Option.

If you elect to reinvest your distributions into additional Units, you will be treated as if you have received your distribution in an amount equal to the distribution you are entitled to. Your tax liability will be the same as if you received the distribution in cash. Also, the rein-
vestment would generally be considered a purchase of new Units for federal income tax purposes.

Treatment of Trust Expenses.

Expenses incurred and deducted by the Trust will generally not be treated as income taxable to you. In some cases, however, you may be required to treat your portion of these Trust expenses as income. You may not be able to take a deduction for some or all of these expenses even if the cash you receive is reduced by such expenses.

Non-U.S. Investors.

If you are a non-U.S. investor, distributions from the Trust treated as dividends will generally be subject to a U.S. withholding tax of 30% of the distribution. Certain dividends, such as capital gains dividends, short-term capital gains dividends, and distributions that are attributable to certain interest income may not be subject to U.S. withholding taxes. In addition, some non-U.S. investors may be eligible for a reduction or elimination of U.S. withholding taxes under a treaty. However, the qualification for those exclusions may not be known at the time of the distribution.

Separately, the United States, pursuant to the Foreign Account Tax Compliance Act (“FATCA”) imposes a 30% tax on certain non-U.S. entities that receive U.S. source interest or dividends if the non-U.S. entity does not comply with certain U.S. disclosure and reporting requirements. This FATCA tax was also scheduled to apply to the gross proceeds from the disposition of securities that produce U.S. source interest or dividends after December 31, 2018. However, proposed regulations may eliminate the requirement to withhold on payments of gross proceeds from dispositions.

It is the responsibility of the entity through which you hold your Units to determine the applicable withholding.

In-Kind Distributions.

If permitted by this prospectus, as described in “Redeeming Your Units,” you may request an In-Kind Distribution of Trust assets when you redeem your Units. This distribution is subject to tax, and you will generally recognize gain or loss, generally based on the value at that time of the securities and the amount of cash received.

You should consult your tax advisor regarding potential foreign, state or local taxation with respect to your Units.

Retirement Plans

You may purchase Units of the Trust for:
• Individual Retirement Accounts;
• Keogh Plans;
• Pension funds; and
• Other tax-deferred retirement plans.

Generally, the federal income tax on capital gains and income received in each of the above plans is deferred until you receive distributions. These distributions are generally treated as ordinary income but may, in some cases, be eligible for special averaging or tax-deferred rollover treatment. Before participating in a plan like this, you should review the tax laws regarding these plans and consult your attorney or tax advisor. Brokerage firms and other financial institutions offer these plans with varying fees and charges.

Rights of Unit Holders

Unit Ownership.

Ownership of Units will not be evidenced by certificates. If you purchase or hold Units through a broker/dealer or bank, your ownership of Units will be recorded in book-entry form at the Depository Trust Company (“DTC”) and credited on its records to your broker/dealer’s or bank’s DTC account. Transfer of Units will be accomplished by book entries made by DTC and its participants if the Units are registered to DTC or its nominee, Cede & Co. DTC will forward all notices and credit all payments received in respect of the Units held by the DTC participants. You will receive written confirmation of your purchases and sales of Units from the broker/dealer or bank through which you made the transaction. You may transfer your Units by contacting the broker/dealer or bank through which you hold your Units.

Unit Holder Reports.

The Trustee will prepare a statement detailing the per Unit amounts (if any) distributed from the Income Account and Capital Account in connection with each distribution. In addition, at the end of each calendar year, the Trustee will prepare a statement which contains the following information:
• A summary of transactions in the Trust for the year;
• A list of any Securities sold during the year and the Securities held at the end of that year by the Trust;
• The Redemption Price per Unit, computed on the 31st
day of December of such year (or the last business day
before); and
• Amounts of income and capital distributed during the
year.

It is the responsibility of the entity through which
you hold your Units to distribute these statements to you.
In addition, you may also request from the Trustee copies
of the evaluations of the Securities as prepared by the
Evaluator to enable you to comply with applicable
federal and state tax reporting requirements.

**Income and Capital Distributions**

You will begin receiving distributions on your Units
only after you become a Record Owner. The Trustee will
credit dividends received on the Trust’s Securities to the
Income Account of the Trust. All other receipts, such as
return of capital or capital gain dividends, are credited to
the Capital Account of the Trust. Dividends received on
foreign Securities, if any, are converted into U.S. dollars
at the applicable exchange rate.

The Trustee will make distributions on or near the
Income Distribution Dates to Unit holders of record on
the preceding Income Distribution Record Date. Distri-
butions will consist of an amount substantially equal to
the Unit holder’s pro rata share of the balance of the
Income Account calculated on the basis of one-twelfth of
the estimated annual dividend distributions (reset on a
quarterly basis) in the Income Account after deducting
estimated expenses. See “Summary of Essential Informa-
tion.” The amount of the initial distribution from the
Income Account will be prorated based on the number of
days in the first payment period. No income distribution
will be paid if accrued expenses of the Trust exceed
amounts in the Income Account on the Distribution
Dates. Distribution amounts will vary with changes in
the Trust’s fees and expenses, in dividends received and
with the sale of Securities. The Trustee will distribute
amounts in the Capital Account, net of amounts desig-
nated to meet redemptions, pay the deferred sales charge
and creation and development fee or pay expenses on the
twenty-fifth day of each month to Unit holders of record
on the tenth day of each month provided the amount
equals at least $1.00 per 100 Units. In any case, the
Trustee will distribute any funds in the Capital Account
in December of each year and as part of the final liquida-
tion distribution. If the Trustee does not have your
taxpayer identification number (“TIN”), it is required to
withhold a certain percentage of your distribution and
deliver such amount to the IRS. You may recover this
amount by giving your TIN to the Trustee, or when you
file a tax return. However, you should check your state-
ments to make sure the Trustee has your TIN to avoid
this “back-up withholding.”

If an Income or Capital Account distribution date is
a day on which the NYSE is closed, the distribution will
be made on the next day the stock exchange is open.
Distributions are paid to Unit holders of record deter-
mined as of the close of business on the Record Date for
that distribution or, if the Record Date is a day on which
the NYSE is closed, the first preceding day on which the
exchange is open.

We anticipate that there will be enough money in the
Capital Account of the Trust to pay the deferred sales
charge. If not, the Trustee may sell Securities to meet the
shortfall.

Within a reasonable time after the Trust is termi-
nated, you will receive the pro rata share of the money
from the sale of the Securities and amounts in the Income
and Capital Accounts. All Unit holders will receive a pro
rata share of any other assets remaining in the Trust, after
deducting any unpaid expenses.

The Trustee may establish reserves (the “Reserve
Account”) within the Trust to cover anticipated state and
local taxes or any governmental charges to be paid out of
the Trust.

**Distribution Reinvestment Option.** You may elect
to have each distribution of income and/or capital rein-
vested into additional Units of the Trust by notifying
your broker/dealer or bank within the time period
required by such entities so that they can notify the
Trustee of your election at least 10 days before any
Record Date. Each later distribution of income and/or
capital on your Units will be reinvested by the Trustee
into additional Units of such Trust. There is no sales
charge on Units acquired through the Distribution Rein-
vestment Option, as discussed under “Public Offering.”
This option may not be available in all states. Each rein-
vestment plan is subject to availability or limitation by
the Sponsor and each broker/dealer or selling firm. The
Sponsor or broker/dealers may suspend or terminate the
offering of a reinvestment plan at any time. Because the
Trust may begin selling Securities nine business days
prior to the Mandatory Termination Date, reinvestment is
not available during this period. Please contact your
financial professional for additional information. Please
note that even if you reinvest distributions, they are
still considered distributions for income tax purposes.
You may redeem all or a portion of your Units at any
time by sending a request for redemption to your broker/
dealer or bank through which you hold your Units. No
redemption fee will be charged, but you are responsible
for any governmental charges that apply. Certain broker/
dealers may charge a transaction fee for processing
redemption requests. Two business days after the day
you tender your Units (the “Date of Tender”) you will
receive cash in an amount for each Unit equal to the
Redemption Price per Unit calculated at the Evaluation
Time on the Date of Tender.

The Date of Tender is considered to be the date on
which your redemption request is received by the Trustee
from the broker/dealer or bank through which you hold
your Units (if such day is a day the NYSE is open for
trading). However, if the redemption request is received
after 4:00 p.m. Eastern time (or after any earlier closing
time on a day on which the NYSE is scheduled in
advance to close at such earlier time), the Date of Tender
is the next day the NYSE is open for trading.

Any amounts paid on redemption representing
income will be withdrawn from the Income Account if
funds are available for that purpose, or from the Capital
Account. All other amounts paid on redemption will be
taken from the Capital Account. The IRS will require the
Trustee to withhold a portion of your redemption
proceeds if the Trustee does not have your TIN as gener-
ally discussed under “Income and Capital Distributions.”

If you tender for redemption at least 2,500 Units, or
such larger amount as required by your broker/dealer or
bank, rather than receiving cash, you may elect to receive
an In-Kind Distribution in an amount equal to the
Redemption Price per Unit by making this request to
your broker/dealer or bank at the time of tender.
However, to be eligible to participate in the In-Kind
Distribution option at redemption, Unit holders must
hold their Units through the end of the initial offering
period. No In-Kind Distribution requests submitted
during the 10 business days prior to the Trust’s Manda-
tory Termination Date will be honored. Where possible,
the Trustee will make an In-Kind Distribution by distrib-
uting each of the Securities in book-entry form to your
bank’s or broker/dealer’s account at DTC. The Trustee
will subtract any customary transfer and registration
charges from your In-Kind Distribution. As a tendering
Unit holder, you will receive your pro rata number of
whole shares of Securities that make up the portfolio, and
cash from the Capital Account equal to the fractional
shares to which you are entitled.

If you elect to receive an In-Kind Distribution of
Securities, you should be aware that it will be considered
a taxable event at the time you receive the Securities. See
“Tax Status” for additional information.

The Trustee may sell Securities to make funds avail-
able for redemption. If Securities are sold, the size and
diversification of the Trust will be reduced. These sales
may result in lower prices than if the Securities were sold
at a different time.

Your right to redeem Units (and therefore, your right
to receive payment) may be delayed:
• If the NYSE is closed (other than customary weekend
and holiday closings);
• If the SEC determines that trading on the NYSE is
restricted or that an emergency exists making sale or
evaluation of the Securities not reasonably practical;
or
• For any other period permitted by SEC order.

The Trustee is not liable to any person for any loss
or damage which may result from such a suspension or
postponement.

The Redemption Price.
The Redemption Price per Unit is determined by the
Trustee by:
adding
1. cash in the Income and Capital Accounts of the
Trust not designated to purchase Securities;
2. the aggregate underlying value of the Securities held
in the Trust; and
3. dividends receivable on the Securities trading ex-
dividend as of the date of computation; and

deducting
1. any applicable taxes or governmental charges that
need to be paid out of the Trust;
2. any amounts owed to the Trustee for its advances;
3. estimated accrued expenses of the Trust, if any;
4. cash held for distribution to Unit holders of record of
the Trust as of the business day before the evaluation
being made;
5. liquidation costs for foreign Securities, if any; and
6. other liabilities incurred by the Trust; and
dividing
1. the result by the number of outstanding Units of the
Trust.

Any remaining deferred sales charge on the Units
when you redeem them will be deducted from your
redemption proceeds. In addition, until they are collected, the Redemption Price per Unit will include estimated organization costs as set forth under “Fee Table.”

Removing Securities from the Trust

The portfolio of the Trust is not managed. However, we may, but are not required to, direct the Trustee to dispose of a Security in certain limited circumstances, including situations in which:

- The issuer of the Security defaults in the payment of a declared dividend;
- Any action or proceeding prevents the payment of dividends;
- There is any legal question or impediment affecting the Security;
- The issuer of the Security has breached a covenant which would affect the payment of dividends, the issuer’s credit standing, or otherwise damage the sound investment character of the Security;
- The issuer has defaulted on the payment of any other of its outstanding obligations;
- There has been a public tender offer made for a Security or a merger or acquisition is announced affecting a Security, and that in our opinion the sale or tender of the Security is in the best interest of Unit holders;
- The sale of Securities is necessary or advisable (i) in order to maintain the qualification of the Trust as a “regulated investment company” in the case of the Trust which has elected to qualify as such or (ii) to provide funds to make any distribution for a taxable year in order to avoid imposition of any income or excise taxes on undistributed income in the Trust which is a “regulated investment company”;
- The price of the Security has declined to such an extent, or such other credit factors exist, that in our opinion keeping the Security would be harmful to the Trust;
- As a result of the ownership of the Security, the Trust or its Unit holders would be a direct or indirect shareholder of a passive foreign investment company; or
- The sale of the Security is necessary for the Trust to comply with such federal and/or state securities laws, regulations and/or regulatory actions and interpretations which may be in effect from time to time.

Except for instances in which the Trust acquires Replacement Securities, as described in “The FT Series,” the Trust will generally not acquire any securities or other property other than the Securities. The Trustee, on behalf of the Trust and at the direction of the Sponsor, will vote for or against any offer for new or exchanged securities or property in exchange for a Security, such as those acquired in a merger or other transaction. If such exchanged securities or property are acquired by the Trust, at our instruction, they will either be sold or held in the Trust. In making the determination as to whether to sell or hold the exchanged securities or property we may get advice from the Portfolio Supervisor. Any proceeds received from the sale of Securities, exchanged securities or property will be credited to the Capital Account of the Trust for distribution to Unit holders or to meet redemption requests. The Trustee may retain and pay us or an affiliate of ours to act as agent for the Trust to facilitate selling Securities, exchanged securities or property from the Trust. If we or our affiliate act in this capacity, we will be held subject to the restrictions under the 1940 Act. When acting in an agency capacity, we may select various broker/dealers to execute securities transactions on behalf of the Trust, which may include broker/dealers who sell Units of the Trust. We do not consider sales of Units of the Trust or any other products sponsored by First Trust as a factor in selecting such broker/dealers. As authorized by the Indenture, the Trustee may also employ a subsidiary or affiliate of the Trustee to act as broker in selling such Securities or property. The Trust will pay for these brokerage services at standard commission rates.

The Trustee may sell Securities designated by us or, absent our direction, at its own discretion, in order to meet redemption requests or pay expenses. In designating Securities to be sold, we will try to maintain the proportionate relationship among the Securities. If this is not possible, the composition and diversification of the Trust may be changed.

Amending or Terminating the Indenture

Amendments. The Indenture may be amended by us and the Trustee without your consent:

- To cure ambiguities;
- To correct or supplement any defective or inconsistent provision;
- To make any amendment required by any governmental agency; or
- To make other changes determined not to be adverse to your best interests (as determined by us and the Trustee).
Termination. As provided by the Indenture, the Trust will terminate on the Mandatory Termination Date as stated in the “Summary of Essential Information.” The Trust may be terminated earlier:

- Upon the consent of 100% of the Unit holders of the Trust;
- If the value of the Securities owned by the Trust as shown by any evaluation is less than the lower of $2,000,000 or 20% of the total value of Securities deposited in the Trust during the initial offering period (“Discretionary Liquidation Amount”); or
- In the event that Units of the Trust not yet sold aggregating more than 60% of the Units of the Trust are tendered for redemption by underwriters, including the Sponsor.

If the Trust is terminated due to this last reason, we will refund your entire sales charge; however, termination of the Trust before the Mandatory Termination Date for any other stated reason will result in all remaining unpaid deferred sales charges on your Units being deducted from your termination proceeds. For various reasons, the Trust may be reduced below the Discretionary Liquidation Amount and could therefore be terminated before the Mandatory Termination Date.

Unless terminated earlier, the Trustee will begin to sell Securities in connection with the termination of the Trust during the period beginning nine business days prior to, and no later than, the Mandatory Termination Date. We will determine the manner and timing of the sale of Securities. Because the Trustee must sell the Securities within a relatively short period of time, the sale of Securities as part of the termination process may result in a lower sales price than might otherwise be realized if such sale were not required at this time.

You will receive a cash distribution from the sale of the remaining Securities, along with your interest in the Income and Capital Accounts, within a reasonable time after the Trust is terminated. The Trustee will deduct from the Trust any accrued costs, expenses, advances or indemnities provided for by the Indenture, including estimated compensation of the Trustee and costs of liquidation and any amounts required as a reserve to pay any taxes or other governmental charges.

Information on the Sponsor, Trustee and Evaluator

The Sponsor.

We, First Trust Portfolios L.P., specialize in the underwriting, trading and wholesale distribution of unit investment trusts under the “First Trust” brand name and other securities. An Illinois limited partnership formed in 1991, we took over the First Trust product line and act as Sponsor for successive series of:

- The First Trust Combined Series
- FT Series (formerly known as The First Trust Special Situations Trust)
- The First Trust Insured Corporate Trust
- The First Trust of Insured Municipal Bonds
- The First Trust GNMA

The First Trust product line commenced with the first insured unit investment trust in 1974. To date we have deposited more than $425 billion in First Trust unit investment trusts. Our employees include a team of professionals with many years of experience in the unit investment trust industry.

We are a member of FINRA and SIPC. Our principal offices are at 120 East Liberty Drive, Wheaton, Illinois 60187; telephone number 800–621–1675. As of December 31, 2018, the total partners’ capital of First Trust Portfolios L.P. was $44,255,416.

This information refers only to us and not to the Trust or to any series of the Trust or to any other dealer. We are including this information only to inform you of our financial responsibility and our ability to carry out our contractual obligations. We will provide more detailed financial information on request.

Code of Ethics. The Sponsor and the Trust have adopted a code of ethics requiring the Sponsor’s employees who have access to information on Trust transactions to report personal securities transactions. The purpose of the code is to avoid potential conflicts of interest and to prevent fraud, deception or misconduct with respect to the Trust.

The Trustee.

The Trustee is The Bank of New York Mellon, a trust company organized under the laws of New York. The Bank of New York Mellon has its unit investment trust division offices at 240 Greenwich Street, New York, New York 10286, telephone 800–813–3074. If you have questions regarding your account or your Trust, please contact the Trustee at its unit investment trust division offices or your financial advisor. The Sponsor does not have access to individual account information. The Bank of New York Mellon is subject to supervision and examination by the Superintendent of the New York State Department of Financial Services and the Board of Governors of the Federal Reserve System, and its deposits are insured by the Federal Deposit Insurance Corporation to the extent permitted by law.
The Trustee has not participated in selecting the Securities for the Trust; it only provides administrative services.

**Limitations of Liabilities of Sponsor and Trustee.**

Neither we nor the Trustee will be liable for taking any action or for not taking any action in good faith according to the Indenture. We will also not be accountable for errors in judgment. We will only be liable for our own willful misfeasance, bad faith, gross negligence (ordinary negligence in the Trustee’s case) or reckless disregard of our obligations and duties. The Trustee is not liable for any loss or depreciation when the Securities are sold. If we fail to act under the Indenture, the Trustee may do so, and the Trustee will not be liable for any action it takes in good faith under the Indenture.

The Trustee will not be liable for any taxes or other governmental charges or interest on the Securities which the Trustee may be required to pay under any present or future law of the United States or of any other taxing authority with jurisdiction. Also, the Indenture states other provisions regarding the liability of the Trustee.

If we do not perform any of our duties under the Indenture or are not able to act or become bankrupt, or if our affairs are taken over by public authorities, then the Trustee may:

- Appoint a successor sponsor, paying them a reasonable rate not more than that stated by the SEC;
- Terminate the Indenture and liquidate the Trust; or
- Continue to act as Trustee without terminating the Indenture.

**The Evaluator.**

The Evaluator is First Trust Advisors L.P., an Illinois limited partnership formed in 1991 and an affiliate of the Sponsor. The Evaluator’s address is 120 East Liberty Drive, Wheaton, Illinois 60187.

The Trustee, Sponsor and Unit holders may rely on the accuracy of any evaluation prepared by the Evaluator. The Evaluator will make determinations in good faith based upon the best available information, but will not be liable to the Trustee, Sponsor or Unit holders for errors in judgment.

**Experts.**

Our counsel is Chapman and Cutler LLP, 111 W. Monroe St., Chicago, Illinois 60603. They have passed upon the legality of the Units offered hereby and certain matters relating to federal tax law. Carter Ledyard & Milburn LLP acts as the Trustee’s counsel.

**Supplemental Information.**

If you write or call the Sponsor, you will receive free of charge supplemental information about this Series, which has been filed with the SEC and to which we have referred throughout. This information states more specific details concerning the nature, structure and risks of this product.

When Units of the Trust are no longer available, this prospectus may be used as a preliminary prospectus for a future series, in which case you should note the following:

*The information in the prospectus is not complete and may be changed. We may not sell, or accept offers to buy, securities of a future series until that series has become effective with the SEC. No securities can be sold in any state where a sale would be illegal.*

This prospectus contains information relating to the above-mentioned unit investment trust, but does not contain all of the information about this investment company as filed with the SEC in Washington, D.C. under the:

- Securities Act of 1933 (file no. 333–232176) and
- Investment Company Act of 1940 (file no. 811–05903)

Information about the Trust, including its Codes of Ethics, can be reviewed and copied at the SEC’s Public Reference Room in Washington, D.C. Information regarding the operation of the SEC’s Public Reference Room may be obtained by calling the SEC at 202–942–8090.

Information about the Trust is available on the EDGAR Database on the SEC’s Internet site at www.sec.gov.
