

The Richard Bernstein Advisors Quality Income Portfolio is a unit investment trust (UIT) which seeks total return through a combination of dividend income and capital appreciation; however, there is no assurance the objective will be met. A UIT is an investment vehicle which consists of a professionally selected unmanaged portfolio of securities which are held for a predetermined period of time. The value of the units of the trust will fluctuate each day with the value of the underlying securities; therefore it is possible to lose money by investing in the trust.

SALES CHARGES (BASED ON A \$10 PUBLIC OFFERING PRICE)

STANDARD ACCOUNTS

Transactional Sales Charges:	Initial 0.00%
	Deferred 1.35%
Creation & Development Fee:	0.50%
Maximum Sales Charge:	1.85%

The deferred sales charge will be deducted in three monthly installments commencing 10/19/18. When the public offering price is less than or equal to \$10.00 per unit, there will be no initial sales charge. If the price exceeds \$10.00 per unit, you will pay an initial sales charge.

FEE/WRAP ACCOUNTS

Maximum Sales Charge:	0.50%
-----------------------	-------

The maximum sales charge for investors in fee accounts consists of the creation and development fee. Investors in fee accounts are not assessed any transactional sales charges. Standard accounts sales charges apply to units purchased as an ineligible asset. The creation and development fee is a charge of \$.050 per unit collected at the end of the initial offering period. If the price you pay exceeds \$10.00 per unit, the creation and development fee will be less than 0.50%; if the price you pay is less than \$10.00 per unit, the creation and development fee will exceed 0.50%. In addition to the sales charges listed, UITs are subject to annual operating expenses and organization costs.

RISK CONSIDERATIONS

An investment in this unmanaged unit investment trust should be made with an understanding of the risks involved with owning common stocks, such as an economic recession and the possible deterioration of either the financial condition of the issuers of the equity securities or the general condition of the stock market.

You should be aware that the portfolio is concentrated in stocks in the financials sector which involves additional risks, including limited diversification. The companies engaged in the financials sector are subject to the adverse effects of volatile interest rates, economic recession, decreases in the availability of capital, increased competition from new entrants in the field, and potential increased regulation.

One of the securities in the portfolio is issued by a Real Estate Investment Trust (REIT). Companies involved in the real estate industry are subject to changes in the real estate market, vacancy rates and competition, volatile interest rates and economic recession.

Although this portfolio terminates in approximately 15 months, the strategy is long-term. Investors should consider their ability to pursue investing in successive portfolios, if available. There may be tax consequences unless units are purchased in an IRA or other qualified plan. The value of the securities held by the trust may be subject to steep declines or increased volatility due to changes in performance or perception of the issuers.

HOLDINGS STYLE ANALYSIS

HOLDINGS SECTOR ANALYSIS

HOLDINGS COMPOSITION

U.S. Stocks	86.00%
Non-U.S. Stocks	14.00%

The holdings characteristics of the portfolio are determined as of the initial date of deposit and may differ slightly from those indicated above due to the requirement that only whole shares be purchased for the portfolio and will likely vary thereafter due to market fluctuations in the underlying securities. For a complete description of these characteristics refer to the prospectus.

An investment in a portfolio containing small-cap and mid-cap companies is subject to additional risks, as the share prices of small-cap companies and certain mid-cap companies are often more volatile than those of larger companies due to several factors, including limited trading volumes, products, financial resources, management inexperience and less publicly available information.

Certain of the common stocks held by the trust are issued by foreign entities. An investment in a portfolio containing equity securities of foreign issuers is subject to additional risks, including currency fluctuations, political risks, withholding, the lack of adequate financial information, and exchange control restrictions impacting foreign issuers. Risks associated with investing in foreign securities may be more pronounced in emerging markets where the securities markets are substantially smaller, less developed, less liquid, less regulated, and more volatile than the U.S. and developed foreign markets.

As the use of Internet technology has become more prevalent in the course of business, the trust has become more susceptible to potential operational risks through breaches in cyber security.
