Portfolio Objective

The FTA Balanced Closed-End Fund is a strategy which seeks to provide total return, with the potential for income as a secondary objective. Under normal conditions, at least 80% of the strategy will invest in a blend of equity and taxable fixed-income based closed-end funds. The strategy may also invest in Business Development Companies (BDC), as well as equity and fixed-income ETFs, which may include inverse equity and taxable fixed-income ETFs.

Investment Selection Process

Z-Statistics - A statistical measure designed to see whether a current observation is close to the mean for a given period. A positive Z-statistic indicates the current value is higher than the mean and a negative that it is lower.
UNII - Undistributed net income per share, given in U.S. dollars.

There can be no assurance that a purchase of the securities in this strategy will be profitable, either individually or in the aggregate, or that such purchase will be more profitable than alternative investments.

First Trust Advisors L.P. (FTA) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS® standards. FTA has been independently verified for the periods August 1, 1999 through June 30, 2017. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS® standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS® standards. The FTA Balanced Closed-End Fund Composite has been examined for periods July 1, 2009 through June 30, 2017. The verification and performance examination reports are available upon request.

Year	Pure Gross-of-Fees Return*	Net-of-Fees Return	Benchmark Return	Composite 3-Year St. Dev.	Benchmark 3-Year St. Dev.	Number of Portfolios	Composite Dispersion	Composite Market Value (in millions)	Total Firm Assets (in millions)

* Pure gross-of-fees returns are presented as supplemental information to the disclosures required by GIPS®.

Notes:

1. First Trust Advisors L.P. (FTA) was founded in 1991 and is a registered investment advisor with the Securities and Exchange Commission (SEC). FTA provides investment advisory services using equity, fixed-income and balanced strategies for individuals, organizations and institutions. The firm consists of all portfolios managed by FTA. Since 2011, the Total Firm Assets are presented net and have been reduced for the effects of leverage. Prior to 2011, the Total Firm Assets are presented gross and have not been reduced for the effects of leverage.
2. The FTA Balanced Closed-End Fund Composite consists principally of closed-end equity and fixed-income funds. The composite creation date was July 2009. A complete list of composites and descriptions is available upon request.
3. The composite includes 100% wrap portfolios since inception for which FTA has full discretionary investment authority and are fee-paying portfolios. The composite does not utilize a material level of leverage.
4. Composite net-of-fees returns are presented net of actual fees, but in instances where actual fees are not identifiable, a maximum model fee of 3% is applied. Net-of-fees returns include investment management fees, custodian fees, trading costs and all other administrative fees. Pure gross-of-fees returns do not reflect the deduction of any expenses, including investment management fees, custodian fees, trading costs and other administrative fees. Prior to 12/31/11, quarterly and annual composite returns were calculated by linking monthly returns. Each portfolio in the composite was valued at least on a monthly basis. If cash flows exceed 10% of the composite's value, the composite was revalued on the day prior to the cash flow and the return was calculated for the interim period. Starting 1/1/12, composite returns are calculated on a daily basis.
5. Valuations and returns are computed and stated in U.S. Dollars. Returns are calculated net of foreign taxes recorded on a cash basis and dividend accruals do not include pending withholding tax reclaims. Additional information regarding policies for valuing portfolios, calculating performance and preparing compliant presentations is available upon request.
6. The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The three-year annualized standard deviation is not presented because 36 monthly composite and benchmark returns were not available prior to 2012.
7. Composite dispersion is measured by standard deviation, which is an asset-weighted calculation that measures the consistency of composite performance with respect to the individual portfolio returns within the composite. Dispersion of portfolios in the composite is not applicable if the period presented is less than a full year or if there were fewer than five portfolios in the composite for the entire year.
8. The benchmark return is a blend of the following indices; Morningstar U.S. All Equity Closed-End Funds Index (60%) - a weighted average of the market price of closed-end funds which invest in U.S. equity securities, and Morningstar U.S. All Taxable Fixed-Income Index (40%) - a weighted average of the market price of closed-end funds which invest in Taxable Fixed-Income securities.
9. The securities comprising the benchmark are not identical to those in any portfolio in the composite, but FTA believes they may be useful in evaluating performance. Unlike the composite, the benchmark is not actively managed and does not reflect the deduction of advisory fees. Differences in composite performance versus benchmark performance may also result due to high concentrations of individual securities holdings in certain portfolios, timing of security transactions and tax considerations. Such factors may contribute to higher standard deviation of portfolio returns within the composite. The benchmark is rebalanced daily. Benchmark returns have not been examined by the verifier.
10. The FTA management fee schedule is an annual fee of 0.50%. FTA, at its discretion, may negotiate a management fee which is different from the standard fee schedule listed here. The overall wrap fee expense for accounts in the composite will typically range from 1.00% to 3.00%.
11. Past performance is not indicative of future results. Other methods may produce different results, and the results for individual portfolios and for different periods may vary depending on market conditions and the composition of the portfolio. Care should be used when comparing these results to those published by other investment advisers, other investment vehicles and unmanaged indices due to possible differences in calculation methods.
