<sup>3</sup>On December 15, 2006, the First Trust Value Line® Dividend Index Fund acquired the assets and adopted the performance history of the First Trust Value Line® Dividend Fund, a closed-end fund, and on June 15, 2007, the First Trust Value Line® 100 Exchange-Traded Fund acquired the assets and adopted the performance history of the First Trust Value Line® 100 Fund, also a closed-end fund. The investment goals, strategies and policies of the funds are substantially similar to those of the predecessor funds. Performance information for periods prior to December 15, 2006 and June 15, 2007 respectively is based on the performance history of the predecessor funds and reflects the operating expenses of the predecessor funds.

<sup>4</sup>First Trust has contractually agreed to reimburse acquired fund fees and expenses of the shares of investment companies held by the fund, provided that the investment companies are advised by the fund's investment advisor. The reimbursement is based on estimated amounts for the current fiscal year. The agreement will remain in place until at least March 31, 2019, or until its termination at the direction of the Trust's Board of Trustees. Please see the Fees and Expenses of the Fund section in the fund's prospectus for more details.

<sup>5</sup>Based on estimated amounts for the current fiscal year, First Trust has contractually agreed to reduce management fees earned by the fund for management fees due to be paid to the underlying investment companies advised by First Trust. The agreement will remain in place until at least January 31, 2019 for MDIV, April 10, 2019 for ERM and TERM, or until its termination at the direction of the Trust's Board of Trustees, or the termination of the Investment Management Agreement. Please see the Fees and Expenses of the Fund section in the fund's prospectus for more details.

<sup>6</sup>Based on estimated amounts for the current fiscal year. First Trust has contractually agreed to waive management fees of 0.10% of average daily net assets until March 1, 2019. Please see the Fees and Expenses of the Fund section in the fund's prospectus for more details.

<sup>7</sup>First Trust has contractually agreed to waive management fees of 0.10% of average daily net assets until February 13, 2019 for FIXD; and until June 5, 2019 for UCON.

<sup>8</sup>First Trust has contractually agreed to waive management fees of 0.15% of average daily net assets until March 1, 2019 for FMB; until June 16, 2019 for FCAL; and until October 26, 2019 for FMHI.

NAV returns are based on the fund's net asset value which represents the fund's net assets (assets less liabilities) divided by the fund's outstanding shares. Market Price returns are based on the midpoint of the bid/ask spread on the stock exchange on which shares of the fund are listed for trading as of the time that the fund's NAV is calculated. Returns are average annualized total returns, except those for periods of less than one year, which are cumulative. A fund's performance may reflect fee waivers and expense reimbursements, absent which performance would have been lower.

**Performance information for the indexes is for illustrative purposes only and does not represent the performance of any actual investment or fund.** Actual performance of a fund may be lower or higher than the index. Indexes do not charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown. Indexes are unmanaged and an investor cannot invest directly in an index.

## ETF Characteristics

Investors buying or selling fund shares on the secondary market may incur customary brokerage commissions. Investors who sell fund shares may receive less than the share's net asset value. Shares may be sold throughout the day on the exchange through any brokerage account. However, unlike mutual funds, shares may only be redeemed directly from a fund by authorized participants, in very large creation/redemption units. If a fund's authorized participants are unable to proceed with creation/redemption orders and no other authorized participant is able to step forward to create or redeem, fund shares may trade at a discount to the fund's net asset value and possibly face delisting.

## Risk Considerations

A fund's shares will change in value, and you could lose money by investing in a fund. There can be no assurance that a fund's investment objective will be achieved.

An index fund's return may not match the return of the applicable index. Securities held by an index fund will generally not be bought or sold in response to market fluctuations.

Actively managed funds are subject to management risk because the advisor or sub-advisor will apply investment techniques and risk analyses that may not have the desired result.

A fund may invest in a concentrated portfolio which involves additional risks including limited diversification.

A fund may invest in small capitalization and mid capitalization companies. Such companies may experience greater price volatility than larger companies.

A fund containing securities of non-U.S. issuers is subject to additional risks as non-U.S. issuers are subject to higher volatility than securities of U.S. issuers. Risks may be heightened for securities of companies located in, or with significant operations in, emerging market countries. Non-U.S. dollar denominated securities may lose money if the local currency depreciates against the U.S. dollar.

Fixed-income securities held by certain of the funds may be subject to credit risk, call risk, income risk, interest rate risk, prepayment risk, extension risk and zero coupon risk. These risks could result in the decline in the value of a security held by a fund, a decline in a fund's income, increased volatility as interest rates rise or fall, and an adverse impact on fund performance. These risks may be heightened for high-yield securities.

Income from municipal bonds could be declared taxable and all or a portion of a fund's otherwise exempt interest dividends may be taxable to investors subject to the federal alternative minimum tax.

Alternative investments may employ complex strategies, have unique investment and risk characteristics that may not be suitable for all investors.

The use of options, warrants and any other derivatives may lead to losses because of adverse movements in the price or value of the underlying asset, index or rate, which may be magnified by certain features of the derivatives.

The trading prices of commodities, commodities-linked instruments, and commodities futures may fluctuate and may not correlate to price movements in other asset classes.

A fund may invest in other investment companies which involves additional expenses that would not be present in a direct investment in the underlying funds. In addition, a fund's investment performance and risks may be related to the investment performance and risks of the underlying funds.

A fund may effect a portion of creations and redemptions for cash, rather than in-kind securities. As a result, a fund may be less tax-efficient.

FAAR, FTGC and FMF do not invest directly in futures instruments. Rather, each fund invests in a wholly-owned subsidiary, which has the same investment objective as the funds, but unlike the funds it may invest without limitation in futures instruments. The subsidiary is not registered under the Investment Company Act of 1940 and is not subject to all its investor protections. Thus, the fund, as an investor in the subsidiary, will not have all the protections offered to investors in registered investment companies.

Certain funds are classified as "non-diversified" and may invest a relatively high percentage of their assets in a limited number of issuers. As a result, the funds may be more susceptible to a single adverse economic or regulatory occurrence affecting one or more of these issuers, experience increased volatility and be highly concentrated in certain issuers.

First Trust Advisors L.P. (FTA) is the adviser to the funds. FTA is an affiliate of First Trust Portfolios L.P., the funds' distributor.

First Trust Advisors L.P. is registered as a commodity pool operator and commodity trading advisor and is also a member of the National Futures Association.
