SOURCES OF INFORMATION

We collect nonpublic personal information (NPPI) about you through our transfer agents that collect, use and maintain the information needed to administer your account with us. The NPPI is received by the transfer agent from your broker-dealer, investment professional or financial representative on your behalf through applications or other documentation you provide to establish your account with us.

We also collect information when you visit our website through the use of "cookies". For example, we may identify the pages on our website that your browser requests or visits.

INFORMATION COLLECTED

The type of NPPI we collect through our transfer agent may include your name, address, social security number, date of birth and other NPPI necessary for the transfer agent to administer your account and verify your identity under federal law.

DISCLOSURE OF INFORMATION

We do not disclose, and do not authorize our transfer agents to disclose, NPPI about our consumers, customers or former customers to anyone, except as permitted by law. In addition to using this information to administer your account and verify your identity through our transfer agents, the permitted uses may also include the disclosure of NPPI to other unaffiliated third-parties for the following reasons:

- to assist us in the distribution of First Trust Fund materials such as trustees, banks, investment advisor or broker-dealer representatives, proxy services, solicitors and printers;
- if you direct us to do so.
- when required by law or in other legally limited circumstances, such as to protect your account from fraud.

PROTECTION OF NPPI COLLECTED

The First Trust Funds engage trusted transfer agents who are subject to the Regulation S-P data protection requirements and must protect your NPPI from unauthorized access and use through security measures that comply with federal law. The First Trust Funds take reasonable measures to review and monitor transfer agent compliance with these requirements and transfer agent cybersecurity and breach risk through third party software and other safeguards.
