Sabrient Systems, LLC is an independent equity research firm that builds powerful investment strategies by using a fundamentals-based, quantitative approach. The strategies are used to create rankings and ratings on more than 7,000 stocks, indices, sectors, and ETFs. Their models are designed to identify those companies that are anticipated to outperform or underperform the market. Historically, certain stocks have outperformed the market in periods during which longer-term Treasury bonds have rising yields and Sabrient believes 10-year and longer Treasury yields are likely to rise over the next several years. The Sabrient Rising Rate Portfolio is a unit investment trust that seeks to find companies that Sabrient believes are positioned to perform well in environments of rising Treasury yields. The stocks in the portfolio are selected by applying a comprehensive investment strategy developed by Sabrient.

PORTFOLIO SELECTION PROCESS

SELECTION UNIVERSE
Select all common stocks trading domestically that have a market cap greater than $500 million and sufficient liquidity and sufficient analyst coverage to be included in the portfolio.

DETERMINE AGGRESSIVENESS OF ACCOUNTING
Use EQR (earnings quality rank), Sabrient’s proprietary forensic accounting factor, to measure the aggressiveness of accounting for each company. Eliminate the stocks that score in the bottom quintile of this score, seeking to attempt to avoid companies that could be overstating or even “creating” the reported growth.

DETERMINE PERFORMANCE IN RISING TREASURY YIELD ENVIRONMENTS
Rank the companies Sabrient expects to do well in rising Treasury yield environments and select the top 100 for further consideration.

ESTIMATE FORWARD EARNINGS
Estimate forward earnings and divide that estimated growth by current price to rank all stocks in order of their GARP score (growth at a reasonable price).

SELECT APPROXIMATELY 46 STOCKS
Select approximately 46 of the highest ranked stocks for the portfolio with a maximum of approximately 30% of all stocks in one sector and a maximum of 18% of all stocks in any one industry.

PORTFOLIO OBJECTIVE

This unit investment trust seeks above-average capital appreciation; however, there is no assurance the objective will be met.

RISK CONSIDERATIONS

An investment in this unmanaged unit investment trust should be made with an understanding of the risks involved with owning common stocks, such as an economic recession and the possible deterioration of either the financial condition of the issuers of the equity securities or the general condition of the stock market.

An investment in a portfolio containing equity securities of foreign issuers is subject to additional risks, including currency fluctuations, political risks, withholding, the lack of adequate financial information, and exchange control restrictions impacting foreign issuers.

An investment in a portfolio containing small-cap and mid-cap companies is subject to additional risks, as the share prices of small-cap companies and certain mid-cap companies are often more volatile than those of larger companies due to several factors, including limited trading volumes, products, financial resources, management inexperience and less publicly available information.

The value of the securities held by the trust may be subject to steep declines or increased volatility due to changes in performance or perception of the issuers.

As the use of Internet technology has become more prevalent in the course of business, the trust has become more susceptible to potential operational risks through breaches in cyber security.

This UIT is a buy and hold strategy and investors should consider their ability to hold the trust until maturity. There may be tax consequences unless units are purchased in an IRA or other qualified plan.

You should consider the portfolio’s investment objective, risks, and charges and expenses carefully before investing. Contact your financial advisor or call First Trust Portfolios L.P. at the number listed below to request a prospectus, which contains this and other information about the portfolio. Read it carefully before you invest.
