DATED MARCH 3, 2025

This Statement of Additional Information ("SAI") is not a prospectus. It should be read in conjunction with the prospectus dated March 3, 2025, as it may be revised from time to time (the "*Prospectus*"), for First Trust Preferred Securities and Income ETF (the "*Fund*"), a series of the First Trust Exchange-Traded Fund III (the "*Trust*"). Capitalized terms used herein that are not defined have the same meaning as in the Prospectus, unless otherwise noted. A copy of the Prospectus may be obtained without charge by writing to the Trust's distributor, First Trust Portfolios L.P., 120 East Liberty Drive, Suite 400, Wheaton, Illinois 60187, or by calling toll free at (800) 621-1675.

The audited financial statements for the Fund's most recent fiscal year appear in the Fund's Form N-CSR dated October 31, 2024, which was filed with the Securities and Exchange Commission (the "*SEC*") on January 10, 2025. The financial statements from the Form N-CSR are incorporated herein by reference. The Form N-CSR is available without charge by calling (800) 621-1675 or by visiting the SEC's website at <http://www.sec.gov>.

GENERAL DESCRIPTION OF THE TRUST AND THE FUND

The Trust was organized as a Massachusetts business trust on January 9, 2008 and is authorized to issue an unlimited number of shares in one or more series. The Trust is an open-end management investment company, registered under the Investment Company Act of 1940, as amended (the "1940 Act"). This SAI relates to the Fund, which is a diversified series.

The Fund, as a series of the Trust, represents a beneficial interest in a separate portfolio of securities and other assets, with its own objective and policies. The Fund was previously classified as non-diversified. As a result of ongoing operations, the Fund is now classified as a diversified investment company. The Fund may not in the future operate in a non-diversified manner without first obtaining shareholder approval.

The Board of Trustees of the Trust (the "*Board*," "*Board of Trustees*" or "*Trustees*") has the right to establish additional series in the future, to determine the preferences, voting powers, rights and privileges thereof and to modify such preferences, voting powers, rights and privileges without shareholder approval. Shares of any series may also be divided into one or more classes at the discretion of the Trustees.

The Trust or any series or class thereof may be terminated at any time by the Board of Trustees upon written notice to the shareholders.

Each share has one vote with respect to matters upon which a shareholder vote is required consistent with the requirements of the 1940 Act and the rules promulgated thereunder. Shares of all series of the Trust vote together as a single class except as otherwise required by the 1940 Act or if the matter being voted on affects only a particular series, and, if a matter affects a particular series differently from other series, the shares of that series will vote separately on such matter. The Trust's Declaration of Trust (the "*Declaration*") requires a shareholder vote only on those matters where the 1940 Act requires a vote of shareholders and otherwise permits the Trustees to take actions without seeking the consent of shareholders. For example, the Declaration gives the Trustees broad authority to approve reorganizations between the Fund and another entity, such as another exchange-traded fund, or the sale of all or substantially all of the Fund's assets, or the termination of the Trust or the Fund without shareholder approval if the 1940 Act would not require such approval.

The Declaration provides that by becoming a shareholder of the Fund, each shareholder shall be expressly held to have agreed to be bound by the provisions of the Declaration and to any By-laws adopted by the Trust. The Declaration provides that, except as set forth therein and authorized by the Trustees, shareholders have no rights, privileges, claims or remedies under any contract or agreement entered into by the Trust or the Fund with any service provider or other agent to or contractor with the Trust or the Fund including, without limitation, any third party beneficiary rights.

The Declaration may, except in limited circumstances, be amended by the Trustees in any respect without a shareholder vote. The Declaration provides that the Trustees may establish the number of Trustees and that vacancies on the Board of Trustees may be filled by the remaining Trustees, except when election of Trustees by the shareholders is required under the 1940 Act. Trustees are then elected by a plurality of votes cast by shareholders at a meeting at which a quorum is present. The Declaration also provides that Trustees may be removed, with or without cause, by a vote of shareholders holding at least two-thirds of the voting power of the Trust, or by a vote of two-thirds of the remaining Trustees. The provisions of the Declaration relating to the election and removal of Trustees may not be amended without the approval of two-thirds of the Trustees.

The holders of Fund shares are required to disclose information on direct or indirect ownership of Fund shares as may be required to comply with various laws applicable to the Fund or as the Trustees may determine, and ownership of Fund shares may be disclosed by the Fund if so required by law or regulation. In addition, pursuant to the Declaration, the Trustees may, in their discretion, require the Trust to redeem shares held by any shareholder for any reason under terms set by the Trustees.

The Declaration provides a detailed process for the bringing of derivative actions by shareholders in order to permit legitimate inquiries and claims while avoiding the time, expense, distraction and other harm that can be caused to the Fund or its shareholders as a result of spurious shareholder demands and derivative actions. In addition, the Declaration provides that actions that are derivative in nature may not be brought directly. Prior to bringing a derivative action, a demand must first be made on the Trustees. The Declaration details various information, certifications, undertakings and acknowledgements that must be included in the demand. Following receipt of the demand, the Trustees have a period of 90 days, which may be extended by an additional 60 days, to consider the demand. If a majority of the Trustees who are considered independent for the purposes of considering the demand determine that maintaining the suit would not be in the

best interests of the Fund, the Trustees are required to reject the demand and the complaining shareholder may not proceed with the derivative action unless the shareholder is able to sustain the burden of proof to a court that the decision of the Trustees not to pursue the requested action was not a good faith exercise of their business judgment on behalf of the Fund. In making such a determination, a Trustee is not considered to have a personal financial interest by virtue of being compensated for his or her services as a Trustee. If a demand is rejected, the complaining shareholder will be responsible for the costs and expenses (including attorneys' fees) incurred by the Fund in connection with the consideration of the demand under a number of circumstances. In addition, if a court determines that a derivative action was made without reasonable cause or for an improper purpose, or if a derivative or direct action is dismissed on the basis of a failure to comply with the procedural provisions relating to shareholder actions as set forth in the Declaration, or if a direct action is dismissed by a court for failure to state a claim, the shareholder bringing the action may be responsible for the Fund's costs, including attorneys' fees.

The provisions of the Declaration provide that any direct or derivative action commenced by a shareholder must be brought only in the U.S. District Court for the District of Massachusetts (Boston Division) or if any such action may not be brought in that court, then in the Business Litigation Session of Suffolk Superior Court in Massachusetts (the "*Chosen Courts*"). Except as prohibited by applicable law, if a shareholder commences an applicable action in a court other than a Chosen Court without the consent of the Fund, then such shareholder may be obligated to reimburse the Fund and any applicable Trustee or officer of the Fund made party to such proceeding for the costs and expenses (including attorneys' fees) incurred in connection with any successful motion to dismiss, stay or transfer of the action. The Declaration also provides that any shareholder bringing an action against the Fund waives the right to trial by jury to the fullest extent permitted by law.

The Trust is not required to and does not intend to hold annual meetings of shareholders.

Under Massachusetts law applicable to Massachusetts business trusts, shareholders of such a trust may, under certain circumstances, be held personally liable as partners for its obligations. However, the Declaration contains an express disclaimer of shareholder liability for acts or obligations of the Trust and requires that notice of this disclaimer be given in each agreement, obligation or instrument entered into or executed by the Trust or the Trustees. The Declaration further provides for indemnification out of the assets and property of the Trust for all losses and expenses of any shareholder held personally liable for the obligations of the Trust. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which both inadequate insurance existed and the Trust or the Fund itself was unable to meet its obligations.

The Declaration provides that a Trustee acting in his or her capacity as Trustee is liable to the Trust for his or her own bad faith, willful misfeasance, gross negligence, or reckless disregard of his or her duties involved in the conduct of the individual's office, and for nothing else and shall not be liable for errors of judgment or mistakes of fact or law. The Declaration also provides that the Trustees of the Trust will be subject to the laws of the Commonwealth of Massachusetts relating to Massachusetts business trusts, but not to the laws of Massachusetts relating to the trustees of common law trusts, such as donative or probate type trusts. The Declaration further provides that a Trustee acting in his or her capacity as Trustee is not personally liable to any person other than the Trust, for any act, omission, or obligation of the Trust. The Declaration requires the Trust to indemnify any persons who are or who have been Trustees, officers or employees of the Trust for any liability for actions or failure to act except to the extent prohibited by applicable federal law. In making any determination as to whether any person is entitled to the advancement of expenses in connection with a claim for which indemnification is sought, such person is entitled to a rebuttable presumption that he or she did not engage in conduct for which indemnification is not available. The Declaration provides that any Trustee who serves as chair of the Board of Trustees or of a committee of the Board of Trustees, as lead independent Trustee or as audit committee financial expert, or in any other similar capacity will not be subject to any greater standard of care or liability because of such position.

These provisions are not intended to restrict any shareholder rights under the federal securities laws and the Declaration specifically provides that no provision of the Declaration shall be effective to require a waiver of compliance with any provision of, or restrict any shareholder rights expressly granted by, the Securities Act of 1933, as amended (the "*1933 Act*"), the Securities Exchange Act of 1934, as amended (the "*1934 Act*") or the 1940 Act, or any valid rule, regulation or order of the Securities Exchange Commission thereunder.

The Fund is advised by First Trust Advisors L.P. (the "*Advisor*" or "*First Trust*") and sub-advised by Stonebridge Advisors LLC ("*Stonebridge*" or the "*Sub-Advisor*").

The shares of the Fund are principally listed and traded on NYSE Arca, Inc. ("NYSE Arca" or the "Exchange") as shown on the cover of this SAI. ETFs, such as the Fund, do not sell or redeem individual shares of the Fund. Instead, financial entities known as "Authorized Participants" (which are discussed in greater detail below) have contractual arrangements with the Fund or the Distributor to purchase and redeem Fund shares directly with the Fund in large blocks of shares known as "Creation Units." An Authorized Participant that purchases a Creation Unit of Fund shares deposits with the Fund a "basket" of securities, cash and/or other assets identified by the Fund that day, and then receives the Creation Unit of Fund shares in return for those assets. The redemption process is the reverse of the purchase process: the Authorized Participant redeems a Creation Unit of Fund shares for a basket of securities, cash and/or other assets. The basket is generally representative of the Fund's portfolio, and together with a cash balancing amount, it is equal to the NAV of the Fund shares comprising the Creation Unit. Pursuant to Rule 6c-11 of the 1940 Act, the Fund may utilize baskets that are not representative of the Fund's portfolio. Such "custom baskets" are discussed in the section entitled "Creation and Redemption of Creation Units."

Fund shares may be issued in advance of receipt of deposit securities subject to various conditions including a requirement to maintain on deposit with the Fund cash at least equal to 115% of the market value of the missing deposit securities. See the section entitled "Creation and Redemption of Creation Units." In each instance of such cash creations or redemptions, transaction fees may be imposed that will be higher than the transaction fees associated with in-kind creations or redemptions. In all cases, such fees will be limited in accordance with the requirements of the SEC applicable to management investment companies offering redeemable securities.

EXCHANGE LISTING AND TRADING

There can be no assurance that the requirements of the Exchange necessary to maintain the listing of shares of the Fund will continue to be met. The Exchange may, but is not required to, remove the shares of the Fund from listing if (i) following the initial 12-month period beginning at the commencement of trading of the Fund, there are fewer than 50 beneficial owners of the shares of the Fund for 30 or more consecutive trading days; or (ii) such other event shall occur or condition exist that, in the opinion of the Exchange, makes further dealings on the Exchange inadvisable. The Exchange will remove the shares of the Fund from listing and trading upon termination of the Fund.

As in the case of other stocks traded on the Exchange, brokers' commissions on transactions will be based on negotiated commission rates at customary levels.

The Fund reserves the right to adjust the price levels of shares in the future to help maintain convenient trading ranges for investors. Any adjustments would be accomplished through stock splits or reverse stock splits, which would have no effect on the net assets of the Fund.

INVESTMENT OBJECTIVE AND POLICIES

The Prospectus describes the investment objective and certain policies of the Fund. The following supplements the information contained in the Prospectus concerning the investment objective and policies of the Fund.

The Fund is subject to the following fundamental policies, which may not be changed without approval of the holders of a majority of the outstanding voting securities (as such term is defined in the 1940 Act) of the Fund:

- (1) The Fund may not issue senior securities, except as permitted under the 1940 Act.
- (2) The Fund may not borrow money, except that the Fund may (i) borrow money from banks for temporary or emergency purposes (but not for leverage or the purchase of investments) and (ii) engage in other transactions permissible under the 1940 Act that may involve a borrowing (such as obtaining short-term credits as are necessary for the clearance of transactions, engaging in delayed-delivery transactions, or purchasing certain futures, forward contracts and options), *provided* that the combination of (i) and (ii) shall not exceed 33⅓% of the value of the Fund's total assets (including the amount borrowed), less the Fund's liabilities (other than borrowings).
- (3) The Fund will not underwrite the securities of other issuers except to the extent the Fund may be considered an underwriter under the 1933 Act, in connection with the purchase and sale of portfolio securities.

- (4) The Fund will not purchase or sell real estate or interests therein, unless acquired as a result of ownership of securities or other instruments (but this shall not prohibit the Fund from purchasing or selling securities or other instruments backed by real estate or of issuers engaged in real estate activities).
- (5) The Fund may not make loans to other persons, except through (i) the purchase of debt securities permissible under the Fund's investment policies, (ii) repurchase agreements, or (iii) the lending of portfolio securities, *provided* that no such loan of portfolio securities may be made by the Fund if, as a result, the aggregate of such loans would exceed 33⅓% of the value of the Fund's total assets.
- (6) The Fund may not purchase or sell physical commodities unless acquired as a result of ownership of securities or other instruments (but this shall not prevent the Fund from purchasing or selling options, futures contracts, forward contracts or other derivative instruments, or from investing in securities or other instruments backed by physical commodities).
- (7) The Fund may not invest 25% or more of the value of its total assets in securities of issuers in any one industry or group of industries, except that the Fund will concentrate its assets in any of the group of industries constituting the financial sector. This restriction does not apply to obligations issued or guaranteed by the U.S. government, its agencies or instrumentalities.

For purposes of applying restriction (1) above, under the 1940 Act as currently in effect, the Fund is not permitted to issue senior securities, except that the Fund may borrow from any bank if, immediately after such borrowing and at all times thereafter, the value of the Fund's total assets is at least 300% of the principal amount of all of the Fund's borrowings (i.e., the principal amount of the borrowings may not exceed 33⅓% of the Fund's total assets). In the event that such asset coverage shall at any time fall below 300% the Fund shall, within three days thereafter (not including Sundays and holidays), reduce the amount of its borrowings to an extent that the asset coverage of such borrowings shall be at least 300%.

Except for restriction (2) above, if a percentage restriction is adhered to at the time of investment, a later increase in percentage resulting from a change in market value of the investment or the total assets will not constitute a violation of that restriction. With respect to restriction (2), if the limitations are exceeded as a result of a change in market value then the Fund will reduce the amount of borrowings within three days thereafter to the extent necessary to comply with the limitations (not including Sundays and holidays).

The fundamental investment limitations set forth above limit the Fund's ability to engage in certain investment practices and purchase securities or other instruments to the extent permitted by, or consistent with, applicable law. As such, these limitations will change as the statute, rules, regulations or orders (or, if applicable, interpretations) change, and no shareholder vote will be required or sought.

The Fund's investment objective and the foregoing fundamental policies of the Fund may not be changed without the affirmative vote of the majority of the outstanding voting securities of the Fund. The 1940 Act defines a majority vote as the vote of the lesser of (i) 67% or more of the voting securities represented at a meeting at which more than 50% of the outstanding securities are represented; or (ii) more than 50% of the outstanding voting securities. With respect to the submission of a change in an investment policy to the holders of outstanding voting securities of the Fund, such matter shall be deemed to have been effectively acted upon with respect to the Fund if a majority of the outstanding voting securities of the Fund vote for the approval of such matter, notwithstanding that such matter has not been approved by the holders of a majority of the outstanding voting securities of any other series of the Trust affected by such matter.

In addition to the foregoing fundamental policies, the Fund is also subject to strategies and policies discussed herein which, unless otherwise noted, are non-fundamental restrictions and policies and may be changed by the Board of Trustees.

INVESTMENT STRATEGIES

The following information supplements the discussion of the Fund's investment objective, policies and strategies that appears in the Prospectus.

Under normal market conditions, the Fund will invest at least 80% of its net assets (including investment borrowings) in preferred securities and income-producing debt securities.

Types of Investments

Corporate Bonds. Corporate bonds, also known as fixed-income securities, are debt obligations issued by corporations. Corporate bonds are generally used by corporations to borrow money from investors. Corporate bonds may be either secured or unsecured. Collateral used for secured debt includes, but is not limited to, real property, machinery, equipment, accounts receivable, stocks, bonds or notes. If a corporate bond is unsecured, it is known as a debenture. Holders of corporate bonds, as creditors, have a prior legal claim over common and preferred stockholders as to both income and assets of the issuer for the principal and interest due them and may have a prior claim over other creditors if liens or mortgages are involved. Interest on corporate bonds may be fixed or floating, or the securities may be zero coupon fixed-income securities which pay no interest. Interest on corporate bonds is typically paid semi-annually and is fully taxable to the holder of the bonds. Corporate bonds contain elements of both interest rate risk and credit risk. The market value of a corporate bond generally may be expected to rise and fall inversely with changes in interest rates and may also be affected by the credit rating of the issuer, the issuer's performance and perceptions of the issuer in the marketplace. Corporate bonds usually yield more than government or agency bonds due to the presence of credit risk.

Fixed Income Investments and Cash Equivalents. Normally, the Fund invests substantially all of its assets to meet its investment objectives and consequently may invest significantly in fixed income securities and cash equivalents; however, for temporary or defensive purposes, the Fund may also invest in other fixed income investments and cash equivalents in order to provide income, liquidity and preserve capital.

Fixed income investments and cash equivalents held by the Fund may include, without limitation, the types of investments set forth below:

- (1) The Fund may invest in U.S. government securities, including bills, notes and bonds differing as to maturity and rates of interest, which are either issued or guaranteed by the U.S. Treasury or by U.S. government agencies or instrumentalities. U.S. government securities include securities that are issued or guaranteed by the U.S. Treasury, by various agencies of the U.S. government, or by various instrumentalities that have been established or sponsored by the U.S. government. U.S. Treasury securities are backed by the "full faith and credit" of the United States. Securities issued or guaranteed by federal agencies and U.S. government-sponsored instrumentalities may or may not be backed by the full faith and credit of the United States. Some of the U.S. government agencies that issue or guarantee securities include the Export-Import Bank of the United States, the Farmers Home Administration, the Federal Housing Administration, the Maritime Administration, the Small Business Administration and The Tennessee Valley Authority. An instrumentality of the U.S. government is a government agency organized under federal charter with government supervision. Instrumentalities issuing or guaranteeing securities include, among others, the Federal Home Loan Banks, the Federal Land Banks, the Central Bank for Cooperatives, Federal Intermediate Credit Banks and the FNMA. In the case of those U.S. government securities not backed by the full faith and credit of the United States, the investor must look principally to the agency or instrumentality issuing or guaranteeing the security for ultimate repayment and may not be able to assert a claim against the United States itself in the event that the agency or instrumentality does not meet its commitment. The U.S. government, its agencies and instrumentalities do not guarantee the market value of their securities; consequently, the value of such securities may fluctuate. In addition, the Fund may invest in sovereign debt obligations of non-U.S. countries. A sovereign debtor's willingness or ability to repay principal and interest in a timely manner may be affected by a number of factors, including its cash flow situation, the extent of its non-U.S. reserves, the availability of sufficient non-U.S. exchange on the date a payment is due, the relative size of the debt service burden to the economy as a whole, the sovereign debtor's policy toward principal international lenders and the political constraints to which it may be subject.
- (2) The Fund may invest in certificates of deposit issued against funds deposited in a bank or savings and loan association. Such certificates are for a definite period of time, earn a specified rate of return and are normally negotiable. If such certificates of deposit are non-negotiable, they will be considered illiquid investments and be subject to the Fund's 15% restriction on investments in illiquid investments. Pursuant to the certificate of deposit, the issuer agrees to pay the amount deposited plus interest to the bearer of the certificate on the date specified thereon. Under current FDIC regulations, the maximum insurance payable as to any one certificate of deposit is \$250,000; therefore, certificates of deposit purchased by the Fund may not be fully insured. The Fund may only invest in certificates of deposit issued by U.S. banks with at least \$1 billion in assets.

- (3) The Fund may invest in bankers' acceptances, which are short-term credit instruments used to finance commercial transactions. Generally, an acceptance is a time draft drawn on a bank by an exporter or an importer to obtain a stated amount of funds to pay for specific merchandise. The draft is then "accepted" by a bank that, in effect, unconditionally guarantees to pay the face value of the instrument on its maturity date. The acceptance may then be held by the accepting bank as an asset or it may be sold in the secondary market at the going rate of interest for a specific maturity.
- (4) The Fund may invest in repurchase agreements, which involve purchases of debt securities with counterparties that are deemed by the Sub-Advisor to present acceptable credit risks. In such an action, at the time the Fund purchases the security, it simultaneously agrees to resell and redeliver the security to the seller, who also simultaneously agrees to buy back the security at a fixed price and time. This assures a predetermined yield for the Fund during its holding period since the resale price is always greater than the purchase price and reflects an agreed-upon market rate. Such actions afford an opportunity for the Fund to invest temporarily available cash. The Fund may enter into repurchase agreements only with respect to obligations of the U.S. government, its agencies or instrumentalities, certificates of deposit or bankers' acceptances in which the Fund may invest. Repurchase agreements may be considered loans to the seller, collateralized by the underlying securities. The risk to the Fund is limited to the ability of the seller to pay the agreed-upon sum on the repurchase date; in the event of default, the repurchase agreement provides that the Fund is entitled to sell the underlying collateral. If the value of the collateral declines after the agreement is entered into, however, and if the seller defaults under a repurchase agreement when the value of the underlying collateral is less than the repurchase price, the Fund could incur a loss of both principal and interest. The portfolio managers monitor the value of the collateral at the time the action is entered into and at all times during the term of the repurchase agreement. The portfolio managers do so in an effort to determine that the value of the collateral always equals or exceeds the agreed-upon repurchase price to be paid to the Fund. If the seller were to be subject to a federal bankruptcy proceeding, the ability of the Fund to liquidate the collateral could be delayed or impaired because of certain provisions of the bankruptcy laws.
- (5) The Fund may invest in bank time deposits, which are monies kept on deposit with banks or savings and loan associations for a stated period of time at a fixed rate of interest. There may be penalties for the early withdrawal of such time deposits, in which case the yields of these investments will be reduced.
- (6) The Fund may invest in commercial paper, which are short-term unsecured promissory notes, including variable rate master demand notes issued by corporations to finance their current operations. Master demand notes are direct lending arrangements between the Fund and a corporation. There is no secondary market for the notes. However, they are redeemable by the Fund at any time. The Fund's portfolio managers will consider the financial condition of the corporation (e.g., earning power, cash flow and other liquidity ratios) and will regularly monitor the corporation's ability to meet all of its financial obligations, because the Fund's liquidity might be impaired if the corporation were unable to pay principal and interest on demand. The Fund may invest in commercial paper only if it has received the highest rating from at least one nationally recognized statistical rating organization or, if unrated, judged by the Sub-Advisor to be of comparable quality.
- (7) The Fund may invest in shares of money market funds, as consistent with its investment objective and policies. Shares of money market funds are subject to management fees and other expenses of those funds. Therefore, investments in money market funds will cause the Fund to bear proportionately the costs incurred by the money market funds' operations. At the same time, the Fund will continue to pay its own management fees and expenses with respect to all of its assets, including any portion invested in the shares of other investment companies. It is possible for the Fund to lose money by investing in money market funds.

High Yield Securities. The Fund will invest in securities that are rated below investment grade at the time of purchase. The ratings of a rating agency represent its opinion as to the quality of securities it undertakes to rate. Ratings are not absolute standards of quality; consequently, securities with the same maturity, duration, coupon, and rating may have different yields. If a security owned by the Fund is subsequently downgraded, the Fund will not be required to dispose of such security. The Credit Rating Definitions as published by Standard & Poor's Ratings Services, a division of The McGraw-Hill Companies, Inc. ("*Standard & Poor's*"), Fitch Ratings ("*Fitch*") and Moody's Investors Service, Inc. ("*Moody's*"), are set forth in *Exhibit B* to this SAI.

Illiquid Investments. The Fund may invest in illiquid investments (i.e., any investment that the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment). For purposes of this restriction, illiquid investments may include, but are not limited to, certain restricted securities (securities the disposition of which is restricted under the federal securities laws), securities that may only be resold pursuant to Rule 144A under the 1933 Act, and repurchase agreements with maturities in excess of seven days, among others. However, the Fund will not acquire illiquid investments if, as a result, such investments would comprise more than 15% of the value of the Fund's net assets. The Advisor, subject to oversight by the Board of Trustees, has the ultimate authority to determine, to the extent permissible under the federal securities laws, which investments are liquid or illiquid for purposes of this 15% limitation under the Fund's liquidity risk management program, adopted pursuant to Rule 22e-4 under the 1940 Act.

Restricted securities may be sold only in privately negotiated transactions or in a public offering with respect to which a registration statement is in effect under the 1933 Act. Where registration is required, the Fund may be obligated to pay all or part of the registration expenses and a considerable period may elapse between the time of the decision to sell and the time the Fund may be permitted to sell a security under an effective registration statement. If, during such a period, adverse market conditions were to develop, the Fund might obtain a less favorable price than that which prevailed when it decided to sell. Illiquid investments will be priced at fair value as determined in good faith under procedures adopted by the Board of Trustees. If, through the appreciation of illiquid investments or the depreciation of liquid investments, the Fund should be in a position where more than 15% of the value of its net assets are invested in illiquid investments, including restricted securities which are not readily marketable, the Advisor will report such occurrence to the Board of Trustees and take such steps as are deemed advisable to protect liquidity in accordance with the Fund's liquidity risk management program.

Investment Companies and Pooled Investment Vehicles. The Fund may invest in other pooled investment vehicles, including open-end or closed-end investment companies, other ETFs and business development companies that invest primarily in securities of the types in which the Fund may invest directly. As a shareholder in a pooled investment vehicle, the Fund will bear its ratable share of that vehicle's expenses, and would remain subject to payment of the Fund's management fees with respect to assets so invested. Shareholders would therefore be subject to duplicative expenses to the extent the Fund invests in other pooled investment vehicles. In addition, the Fund will incur brokerage costs when purchasing and selling shares of ETFs. Other pooled investment vehicles may be leveraged, and the net asset value and market value of their securities will therefore be more volatile and the yield to shareholders will tend to fluctuate more than the yield of unleveraged pooled investment vehicles.

Money Market Funds. The Fund may invest in shares of money market funds to the extent permitted by the 1940 Act.

Non-U.S. Investments. Non-U.S. securities include securities issued or guaranteed by companies organized under the laws of countries other than the United States, securities issued or guaranteed by foreign, national, provincial, state, municipal or other governments with taxing authority or by their agencies or instrumentalities and debt obligations of supra-national governmental entities such as the World Bank or European Union. These securities may be issued by companies domiciled in the United States, U.S. dollar-denominated depositary receipts and U.S. dollar-denominated foreign securities. Non-U.S. securities may also include U.S. dollar-denominated debt obligations, such as "Yankee Dollar" obligations, of foreign issuers and of supra-national government entities. Yankee Dollar obligations are U.S. dollar-denominated obligations issued in the U.S. capital markets by foreign corporations, banks and governments. Foreign securities also may be traded on foreign securities exchanges or in over-the-counter ("OTC") capital markets.

Preferred Securities and Hybrid Securities. The Fund invests in preferred securities. Certain of the preferred securities in which the Fund invests are traditional preferred securities, which issue dividends that qualify for the dividend received deduction under which "qualified" domestic corporations are able to exclude a percentage of the dividends received from their taxable income.

Certain of the preferred securities in which the Fund invests are preferred securities that do not issue dividends that qualify for the dividends received deduction for eligible investors ("*non-DRD preferred securities*") and debt instruments that are similar in many respects to preferred securities (such debt instruments and non-DRD preferred securities are often referred to as "*hybrid securities*") that do not qualify for the dividends received deduction or issue qualified dividend income. Pursuant to the dividends received deduction, corporations may generally deduct 70% of the dividend income they receive. Corporate shareholders of a regulated investment company like the Fund generally are permitted to claim a deduction with respect to that portion of their distributions attributable to amounts received by the regulated investment company that

qualify for the dividends received deduction. However, not all preferred securities pay dividends that are eligible for the dividends received deduction. Any corporate shareholder who otherwise would qualify for the dividends received deduction should assume that none of the distributions it receives from the Fund will qualify for the dividends received deduction.

These types of hybrid securities typically offer additional yield spread versus other types of preferred securities due to this lack of special tax treatment. Hybrid securities are typically issued by corporations, generally in the form of interest bearing notes or preferred securities, or by an affiliated business trust of a corporation, generally in the form of (i) beneficial interests in subordinated debentures or similarly structured securities or (ii) more senior debt securities that pay income and trade in a manner similar to preferred securities. The hybrid securities market consists of both fixed and adjustable coupon rate securities that are either perpetual in nature or have stated maturity dates. The hybrid securities market is divided into the "\$25 par" and the "institutional" segments. The \$25 par segment is typified by securities that are listed on the New York Stock Exchange (the "NYSE"), which trade and are quoted "flat", *i.e.*, without accrued dividend income, and which are typically callable at par value five years after their original issuance date. The institutional segment is typified by \$1,000 par value securities that are not exchange-listed, which trade and are quoted on an "accrued income" basis, and which typically have a minimum of 10 years of call protection (at premium prices) from the date of their original issuance.

Hybrid securities are typically junior and fully subordinated liabilities of an issuer or the beneficiary of a guarantee that is junior and fully subordinated to the other liabilities of the guarantor. In addition, hybrid securities typically permit an issuer to defer the payment of income for eighteen months or more without triggering an event of default. Generally, the deferral period is five years or more. Because of their subordinated position in the capital structure of an issuer, the ability to defer payments for extended periods of time without adverse consequence to the issuer, and certain other features (such as restrictions on common dividend payments by the issuer or ultimate guarantor when cumulative payments on the non-DRD preferred securities have not been made), these hybrid securities are often treated as close substitutes for traditional preferred securities, both by issuers and investors. Hybrid securities have many of the key characteristics of equity due to their subordinated position in an issuer's capital structure and because their quality and value are heavily dependent on the profitability of the issuer rather than on any legal claims to specific assets or cash flows.

Hybrid securities include but are not limited to: trust originated preferred securities, monthly income preferred securities, quarterly income bond securities, quarterly income debt securities, quarterly income preferred securities, corporate trust securities, public income notes, and other trust preferred securities.

Hybrid securities are typically issued with a final maturity date, although some are perpetual in nature. In certain instances, a final maturity date may be extended and/or the final payment of principal may be deferred at the issuer's option for a specified time without any adverse consequence to the issuer. No redemption can typically take place unless all cumulative payment obligations have been met, although issuers may be able to engage in open-market repurchases without regard to any cumulative dividends payable. A portion of the portfolio may include investments in non-cumulative preferred securities, whereby the issuer does not have an obligation to make up any arrearages to its shareholders. Should an issuer default on its obligations under such a security, the amount of dividends the Fund pays may be adversely affected.

Many hybrid securities are issued by a trust or other special purpose entities established by operating companies, and are not a direct obligation of an operating company. At the time a trust or special purpose entity sells its preferred securities to investors, the trust or special purpose entity purchases debt of the operating company (with terms comparable to those of the trust or special purpose entity securities), which enables the operating company to deduct for tax purposes the interest paid on the debt held by the trust or special purpose entity. The trust or special purpose entity is generally required to be treated as transparent for federal income tax purposes such that the holders of the non-DRD preferred securities are treated as owning beneficial interests in the underlying debt of the operating company. Accordingly, payments of the non-DRD preferred securities are treated as interest rather than dividends for federal income tax purposes and, as such, are not eligible for the dividends received deduction. The trust or special purpose entity in turn would be a holder of the operating company's debt and would have priority with respect to the operating company's earnings and profits over the operating company's common shareholders, but would typically be subordinated to other classes of the operating company's debt. Typically a non-DRD preferred share has a rating that is slightly below that of its corresponding operating company's senior debt securities.

Real Estate Investment Trusts. The Fund may invest in shares of beneficial interest of real estate investment trusts ("REITs"). REITs are typically publicly traded corporations or trusts that invest in residential or commercial real estate. REITs generally can be divided into the following three types: (i) equity REITs which invest the majority of their assets directly in real property and derive their income primarily from rents and capital gains or real estate appreciation; (ii) mortgage REITs

which invest the majority of their assets in real estate mortgage loans and derive their income primarily from interest payments; and (iii) hybrid REITs which combine the characteristics of equity REITs and mortgage REITs.

Restricted Securities. The Fund may invest in restricted securities, which are securities that may not be sold without an effective registration statement under the 1933 Act. Restricted securities may be sold only in privately negotiated transactions or in a public offering with respect to which a registration statement is in effect under the 1933 Act. Where registration is required, the Fund may be obligated to pay all or part of the registration expenses and a considerable period may elapse between the time of the decision to sell and the time the Fund may be permitted to sell a security under an effective registration statement. If, during such a period, adverse market conditions were to develop, the Fund might obtain a less favorable price than that which prevailed when it decided to sell. Illiquid securities will be priced at fair value as determined in good faith under procedures adopted by the Board of Trustees. If, through the appreciation of illiquid securities or the depreciation of liquid securities, the Fund should be in a position where more than 15% of the value of its net assets are invested in illiquid securities, including restricted securities which are not readily marketable, the Advisor will report such occurrence to the Board of Trustees and take such steps as are deemed advisable to protect liquidity in accordance with the Fund's liquidity risk management program.

With respect to securities issued pursuant to Rule 144A of the 1933 Act, which is discussed in more detail in the prospectus, First Trust considers factors such as (i) the nature of the market for a security (including the institutional private resale market, the frequency of trades and quotes for the security, the number of dealers willing to purchase or sell the security, the amount of time normally needed to dispose of the security, the method of soliciting offers and the mechanics of transfer), (ii) the terms of certain securities or other instruments allowing for the disposition to a third party or the issuer thereof (e.g., certain repurchase obligations and demand instruments), and (iii) other permissible relevant factors.

U.S. Government Securities. U.S. government securities include U.S. Treasury obligations and securities issued or guaranteed by various agencies of the U.S. government, or by various instrumentalities which have been established or sponsored by the U.S. government. U.S. Treasury obligations are backed by the "full faith and credit" of the U.S. government. Securities issued or guaranteed by federal agencies and U.S. government sponsored instrumentalities may or may not be backed by the full faith and credit of the U.S. government.

Warrants. The Fund may invest in warrants. Warrants acquired by the Fund entitle it to buy common stock from the issuer at a specified price and time. They do not represent ownership of the securities but only the right to buy them. Warrants are subject to the same market risks as stocks, but may be more volatile in price. The Fund's investment in warrants will not entitle it to receive dividends or exercise voting rights and will become worthless if the warrants cannot be profitably exercised before their expiration date.

Portfolio Turnover

The Fund buys and sells portfolio securities in the normal course of its investment activities. The proportion of the Fund's investment portfolio that is bought and sold during a year is known as the Fund's portfolio turnover rate. A portfolio turnover rate of 100% would occur, for example, if all of the portfolio securities (other than short-term securities) were replaced once during the fiscal year. A high portfolio turnover rate could result in the payment by the Fund of increased brokerage costs, expenses and taxes. The portfolio turnover rates for the specified periods are set forth in the table below. Significant variations in portfolio turnover from year-to-year are generally the result of fluctuations in the size of the Fund or changes to the Fund's portfolio holdings.

Portfolio Turnover Rate

Fiscal Year Ended October 31,

<u>2024</u>	<u>2023</u>

Lending of Portfolio Securities

In order to generate additional income, as a non-principal investment strategy, First Trust is authorized to select the First Trust Funds, including the Fund, with notice to the Board of Trustees, to lend portfolio securities representing up to 33⅓% of the value of its total assets to broker-dealers, banks or other institutional borrowers of securities. As with other extensions of credit, there may be risks of delay in recovery of the securities or even loss of rights in the collateral should the borrower of the securities fail financially. However, such First Trust Funds will only enter into loan arrangements with

broker-dealers, banks or other institutions which First Trust has determined are creditworthy under guidelines approved by the Board of Trustees. The First Trust Funds will pay a portion of the income earned on the lending transaction to the placing broker and may pay administrative and custodial fees in connection with these loans. First Trust may select the First Trust Fund to participate in the securities lending program, at its discretion with notice to the Board of Trustees.

In these loan arrangements, the First Trust Funds will receive collateral in the form of cash, U.S. government securities or other high-grade debt obligations in an amount at least equal to the value of the borrowed securities, marked to market daily. This collateral must be valued daily by First Trust or the First Trust Fund's lending agent and, if the market value of the loaned securities increases, the borrower must furnish additional collateral to the First Trust Fund. During the time portfolio securities are on loan, the borrower pays the First Trust Fund any dividends or interest paid on the securities. Loans are subject to termination at any time by the First Trust Fund or the borrower. While a First Trust Fund does not have the right to vote securities on loan, it would terminate the loan and regain the right to vote if that were considered important with respect to the investment. When a First Trust Fund lends portfolio securities to a borrower, payments in lieu of dividends made by the borrower to the First Trust Fund will not constitute "qualified dividends" taxable at the same rate as long-term capital gains, even if the actual dividends would have constituted qualified dividends had the First Trust Fund held the securities. Please see "Securities Lending Risk" below for a description of the risks associated with securities lending activities.

INVESTMENT RISKS

The following risk disclosure supplements the discussion of the Fund's investment risks that appears in the Prospectus.

Overview

An investment in the Fund should be made with an understanding of the risks that an investment in the Fund's shares entails, including the risk that the financial condition of the issuers of the securities held by the Fund or the general condition of the securities market may worsen and the value of the securities and therefore the value of the Fund may decline. The Fund may not be an appropriate investment for those who are unable or unwilling to assume the risks involved generally with such an investment. The past market and earnings performance of any of the securities included in the Fund is not predictive of their future performance.

Additional Market Disruption Risk

In February 2022, Russia commenced a military attack on Ukraine. In response, various countries, including the United States, issued broad-ranging sanctions on Russia and certain Russian companies and individuals. The hostilities between the two countries may escalate and any existing or future sanctions could have a severe adverse effect on Russia's economy, currency, companies and region as well as negatively impact other regional and global economic markets of the world (including Europe and the United States), companies in such countries and various sectors, industries and markets for securities and commodities globally, such as oil and natural gas. Accordingly, the hostilities and sanctions may have a negative effect on the Fund's investments and performance beyond any direct exposure to Russian issuers or those of adjoining geographic regions. Russia may also take retaliatory actions or countermeasures, such as cyberattacks and espionage, which may negatively impact the countries and companies in which the Fund may invest. The extent and duration of the military action or future escalation of such hostilities; the extent and impact of existing and any future sanctions, market disruptions and volatility; and the result of any diplomatic negotiations cannot be predicted. These and any related events could have a significant negative impact on certain of the Fund's investments as well as the Fund's performance, and the value or liquidity of certain securities held by the Fund may decline significantly.

Convertible Securities Risk

Convertible securities generally offer lower interest or dividend yields than non-convertible securities of similar quality. The market values of convertible securities tend to decline as interest rates increase and, conversely, to increase as interest rates decline. However, a convertible security's market value tends to reflect the market price of the common stock of the issuing company when that stock price approaches or is greater than the convertible security's "conversion price." The conversion price is defined as the predetermined price at which the convertible security could be exchanged for the associated stock. As the market price of the underlying common stock declines, the price of the convertible security tends to be influenced more by the yield of the convertible security. Thus, it may not decline in price to the same extent as the underlying common stock but is subject to market risk nonetheless.

In addition, convertible securities that may not be converted unless certain conditions are met may be subject to increased volatility and trade at a slight discount to similar convertible securities that do not require such conditions to be met prior to conversion.

In the event of a liquidation of the issuing company, holders of convertible debt securities which are subordinate in right of payment to the issuer's other debt obligations would be paid before the company's common stockholders but after holders of any senior debt obligations of the company. Consequently, the issuer's convertible securities generally entail less risk than its common stock but more risk than its debt obligations. Convertible preferred securities are also generally subordinated to debt instruments and non-convertible series of preferred securities in a company's capital structure in terms of having priority to corporate income, claims to corporate assets and liquidation payments, and therefore convertible preferred securities may be subject to greater credit risk than more senior debt and preferred instruments. Convertible securities are often rated below investment grade or not rated because they fall below debt obligations and just above common equity in order of preference or priority on the issuer's balance sheet. Below investment grade securities are commonly referred to as "junk" or "high yield" securities and are considered speculative with respect to the issuer's capacity to pay interest and repay principal.

Currency Exchange Rate Risk

Investments denominated in non-U.S. currencies and investments in securities or derivatives that provide exposure to such currencies, currency exchange rates or interest rates are subject to non-U.S. currency risk. Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investment and the value of your Fund shares. Because each Fund's net asset value is determined on the basis of U.S. dollars, the U.S. dollar value of your investment in the Fund may go down if the value of the local currency of the non-U.S. markets in which the Fund invests depreciates against the U.S. dollar. This is true even if the local currency value of securities in the Fund's holdings goes up. Conversely, the U.S. dollar value of your investment in the Fund may go up if the value of the local currency appreciates against the U.S. dollar.

The value of the U.S. dollar against other currencies is influenced by a variety of factors. These factors include national debt levels and trade deficits; changes in balances of payments and trade, domestic and foreign interest and inflation rates; global or regional political, economic or financial events; monetary policies of governments; actual or potential government intervention; and global energy prices. Political instability, the possibility of government intervention and restrictive or opaque business and investment policies may also reduce the value of a country's currency. Government monetary policies and the buying or selling of currency by a country's government may also influence exchange rates.

Currencies of emerging or developing market countries may be subject to significantly greater risks than currencies of developed countries. Many developing market countries have experienced steady declines or even sudden devaluations of their currencies relative to the U.S. dollar. Some non-U.S. market currencies may not be traded internationally, may be subject to strict limitations on foreign investment and may be subject to frequent and unannounced government intervention. Government intervention and currency controls can decrease the value and significantly increase the volatility of an investment in non-U.S. currency. Although the currencies of some developing market countries may be convertible into U.S. dollars, the achievable rates may differ from those experienced by domestic investors because of foreign investment restrictions, withholding taxes, lack of liquidity or other reasons.

Debt Securities Risk

In addition to the risks described elsewhere in the Prospectus and this SAI, debt securities are subject to certain other risks, including:

- ***Issuer Risk.*** The value of debt securities may decline for a number of reasons which directly relate to the issuer, such as management performance, leverage and reduced demand for the issuer's goods and services. Changes in an issuer's credit rating or the market's perception of an issuer's creditworthiness may also affect the value of the Fund's investment in that issuer.
- ***Interest Rate Risk.*** Interest rate risk is the risk that debt securities will decline in value because of changes in market interest rates. When market interest rates rise, the market value of fixed rate securities generally will fall. Currently, interest rates are at or near historical lows and, as a result, they are likely to rise over time. Market value generally falls further for fixed rate securities with longer duration. During periods of rising interest rates, the average life of certain types of securities may be extended because of slower than expected prepayments. This may lock in a below-market yield, increase the security's duration and further reduce the value of the security.

Investments in debt securities with long-term maturities may experience significant price declines if long-term interest rates increase. Fluctuations in the value of portfolio securities will not affect interest income on existing portfolio securities but will be reflected in the Fund's net asset value. Since the magnitude of these fluctuations will generally be greater at times when the Fund's average maturity is longer, under certain market conditions the Fund may, for temporary defensive purposes, accept lower current income from short-term investments rather than investing in higher yielding long-term securities.

- **Liquidity Risk.** Certain debt securities may be substantially less liquid than many other securities, such as common stocks traded on an exchange. Illiquid investments involve the risk that the securities will not be able to be sold at the time desired by the Fund or at prices approximating the value at which the Fund is carrying the securities on its books.
- **Prepayment Risk.** During periods of declining interest rates, the issuer of a security may exercise its option to prepay principal earlier than scheduled, forcing the Fund to reinvest the proceeds from such prepayment in lower yielding securities, which may result in a decline in the Fund's income and distributions to common shareholders of the Fund. This is known as call or prepayment risk. Debt securities frequently have call features that allow the issuer to redeem the security prior to its stated maturity. An issuer may redeem an obligation if the issuer can refinance the debt at a lower cost due to declining interest rates or an improvement in the credit standing of the issuer. If the Fund bought a security at a premium, the premium could be lost in the event of a prepayment.
- **Reinvestment Risk.** Reinvestment risk is the risk that income from the Fund's portfolio will decline if the Fund invests the proceeds from matured, traded or called bonds at market interest rates that are below the Fund portfolio's current earnings rate. A decline in income could affect the market price of the Fund's common shares or the overall return of the Fund.

Depository Receipts Risk

The Fund may hold securities of certain non-U.S. companies in the form of depository receipts ("*Depository Receipts*"). Depository Receipts may not necessarily be denominated in the same currency as the underlying securities into which they may be converted. American Depository Receipts ("*ADRs*") are receipts typically issued by an American bank or trust company that evidence ownership of underlying securities issued by a foreign corporation, while Global Depository Receipts ("*GDRs*") are receipts issued throughout the world that evidence a similar arrangement. ADRs and GDRs may trade in foreign currencies that differ from the currency the underlying security for each ADR or GDR principally trades in. Generally, ADRs, in registered form, are designed for use in the U.S. securities markets. GDRs, in registered form, are tradable both in the United States and in Europe and are designed for use throughout the world. The Fund may hold unsponsored Depository Receipts. The issuers of unsponsored Depository Receipts are not obligated to disclose material information in the United States; therefore, there may be less information available regarding such issuers and there may not be a correlation between such information and the market value of the Depository Receipts.

Hybrid Capital Securities Risk

Although it may be considered an equity security within an issuer's capital structure, a hybrid capital security may exhibit characteristics to a debt security, convertible security or other evidence of indebtedness on which the value of the interest, or principal of which, is determined by reference to changes in the value of a reference instrument or financial strength of a reference entity (e.g., a security or other financial instrument, asset, currency or interest rate). Hybrid capital securities may be functionally equivalent to preferred stock and are issued and trade in a manner similar to traditional perpetual preferred stock. Such hybrid capital securities may have a lower par amount, may allow the issuer to defer interest or dividend payments and may be equal to preferred shares or the lowest level of subordinated debt in terms of claims to an issuer's assets in the event of liquidation. Also, the price of a hybrid capital security and any applicable reference instrument may not move in the same direction or at the same time.

An investment in a hybrid capital security may entail significant risks not associated with a similar investment in a traditional equity security or preferred stock. The risks of a particular hybrid capital security will depend upon the terms of the instrument, but may include the possibility of significant changes in the value of any applicable reference instrument. Such risks may depend upon factors unrelated to the operations or credit quality of the issuer of the hybrid capital security. Hybrid capital securities potentially are more volatile and carry greater market and liquidity risks than traditional equity securities. Holders of hybrid preferred securities may have limited voting rights to control the activities of the issuer. The purchase of hybrid preferred securities also may expose a Fund to the credit risk of their issuer, and, depending on the level of the Fund's investment in such hybrid securities, these risks may cause significant fluctuations in the Fund's NAV. Hybrid

securities also may carry liquidity risk, since the instruments are often “customized” to meet the needs of an issuer or a particular investor, and therefore the number of investors that are willing and able to buy such instruments in the secondary market may be small.

Leverage Risk

Leverage risk is the risk that the Fund may be more volatile than if it had not been leveraged due to leverage's tendency to exaggerate the effect of any increase or decrease in the value of the Fund's portfolio. The use of leverage may also cause the Fund to liquidate portfolio positions when it may not be advantageous to do so to satisfy its obligations or to meet segregation requirements.

Listing Standards Risk

The Fund is required to comply with listing requirements adopted by the Exchange. Non-compliance with such requirements may result in the Fund's shares being delisted by the Exchange. Any resulting liquidation of the Fund could cause the Fund to incur elevated transaction costs and could result in negative tax consequences for its shareholders.

Liquidity Risk

Whether or not the equity securities held by the Fund are listed on a securities exchange, the principal trading market for certain of the equity securities in the Fund may be in the OTC market. As a result, the existence of a liquid trading market for the equity securities may depend on whether dealers will make a market in the equity securities. Certain regions, countries or asset types may also suffer periods of relative illiquidity. There can be no assurance that a market will be made for any of the equity securities, that any market for the equity securities will be maintained or that there will be sufficient liquidity of the equity securities in any markets made. The price at which the equity securities are held by the Fund will be adversely affected if trading markets for the equity securities are limited or absent.

Market Risk

Market risk is the risk that a particular security, or shares of the Fund in general, may fall in value. Securities are subject to market fluctuations caused by such factors as economic, political, regulatory or market developments, changes in interest rates and perceived trends in securities prices. Shares of the Fund could decline in value or underperform other investments due to short-term market movements or any longer periods during more prolonged market downturns. In addition, local, regional or global events such as war, acts of terrorism, spread of infectious diseases or other public health issues, recessions, natural disasters or other events could have a significant negative impact on the Fund and its investments. Such events may affect certain geographic regions, countries, sectors and industries more significantly than others. Such events could adversely affect the prices and liquidity of the Fund's portfolio securities or other instruments and could result in disruptions in the trading markets. Any of such circumstances could have a materially negative impact on the value of the Fund's shares and result in increased market volatility. During any such events, the Fund's shares may trade at increased premiums or discounts to their net asset value and the bid/ask spread on the Fund's shares may widen.

Health crises caused by the outbreak of infectious diseases or other public health issues, may exacerbate other pre-existing political, social, economic, market and financial risks. The impact of any such events, could negatively affect the global economy, as well as the economies of individual countries or regions, the financial performance of individual companies, sectors and industries, and the markets in general in significant and unforeseen ways. Any such impact could adversely affect the prices and liquidity of the securities and other instruments in which the Fund invests and negatively impact the Fund's investment return. For example, an outbreak of a respiratory disease designated as COVID-19 was first detected in China in December 2019 and subsequently spread internationally. The ensuing policies enacted by governments and central banks have caused and may continue to cause significant volatility and uncertainty in global financial markets, negatively impacting global growth prospects. While vaccines have been developed, there is no guarantee that vaccines will be effective against future variants of the disease. The impact of the COVID-19 pandemic may be short term or may last for an extended period of time, and in either case could result in a substantial economic downturn or recession.

In addition, the operations of the Fund, the Advisor and the Fund's other service providers may be significantly impacted, or even temporarily or permanently halted, as a result of government quarantine measures, voluntary and precautionary restrictions on travel or meetings and other factors related to a public health emergency, including its potential adverse impact on the health of any such entity's personnel.

Non-U.S. Securities Risk

An investment in non-U.S. securities involves risks in addition to the usual risks inherent in domestic investments, including currency risk. The value of a non-U.S. security in U.S. dollars tends to decrease when the value of the U.S. dollar rises against the non-U.S. currency in which the security is denominated and tends to increase when the value of the U.S. dollar falls against such currency. Non-U.S. securities are affected by the fact that in many countries there is less publicly available information about issuers than is available in the reports and ratings published about companies in the United States and companies may not be subject to uniform accounting, auditing and financial reporting standards. Other risks inherent in non-U.S. investments may include expropriation; confiscatory taxation; withholding taxes on dividends and interest; less extensive regulation of non-U.S. brokers, securities markets and issuers; diplomatic developments; and political or social instability. Non-U.S. economies may differ favorably or unfavorably from the U.S. economy in various respects, and many non-U.S. securities are less liquid and their prices tend to be more volatile than comparable U.S. securities. From time to time, non-U.S. securities may be difficult to liquidate rapidly without adverse price effects.

Passive Foreign Investment Companies Risk

The Fund may invest in companies that are considered to be "passive foreign investment companies" ("PFICs"), which are generally certain non-U.S. corporations that receive at least 75% of their annual gross income from passive sources (such as interest, dividends, certain rents and royalties or capital gains) or that hold at least 50% of their assets in investments producing such passive income. Therefore, the Fund could be subject to U.S. federal income tax and additional interest charges on gains and certain distributions with respect to those equity interests, even if all the income or gain is distributed to its shareholders in a timely manner. The Fund will not be able to pass through to its shareholders any credit or deduction for such taxes.

Preferred Securities and Trust Preferred Securities Risk

There are special risks associated with investing in preferred securities, including risks related to deferral, noncumulative dividends, subordination, liquidity, limited voting rights and special redemption rights. Trust preferred securities are limited-life preferred securities typically issued by corporations, generally in the form of interest-bearing notes or preferred securities issued by an affiliated business trust of a corporation whose only assets are generally in the form of beneficial interests in subordinated debentures or similarly structured securities. Dividend payments on the trust preferred securities generally coincide with interest payments on the underlying obligations. Trust preferred securities generally have a yield advantage over traditional preferred securities, but unlike preferred securities, distributions are treated as interest rather than dividends for federal income tax purposes and therefore, are not eligible for the dividends received deduction and do not constitute qualified dividend income. Trust preferred securities prices fluctuate for several reasons including changes in investors' perception of the financial condition of an issuer or the general economic condition of the market for trust preferred securities, or when political or economic events affecting the issuers occur. Trust preferred securities are also sensitive to interest rate fluctuations, as the cost of capital rises and borrowing costs increase in a rising interest rate environment and the risk that a trust preferred security may be called for redemption in a falling interest rate environment. Certain of the other risks unique to trust preferred securities include: (i) distributions on trust preferred securities will be made only if interest payments on the interest-bearing notes, preferred securities or subordinated debentures are made; (ii) a corporation issuing the interest-bearing notes, preferred securities or subordinated debentures may defer interest payments on these instruments for up to 20 consecutive quarters and if such election is made, distributions will not be made on the trust preferred securities during the deferral period; (iii) certain tax or regulatory events may trigger the redemption of the interest-bearing notes, preferred securities or subordinated debentures by the issuing corporation and result in prepayment of the trust preferred securities prior to their stated maturity date; (iv) future legislation may be proposed or enacted that may prohibit the corporation from deducting its interest payments on the interest-bearing notes, preferred securities or subordinated debentures for tax purposes, making redemption of these instruments likely; (v) a corporation may redeem the interest bearing notes, preferred securities or subordinated debentures in whole at any time or in part from time to time on or after a stated call date; (vi) trust preferred securities holders have very limited voting rights; and (vii) payment of interest on the interest-bearing notes, preferred securities or subordinated debentures, and therefore distributions on the trust preferred securities, is dependent on the financial condition of the issuing corporation.

Real Estate Investment Trust Risk

REITs are financial vehicles that pool investors' capital to purchase or finance real estate. REITs may concentrate their investments in specific geographic areas or in specific property types, e.g., hotels, shopping malls, residential complexes and office buildings. The market value of REIT shares and the ability of the REITs to distribute income may be adversely affected by several factors, including rising interest rates; changes in the national, state and local economic climate

and real estate conditions; perceptions of prospective tenants of the safety, convenience and attractiveness of the properties; the ability of the owners to provide adequate management, maintenance and insurance; the cost of complying with the Americans with Disabilities Act; increased competition from new properties; the impact of present or future environmental legislation and compliance with environmental laws; changes in real estate taxes and other operating expenses; adverse changes in governmental rules and fiscal policies; adverse changes in zoning laws; and other factors beyond the control of the issuers of the REITs. In addition, distributions received by the Fund from REITs may consist of dividends, capital gains and/or return of capital. Many of these distributions however will not generally qualify for favorable treatment as qualified dividend income.

Securities Lending Risk

Securities lending involves exposure to certain risks, including counterparty risk, collateral risk and operational risk. Counterparty risk is the risk that the borrower may fail to return the securities in a timely manner or at all. As a result, a First Trust Fund engaged in securities lending transactions may suffer a loss and there may be a delay in recovering the lent securities. Any delay in the return of securities on loan may restrict the ability of the Fund to meet delivery or payment obligations. Collateral risk is the risk that the collateral received may be realized at a value lower than the value of the securities lent, whether due to inaccurate pricing of the collateral, adverse market movements in the value of the collateral, intra-day increases in the value of the securities lent, a deterioration in the credit rating of the collateral issuer, or the illiquidity of the market in which the collateral is traded. Securities lending also entails operational risks, such as settlement failures or delays in the settlement of instructions. Such failures or delays may restrict the ability of the Fund to meet delivery or payment obligations. Lastly, securities lending activities may result in adverse tax consequences for the Fund and its shareholders. For instance, substitute payments for dividends received by the Fund for securities loaned out by the Fund will not be considered qualified dividend income. The Fund could lose money if its short-term investment of the collateral declines in value over the period of the loan.

Warrants and Rights Risk

Warrants and rights are subject to the same market risks as common stocks, but are more volatile in price. Warrants and rights do not carry the right to dividends or voting rights with respect to their underlying securities, and they do not represent any rights in the assets of the issuer. An investment in warrants or rights may be considered speculative. In addition, the value of a warrant or right does not necessarily change with the value of the underlying security and a warrant or right ceases to have value if it is not exercised prior to its expiration date. The purchase of warrants or rights involves the risk that the Fund could lose the purchase value of a warrant or right if the right to subscribe for additional shares is not exercised prior to the warrants' or rights' expiration. Also, the purchase of warrants and rights involves the risk that the effective price paid for the warrant or right added to the subscription price of the related security may exceed the value of the subscribed security's market price such as when there is no movement in the price of the underlying security.

MANAGEMENT OF THE FUND

Trustees and Officers

The general supervision of the duties performed for the Fund under the investment management agreement and sub-advisory agreement is the responsibility of the Board of Trustees. There are seven Trustees of the Trust, one of whom is an "interested person" (as the term is defined in the 1940 Act) and six of whom are Trustees who are not officers or employees of First Trust or any of its affiliates ("*Independent Trustees*"). The Trustees set broad policies for the Fund, choose the Trust's officers and hire the Trust's investment advisor and Sub-Advisor. The officers of the Trust manage its day-to-day operations and are responsible to the Board of Trustees. The following is a list of the Trustees and executive officers of the Trust and a statement of their present positions and principal occupations during the past five years, the number of portfolios each Trustee oversees and the other directorships they have held during the past five years, if applicable. Each Trustee has been elected for an indefinite term. The officers of the Trust serve indefinite terms. Each Trustee, except for James A. Bowen, is an Independent Trustee. Mr. Bowen is deemed an "interested person" (as that term is defined in the 1940 Act) ("*Interested Trustee*") of the Trust due to his position as Chief Executive Officer of First Trust, investment advisor to the Fund. The following table identifies the Trustees and Officers of the Trust. Unless otherwise indicated, the address of all persons below is c/o First Trust Advisors L.P., 120 East Liberty Drive, Suite 400, Wheaton, IL 60187.

(1) Mr. Bowen is deemed an “interested person” of the Trust due to his position as Chief Executive Officer of First Trust, investment advisor of the Fund.

Unitary Board Leadership Structure

Except in certain circumstances (as noted below) under which a Trustee is unable to sit on all the boards of all the funds in the First Trust Fund Complex (as defined below), each Trustee serves as a trustee of all open-end and closed-end funds in the First Trust Fund Complex (as defined below), which is known as a “unitary” board leadership structure. Each Trustee (except as noted below) currently serves as a trustee of First Trust Series Fund and First Trust Variable Insurance Trust, open-end funds with 12 portfolios advised by First Trust; First Trust Senior Floating Rate Income Fund II, First Trust Enhanced Equity Income Fund, First Trust Mortgage Income Fund, First Trust Specialty Finance and Financial Opportunities Fund, First Trust Intermediate Duration Preferred & Income Fund and First Trust High Yield Opportunities 2027 Term Fund, closed-end funds advised by First Trust; and First Trust Exchange-Traded Fund, First Trust Exchange-Traded Fund II, First Trust Exchange-Traded Fund III, First Trust Exchange-Traded Fund IV, First Trust Exchange-Traded Fund V, First Trust Exchange-Traded Fund VI, First Trust Exchange-Traded Fund VII, First Trust Exchange-Traded Fund VIII, First Trust Exchange-Traded AlphaDEX® Fund and First Trust Exchange-Traded AlphaDEX® Fund II, exchange-traded funds with 286 portfolios advised by First Trust (each a “First Trust Fund” and collectively, the “First Trust Fund Complex”). Ms. Wright also serves as director of First Trust Global Funds, a public limited company established in Ireland and an open-end umbrella fund representing 39 exchange-traded funds and one mutual fund, and advised by First Trust (collectively, the “First Trust

UCITS"). In addition, Ms. Wright had previously served on the board of directors of First Trust Global Portfolios Management Limited, the manager to the First Trust UCITS and an affiliate of First Trust, but resigned such position effective March 6, 2023. Except as noted above, none of the Independent Trustees nor their immediate family members has ever been a director, officer or employee of, or consultant to, First Trust, First Trust Portfolios L.P. or their affiliates. Due to certain restrictions resulting from the 1940 Act, Ms. Wright does not serve as a Trustee of First Trust Exchange-Traded Fund, with, in the aggregate, 26 portfolios.

The management of the Fund, including general supervision of the duties performed for the Fund under the investment management agreement between the Trust, on behalf of the Fund, and the Advisor, and the sub-advisory agreement among the Advisor and the Sub-Advisor and the Trust, on behalf of the Fund, is the responsibility of the Board of Trustees. The Trustees set broad policies for the Fund, choose the Trust's officers and hire the Fund's investment advisor, sub-advisors and other service providers. The officers of the Trust manage the day-to-day operations and are responsible to the Board. The Board is composed of six Independent Trustees and one Interested Trustee. The Interested Trustee, James A. Bowen, serves as the Chairman of the Board for each fund in the First Trust Fund Complex.

The unitary board structure was adopted for the First Trust Funds because of the efficiencies it achieves with respect to the governance and oversight of the First Trust Funds. Each First Trust Fund is subject to the rules and regulations of the 1940 Act (and other applicable securities laws), which means that many of the First Trust Funds face similar issues with respect to certain of their fundamental activities, including risk management, portfolio liquidity, portfolio valuation and financial reporting. Because of the similar and often overlapping issues facing the First Trust Funds, including among the First Trust exchange-traded funds, the Board of the First Trust Funds believes that maintaining a unitary board structure promotes efficiency and consistency in the governance and oversight of all First Trust Funds and reduces the costs, administrative burdens and possible conflicts that may result from having multiple boards. In adopting a unitary board structure, the Trustees seek to provide effective governance through establishing a board the overall composition of which will, as a body, possess the appropriate skills, diversity, independence and experience to oversee the Fund's business.

Annually, the Board reviews its governance structure and the committee structures, their performance and functions, and it reviews any processes that would enhance Board governance over the Fund's business. The Board has determined that its leadership structure, including the unitary board and committee structure, is appropriate based on the characteristics of the funds it serves and the characteristics of the First Trust Fund Complex as a whole.

In order to streamline communication between the Advisor and the Independent Trustees and create certain efficiencies, the Board has a Lead Independent Trustee who is responsible for: (i) chairing all meetings of the Independent Trustees; (ii) working with the Advisor, Fund counsel and the independent legal counsel to the Independent Trustees to determine the agenda for Board meetings; (iii) serving as the principal contact for and facilitating communication between the Independent Trustees and the Fund's service providers, particularly the Advisor; and (iv) any other duties that the Independent Trustees may delegate to the Lead Independent Trustee. The Lead Independent Trustee is selected by the Independent Trustees and serves for such term as approved by the Independent Trustees or until his or her successor is selected. Robert F. Keith currently serves as the Lead Independent Trustee.

Effective March 12, 2024, the Independent Trustees may select one Independent Trustee to serve as a Vice Lead Independent Trustee for such term as approved by the Independent Trustees or until his or her successor is selected. The Vice Lead Independent Trustee assists the Lead Independent Trustee in the performance of his or her responsibilities and, in the absence of the Lead Independent Trustee, may act in the place of the Lead Independent Trustee. The Vice Lead Independent Trustee is also responsible for any other duties that the Independent Trustees may delegate to him or her. Thomas R. Kadlec was appointed to serve as the Vice Lead Independent Trustee, effective March 12, 2024.

The Board has established five standing committees (as described below) and has delegated certain of its responsibilities to those committees. The Board and its committees meet frequently throughout the year to oversee the Fund's activities, review contractual arrangements with and performance of service providers, oversee compliance with regulatory requirements and review Fund performance. The Independent Trustees are represented by independent legal counsel at all Board and committee meetings (other than meetings of the Dividend Committee). Generally, the Board acts by majority vote of all the Trustees, including a majority vote of the Independent Trustees if required by applicable law.

The five standing committees of the Board are: the Executive Committee, the Dividend Committee, the Nominating and Governance Committee, the Valuation Committee and the Audit Committee. The Dividend Committee, the Nominating and Governance Committee, the Valuation Committee and the Audit Committee each have a Chair and, since March 12, 2024, the Audit Committee has had a Vice Chair. The Committee Chairs, the Audit Committee Vice Chair, the Lead

Independent Trustee and the Vice Lead Independent Trustee rotate periodically in serving in such capacities. The next rotation is currently scheduled to be effective January 1, 2026. In addition, the Lead Independent Trustee and the Vice Lead Independent Trustee currently serve on the Executive Committee with the Interested Trustee.

The Nominating and Governance Committee is responsible for appointing and nominating non-interested persons to the Board of Trustees. Messrs. Erickson, Kadlec, Keith, Nielson and Mses. Keefe and Wright are members of the Nominating and Governance Committee. If there is no vacancy on the Board of Trustees, the Board will not actively seek recommendations from other parties, including shareholders. The Board of Trustees has adopted a mandatory retirement age of 75 for Independent Trustees, beyond which age Independent Trustees are ineligible to serve. The Committee will not consider new trustee candidates who are 72 years of age or older or will turn 72 years old during the initial term. When a vacancy on the Board of Trustees occurs or is anticipated to occur and nominations are sought to fill such vacancy, the Nominating and Governance Committee may seek nominations from those sources it deems appropriate in its discretion, including shareholders of the Fund. To submit a recommendation for nomination as a candidate for a position on the Board of Trustees, shareholders of the Fund should mail such recommendation to W. Scott Jardine, Secretary, at the Trust's address, 120 East Liberty Drive, Suite 400, Wheaton, Illinois 60187. Such recommendation shall include the following information: (i) evidence of Fund ownership of the person or entity recommending the candidate (if a Fund shareholder); (ii) a full description of the proposed candidate's background, including education, experience, current employment and date of birth; (iii) names and addresses of at least three professional references for the candidate; (iv) information as to whether the candidate is an "interested person" in relation to the Fund, as such term is defined in the 1940 Act, and such other information that may be considered to impair the candidate's independence; and (v) any other information that may be helpful to the Committee in evaluating the candidate. If a recommendation is received with satisfactorily completed information regarding a candidate during a time when a vacancy exists on the Board or during such other time as the Nominating and Governance Committee is accepting recommendations, the recommendation will be forwarded to the Chair of the Nominating and Governance Committee and to counsel to the Independent Trustees. During the last fiscal year, the Nominating and Governance Committee held four meetings.

The Valuation Committee is responsible for the oversight of the Advisor as the "Valuation Designee" under Rule 2a-5 of the 1940 Act and its implementation of the valuation of the securities held in the Fund's portfolio. Messrs. Erickson, Kadlec, Keith, Nielson and Mses. Keefe and Wright are members of the Valuation Committee. During the last fiscal year, the Valuation Committee held four meetings.

The Audit Committee is responsible for overseeing the Fund's accounting and financial reporting process, the system of internal controls and audit process and for evaluating and appointing independent auditors (subject also to Board approval). Messrs. Erickson, Kadlec, Keith, Nielson and Mses. Keefe and Wright serve on the Audit Committee. Ms. Keefe was appointed to serve as the Vice Chair of the Audit Committee, effective March 12, 2024. During the last fiscal year, the Audit Committee held nine meetings.

The Executive Committee, which meets between Board meetings, is authorized to exercise all powers of and to act in the place of the Board to the extent permitted by each Fund's Declaration of Trust and By-Laws. Mr. Bowen, Mr. Keith and Mr. Kadlec are members of the Executive Committee. During the last fiscal year, the Executive Committee did not hold any meetings.

The Dividend Committee is responsible for assisting the Board in, or assuming the authority and power of the Board with respect to, the declaration and setting of the Fund's dividends. Messrs. Keith and Kadlec serve on the Dividend Committee. During the last fiscal year, the Dividend Committee did not hold any meetings.

Executive Officers

The executive officers of the Trust hold the same positions with each fund in the First Trust Fund Complex (representing 304 portfolios) as they hold with the Trust, except Mr. Ueland who is an executive officer of only the ETFs advised by First Trust and Mr. Testin who is an executive officer of only the ETFs and open-end funds advised by First Trust.

Risk Oversight

As part of the general oversight of the Fund, the Board is involved in the risk oversight of the Fund. The Board has adopted and periodically reviews policies and procedures designed to address the Fund's risks. Oversight of investment and compliance risk is performed primarily at the Board level in conjunction with the Advisor's investment oversight group and the Trust's Chief Compliance Officer ("CCO"). Oversight of other risks also occurs at the committee level. The Advisor's

investment oversight group reports to the Board at quarterly meetings regarding, among other things, Fund performance and the various drivers of such performance as well as information related to the Sub-Advisor and its operations and processes. The Board reviews reports on the Fund's and the service providers' compliance policies and procedures at each quarterly Board meeting and receives an annual report from the CCO regarding the operations of the Fund's and the service providers' compliance programs. In addition, the Independent Trustees meet privately each quarter with the CCO. The Audit Committee reviews, with the Advisor and the Fund's independent auditors, the Fund's major financial risk exposures and the steps the Advisor has taken to monitor and control these exposures, including the Fund's risk assessment and risk management policies and guidelines. The Audit Committee also, as appropriate, reviews in a general manner the processes other Board committees have in place with respect to risk assessment and risk management. The Nominating and Governance Committee monitors all matters related to the corporate governance of the Trust. The Valuation Committee monitors valuation risk and oversees the Advisor's performance as Valuation Designee.

Not all risks that may affect the Fund can be identified nor can controls be developed to eliminate or mitigate their occurrence or effects. It may not be practical or cost effective to eliminate or mitigate certain risks, the processes and controls employed to address certain risks may be limited in their effectiveness, and some risks are simply beyond the reasonable control of the Fund or the Advisor or other service providers. For instance, as the use of Internet technology has become more prevalent, the Fund and its service providers have become more susceptible to potential operational risks through breaches in cyber security (generally, intentional and unintentional events that may cause the Fund or a service provider to lose proprietary information, suffer data corruption or lose operational capacity). There can be no guarantee that any risk management systems established by the Fund, its service providers, or issuers of the securities in which the Fund invests to reduce cyber security risks will succeed, and the Fund cannot control such systems put in place by service providers, issuers or other third parties whose operations may affect the Fund and/or its shareholders. Moreover, it is necessary to bear certain risks (such as investment-related risks) to achieve the Fund's goals. As a result of the foregoing and other factors, the Fund's ability to manage risk is subject to substantial limitations.

Board Diversification and Trustee Qualifications

As described above, the Nominating and Governance Committee of the Board oversees matters related to the selection and nomination of Trustees. The Nominating and Governance Committee seeks to establish an effective Board with an appropriate range of skills and diversity, including, as appropriate, differences in background, professional experience, education, vocation, and other individual characteristics and traits in the aggregate. Each Trustee must meet certain basic requirements, including relevant skills and experience, time availability and, if qualifying as an Independent Trustee, independence from the Advisor, Sub-Advisor, underwriters or other service providers, including any affiliates of these entities.

Listed below for each current Trustee are the experiences, qualifications and attributes that led to the conclusion, as of the date of this SAI, that each current Trustee should serve as a Trustee in light of the Trust's business and structure.

Richard E. Erickson, M.D., was previously an orthopedic surgeon with Edward-Elmhurst Medical Group from 2021 to September 2023. Prior thereto, he was President of Wheaton Orthopedics (from 1990 to 2021), a co-owner and director of a fitness center and a limited partner of two real estate companies. Dr. Erickson has served as a Trustee of each First Trust Fund since its inception and of the First Trust Funds since 1999. Dr. Erickson has also served as the Lead Independent Trustee (2008 - 2009 and 2017 - 2019) and on the Executive Committee (2008 - 2009 and 2017 - 2022), Chairman of the Nominating and Governance Committee (2003 - 2007 and 2014 - 2016), Chairman of the Audit Committee (2012 - 2013) and Chairman of the Valuation Committee (June 2006 - 2007; 2010 - 2011 and 2020 - 2022) of the First Trust Funds. He currently serves as Chairman of the Audit Committee (since January 1, 2023) of the First Trust Funds.

Thomas R. Kadlec was previously President of ADM Investor Services Inc. ("ADMIS"), a futures commission merchant and wholly-owned subsidiary of the Archer Daniels Midland Company ("ADM") from 2010 to July 2022. Mr. Kadlec was employed by ADMIS and its affiliates since 1990 in various accounting, financial, operations and risk management capacities. Mr. Kadlec served on the boards of several international affiliates of ADMIS until July 2022 and served as a member of ADM's Integrated Risk Committee from 2008 - 2018, which was tasked with the duty of implementing and communicating enterprise-wide risk management. From 2014 to 2022, Mr. Kadlec was on the board of the Futures Industry Association. In 2017, Mr. Kadlec was elected to the board of the National Futures Association. Mr. Kadlec has served as a Trustee of each First Trust Fund since its inception. Mr. Kadlec also served on the Executive Committee from the organization of the first First Trust closed-end fund in 2003 through 2005 (and 2014 - 2019) until he was elected as the first Lead Independent Trustee in December 2005, serving as such through 2007 (and 2014 - 2016). He also served as Chairman of

the Valuation Committee (2008 – 2009 and 2017 – 2019), Chairman of the Audit Committee (2010 – 2011 and 2020 – 2022) and Chairman of the Nominating and Governance Committee (2012 – 2013). He currently serves as Vice Lead Independent Trustee (since March 12, 2024), on the Executive Committee (since March 12, 2024), on the Dividend Committee (since March 12, 2024) and as Chairman of the Nominating and Governance Committee (since January 1, 2023) of the First Trust Funds.

Denise M. Keefe has been Senior Vice President of Advocate Health, Continuing Health Division since 2023, and from 2018 to 2023 was Executive Vice President of Advocate Aurora Health (together, with Advocate Health, “Advocate”). Advocate is one of the largest integrated healthcare systems in the U.S. serving Illinois and Wisconsin. Ms. Keefe has been employed by Advocate since 1993 and is responsible for the Continuing Health Division’s strategic direction, fiscal management, business development, revenue enhancement, operational efficiencies, and human resource management of 4,000 employees. Ms. Keefe also currently serves on the boards of several organizations within the Advocate Aurora Continuing Health Division and other health care organizations, including RML Long Term Acute Care Hospitals (since 2014). Prior thereto, Ms. Keefe was Corporate Vice President, Marketing and Business Development for the Visiting Nurse Association of Chicago (1989 – 1992) and a former Board Member of Sherman West Court Skilled Nursing Facility. Ms. Keefe has served as a Trustee of the First Trust Funds and on the Audit Committee, Nominating and Governance Committee and Valuation Committee of the First Trust Funds since November 1, 2021. In addition, she currently serves as Audit Committee Vice Chair (since March 12, 2024) of the First Trust Funds.

Robert F. Keith is President of Hibs Enterprises, a financial and management consulting firm. Mr. Keith has been with Hibs Enterprises since 2003. Prior thereto, Mr. Keith spent 18 years with ServiceMaster and Aramark, including three years as President and COO of ServiceMaster Consumer Services, where he led the initial expansion of certain products overseas; five years as President and COO of ServiceMaster Management Services; and two years as President of Aramark ServiceMaster Management Services. Mr. Keith is a certified public accountant and also has held the positions of Treasurer and Chief Financial Officer of ServiceMaster, at which time he oversaw the financial aspects of ServiceMaster’s expansion of its Management Services division into Europe, the Middle East and Asia. Mr. Keith has served as a Trustee of the First Trust Funds since 2006. Mr. Keith has also served as the Chairman of the Audit Committee (2008 – 2009 and 2017 – 2019), Chairman of the Nominating and Governance Committee (2010 – 2011 and 2020 – 2022) and Chairman of the Valuation Committee (2014 – 2016) of the First Trust Funds. He served as Lead Independent Trustee and on the Executive Committee (2012 – 2016). He currently serves as Lead Independent Trustee and on the Executive Committee (since January 1, 2023) and as Chairman of the Dividend Committee (since January 1, 2023) of the First Trust Funds.

Niel B. Nielson, Ph.D., has been the Senior Advisor of Pelita Harapan Educational Foundation, a global provider of educational products and services since 2018. Prior thereto, Mr. Nielson served as the Managing Director and Chief Operating Officer of Pelita Harapan Educational Foundation for three years. Mr. Nielson formerly served as the President and Chief Executive Officer of Dew Learning LLC from 2012 through 2014. Mr. Nielson formerly served as President of Covenant College (2002 – 2012), and as a partner and trader (of options and futures contracts for hedging options) for Ritchie Capital Markets Group (1996 – 1997), where he held an administrative management position at this proprietary derivatives trading company. He also held prior positions in new business development for ServiceMaster Management Services Company and in personnel and human resources for NationsBank of North Carolina, N.A. and Chicago Research and Trading Group, Ltd. (“CRT”). His international experience includes serving as a director of CRT Europe, Inc. for two years, directing out of London all aspects of business conducted by the U.K. and European subsidiary of CRT. Prior to that, Mr. Nielson was a trader and manager at CRT in Chicago. Mr. Nielson has served as a Trustee of each First Trust Fund since its inception and of the First Trust Funds since 1999. Mr. Nielson has also served as Chairman of the Audit Committee (2003 – 2007 and 2014 – 2016), Chairman of the Valuation Committee (2012 – 2013), Chairman of the Nominating and Governance Committee (2008 – 2009 and 2017 – 2019), Chairman of the Dividend Committee (2020 – 2022), and Lead Independent Trustee (2010 – 2011 and 2020 – 2022) of the First Trust Funds. Further, he has served as a member of the Executive Committee (2010 – 2011 and January 1, 2020 – March 12, 2024) and the Dividend Committee (October 19, 2020 – March 12, 2024) of the First Trust Funds. He currently serves as Chairman of the Valuation Committee (since January 1, 2023) of the First Trust Funds.

Bronwyn Wright has acted as an independent director to a number of Irish collective investment funds since 2009. Ms. Wright is a former Managing Director of Citibank Europe plc and Head of Securities and Fund Services for Citi Ireland. In these positions, she was responsible for the management and strategic direction of Citi Ireland’s securities and fund services business which included funds, custody, security finance/lending and global agency and trust. She also had responsibility for leading, managing and growing the Trustee, Custodian and Depository business in Ireland, the United Kingdom,

Luxembourg, Jersey and Cayman. Ms. Wright has served as a Trustee of the First Trust Funds and on the Audit Committee, Nominating and Governance Committee and Valuation Committee of the First Trust Funds since September 10, 2023.

James A. Bowen is Chief Executive Officer of First Trust Advisors L.P. and First Trust Portfolios L.P. Mr. Bowen is involved in the day-to-day management of the First Trust Funds and serves on the Executive Committee. He has over 35 years of experience in the investment company business in sales, sales management and executive management. Mr. Bowen has served as a Trustee of each First Trust Fund since its inception and of the First Trust Funds since 1999.

Effective January 1, 2024, the fixed annual retainer paid to the Independent Trustees is \$285,000 per year and an annual per fund fee of \$7,500 for each closed-end fund, \$2,000 for each actively managed fund, \$750 for each target outcome fund and \$500 for each index fund. The fixed annual retainer is allocated equally among each fund in the First Trust Fund Complex rather than being allocated pro rata based on each fund's net assets. Additionally, the Lead Independent Trustee is paid \$30,000 annually, the Vice Lead Independent Trustee is paid up to \$25,000 annually (effective March 12, 2024), the Chairman of the Audit Committee is paid \$25,000 annually, the Chairman of the Valuation Committee is paid \$20,000 annually, the Chairman of the Nominating and Governance Committee is paid \$20,000 annually and the Vice Chair of the Audit Committee is paid \$15,000 annually (effective March 12, 2024) to serve in such capacities with compensation allocated pro rata among each fund in the First Trust Fund Complex based on its net assets. Trustees are also reimbursed by the funds in the First Trust Fund Complex for travel and out-of-pocket expenses incurred in connection with all meetings. Each Committee Chair, the Audit Committee Vice Chair, the Lead Independent Trustee and the Vice Lead Independent Trustee rotate in accordance with the rotation periods established by the Board.

The following table sets forth the total compensation (including reimbursement for travel and out-of-pocket expenses) paid by the Fund and the First Trust Fund Complex to each of the Independent Trustees for the fiscal year ended October 31, 2024 and the calendar year ended December 31, 2024, respectively. The Trust has no retirement or pension plans. The officers and Trustee who are "interested persons" as designated above serve without any compensation from the Trust. The Trust has no employees. Its officers are compensated by First Trust.

Name of Trustee	Total Compensation from the Fund ⁽¹⁾	Total Compensation from the First Trust Fund Complex ⁽²⁾
Richard E. Erickson	\$4,000	\$653,176
Thomas R. Kadlec	\$4,221	\$666,676
Denise M. Keefe	\$3,434	\$636,112
Robert F. Keith	\$4,158	\$657,442
Niel B. Nielson	\$3,841	\$644,660
Bronwyn Wright	\$3,315	\$617,975

(1) The compensation paid by the Fund to the Independent Trustees for the fiscal year ended October 31, 2024 for services to the Fund.

(2) The total compensation paid to the Independent Trustees for the calendar year ended December 31, 2024 for services to the 307 portfolios existing in 2024, which consisted of 12 open-end mutual funds, 13 closed-end funds and 282 exchange-traded funds.

The following table sets forth the dollar range of equity securities beneficially owned by the Trustees in the Fund and in other funds overseen by the Trustees in the First Trust Fund Complex as of December 31, 2024:

Trustee	Dollar Range of Equity Securities in the Fund (Number of Shares Held)	Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen by Trustee in the First Trust Fund Complex
Interested Trustee

Bronwyn Wright	None	None

As of January 31, 2025, the Independent Trustees of the Trust and their immediate family members did not own beneficially or of record any class of securities of an investment advisor or principal underwriter of the Fund or any person directly or indirectly controlling, controlled by or under common control with an investment advisor or principal underwriter of the Fund.

As of January 31, 2025, the officers and Trustees, in the aggregate, owned less than 1% of the shares of the Fund.

The table set forth in *Exhibit A* shows the percentage ownership of each person or “group” (as that term is used in Section 13(d) of the 1934 Act) who, based on the securities position listing reports as of January 31, 2025, owned of record, or is known by the Trust to have owned of record or beneficially, 5% or more of the shares of the Fund (the “*Principal Holders*”). A control person is one who owns, either directly or indirectly, more than 25% of the voting securities of the Fund or acknowledges the existence of control. A party that controls the Fund may be able to significantly influence the outcome of any item presented to shareholders for approval. The Fund does not have any knowledge of who the ultimate beneficiaries are of the shares.

Investment Advisor. First Trust, 120 East Liberty Drive, Suite 400, Wheaton, Illinois 60187, is the investment advisor to the Fund. First Trust is a limited partnership with one limited partner, Grace Partners of DuPage L.P., and one general partner, The Charger Corporation. Grace Partners of DuPage L.P. is a limited partnership with one general partner, The Charger Corporation, and a number of limited partners. The Charger Corporation is an Illinois corporation controlled by James A. Bowen, the Chief Executive Officer of First Trust. First Trust discharges its responsibilities to the Fund subject to the policies of the Board of Trustees.

First Trust provides investment tools and portfolios for advisors and investors. First Trust is committed to theoretically sound portfolio construction and empirically verifiable investment management approaches. Its asset management philosophy and investment discipline are deeply rooted in the application of intuitive factor analysis and model implementation to enhance investment decisions.

First Trust acts as investment advisor for the Fund and manages the investment and reinvestment of the assets of the Fund. First Trust also administers the Trust's business affairs, provides office facilities and equipment and certain clerical, bookkeeping and administrative services, and permits any of its officers or employees to serve without compensation as Trustees or officers of the Trust if elected to such positions.

Pursuant to an investment agreement between First Trust and the Trust, on behalf of the Fund (the “*Investment Management Agreement*”), First Trust oversees Stonebridge's management of the Fund's assets and is responsible for paying all expenses of the Fund, excluding the fee payments under the Investment Management Agreement, interest, taxes, brokerage commissions and other expenses connected with the execution of portfolio transactions, distribution and service fees payable pursuant to a Rule 12b-1 plan, if any, and extraordinary expenses.

The Fund has agreed to pay First Trust an annual management fee equal to 0.85% of its average daily net assets. First Trust provides fund reporting services to the Fund for a flat annual fee in the amount of \$9,250, which is included in the annual unitary management fee.

Under the Investment Management Agreement, First Trust shall not be liable for any loss sustained by reason of the purchase, sale or retention of any security, whether or not such purchase, sale or retention shall have been based upon the

investigation and research made by any other individual, firm or corporation, if such recommendation shall have been selected with due care and in good faith, except loss resulting from willful misfeasance, bad faith, or gross negligence on the part of First Trust in the performance of its obligations and duties, or by reason of its reckless disregard of its obligations and duties. The Investment Management Agreement terminates automatically upon assignment and is terminable at any time without penalty as to the Fund by the Board of Trustees, including a majority of the Independent Trustees, or by vote of the holders of a majority of the Fund's outstanding voting securities on 60 days' written notice to First Trust, or by First Trust on 60 days' written notice to the Fund.

As approved by the Trust's Board of Trustees, the management fee paid to the Advisor will be reduced at certain levels of Fund net assets ("*breakpoints*") and calculated pursuant to the schedule below:

Management Fee	Breakpoints
0.85000%	Fund net assets up to and including \$2.5 billion
0.82875%	Fund net assets greater than \$2.5 billion up to and including \$5 billion
0.80750%	Fund net assets greater than \$5 billion up to and including \$7.5 billion
0.78625%	Fund net assets greater than \$7.5 billion up to and including \$10 billion
0.76500%	Fund net assets greater than \$10 billion

In connection with the introduction of the breakpoints discussed above, the Fund's investment sub-advisory agreement has been amended to reflect that the investment sub-advisory fee paid to Stonebridge Advisors LLC, the Fund's investment sub-advisor, is based on the Advisor's management fee. Accordingly, during any period in which the Advisor's management fee is reduced in accordance with the breakpoints described above, the investment sub-advisory fee will be reduced to reflect the reduction in the Advisor's management fee.

The following table sets forth the unitary management fee paid by the Fund to First Trust for the specified periods.

Amount of Unitary Fees		
Fiscal Year Ended October 31,		
2024	2023	2022
\$44,636,161	\$46,658,092	\$60,708,917

SUB-ADVISOR

The Trust, on behalf of the Fund, and First Trust have retained Stonebridge Advisors LLC, an affiliate of First Trust, to serve as the Fund's investment sub-advisor pursuant to a sub-advisory agreement (the "*Sub-Advisory Agreement*"). In this capacity, Stonebridge is responsible for the selection and ongoing monitoring of the securities in the Fund's investment portfolio. Stonebridge is a Delaware limited liability company with principal offices located at 10 Westport Road, Suite C101, Wilton, Connecticut 06897. Stonebridge is owned 51% by an affiliate of the Advisor and 48% by Stonebridge Asset Management LLP. Stonebridge is a registered investment advisor under the Investment Advisers Act of 1940, as amended (the "*Advisers Act*"), and had approximately \$12.715 billion of assets which it managed as of December 31, 2024. Stonebridge is a research-driven firm whose personnel have longstanding experience in investing in preferred securities. Set forth below is information regarding the key executives of Stonebridge who will select and monitor the portfolio or provide managerial or executive support to the Fund.

Portfolio Managers. The portfolio managers are primarily and jointly responsible for the day-to-day management of the Fund. There are currently three portfolio managers, as follows:

- Robert Wolf is Executive Vice President and Chief Investment Officer of Stonebridge Advisors. Mr. Wolf is a senior leader of the investment committee and oversees investment policies and strategies for portfolio management activities across all fund products and separately managed accounts. In addition, Mr. Wolf directs the daily management of preferred securities portfolios and trading functions. Mr. Wolf has 25 years of fixed-income experience in both portfolio management and credit research. Prior to joining Stonebridge in 2006, Mr. Wolf was a high-yield fixed-income research analyst at Lehman Brothers. In this role, his responsibilities included detailed credit analysis across multiple sectors, relative value analysis, and developing trade recommendations. Mr. Wolf

previously worked for Lehman Brothers' commercial mortgage-backed securities (CMBS) trading desk as a credit analyst. Mr. Wolf received his B.S. degree in Chemistry from Villanova University and his MBA in Finance from the New York University Stern School of Business.

- Eric Weaver is Executive Vice President, Chief Strategist and Portfolio Manager of Stonebridge Advisors. Mr. Weaver is a senior member of Stonebridge Advisors' Investment Committee and oversees the investment strategy for portfolio management activities across all fund products and separately managed accounts. In addition, Mr. Weaver is a member of the Executive Committee at Stonebridge Advisors. Mr. Weaver has 17 years of investment management experience in portfolio management, trading, risks analysis, and research. Prior to joining Stonebridge in 2013, Mr. Weaver worked at a private proprietary trading firm as a senior derivatives trader, with OTC and electronic trading experience on the NASDAQ OMX PHLX and CBOE options exchanges. In this role, Mr. Weaver focused on trading, portfolio and risk management, and pricing complex derivatives in a large and diverse portfolio of equities, options, and futures. Mr. Weaver received a B.A. degree in Economics and Mathematics and a M.S. degree in Economics from Lehigh University in Bethlehem, PA.
- Angelo Graci is Executive Vice President, Head of Credit Research, and Portfolio Manager of Stonebridge Advisors. Mr. Graci is a senior member of the Investment Committee and manages a team of analysts that oversees all of Stonebridge's portfolio investments. His extensive knowledge of global banking, insurance, non-bank finance and REITs brings an impressive level of analytical depth to the Stonebridge research team. Mr. Graci has 29 years of credit and equity research experience with a focus on financials. Prior to joining Stonebridge in 2018, Mr. Graci was a global financials credit strategist at Stifel Financial, with a particular focus on hybrid/preferred strategy. Before Stifel, he was a senior analyst at Caxton Associates, responsible for financial sector credit and equity analysis and portfolio management. Prior roles included global financials and hybrid strategy at Citadel Securities and credit analysis and trading at Merrill Lynch. Mr. Graci received a B.S. in Finance from SUNY Albany and an MBA in Finance from New York University Stern School of Business. He holds the CFA® designation awarded by CFA Institute.

As of October 31, 2024, Mr. Wolf beneficially owned shares of the Fund in the amount of \$50,001 - \$100,000, Mr. Weaver beneficially owned shares of the Fund in the amount of \$10,001 - \$50,000 and Mr. Graci beneficially owned shares of the Fund in the amount of over \$100,000.

Compensation. The portfolio managers are compensated with an industry competitive salary and a year-end discretionary bonus based on client service, asset growth and the performance of the Fund. Each portfolio manager's performance is formally evaluated annually based on a variety of factors. Bonus compensation is primarily a function of the firm's overall annual profitability and the individual portfolio manager's contribution as measured by the overall investment performance of client portfolios in the strategy the portfolio manager manages relative to the strategy's general benchmark.

Accounts Managed by Sub-Advisor

In addition to the Fund, as of October 31, 2024, the portfolio managers are also primarily responsible for the day-to-day portfolio management of the following accounts:

Portfolio Managers	Registered Investment Companies Number of Accounts (\$ Assets in Millions)	Other Pooled Investment Vehicles Number of Accounts (\$ Assets in Millions)	Other Accounts Number of Accounts (\$ Assets in Millions)	Registered Investment Companies With Performance Fees Number of Accounts (\$ Assets in Millions)	Other Pooled Investment Vehicles With Performance Fees Number of Accounts (\$ Assets in Millions)	Other Accounts With Performance Fees Number of Accounts (\$ Assets in Millions)
Robert Wolf	4 (\$3,508)	N/A	4,020 (\$1,680)	N/A	N/A	N/A
Eric Weaver	4 (\$3,508)	N/A	4,020 (\$1,680)	N/A	N/A	N/A
Angelo Graci	4 (\$3,508)	N/A	4,020 (\$1,680)	N/A	N/A	N/A

Conflicts of Interest. Actual or apparent conflicts of interest may arise when a portfolio manager has day-to-day management responsibilities with respect to more than one fund or other account. More specifically, portfolio managers who manage multiple funds and/or other accounts may be presented with one or more of the potential conflicts described below.

The management of multiple funds and/or other accounts may result in a portfolio manager devoting unequal time and attention to the management of each fund and/or other account. The Sub-Advisor seeks to manage such competing interests for the time and attention of a portfolio manager by having the portfolio manager focus on a particular investment discipline. Most other accounts managed by a portfolio manager are managed using the same investment models that are used in connection with the management of the Fund.

If a portfolio manager identifies a limited investment opportunity that may be suitable for more than one fund or other account, a fund may not be able to take full advantage of that opportunity due to an allocation of filled purchase or sale orders across all eligible funds and other accounts. To deal with these situations, the Sub-Advisor adopted procedures for allocating portfolio transactions across multiple accounts.

With respect to securities transactions for the Fund, the Sub-Advisor determines which broker to use to execute each order, consistent with its duty to seek best execution of the transaction. However, with respect to certain other accounts (such as mutual funds for which the Sub-Advisor acts as sub-advisor, other pooled investment vehicles that are not registered mutual funds, and other accounts managed for organizations and individuals), the Sub-Advisor may be limited by the client with respect to the selection of brokers or may be instructed to direct trades through a particular broker. In these cases, trades for the Fund in a particular security may be placed separately from, rather than aggregated with, such other accounts. Having separate transactions with respect to a security may temporarily affect the market price of the security or the execution of the transaction, or both, to the possible detriment of the Fund or other account(s) involved.

The Sub-Advisor, the Advisor and the Fund have adopted certain compliance procedures that are designed to address these types of conflicts. However, there is no guarantee that such procedures will detect each and every situation in which a conflict arises.

The Sub-Advisory Agreement. The Sub-Advisor, subject to the Board of Trustees' and Advisor's supervision, provides the Fund with discretionary investment services. Specifically, the Sub-Advisor is responsible for managing the investments of the Fund in accordance with the Fund's investment objective, policies and restrictions as provided in the Prospectus and this SAI, as may be subsequently changed by the Board of Trustees and communicated to the Sub-Advisor in writing. The Sub-Advisor further agrees to conform to all applicable laws and regulations of the SEC in all material respects and to conduct its activities under the Sub-Advisory Agreement in all material respects in accordance with applicable regulations of any governmental authority pertaining to its investment advisory services. In the performance of its duties, the Sub-Advisor will, in all material respects satisfy any applicable fiduciary duties it may have to the Fund, monitor the Fund's investments, and will comply with the provisions of the Fund's Declaration of Trust and By-Laws, as amended from time to time, and the stated investment objective, policies and restrictions of the Fund. The Sub-Advisor is responsible for effecting all security transactions for the Fund's assets. The Sub-Advisory Agreement provides that the Sub-Advisor shall generally not be liable for any loss suffered by the Fund or the Advisor (including, without limitation, by reason of the purchase, sale or retention of any security) in connection with the performance of the Sub-Advisor's duties under the Sub-Advisory Agreement, except for a loss resulting from willful misfeasance, bad faith or gross negligence on the part of the Sub-Advisor in performance of its duties under the Sub-Advisory Agreement, or by reason of its reckless disregard of its obligations and duties under the Sub-Advisory Agreement.

Pursuant to the Sub-Advisory Agreement, the Advisor has agreed to pay for the services and facilities provided by the Sub-Advisor through sub-advisory fees equal to the annual rate of 0.425% of the average daily net assets of the Fund less the amount of Fund Expenses (as such term is defined in the Sub-Advisory Agreement) owed by the Sub-Advisor pursuant to the Sub-Advisory Agreement. The Sub-Advisor's fees are paid by the Advisor out of the Advisor's management fee.

The following table sets forth the sub-advisory fees paid to the Sub-Advisor by the Advisor (net of any applicable expense waivers or reimbursements) for the specified periods.

Amount of Sub-Advisory Fees

Fiscal Year Ended October 31,		
2024	2023	2022
\$20,709,921	\$21,889,381	\$28,658,038

The Sub-Advisory Agreement may be terminated without the payment of any penalty by First Trust, the Board of Trustees, or a majority of the outstanding voting securities of the Fund (as defined in the 1940 Act), upon 60 days' written notice to the Sub-Advisor.

All fees and expenses are accrued daily and deducted before payment of dividends to investors. The Sub-Advisory Agreement has been approved by the Board of Trustees, including a majority of the Independent Trustees and the initial shareholders of the Fund.

BROKERAGE ALLOCATIONS

The Sub-Advisor is responsible for decisions to buy and sell securities for the Fund and for the placement of the Fund's securities business, the negotiation of the commissions to be paid on brokered transactions, the prices for principal trades in securities, and the allocation of portfolio brokerage and principal business. It is the policy of the Sub-Advisor to seek the best execution at the best security price available with respect to each transaction, and with respect to brokered transactions in light of the overall quality of brokerage and research services provided to the Sub-Advisor and its clients. The best price to the Fund means the best net price without regard to the mix between purchase or sale price and commission, if any. Purchases may be made from underwriters, dealers and, on occasion, the issuers. Commissions will be paid on the Fund's futures and options transactions, if any. The purchase price of portfolio securities purchased from an underwriter or dealer may include underwriting commissions and dealer spreads. The Fund may pay markups on principal transactions. In selecting broker-dealers and in negotiating commissions, the Sub-Advisor considers, among other things, the firm's reliability, the quality of its execution services on a continuing basis and its financial condition. Fund portfolio transactions may be effected with broker-dealers who have assisted investors in the purchase of shares.

Section 28(e) of the 1934 Act permits an investment advisor, under certain circumstances, to cause an account to pay a broker or dealer who supplies brokerage and research services a commission for effecting a transaction in excess of the amount of commission another broker or dealer would have charged for effecting the transaction. Brokerage and research services include (a) furnishing advice as to the value of securities, the advisability of investing, purchasing or selling securities, and the availability of securities or purchasers or sellers of securities; (b) furnishing analyses and reports concerning issuers, industries, securities, economic factors and trends, portfolio strategy and the performance of accounts; and (c) effecting securities transactions and performing functions incidental thereto (such as clearance, settlement and custody). Such brokerage and research services are often referred to as "soft dollars." The Sub-Advisor has advised the Board of Trustees that it does not currently intend to use soft dollars.

As an investment advisor, the Sub-Advisor has an obligation to seek best execution of trades in a manner intended, considering the circumstances, to secure that combination of net price and execution that will maximize the value of the Sub-Advisor's investment decisions for the benefit of its clients. Subject to the Sub-Advisor's duty to seek best execution, the Sub-Advisor's selection of brokers may be affected by its receipt of research services.

The Sub-Advisor may use client commissions (i) to acquire third party research, including the eligible portion of certain "mixed use" research products, and (ii) for proprietary research provided by brokers participating in the execution process, including access to the brokers' traders and analysts, access to conferences and company management, and the provision of market information.

When the Sub-Advisor receives research products and services in return for client brokerage, it relieves the Sub-Advisor of the expense it would otherwise bear of paying for those items with its own funds, which may provide an incentive to the Sub-Advisor to select a particular broker-dealer or electronic communication network that will provide it with research products or services.

However, the Sub-Advisor chooses those broker-dealers it believes are best able to provide the best combination of net price and execution in each transaction. The Sub-Advisor uses client brokerage from accounts managed by an investment team for research used by that team. Because virtually all orders are aggregated across all accounts in a strategy

for execution by a single broker, all participating accounts, including the Fund, generally will pay the same commission rate for trades and will share pro rata in the costs for the research, except for certain governmental clients that are subject to legal restrictions on the use of their commissions to pay for third-party research products and services (in which case the Sub-Advisor pays for such products and services from its own funds).

Notwithstanding the foregoing, in selecting brokers, the Sub-Advisor may in the future consider investment and market information and other research, such as economic, securities and performance measurement research, provided by such brokers, and the quality and reliability of brokerage services, including execution capability, performance and financial responsibility. Accordingly, the commissions charged by any such broker may be greater than the amount another firm might charge if the Sub-Advisor determines in good faith that the amount of such commissions is reasonable in relation to the value of the research information and brokerage services provided by such broker to the Sub-Advisor or the Trust. In addition, the Sub-Advisor must determine that the research information received in this manner provides the Fund with benefits by supplementing the research otherwise available to the Fund. The Investment Management Agreement and the Sub-Advisory Agreement provide that such higher commissions will not be paid by the Fund unless the Advisor or Sub-Advisor determines in good faith that the amount is reasonable in relation to the services provided. The investment advisory fees paid by the Fund to First Trust under the Investment Management Agreement would not be reduced as a result of receipt by the Sub-Advisor of research services.

The Sub-Advisor places portfolio transactions for other advisory accounts advised by it, and research services furnished by firms through which the Fund effects its securities transactions may be used by the Sub-Advisor in servicing all of its accounts; not all of such services may be used by the Sub-Advisor in connection with the Fund. The Sub-Advisor believes it is not possible to measure separately the benefits from research services to each of the accounts (including the Fund) advised by it. Because the volume and nature of the trading activities of the accounts are not uniform, the amount of commissions in excess of those charged by another broker paid by each account for brokerage and research services will vary. However, the Sub-Advisor believes such costs to the Fund will not be disproportionate to the benefits received by the Fund on a continuing basis. The Sub-Advisor seeks to allocate portfolio transactions equitably whenever concurrent decisions are made to purchase or sell securities by the Fund and another advisory account. In some cases, this procedure could have an adverse effect on the price or the amount of securities available to the Fund. In making such allocations between the Fund and other advisory accounts, the main factors considered by the Sub-Advisor are the respective investment objective, the relative size of portfolio holding of the same or comparable securities, the availability of cash for investment and the size of investment commitments generally held.

Brokerage Commissions

The following table sets forth the aggregate amount of brokerage commissions paid by the Fund for the specified periods. Significant variations in the amount the Fund paid in brokerage commissions from year-to-year are generally the result of fluctuations in the size of the Fund or changes to the Fund's portfolio holdings.

Aggregate Amount of Brokerage Commissions

Fiscal Year Ended October 31,		
2024	2023	2022
\$83,320	\$125,560	\$99,007

During the last fiscal year, First Trust Preferred Securities and Income ETF held securities of BNP Paribas Securities Corp., BOFA Securities, Inc., Goldman Sachs and Co. LLC, J.P. Morgan Securities LLC, Morgan Stanley and Co., LLC, RBC Capital Markets, LLC and Wells Fargo Securities, LLC, each a regular broker or dealer of the Fund as defined in Rule 10b-1 under the 1940 Act. As of October 31, 2024, the Fund's investment in each was 3.35%, 2.75%, 2.06%, 1.80%, 0.25%, 1.34% and 4.33% of the Fund's net assets, respectively.

ADMINISTRATOR, FUND ACCOUNTING AGENT, CUSTODIAN, TRANSFER AGENT, DISTRIBUTOR AND EXCHANGE

Administrator and Fund Accounting Agent. The Trust has appointed The Bank of New York Mellon ("BNY"), located at 240 Greenwich Street, New York, New York 10286, to serve as the Fund's administrator and provide the Fund with accounting services pursuant to a fund administration and accounting agreement (the "*Administration and Accounting Agreement*"). Under the Administration and Accounting Agreement, BNY is obligated, on a continuous basis, to provide such

administrative services as the Board reasonably deems necessary for the proper administration of the Trust and the Fund. BNY generally will assist in many aspects of the Trust's and the Fund's operations, including accounting, bookkeeping and record keeping services (including, without limitation, the maintenance of such books and records as are required under the 1940 Act and the rules thereunder, except as maintained by other service providers), assist in preparing reports to shareholders or investors, prepare and file tax returns, supply financial information and supporting data for reports to and filings with the SEC and various state Blue Sky authorities and supply supporting documentation for meetings of the Board.

Custodian. The Trust has also appointed BNY to serve as the Fund's custodian pursuant to a custodian agreement (the "*Custodian Agreement*"). Pursuant to the terms of the Custodian Agreement, BNY is generally responsible for the safekeeping of the Fund's assets and performing various other administrative duties set forth in the Custodian Agreement.

As set forth in the Administrative Agency Agreement and Custodian Agreement, the Trust, on behalf of the Fund, has agreed to indemnify BNY against, and hold it harmless from, certain losses, claims, liabilities and expenses arising out of BNY's performance of its obligations and duties under the Administrative Agency Agreement and Custodian Agreement, provided that such losses, claims, liabilities and expenses did not result from BNY's willful malfeasance, bad faith or negligence in the performance of such obligations and duties.

As compensation for the services provided by BNY under the Administrative Agency Agreement and Custodian Agreement, the Trust, on behalf of the Fund, has agreed to pay to BNY such compensation as is mutually agreed upon from time to time and reimburse BNY for out-of-pocket expenses which are a normal incident of the services provided under the agreements. This fee is subject to reduction for assets over \$1 billion and \$2 billion. Pursuant to the terms of the Investment Management Agreements, the Fund does not directly pay BNY for these services, as First Trust has assumed responsibility for the payment of these expenses out of the unitary management fee it receives from the Fund.

Transfer Agent. Pursuant to a transfer agency and service agreement, BNY provides the Trust with transfer agency services, which includes Creation Unit Aggregation order processing.

The Trust on behalf of the Fund has agreed to indemnify BNY for certain liabilities, including certain liabilities arising under the federal securities laws, unless such loss or liability results from negligence or willful misconduct in the performance of its duties. As compensation for these services, BNY is paid a fee based on the Fund's total average daily net assets. BNY also is entitled to certain out-of-pocket expenses for the services described above. This fee is subject to reduction for assets over \$1 billion and \$2 billion. The Fund has not paid any fees to BNY for the services provided as the Advisor has assumed responsibility for payment of these fees as part of the unitary management fee.

Distributor. First Trust Portfolios L.P., an affiliate of First Trust, is the distributor ("*FTP*" or the "*Distributor*") and principal underwriter of the shares of the Fund. Its principal address is 120 East Liberty Drive, Suite 400, Wheaton, Illinois 60187. The Distributor has entered into a Distribution Agreement with the Trust pursuant to which it distributes Fund shares. Shares are continuously offered for sale by the Fund through the Distributor only in Creation Unit Aggregations, as described in the Prospectus under the heading "Other Information - Continuous Offering."

For the fiscal years ended October 31, 2022, October 31, 2023 and October 31, 2024, there were no underwriting commissions with respect to the sale of Fund shares, and FTP did not receive compensation on redemptions for the Fund for those years.

12b-1 Plan. The Trust has adopted a Plan of Distribution pursuant to Rule 12b-1 under the 1940 Act (the "*Plan*") pursuant to which the Fund may reimburse the Distributor up to a maximum annual rate of 0.25% of its average daily net assets.

Under the Plan and as required by Rule 12b-1, the Trustees will receive and review after the end of each calendar quarter a written report provided by the Distributor of the amounts expended under the Plan and the purpose for which such expenditures were made. With the exception of the Distributor and its affiliates, no "interested person" of the Trust (as that term is defined in the 1940 Act) and no Trustee of the Trust has a direct or indirect financial interest in the operation of the Plan or any related agreement.

No fee is currently paid by the Fund under the Plan and, pursuant to a contractual agreement, the Fund will not pay 12b-1 fees any time before February 28, 2026.

Aggregations. Fund shares in less than Creation Unit Aggregations are not distributed by the Distributor. The Distributor will deliver the Prospectus and, upon request, this SAI to persons purchasing Creation Unit Aggregations and will

maintain records of both orders placed with it and confirmations of acceptance furnished by it. The Distributor is a broker-dealer registered under the 1934 Act and a member of the Financial Industry Regulatory Authority ("FINRA").

The Distribution Agreement provides that it may be terminated at any time, without the payment of any penalty, on at least 60 days' written notice by the Trust to the Distributor (i) by vote of a majority of the Independent Trustees or (ii) by vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Fund. The Distribution Agreement will terminate automatically in the event of its assignment (as defined in the 1940 Act).

The Distributor has entered into agreements with participants that utilize the facilities of the Depository Trust Company (the "*DTC Participants*"), which have international operational capabilities and place orders for Creation Unit Aggregations of Fund shares. Participating Parties (which are participants in the Continuous Net Settlement System of the National Securities Clearing Corporation) shall be DTC Participants.

Exchange. The only relationship that the Exchange has with First Trust or the Distributor of the Fund in connection with the Fund is that the Exchange lists the shares of the Fund and disseminates the intra-day portfolio values that are calculated by the IPV calculator pursuant to its listing agreement with the Trust. The Exchange is not responsible for and has not participated in the determination of pricing or the timing of the issuance or sale of the shares of the Fund or in the determination or calculation of the net asset value of the Fund. The Exchange has no obligation or liability in connection with the administration, marketing or trading of the Fund.

ADDITIONAL PAYMENTS TO FINANCIAL INTERMEDIARIES

First Trust or its affiliates may from time to time make payments, out of their own resources, to certain broker-dealers, registered investment advisers, banks or other intermediaries (collectively, "*intermediaries*") that sell shares of First Trust mutual funds and ETFs ("*First Trust Funds*") to promote the sales and retention of Fund shares by those firms and their customers. The amounts of these payments vary by intermediary. The level of payments that First Trust is willing to provide to a particular intermediary may be affected by, among other factors, (i) the firm's total assets or Fund shares held in and recent net investments into First Trust Funds, (ii) the value of the assets invested in the First Trust Funds by the intermediary's customers, (iii) redemption rates, (iv) its ability to attract and retain assets, (v) the intermediary's reputation in the industry, (vi) the level and/or type of marketing assistance and educational activities provided by the intermediary, (vii) the firm's level of participation in First Trust Funds' sales and marketing programs, (viii) the firm's compensation program for its registered representatives who sell Fund shares and provide services to Fund shareholders, and (ix) the asset class of the First Trust Funds for which these payments are provided. Such payments are generally asset-based but also may include the payment of a lump sum.

First Trust and/or its affiliates may make payments, out of its own assets, to those firms as compensation and/or reimbursement for marketing support and/or program servicing to selected intermediaries that are registered as holders or dealers of record for accounts invested in one or more of the First Trust Funds or that make First Trust Fund shares available through certain selected Fund no-transaction fee institutional platforms and fee-based wrap programs at certain financial intermediaries. Program servicing payments typically apply to employee benefit plans, such as retirement plans, or fee-based advisory programs but may apply to retail sales and assets in certain situations. The payments are based on such factors as the type and nature of services or support furnished by the intermediary and are generally asset-based. Services for which an intermediary receives marketing support payments may include, but are not limited to, business planning assistance, advertising, educating the intermediary's personnel about First Trust Funds in connection with shareholder financial planning needs, placement on the intermediary's preferred or recommended fund list, and access to sales meetings, sales representatives and management representatives of the intermediary. In addition, intermediaries may be compensated for enabling representatives of First Trust and/or its affiliates to participate in and/or present at conferences or seminars, sales or training programs for invited registered representatives and other employees, client and investor events and other events sponsored by the intermediary. Services for which an intermediary receives program servicing payments typically include, but are not limited to, record keeping, reporting or transaction processing and shareholder communications and other account administration services, but may also include services rendered in connection with Fund/investment selection and monitoring, employee enrollment and education, plan balance rollover or separation, or other similar services. An intermediary may perform program services itself or may arrange with a third party to perform program services. These payments, if any, are in addition to the service fee and any applicable omnibus sub-accounting fees paid to these firms with respect to these services by the First Trust Funds out of Fund assets.

From time to time, First Trust and/or its affiliates, at its expense, may provide other compensation to intermediaries that sell or arrange for the sale of shares of the First Trust Funds, which may be in addition to marketing support and program servicing payments described above. For example, First Trust and/or its affiliates may: (i) compensate intermediaries for National Securities Clearing Corporation networking system services (e.g., shareholder communication, account statements, trade confirmations and tax reporting) on an asset-based or per-account basis; (ii) compensate intermediaries for providing Fund shareholder trading information; (iii) make one-time or periodic payments to reimburse selected intermediaries for items such as ticket charges (i.e., fees that an intermediary charges its representatives for effecting transactions in Fund shares) or exchange order, operational charges (e.g., fees that an intermediary charges for establishing the Fund on its trading system), and literature printing and/or distribution costs; (iv) at the direction of a retirement plan's sponsor, reimburse or pay direct expenses of an employee benefit plan that would otherwise be payable by the plan; (v) provide payments to broker-dealers to help defray their technology or infrastructure costs; and (vi) make payments for expenses associated with intermediaries' use of First Trust Funds including, but not limited to, the use of First Trust Funds in model portfolios.

When not provided for in a marketing support or program servicing agreement, First Trust and/or its affiliates may also pay intermediaries for enabling First Trust and/or its affiliates to participate in and/or present at conferences or seminars, sales or training programs for invited registered representatives and other intermediary employees, client and investor events and other intermediary-sponsored events, and for travel expenses, including lodging incurred by registered representatives and other employees in connection with prospecting, asset retention and due diligence trips. These payments may vary depending upon the nature of the event. First Trust and/or its affiliates make payments for such events as it deems appropriate, subject to its internal guidelines and applicable law.

First Trust and/or its affiliates occasionally sponsor due diligence meetings for registered representatives during which they receive updates on various First Trust Funds and are afforded the opportunity to speak with portfolio managers. Although invitations to these meetings are not conditioned on selling a specific number of shares, those who have shown an interest in First Trust Funds are more likely to be considered. To the extent permitted by their firm's policies and procedures, all or a portion of registered representatives' expenses in attending these meetings may be covered by First Trust and/or its affiliates.

The amounts of payments referenced above made by First Trust and/or its affiliates could be significant and may create an incentive for an intermediary or its representatives to recommend or offer shares of the First Trust Funds to its customers. The intermediary may elevate the prominence or profile of the First Trust Funds within the intermediary's organization by, for example, placing the First Trust Funds on a list of preferred or recommended funds and/or granting First Trust and/or its affiliates preferential or enhanced opportunities to promote the First Trust Funds in various ways within the intermediary's organization. These payments are made pursuant to negotiated agreements with intermediaries. The payments do not change the price paid by investors for the purchase of a share or the amount the Fund will receive as proceeds from such sales. Furthermore, many of these payments are not reflected in the fees and expenses listed in the fee table section of the Fund's Prospectus because they are not paid by the Fund. The types of payments described herein are not mutually exclusive, and a single intermediary may receive some or all types of payments as described.

Other compensation may be offered to the extent not prohibited by state laws or any self-regulatory agency, such as FINRA. Investors can ask their intermediaries for information about any payments they receive from First Trust and/or its affiliates and the services it provides for those payments. Investors may wish to take intermediary payment arrangements into account when considering and evaluating any recommendations relating to Fund shares.

Payments to intermediaries, in certain circumstances, may also be made in connection with the distribution of model portfolios developed by First Trust, such as the inclusion of such model portfolios on an intermediary's platform, as well as in connection with the marketing and sale of, and/or product training regarding such model portfolios, or servicing of accounts tracking such model portfolios. Such payments may be variable or fixed fee payments for platform support, or other payments in the form of a variable or fixed fee or a per position fee, or may relate to the amount of assets an intermediary's clients have invested in the First Trust Funds in such models developed by First Trust, the management fee, the total expense ratio, or sales of the First Trust Funds in such models developed by First Trust. Some intermediaries also provide related data regarding transactions in specific model portfolios, First Trust Funds and investment strategies to First Trust in exchange for a fee.

First Trust and/or its affiliates may enter into arrangements with third parties, such as a software provider, whereby First Trust may license certain technology or other services from such entity in exchange for licensing or other fees which may be, in whole or in part, dependent on the value of First Trust mutual funds or ETFs held through such software or other

service. Such third party may also offer price concessions to broker dealers, investment advisers or other financial intermediaries that license technology or other services that may be dependent, in whole or in part, on the value of First Trust mutual funds or ETFs held through such software or other service.

ADDITIONAL INFORMATION

Book Entry Only System. The following information supplements and should be read in conjunction with the Prospectus.

DTC Acts as Securities Depository for Fund Shares. Shares of the Fund are represented by securities registered in the name of The Depository Trust Company ("*DTC*") or its nominee, Cede & Co., and deposited with, or on behalf of, DTC.

DTC, a limited-purpose trust company, was created to hold securities of its participants (the "*DTC Participants*") and to facilitate the clearance and settlement of securities transactions among the DTC Participants in such securities through electronic book-entry changes in accounts of the DTC Participants, thereby eliminating the need for physical movement of securities certificates. DTC Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own DTC. More specifically, DTC is owned by a number of its DTC Participants and by the NYSE and FINRA. Access to the DTC system is also available to others such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly (the "*Indirect Participants*").

Beneficial ownership of shares is limited to DTC Participants, Indirect Participants and persons holding interests through DTC Participants and Indirect Participants. Ownership of beneficial interests in shares (owners of such beneficial interests are referred to herein as "*Beneficial Owners*") is shown on, and the transfer of ownership is effected only through, records maintained by DTC (with respect to DTC Participants) and on the records of DTC Participants (with respect to Indirect Participants and Beneficial Owners that are not DTC Participants). Beneficial Owners will receive from or through the DTC Participant a written confirmation relating to their purchase and sale of shares.

Conveyance of all notices, statements and other communications to Beneficial Owners is effected as follows. Pursuant to a letter agreement between DTC and the Trust, DTC is required to make available to the Trust upon request and for a fee to be charged to the Trust a listing of the shares of the Fund held by each DTC Participant. The Trust shall inquire of each such DTC Participant as to the number of Beneficial Owners holding shares, directly or indirectly, through such DTC Participant. The Trust shall provide each such DTC Participant with copies of such notice, statement or other communication, in such form, number and at such place as such DTC Participant may reasonably request, in order that such notice, statement or communication may be transmitted by such DTC Participant, directly or indirectly, to such Beneficial Owners. In addition, the Trust shall pay to each such DTC Participant a fair and reasonable amount as reimbursement for the expenses attendant to such transmittal, all subject to applicable statutory and regulatory requirements.

Fund distributions shall be made to DTC or its nominee, as the registered holder of all Fund shares. DTC or its nominee, upon receipt of any such distributions, shall immediately credit DTC Participants' accounts with payments in amounts proportionate to their respective beneficial interests in shares of the Fund as shown on the records of DTC or its nominee. Payments by DTC Participants to Indirect Participants and Beneficial Owners of shares held through such DTC Participants will be governed by standing instructions and customary practices, as is now the case with securities held for the accounts of customers in bearer form or registered in a "street name," and will be the responsibility of such DTC Participants.

The Trust has no responsibility or liability for any aspect of the records relating to or notices to Beneficial Owners, or payments made on account of beneficial ownership interests in such shares, or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests, or for any other aspect of the relationship between DTC and the DTC Participants or the relationship between such DTC Participants and the Indirect Participants and Beneficial Owners owning through such DTC Participants.

DTC may decide to discontinue providing its service with respect to shares at any time by giving reasonable notice to the Trust and discharging its responsibilities with respect thereto under applicable law. Under such circumstances, the Trust shall take action to find a replacement for DTC to perform its functions at a comparable cost.

Policy Regarding Investment in Other Investment Companies. The Fund will not rely on Sections 12(d)(1)(F) or 12(d)(1)(G) of the 1940 Act to invest in other investment companies.

INFORMATION FOR INVESTORS IN THE EUROPEAN ECONOMIC AREA (“EEA”) ONLY

The following disclosures are included in this SAI solely for the purposes of compliance with the applicable EEA law and regulation resulting from, of and as a consequence of, the Fund's registration or notification under the EU Directive on Alternative Investment Fund Managers (Directive (2011/61/EU)) (the “AIFM Directive”) national private placement regimes in certain European Union (“EU”) and EEA jurisdictions. The following disclosures are not intended for, and should not be relied on by, any investor other than an investor in the relevant EU and/or EEA jurisdictions because the rules, regulations and requirements applicable to the Fund in those jurisdictions as a result of their registration or notification differ from the rules, regulations and requirements applicable to the Fund under the Investment Company Act.

European Union's Sustainable Finance Disclosure Regulation

While First Trust Advisors L.P. (the “Advisor”) is not itself generally subject to Regulation 2019/2088 of the European Parliament and of the Council on sustainability-related disclosures in the financial sector (“SFDR”), by virtue of the Fund's registration or notification under the AIFM Directive national private placement regimes in certain EU and EEA jurisdictions, some limited disclosures under the SFDR must be made in respect of the Fund and the following section is intended to satisfy certain of such requirements. The SFDR requires the Advisor to determine, on a product-by-product basis, whether “sustainability risks” are relevant to the Advisor's in-scope financial products, including the Fund.

For the purposes of SFDR, “sustainability risk” means an environmental, social or governance (“ESG”) event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of an investment.

Solely for the purposes of SFDR, the Advisor has determined that sustainability risks are not relevant to the Fund on the basis that the Fund invests principally in investments or asset classes which, in the opinion of the Advisor, are not ordinarily subject to sustainability risk as a material negative impact on the value of those investments, as such terms are interpreted and applied under SFDR.

Consequently, the Advisor does not integrate sustainability risks into its investment decision making for the Fund and the Advisor has not assessed the likely impacts of sustainability risks on the returns of the Fund, as such terms are interpreted and applied under SFDR.

The Advisor will keep its assessment that sustainability risks are not relevant to the Fund under regular review.

SFDR requires the Advisor to disclose whether, and if so how, it considers the principal adverse impacts (“PAIs”) of its investment decisions on sustainability factors, in accordance with a specific regime outlined in SFDR, in relation to the Fund. The Advisor does not consider the principal adverse impacts of its investment decisions on sustainability factors (either generally or in relation to the Fund).

In addition, the Advisor considers that its primary investment strategies and client relationships do not support adoption of the PAI regime within SFDR.

Information for Investors in the EEA Regarding Offering of the Fund

In relation to each Member State of the EEA which has implemented the AIFM Directive, the Prospectus, and any summary Prospectus or SAI relating to the Fund, may only be distributed and shares may only be offered or placed in a Member State to the extent that: (1) the Fund is permitted to be marketed to professional investors in the relevant Member State in accordance with the AIFM Directive (as implemented into the local law/regulations of the relevant Member State); or otherwise (2) the Prospectus and SAI may be lawfully distributed and the shares may lawfully be offered or placed in that Member State (including at the initiative of the investor).

In relation to each Member State of the EEA which, at the date of this SAI, has not implemented the AIFM Directive, the Prospectus and this SAI may only be distributed and shares may only be offered or placed to the extent that the Prospectus and this SAI may be lawfully distributed and the shares may lawfully be offered or placed in that Member State (including at the initiative of the investor).

In addition, the following restrictions apply to the distribution of the Prospectus and SAI in the following Member States:

Information for Investors in the United Kingdom

Subject always to the foregoing notice in respect of the EEA, this SAI is being issued in the United Kingdom by First Trust Global Portfolios Limited (which is authorized and regulated by the Financial Conduct Authority (the “FCA”)) only to and/or is directed only at persons who are professional clients or eligible counterparties for the purposes of the FCA’s Conduct of Business Sourcebook. The opportunity to invest in the Fund is only available to such persons in the United Kingdom, and the Prospectus and SAI must not be relied on or acted upon by any other persons in the United Kingdom.

Information for Investors in Ireland

The distribution of this Prospectus and SAI in Ireland and the offering or purchase of shares is restricted to the individual to whom it is addressed. Accordingly, it may not be reproduced in whole or in part, nor may its contents be distributed in writing or orally to any third party and it may be read solely by the person to whom it is addressed and his/her professional advisers. Shares in the Fund will not be offered or sold by any person:

- (a) otherwise than in conformity with the provisions of the European Communities (Markets in Financial Instruments) Regulations 2007 and the European Union (Alternative Investment Fund Managers) Regulations 2013, each as amended; or
- (b) in any way which would require the publication of a prospectus under the Companies Act 2014 or any regulations made thereunder; or
- (c) in Ireland except in all circumstances that will result in compliance with all applicable laws and regulations in Ireland.

AIFM Directive Disclosures

Background. The AIFM Directive is an EU directive which regulates the management and marketing of funds within the EEA. The AIFM Directive distinguishes between EU and non-EU funds and EU and non-EU fund managers and different obligations apply under the AIFM Directive depending on where the fund is based and where the manager is based. Certain disclosure, transparency and reporting obligations are imposed on non-EU fund managers wishing to market funds to investors in the EEA. There are additional requirements imposed on EU fund managers, which do not currently apply to First Trust.

To the extent not already disclosed to you prior to your investment in the Fund, the purpose of this section of this SAI is to satisfy the disclosures which are required to be provided to you under the AIFM Directive.

Overview of the Fund and the Service Providers. The Fund is a non-EU AIFs (“AIF” means an alternative investment fund for the purposes of the AIFM Directive).

First Trust Advisors L.P. (“First Trust”) is the AIFM of the Fund (“AIFM” means an alternative investment fund manager for the purposes of the AIFM Directive). First Trust is a non-EU AIFM.

The Trust has entered into agreements with various service providers including First Trust (as the Investment Advisor), the Custodian, Distributor, Transfer Agent, Administrator, index providers and the exchange where the Fund is listed in respect of the Fund. Further details regarding the duties and roles of such service providers can be found in the Prospectus and this SAI for the Fund.

In addition to the parties listed above, the Trust has appointed (i) Chapman and Cutler LLP as its legal counsel which advises it on US legal matters; (ii) Deloitte & Touche LLP as the Fund’s auditors who undertake to audit the Fund’s financial statements in accordance with the standards of the Public Company Accounting Oversight Board (PCAOB) (United States); and (iii) CT Corporation System as the Fund’s registered agent.

First Trust is not required to ensure that the Fund appoints, and the Fund has not appointed, a depositary for purposes of the AIFM Directive. (A depositary in the context of the AIFM Directive, has a specific role and function. The appointment of such depositary is not required for non-EU AIFs with non-EU AIFMs). As such, investors in the Fund have no rights as against any person in respect of the duties or liabilities of a depositary under the AIFM Directive.

Investors’ Contractual Rights. In respect of each of the service providers to the Fund, investors who purchase shares in the Fund in the secondary market have no direct rights of action against the service providers, as a matter of contract law or under the establishment documents of the Trust. The proper plaintiff in an action in respect of which a wrongdoing is

alleged to have been committed against the Fund or the Trust by a service provider is, prima facie, the Trust itself. An investor may bring a derivative or similar action or proceeding ("*Derivative Action*") against the Trust or the Fund to recover a judgment in its favor in accordance with the provisions of the Declaration. Accordingly, investors would have no direct contractual right against the relevant service provider for breach of the agreement governing its appointment by the Trust. The foregoing disclosure is without prejudice to such other rights of action (for example, under the securities laws, tort law or in respect of breach of fiduciary duty) which might in certain situations be separately available to investors.

Investment in the Fund. Investors will buy shares in the Fund in secondary market transactions through brokers and will not subscribe for shares from the Trust directly. As such, there is no direct contractual relationship between the Fund and the investor in connection with the purchase or sale of shares. While the Fund is established under Massachusetts law and Massachusetts law does facilitate the enforcement of judgments obtained in foreign jurisdictions, investors who buy shares on the secondary market will have no direct contractual right of action against the Fund. Investors should refer to "How to Buy and Sell Shares" in the main body of the Prospectus for more detail. The foregoing disclosure is without prejudice to such other rights of action (for example, under the securities laws, tort law or in respect of breach of fiduciary duty) which might in certain situations be separately available to investors.

Redemption from the Fund. Non-US investors will sell shares in secondary market transactions through brokers and will not redeem shares from the Fund directly. Shares can be sold throughout the trading day like other publicly traded shares. Investors should refer to "How to Buy and Sell Shares" in the main body of the Prospectus for more detail.

Liquidity Risk Management. Investors should note that while First Trust is not required to implement liquidity management arrangements in accordance with the AIFM Directive in respect of the Fund, the Fund is subject to the liquidity limitations established by the SEC. The Trustees have delegated to First Trust the day-to-day determination of illiquidity of equity and fixed income securities as described under "Illiquid Investments" in this SAI.

Treatment of Investors. The Trust and the AIFM do not offer any investors preferential treatment or the right to obtain preferential treatment. Whilst the Trust does not take specific steps to ensure the fair treatment of investors, under the 1940 Act the Trustees are required to monitor how the Fund operates and oversee matters where the interests of the Fund and its shareholders may differ from those of its investment adviser.

First Trust is registered as an investment adviser with the SEC, and is subject to regulation and oversight designed to protect shareholders. Under the Investment Advisers Act of 1940, First Trust is a fiduciary to its clients, including the Fund, and is therefore required to act in the best interests of clients and to place the interests of clients before its own.

Information Regarding the Use of Leverage and Collateral. The AIFM Directive requires disclosure of certain information relating to leverage, collateral and asset re-use arrangements. The Fund may obtain leverage through the use of derivatives and other non-fully funded investments such as reverse repurchase agreements, firm commitment agreements and standby commitment agreements if, and to the extent that, such transactions are (i) disclosed in the Fund's Prospectus and SAI and (ii) deemed appropriate investments by First Trust. These leveraged trading practices generally have not been prohibited by the SEC, though the SEC has published guidance on the manner in which the Fund may cover its leveraged trading practices to limit leverage and avoid the need to address the leverage concerns in Section 18 of the 1940 Act, which severely restricts how the Fund may use leverage. All arrangements entered into by First Trust on behalf of the Fund which result in leverage follow the parameter of the guidance published by the SEC.

As a non-EU AIFM, First Trust is not obliged to set a maximum permitted level of leverage which it may employ in its management of the Fund. The total amount of leverage employed by the Fund is provided at <http://www.ftglobalportfolios.com>.

Investors should refer to the "Investment Objective and Policies" and "Investment Strategies" section of this SAI for more details on the use and risk of leverage by the Fund.

Shareholder Voting Rights. The Declaration requires a shareholder vote only on those matters where the 1940 Act requires a vote of shareholders and otherwise permits the Trustees to take actions without seeking the consent of shareholders. The Fund's fundamental policies, as described in the "Investment Objective and Policies" section of this SAI, may not be changed without approval of the holders of a majority of the outstanding voting securities (as such term is defined in the 1940 Act) of the Fund. The 1940 Act defines a majority vote as the vote of the lesser of (i) 67% or more of the voting securities represented at a meeting at which more than 50% of the outstanding securities are represented; or (ii) more than 50% of the outstanding voting securities.

Net Asset Value. The latest NAV of the Fund, and the latest NAV per share of each class of share of the Fund, is available online at: <http://www.ftglobalportfolios.com> and online stock quote services. Generally investors will buy and sell shares of the Fund in secondary market transactions through brokers. Shares of the Fund will therefore be available at the relevant market price rather than NAV.

The historical performance of the Fund since inception is available online at: <http://www.ftglobalportfolios.com>.

Accounts. Under the AIFM Directive, First Trust is required to make available the N-CSR of the Funds that it markets in the EEA. This must be prepared by no later than 6 months following the end of the financial year and contain certain specific content requirements set out in the AIFM Directive. Once the N-CSR has been produced, it will be made available to investors in the manner as set out in the Prospectus.

Professional Liability Requirements/Delegation by the AIFM/Valuation. As a non-EU AIFM, First Trust is not subject to certain EU requirements relating to (i) the cover of professional liability risk by holding either additional of its own funds or appropriate professional liability insurance; (ii) permitted delegation and the management and disclosure of conflicts of interest relating to any such delegation; and (iii) valuation as set out in Article 19 of the AIFM Directive. As such, no disclosures for the purposes of the AIFM Directive have been made. Notwithstanding this, First Trust and the Fund continue to comply with their requirements under US law.

Periodic Disclosure Obligations. The following information will be disclosed to Fund shareholders on a periodic basis by way of a posting being made on <http://www.ftglobalportfolios.com>:

- the percentage of the Fund's assets, if any, that are subject to special arrangements arising from their illiquid nature (including, but not limited to, deferrals of redemptions and suspensions);
- the current risk profile of the Fund and the risk management systems employed by the AIFM to manage those risks; and
- the total amount of leverage employed by the Fund, if any.

Whenever any new arrangements for managing the liquidity of the Fund are introduced including, but not limited to, any material changes to the liquidity management systems and procedures employed by First Trust, a disclosure to this effect will be uploaded on the Fund's website. The Fund will ensure that a notice is uploaded on an expedited basis whenever deferrals or other similar special arrangements are activated or where redemptions of shares are suspended.

A notice will be posted without undue delay whenever there is a change to a maximum level of leverage which may be employed on behalf of the Fund; and any changes are made to the right of re-use of collateral or any changes to any guarantee granted under any leveraging arrangement.

INFORMATION FOR INVESTORS IN HONG KONG ONLY

The Fund is a collective investment scheme but is not authorized under Section 104 of the Securities and Futures Ordinance of Hong Kong by the Securities and Futures Commission of Hong Kong. Accordingly, the distribution of the Prospectus, and the placement of Fund shares in Hong Kong, is restricted. The Prospectus may only be distributed, circulated or issued to persons who are professional investors under the Securities and Futures Ordinance and any rules made under that Ordinance or as otherwise permitted by the Securities and Futures Ordinance.

INFORMATION FOR INVESTORS IN SINGAPORE ONLY

The Prospectus has not been registered as a Prospectus with the Monetary Authority of Singapore. Accordingly, the Prospectus and any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of Fund shares may not be circulated or distributed, nor may Fund shares be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (i) to an institutional investor pursuant to Section 304 of the Securities and Futures Act, Chapter 289 of Singapore (the "SFA") or (ii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

INFORMATION FOR INVESTORS IN TAIWAN ONLY

Fund shares are being made available in the Republic of China ("R.O.C.") on a private placement basis only to banks, bills houses, trust enterprises, financial holding companies and other qualified entities or institutions (collectively, "Qualified

Institutions") and other entities and individuals meeting specific criteria ("*Other Qualified Investors*") pursuant to the private placement provisions of the R.O.C. Rules Governing Offshore Funds. No other offer or sale of the shares of the Fund in the R.O.C. is permitted. R.O.C. purchasers of Fund shares may not sell or otherwise dispose of their holdings except by redemption, transfer to a Qualified Institution or Other Qualified Investor, transfer by operation of law or other means approved by the R.O.C. Financial Supervisory Commission.

PROXY VOTING POLICIES AND PROCEDURES

The Trust has adopted a proxy voting policy that seeks to ensure that proxies for securities held by the Fund are voted consistently with the best interests of the Fund.

The Board has delegated to Stonebridge the day-to-day proxy voting responsibility for the Fund and has directed Stonebridge to vote proxies consistent with the Fund's best interests. Stonebridge's Proxy Voting Policies and Procedures are set forth in *Exhibit B*.

Information regarding how the Fund voted proxies (if any) relating to portfolio securities during the most recent 12-month period ended June 30, is available upon request and without charge on the Fund's website at <http://www.ftportfolios.com>, by calling (800) 621-1675 or by accessing the SEC's website at <http://www.sec.gov>.

Portfolio Schedule. The Fund files portfolio holdings information for each month in a fiscal quarter within 60 days after the end of the relevant fiscal quarter on Form N-PORT. Portfolio holdings information for the third month of each fiscal quarter will be publicly available on the SEC's website at <http://www.sec.gov>. The Fund's complete schedule of portfolio holdings for the second and fourth quarters of each fiscal year is included in the semi-annual and annual financial statements and other information provided to shareholders, respectively, and is filed with the SEC on Form N-CSR. A semi-annual or annual financial statement and other information provided for the Fund will become available to investors within 60 days after the period to which it relates. The Fund's Forms N-PORT and Forms N-CSR are available on the SEC's website listed above.

Policy Regarding Disclosure of Portfolio Holdings. The Trust has adopted a policy regarding the disclosure of information about the Fund's portfolio holdings. The Board of Trustees must approve all material amendments to this policy. The Fund's portfolio holdings are publicly disseminated each day the Fund is open for business through financial reporting and news services, including publicly accessible Internet websites. In addition, a basket composition file, which includes the security names and share quantities to deliver in exchange for Fund shares, together with estimates and actual cash components, is publicly disseminated each day the NYSE is open for trading via the National Securities Clearing Corporation ("*NSCC*"). Pursuant to Rule 6c-11 under the 1940 Act, information regarding the Fund's current portfolio holdings will be available on a daily basis at <http://www.ftportfolios.com/Retail/etf/home.aspx>. The Trust, First Trust, FTP, Stonebridge and BNY will not disseminate non-public information concerning the Trust.

Codes of Ethics. In order to mitigate the possibility that the Fund will be adversely affected by personal trading, the Trust, First Trust, Stonebridge and the Distributor have adopted Codes of Ethics under Rule 17j-1 of the 1940 Act. These Codes of Ethics contain policies restricting securities trading in personal accounts of the officers, Trustees and others who normally come into possession of information on portfolio transactions. Personnel subject to the Codes of Ethics may invest in securities that may be purchased or held by the Fund; however, the Codes of Ethics require that each transaction in such securities be reviewed by the Chief Compliance Officer or his or her designee. These Codes of Ethics are on public file with, and are available from, the SEC.

CREATION AND REDEMPTION OF CREATION UNITS

General. ETFs, such as the Fund, generally issue and redeem their shares in primary market transactions through a creation and redemption mechanism and do not sell or redeem individual shares. Instead, financial entities known as "Authorized Participants" have contractual arrangements with an ETF or one of the ETF's service providers to purchase and redeem ETF shares directly with the ETF in large blocks of shares known as "Creation Units." Prior to the start of trading on every business day, an ETF publishes through the National Securities Clearing Corporation ("*NSCC*") the "basket" of securities, cash or other assets that it will accept in exchange for a Creation Unit of the ETF's shares. An Authorized Participant that wishes to effectuate a creation of an ETF's shares deposits with the ETF the "basket" of securities, cash or other assets identified by the ETF that day, and then receives the Creation Unit of the ETF's shares in return for those assets. After purchasing a Creation Unit, the Authorized Participant may continue to hold the ETF's shares or sell them in the

secondary market. The redemption process is the reverse of the purchase process: the authorized participant redeems a Creation Unit of ETF shares for a basket of securities, cash or other assets. The combination of the creation and redemption process with secondary market trading in ETF shares and underlying securities provides arbitrage opportunities that are designed to help keep the market price of ETF shares at or close to the NAV per share of the ETF.

Authorized Participants. An “*Authorized Participant*” is a member or participant of a clearing agency registered with the SEC that has a written agreement with the Fund or one of its service providers that allows the Authorized Participant to place orders for the purchase or redemption of Creation Units (a “*Participant Agreement*”). Orders to purchase Creation Units must be delivered through an Authorized Participant that has executed a Participant Agreement and must comply with the applicable provisions of such Participant Agreement. Investors wishing to purchase or sell shares generally do so on an exchange. Institutional investors other than Authorized Participants are responsible for making arrangements for a redemption request to be made through an Authorized Participant.

Business Day. A “*Business Day*” is generally any day on which the New York Stock Exchange (“*NYSE*”), the Exchange and the Trust are open for business. As of the date of this SAI, the NYSE observes the following holidays: New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Juneteenth, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. The Business Day on which an order to purchase or redeem Creation Units is received in proper form is referred to as the “*Transmittal Date*.”

Basket Composition. Rule 6c-11(c)(3) under of the 1940 Act requires an ETF relying on the exemptions offered by Rule 6c-11 to adopt and implement written policies and procedures governing the construction of baskets and the process that the ETF will use for the acceptance of baskets. In general, in connection with the construction and acceptance of baskets, the Advisor may consider various factors, including, but not limited to: (1) whether the securities, assets and other positions comprising a basket are consistent with the ETF’s investment objective(s), policies and disclosure; (2) whether the securities, assets and other positions can legally and readily be acquired, transferred and held by the ETF and/or Authorized Participant(s), as applicable; (3) whether to utilize cash, either in lieu of securities or other instruments or as a cash balancing amount; and (4) in the case of an ETF that tracks an index, whether the securities, assets and other positions aid index tracking.

The Fund may utilize a pro rata basket or a custom basket in reliance on Rule 6c-11. A “pro rata basket” is a basket that is a pro rata representation of the ETF’s portfolio holdings, except for minor deviations when it is not operationally feasible to include a particular instrument within the basket, except to the extent that the Fund utilized different baskets in transactions on the same Business Day.

Rule 6c-11 defines “custom baskets” to include two categories of baskets. First, a basket containing a non-representative selection of the ETF’s portfolio holdings would constitute a custom basket. These types of custom baskets include, but are not limited to, baskets that do not reflect: (i) a pro rata representation of the Fund’s portfolio holdings; (ii) a representative sampling of an ETF’s portfolio holdings; or (iii) changes due to a rebalancing or reconstitution of an ETF’s securities market index, if applicable. Second, if different baskets are used in transactions on the same Business Day, each basket after the initial basket would constitute a custom basket. For example, if an ETF exchanges a basket with either the same or another Authorized Participant that reflects a representative sampling that differs from the initial basket, that basket (and any such subsequent baskets) would be a custom basket. Similarly, if an ETF substitutes cash in lieu of a portion of basket assets for a single Authorized Participant, that basket would be a custom basket. The Advisor’s Rule 6c-11 Committee defines any deviation from a pro rata basket to be a “custom basket.” Rebalancing and reconstitution baskets do not constitute custom baskets. All cash baskets that are the initial basket on a Business Day also do not constitute custom baskets.

Under a variety of circumstances, an ETF and its shareholders may benefit from the flexibility afforded by custom baskets. In general terms, the use of custom baskets may reduce costs, increase efficiency and improve trading. Because utilizing custom baskets provides a way for an ETF to add, remove and re-weight portfolio securities without transacting in the market, it may help the ETF to avoid transaction costs and adverse tax consequences. Rule 6c-11 provides an ETF with flexibility to use “custom baskets” if the ETF has adopted written policies and procedures that: (1) set forth detailed parameters for the construction and acceptance of custom baskets that are in the best interests of the ETF and its shareholders, including the process for any revisions to, or deviations from, those parameters; and (2) specify the titles or roles of employees of the ETF’s investment advisor who are required to review each custom basket for compliance with those parameters.

The use of baskets that do not correspond pro rata to an ETF's portfolio holdings has historically created concern that an Authorized Participant could take advantage of its relationship with an ETF and pressure the ETF to construct a basket that favors an Authorized Participant to the detriment of the ETF's shareholders. For example, because ETFs rely on Authorized Participants to maintain the secondary market by promoting an effective arbitrage mechanism, an Authorized Participant holding less liquid or less desirable securities potentially could pressure an ETF into accepting those securities in its basket in exchange for liquid ETF shares (i.e., dumping). An Authorized Participant also could pressure the ETF into including in its basket certain desirable securities in exchange for ETF shares tendered for redemption (i.e., cherry-picking). In either case, the ETF's other investors would be disadvantaged and would be left holding shares of an ETF with a less liquid or less desirable portfolio of securities. The Advisor has adopted policies and procedures designed to mitigate these concerns but there is ultimately no guarantee that such policies and procedures will be effective.

Basket Dissemination. Basket files are published for consumption through the NSCC, a subsidiary of Depository Trust & Clearing Corporation, and can be utilized for pricing, creations, redemptions, rebalancing and custom scenarios. In most instances, pro rata baskets are calculated and supplied by the ETF's custodial bank based on ETF holdings, whereas non-pro rata, custom and forward-looking pro rata baskets are calculated by the Fund's investment advisor and disseminated by the ETF's custodial bank through the NSCC process.

Placement of Creation or Redemption Orders. All orders to purchase or redeem Creation Units are to be governed according to the applicable Participant Agreement that each Authorized Participant has executed. In general, all orders to purchase or redeem Creation Units must be received by the transfer agent in the proper form required by the Participant Agreement no later than the closing time of the regular trading session of the NYSE (ordinarily 4:00 p.m. Eastern Standard Time) on each day the NYSE is open for business (the "*Closing Time*") in order for the purchase or redemption of Creation Units to be effected based on the NAV of shares of the Fund as next determined on such date after receipt of the order in proper form. However, at its discretion, the Fund may require an Authorized Participant to submit orders to purchase or redeem Creation Units be placed earlier in the day (such as instances where an applicable market for a security comprising a creation or redemption basket closes earlier than usual).

Delivery of Redemption Proceeds. Deliveries of securities to Authorized Participants in connection with redemption orders are generally expected to be made within one Business Day. Due to the schedule of holidays in certain countries, however, the delivery of in-kind redemption proceeds for the Fund may take longer than one Business Day after the day on which the redemption request is received in proper form. Section 22(e) of the 1940 Act generally prohibits a registered open-end management investment company from postponing the date of satisfaction of redemption requests for more than seven days after the tender of a security for redemption. This prohibition can cause operational difficulties for ETFs that hold foreign investments and exchange in-kind baskets for Creation Units. For example, local market delivery cycles for transferring foreign investments to redeeming investors, together with local market holiday schedules, can sometimes require a delivery process in excess of seven days. However, Rule 6c-11 grants relief from Section 22(e) to permit an ETF to delay satisfaction of a redemption request for more than seven days if a local market holiday, or series of consecutive holidays, or the extended delivery cycles for transferring foreign investments to redeeming Authorized Participants, or the combination thereof prevents timely delivery of the foreign investment included in the ETF's basket. Under this exemption, an ETF must deliver foreign investments as soon as practicable, but in no event later than 15 days after the tender to the ETF. The exemption therefore will permit a delay only to the extent that additional time for settlement is actually required, when a local market holiday, or series of consecutive holidays, or the extended delivery cycles for transferring foreign investments to redeeming authorized participants prevents timely delivery of the foreign investment included in the ETF's basket. If a foreign investment settles in less than 15 days, Rule 6c-11 requires an ETF to deliver it pursuant to the standard settlement time of the local market where the investment trades. Rule 6c-11 defines "foreign investment" as any security, asset or other position of the ETF issued by a foreign issuer (as defined by Rule 3b-4 under the 1934 Act), and that is traded on a trading market outside of the United States. This definition is not limited to "foreign securities," but also includes other investments that may not be considered securities. Although these other investments may not be securities, they may present the same challenges for timely settlement as foreign securities if they are transferred in kind.

Creation Transaction Fees. The Fund imposes fees in connection with the purchase of Creation Units. These fees may vary based upon various facts-based circumstances, including, but not limited to, the composition of the securities included in the Creation Unit or the countries in which the transactions are settled. The price for each Creation Unit will equal the daily NAV per share of the Fund times the number of shares in a Creation Unit, plus the fees described above and, if applicable, any operational processing and brokerage costs, transfer fees, stamp taxes and part or all of the spread between the expected bid and offer side of the market related to the securities comprising the creation basket.

Redemption Transaction Fees. The Fund also imposes fees in connection with the redemption of Creation Units. These fees may vary based upon various facts-based circumstances, including, but not limited to, the composition of the securities included in the Creation Unit or the countries in which the transactions are settled. The price received for each Creation Unit will equal the daily NAV per share of the Fund times the number of shares in a Creation Unit, minus the fees described above and, if applicable, any operational processing and brokerage costs, transfer fees, stamp taxes and part or all of the spread between the expected bid and offer side of the market related to the securities comprising the redemption basket. Investors who use the services of a broker or other such intermediary in addition to an Authorized Participant to effect a redemption of a Creation Unit may also be assessed an amount to cover the cost of such services. The redemption fee charged by the Fund will comply with Rule 22c-2 of the 1940 Act which limits redemption fees to no more than 2% of the value of the shares redeemed.

Suspension of Creations. The SEC has stated its position that an ETF generally may reject or suspend the issuance of Creation Units only for a limited time and only due to extraordinary circumstances, such as when the markets on which the ETF's portfolio holdings are traded are closed for a limited period of time. The SEC has also stated that an ETF could not set transaction fees so high as to effectively suspend the issuance of Creation Units. Circumstances in which the Fund may suspend or reject creations include, but are not limited to: (i) the order is not in proper form; (ii) the purchaser or group of related purchasers, upon obtaining the Creation Units of Fund shares ordered, would own 80% or more of the currently outstanding shares of the Fund; (iii) the required consideration is not delivered; (iv) the acceptance of the basket would, in the opinion of the Fund, be unlawful; or (v) there exist circumstances outside the control of the Fund that make it impossible to process purchases of Creation Units for all practical purposes. Examples of such circumstances include: acts of God or public service or utility problems such as fires, floods, extreme weather conditions and power outages resulting in telephone, telecopy and computer failures; market conditions or activities causing trading halts; systems failures involving computer or other information systems affecting the Fund, First Trust, the Distributor, DTC, NSCC, the transfer agent, the custodian, any sub-custodian or any other participant in the purchase process; and similar extraordinary events. The Fund reserves the right to reject a creation order transmitted to it provided that such action does not result in a suspension of sales of creation units in contravention of 6c-11 and the SEC's positions thereunder. The Transfer Agent shall notify a prospective creator of a Creation Unit and/or the Authorized Participant acting on behalf of such prospective creator of the rejection of the order of such person. The Trust, the Fund, the Transfer Agent, the custodian, any sub-custodian and the Distributor are under no duty, however, to give notification of any defects or irregularities in the delivery of baskets, nor shall any of them incur any liability for the failure to give any such notification.

Suspension of Redemptions. An ETF may suspend the redemption of Creation Units only in accordance with Section 22(e) of the 1940 Act. Section 22(e) stipulates that no registered investment company shall suspend the right of redemption, or postpone the date of payment or satisfaction upon redemption of any redeemable security in accordance with its terms for more than seven days after the tender of such security to the company or its agent designated for that purpose for redemption, except (1) for any period (A) during which the NYSE is closed other than customary week-end and holiday closings or (B) during which trading on the NYSE is restricted; (2) for any period during which an emergency exists as a result of which (A) disposal by the investment company of securities owned by it is not reasonably practicable or (B) it is not reasonably practicable for such company fairly to determine the value of its net assets; or (3) for such other periods as the SEC may by order permit for the protection of security holders of the investment company.

Exceptions to Use of Creation Units. Under Rule 6c-11 of the 1940 Act, ETFs are permitted to sell or redeem individual shares on the day of consummation of a reorganization, merger, conversion, or liquidation. In these limited circumstances, an ETF may need to issue or redeem individual shares and may need to transact without utilizing Authorized Participants.

FEDERAL TAX MATTERS

This section summarizes some of the main U.S. federal income tax consequences of owning shares of the Fund. This section is current as of the date of the SAI. Tax laws and interpretations change frequently, and these summaries do not describe all of the tax consequences to all taxpayers. For example, these summaries generally do not describe your situation if you are a corporation, a non-U.S. person, a broker-dealer or other investor with special circumstances. In addition, this section does not describe your state, local or foreign tax consequences.

This federal income tax summary is based in part on the advice of counsel to the Fund. The Internal Revenue Service ("IRS") could disagree with any conclusions set forth in this section. The following disclosure may not be sufficient for prospective investors to use for the purpose of avoiding penalties under federal tax law.

As with any investment, prospective investors should seek advice based on their individual circumstances from their own tax advisor.

The Fund intends to qualify annually and to elect to be treated as a regulated investment company (a "RIC") under the Internal Revenue Code of 1986, as amended (the "Code").

To qualify for the favorable U.S. federal income tax treatment generally accorded to RICs, the Fund must, among other things, (i) derive in each taxable year at least 90% of its gross income from dividends, interest, payments with respect to securities loans and gains from the sale or other disposition of stock, securities or foreign currencies or other income derived with respect to its business of investing in such stock, securities or currencies, or net income derived from interests in certain publicly traded partnerships; (ii) diversify its holdings so that, at the end of each quarter of the taxable year, (a) at least 50% of the market value of the Fund's assets is represented by cash and cash items (including receivables), U.S. government securities, the securities of other RICs and other securities, with such other securities of any one issuer generally limited for the purposes of this calculation to an amount not greater than 5% of the value of the Fund's total assets and not greater than 10% of the outstanding voting securities of such issuer, and (b) not more than 25% of the value of its total assets is invested in the securities (other than U.S. government securities or the securities of other RICs) of any one issuer, or two or more issuers which the Fund controls which are engaged in the same, similar or related trades or businesses, or the securities of one or more of certain publicly traded partnerships; and (iii) distribute at least 90% of its investment company taxable income (which includes, among other items, dividends, interest and net short-term capital gains in excess of net long-term capital losses) and at least 90% of its net tax-exempt interest income each taxable year. There are certain exceptions for failure to qualify if the failure is for reasonable cause or is *de minimis*, and certain corrective action is taken and certain tax payments are made by the Fund.

As a RIC, the Fund generally will not be subject to U.S. federal income tax on its investment company taxable income (as that term is defined in the Code, but without regard to the deduction for dividends paid) and net capital gain (the excess of net long-term capital gain over net short-term capital loss), if any, that it distributes to shareholders. The Fund intends to distribute to its shareholders, at least annually, substantially all of its investment company taxable income and net capital gain. If the Fund retains any net capital gain or investment company taxable income, it will generally be subject to federal income tax at regular corporate rates on the amount retained. In addition, amounts not distributed on a timely basis in accordance with a calendar year distribution requirement are subject to a nondeductible 4% excise tax unless, generally, the Fund distributes during each calendar year an amount equal to the sum of (1) at least 98% of its ordinary income (not taking into account any capital gains or losses) for the calendar year, (2) at least 98.2% of its capital gains in excess of its capital losses (adjusted for certain ordinary losses) for the one-year period ending October 31 of the calendar year, and (3) any ordinary income and capital gains for previous years that were not distributed during those years. In order to prevent application of the excise tax, the Fund intends to make its distributions in accordance with the calendar year distribution requirement. A distribution will be treated as paid on December 31 of the current calendar year if it is declared by the Fund in October, November or December with a record date in such a month and paid by the Fund during January of the following calendar year. Such distributions will be taxable to shareholders in the calendar year in which the distributions are declared, rather than the calendar year in which the distributions are received.

Subject to certain reasonable cause and *de minimis* exceptions, if the Fund fails to qualify as a RIC or fails to satisfy the 90% distribution requirement in any taxable year, the Fund would be taxed as an ordinary corporation on its taxable income (even if such income were distributed to its shareholders) and all distributions out of earnings and profits would be taxed to shareholders as ordinary income.

Distributions

Dividends paid out of the Fund's investment company taxable income are generally taxable to a shareholder as ordinary income to the extent of the Fund's earnings and profits, whether paid in cash or reinvested in additional shares. However, certain ordinary income distributions received from the Fund may be taxed at capital gains tax rates. In particular, ordinary income dividends received by an individual shareholder from a RIC such as the Fund are generally taxed at the same rates that apply to net capital gain, provided that certain holding period requirements are satisfied and provided the dividends are attributable to qualifying dividends received by the Fund itself. Dividends received by the Fund from REITs and foreign corporations are qualifying dividends eligible for this lower tax rate only in certain circumstances. Certain hedging strategies may reduce the amount of dividends that would otherwise be eligible for the capital gains tax rates. The Fund will provide notice to its shareholders of the amount of any distributions that may be taken into account as a dividend which is eligible for the capital gains tax rates. The Fund cannot make any guarantees as to the amount of any distribution which will

be regarded as a qualifying dividend. Some portion of the ordinary income distributions that are attributable to dividends received by the Fund from shares in certain real estate investment trusts may be designated by the Fund as eligible for a deduction for qualified business income, provided certain holding period requirements are satisfied.

Income from the Fund may also be subject to a 3.8% "Medicare tax." This tax generally applies to net investment income if the taxpayer's adjusted gross income exceeds certain threshold amounts, which are \$250,000 in the case of married couples filing joint returns and \$200,000 in the case of single individuals.

A corporation that owns shares generally will not be entitled to the dividends received deduction with respect to many dividends received from the Fund because the dividends received deduction is generally not available for distributions from RICs. However, certain ordinary income dividends on shares that are attributable to qualifying dividends received by the Fund from certain domestic corporations may be reported by the Fund as being eligible for the dividends received deduction. Certain hedging strategies may reduce the amount of dividends that would otherwise be treated as qualifying dividends.

Distributions of net capital gain (the excess of net long-term capital gain over net short-term capital loss), if any, properly reported as capital gain dividends are taxable to a shareholder as long-term capital gains, regardless of how long the shareholder has held Fund shares. An election may be available to you to defer recognition of the gain attributable to a capital gain dividend if you make certain qualifying investments within a limited time. You should talk to your tax advisor about the availability of this deferral election and its requirements. Shareholders receiving distributions in the form of additional shares, rather than cash, generally will have a tax basis in each such share equal to the value of a share of the Fund on the reinvestment date. A distribution of an amount in excess of the Fund's current and accumulated earnings and profits will be treated by a shareholder as a return of capital which is applied against and reduces the shareholder's basis in his or her shares. To the extent that the amount of any such distribution exceeds the shareholder's basis in his or her shares, the excess will be treated by the shareholder as gain from a sale or exchange of the shares.

Shareholders will be notified annually as to the U.S. federal income tax status of distributions and shareholders receiving distributions in the form of additional shares will receive a report as to the value of those shares.

Sale or Exchange of Fund Shares

Upon the sale or other disposition of shares of the Fund, which a shareholder holds as a capital asset, such shareholder may realize a capital gain or loss which will be long-term or short-term, depending upon the shareholder's holding period for the shares. Generally, a shareholder's gain or loss will be a long-term gain or loss if the shares have been held for more than one year. An election may be available to you to defer recognition of capital gain if you make certain qualifying investments within a limited time. You should talk to your tax advisor about the availability of this deferral election and its requirements.

Any loss realized on a sale or exchange will be disallowed to the extent that shares disposed of are replaced (including through reinvestment of dividends) within a period of 61 days beginning 30 days before and ending 30 days after disposition of shares or to the extent that the shareholder, during such period, acquires or enters into an option or contract to acquire substantially identical stock or securities. In such a case, the basis of the shares acquired will be adjusted to reflect the disallowed loss. Any loss realized by a shareholder on a disposition of Fund shares held by the shareholder for six months or less will be treated as a long-term capital loss to the extent of any distributions of long-term capital gain received by the shareholder with respect to such shares.

Taxes on Purchase and Redemption of Creation Units

If a shareholder exchanges securities for Creation Units, the shareholder will generally recognize a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time and the shareholder's aggregate basis in the securities surrendered and the Cash Component paid. If a shareholder exchanges Creation Units for securities, then the shareholder will generally recognize a gain or loss equal to the difference between the shareholder's basis in the Creation Units and the aggregate market value of the securities received and the Cash Redemption Amount. The IRS, however, may assert that a loss realized upon an exchange of securities for Creation Units or Creation Units for securities cannot be deducted currently under the rules governing "wash sales," or on the basis that there has been no significant change in economic position.

Nature of Fund Investments

Certain of the Fund's investment practices are subject to special and complex federal income tax provisions that may, among other things, (i) disallow, suspend or otherwise limit the allowance of certain losses or deductions; (ii) convert lower taxed long-term capital gain into higher taxed short-term capital gain or ordinary income; (iii) convert an ordinary loss or a deduction into a capital loss (the deductibility of which is more limited); (iv) cause the Fund to recognize income or gain without a corresponding receipt of cash; (v) adversely affect the time as to when a purchase or sale of stock or securities is deemed to occur; and (vi) adversely alter the characterization of certain complex financial transactions.

Futures Contracts and Options

The Fund's transactions in futures contracts and options will be subject to special provisions of the Code that, among other things, may affect the character of gains and losses realized by the Fund (*i.e.*, may affect whether gains or losses are ordinary or capital, or short-term or long-term), may accelerate recognition of income to the Fund and may defer Fund losses. These rules could, therefore, affect the character, amount and timing of distributions to shareholders. These provisions also (a) will require the Fund to mark-to-market certain types of the positions in its portfolio (*i.e.*, treat them as if they were closed out); and (b) may cause the Fund to recognize income without receiving cash with which to make distributions in amounts necessary to satisfy the 90% distribution requirement for qualifying to be taxed as a RIC and the distribution requirements for avoiding excise taxes.

Investments in Certain Foreign Corporations

If the Fund holds an equity interest in any "passive foreign investment companies" ("PFICs"), which are generally certain foreign corporations that receive at least 75% of their annual gross income from passive sources (such as interest, dividends, certain rents and royalties or capital gains) or that hold at least 50% of their assets in investments producing such passive income, the Fund could be subject to U.S. federal income tax and additional interest charges on gains and certain distributions with respect to those equity interests, even if all the income or gain is timely distributed to its shareholders. The Fund will not be able to pass through to its shareholders any credit or deduction for such taxes. The Fund may be able to make an election that could ameliorate these adverse tax consequences. In this case, the Fund would recognize as ordinary income any increase in the value of such PFIC shares, and as ordinary loss any decrease in such value to the extent it did not exceed prior increases included in income. Under this election, the Fund might be required to recognize in a year income in excess of its distributions from PFICs and its proceeds from dispositions of PFIC stock during that year, and such income would nevertheless be subject to the distribution requirement and would be taken into account for purposes of the 4% excise tax (described above). Dividends paid by PFICs are not treated as qualified dividend income.

Backup Withholding

The Fund may be required to withhold U.S. federal income tax from all taxable distributions and sale proceeds payable to shareholders who fail to provide the Fund with their correct taxpayer identification number or fail to make required certifications, or who have been notified by the IRS that they are subject to backup withholding. Corporate shareholders and certain other shareholders specified in the Code generally are exempt from such backup withholding. This withholding is not an additional tax. Any amounts withheld may be credited against the shareholder's U.S. federal income tax liability.

Non-U.S. Shareholders

U.S. taxation of a shareholder who, as to the United States, is a nonresident alien individual, a foreign trust or estate, a foreign corporation or foreign partnership ("*non-U.S. shareholder*") depends on whether the income of the Fund is "effectively connected" with a U.S. trade or business carried on by the shareholder.

In addition to the rules described in this section concerning the potential imposition of withholding on distributions to non-U.S. persons, distributions to non-U.S. persons that are "financial institutions" may be subject to a withholding tax of 30% unless an agreement is in place between the financial institution and the U.S. Treasury to collect and disclose information about accounts, equity investments or debt interests in the financial institution held by one or more U.S. persons or the institution is resident in a jurisdiction that has entered into such an agreement with the U.S. Treasury. For these purposes, a "financial institution" means any entity that (i) accepts deposits in the ordinary course of a banking or similar business; (ii) holds financial assets for the account of others as a substantial portion of its business; or (iii) is engaged (or holds itself out as being engaged) primarily in the business of investing, reinvesting or trading in securities, partnership

interests, commodities or any interest (including a futures contract or option) in such securities, partnership interests or commodities. This withholding tax is also currently scheduled to apply to the gross proceeds from the disposition of securities that produce U.S. source interest or dividends. However, proposed regulations may eliminate the requirement to withhold on payments of gross proceeds from dispositions.

Distributions to non-financial non-U.S. entities (other than publicly traded foreign entities, entities owned by residents of U.S. possessions, foreign governments, international organizations or foreign central banks) will also be subject to a withholding tax of 30% if the entity does not certify that the entity does not have any substantial U.S. owners or provide the name, address and TIN of each substantial U.S. owner. This withholding tax is also currently scheduled to apply to the gross proceeds from the disposition of securities that produce U.S. source interest or dividends. However, proposed regulations may eliminate the requirement to withhold on payments of gross proceeds from dispositions.

Income Not Effectively Connected. If the income from the Fund is not “effectively connected” with a U.S. trade or business carried on by the non-U.S. shareholder, distributions of investment company taxable income will generally be subject to a U.S. tax of 30% (or lower treaty rate), which tax is generally withheld from such distributions.

Distributions of capital gain dividends and any amounts retained by the Fund which are properly reported by the Fund as undistributed capital gains will not be subject to U.S. tax at the rate of 30% (or lower treaty rate) unless the non-U.S. shareholder is a nonresident alien individual and is physically present in the United States for more than 182 days during the taxable year and meets certain other requirements. However, this 30% tax on capital gains of nonresident alien individuals who are physically present in the United States for more than the 182 day period only applies in exceptional cases because any individual present in the United States for more than 182 days during the taxable year is generally treated as a resident for U.S. income tax purposes; in that case, he or she would be subject to U.S. income tax on his or her worldwide income at the graduated rates applicable to U.S. citizens, rather than the 30% U.S. tax. In the case of a non-U.S. shareholder who is a nonresident alien individual, the Fund may be required to withhold U.S. income tax from distributions of net capital gain unless the non-U.S. shareholder certifies his or her non-U.S. status under penalties of perjury or otherwise establishes an exemption. If a non-U.S. shareholder is a nonresident alien individual, any gain such shareholder realizes upon the sale or exchange of such shareholder's shares of the Fund in the United States will ordinarily be exempt from U.S. tax unless the gain is U.S. source income and such shareholder is physically present in the United States for more than 182 days during the taxable year and meets certain other requirements.

Distributions from the Fund that are properly reported by the Fund as an interest-related dividend attributable to certain interest income received by the Fund or as a short-term capital gain dividend attributable to certain net short-term capital gain income received by the Fund may not be subject to U.S. federal income taxes, including withholding taxes when received by certain non-U.S. shareholders, provided that the Fund makes certain elections and certain other conditions are met. For tax years after December 31, 2022, amounts paid to or recognized by a non-U.S. affiliate that are excluded from tax under the portfolio interest, capital gain dividends, short-term capital gains or tax-exempt interest dividend exceptions or applicable treaties, may be taken into consideration in determining whether a corporation is an “applicable corporation” subject to a 15% minimum tax on adjusted financial statement income.

In addition, capital gain distributions attributable to gain from U.S. real property interests (including certain U.S. real property holding corporations) will generally be subject to United States withholding tax and will give rise to an obligation on the part of the non-U.S. shareholder to file a United States tax return.

Income Effectively Connected. If the income from the Fund is “effectively connected” with a U.S. trade or business carried on by a non-U.S. shareholder, then distributions of investment company taxable income and capital gain dividends, any amounts retained by the Fund which are properly reported by the Fund as undistributed capital gains and any gains realized upon the sale or exchange of shares of the Fund will be subject to U.S. income tax at the graduated rates applicable to U.S. citizens, residents and domestic corporations. Non-U.S. corporate shareholders may also be subject to the branch profits tax imposed by the Code. The tax consequences to a non-U.S. shareholder entitled to claim the benefits of an applicable tax treaty may differ from those described herein. Non-U.S. shareholders are advised to consult their own tax advisors with respect to the particular tax consequences to them of an investment in the Fund.

Capital Loss Carry-forward

Under the Regulated Investment Company Modernization Act of 2010, net capital losses of the Fund incurred in taxable years beginning after December 22, 2010 may be carried forward indefinitely, and their character is retained as short-term and/or long-term losses. To the extent that these loss carry-forwards are used to offset future capital gains, it is

probable that the capital gains so offset will not be distributed to Fund shareholders. As of October 31, 2024, the Fund had net capital losses for federal income tax purposes as shown in the table below. The Fund is subject to certain limitations, under U.S. tax rules, on the use of capital loss carry-forwards and net unrealized built-in losses. These limitations generally apply when there has been a 50% change in ownership.

Other Taxation

Fund shareholders may be subject to state, local and foreign taxes on their Fund distributions. Shareholders are advised to consult their own tax advisors with respect to the particular tax consequences to them of an investment in the Fund.

DETERMINATION OF NET ASSET VALUE

The Fund's net asset value is determined as set forth in the Prospectus in the section entitled "Net Asset Value."

DIVIDENDS AND DISTRIBUTIONS

The following information supplements and should be read in conjunction with the section in the Prospectus entitled "Dividends, Distributions and Taxes."

General Policies. Dividends from net investment income of the Fund, if any, are declared and paid monthly. Distributions of net realized securities gains, if any, generally are declared and paid once a year, but the Trust may make distributions on a more frequent basis. The Trust reserves the right to declare special distributions if, in its reasonable discretion, such action is necessary or advisable to preserve the status of the Fund as a RIC or to avoid imposition of income or excise taxes on undistributed income.

Dividends and other distributions of Fund shares are distributed, as described below, on a *pro rata* basis to Beneficial Owners of such shares. Dividend payments are made through DTC Participants and Indirect Participants to Beneficial Owners then of record with proceeds received from the Fund.

Dividend Reinvestment Service. No reinvestment service is provided by the Trust. Broker-dealers may make available the DTC book-entry Dividend Reinvestment Service for use by Beneficial Owners of the Fund for reinvestment of their dividend distributions. Beneficial Owners should contact their brokers in order to determine the availability and costs of the service and the details of participation therein. Brokers may require Beneficial Owners to adhere to specific procedures and timetables. If this service is available and used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole shares of the Fund purchased in the secondary market.

MISCELLANEOUS INFORMATION

Counsel. Chapman and Cutler LLP, 320 South Canal Street, Chicago, Illinois 60606, is counsel to the Trust.

Independent Registered Public Accounting Firm. Deloitte & Touche LLP, 111 South Wacker Drive, Chicago, Illinois 60606, serves as the Fund's independent registered public accounting firm. The firm audits the Fund's financial statements and performs other related audit services.

FINANCIAL STATEMENTS

The audited financial statements and notes thereto for the Fund, contained in the Form N-CSR dated October 31, 2024, are incorporated by reference into this Statement of Additional Information and have been audited by Deloitte & Touche LLP, independent registered public accounting firm, whose report appears in the Form N-CSR and is also incorporated by reference herein. No other parts of the Form N-CSR are incorporated by reference herein. The Form N-CSR is available without charge by calling (800) 621-1675 or by visiting the SEC's website at <http://www.sec.gov>.

EXHIBIT B – PROXY VOTING GUIDELINES

STONEBRIDGE ADVISORS LLC

PROXY VOTING POLICIES AND PROCEDURES (REVISED 2023)

General Proxy Voting Policy.

The preferred and hybrid securities in which we generally invest do not normally carry proxy voting rights, and we do not anticipate acquiring other equity securities that have such rights. But in the event that a proxy vote is solicited on a security held in client portfolios, Stonebridge will strive to cast its vote in the best economic interests of the client, following the Proxy Voting Guidelines detailed below. Stonebridge currently votes proxies for the sub-advised mutual funds using the Broadridge Corporate Issuer Solutions, Inc. website <http://ProxyVote.com>, which is available to us through UBS. The trader or credit analyst assigned the duty of monitoring the particular Firm is the person assigned to inform Operations of how the proxy will be voted. SB will vote "Abstain" on proxies received for in-kind securities slated for immediate resale.

Clients may obtain a copy of Stonebridge's Proxy Voting Policy as well as information relating to how proxies were voted.

Proxy Voting Guidelines.

We will normally vote proxies in accordance with the following guidelines unless we determine that it is in the best economic interests of our clients do otherwise:

- We will consider the proposal's expected impact on shareholder value and will not consider any benefit to us, our employees or affiliates.
- We consider the reputation, experience and competence of a Firm's management when we evaluate the merits of investing in a particular Firm, and we invest in companies in which we believe management goals and shareholder goals are aligned. Therefore, on most issues, we cast our votes in accordance with management's recommendations. However, when we believe management's position on a particular issue is not in the best interests our clients, we will vote contrary to management's recommendation.
- With respect to a Firm's board of directors, we believe there should be a majority of independent directors on Firm boards, and that audit, compensation and nominating committees should consist solely of independent directors. Therefore, we will normally vote in favor of proposals that insure such independence.
- With respect to auditors, we believe that the relationship between a public Firm and its auditors should be limited primarily to the audit engagement, and we will normally vote in favor of proposals to prohibit or limit fees paid to auditors for any services other than auditing or closely-related activities that do not raise any appearance of impaired independence.
- With respect to equity-based compensation plans, we believe that appropriately designed plans approved by a Firm's shareholders can be an effective way to align the interests of long-term shareholders and the interests of management, employees and directors. However, we will normally vote against plans that substantially dilute our ownership interest in the Firm or provide participants with excessive awards. We will also normally vote in favor of proposals to require the expensing of options.
- With respect to shareholder rights, we believe that all shareholders of a Firm should have an equal voice and that barriers that limit the ability of shareholders to effect corporate change and to realize the full value of their investment are not desirable. Therefore, we will normally vote against proposals for supermajority voting rights, against the adoption of poison pill plans, and against proposals for different classes of stock with different voting rights.
- With respect to "social responsibility" issues, we believe that matters related to a Firm's day-to-day business operations are primarily the responsibility of management. We are focused on maximizing long-term shareholder value and will normally vote against shareholder proposals requesting that a Firm disclose or change certain business practices, unless we believe the proposal would have a substantial, positive economic impact on the Firm.
- Sometimes a client will fund an account with in-kind securities. When this happens, we review the in-kind portfolio, retain those preferred and hybrid securities that fit Stonebridge's strategies, and quickly sell the rest to

produce cash which can then be invested in securities that do fit our strategies. It may occur that a proxy vote solicitation is received on a security that was received in-kind and slated for immediate sale without further analysis. It is our policy to vote "Abstain" on such securities as we have only transitory possession of them.

In other circumstances, we may also decide to refrain from voting a particular proxy. In these instances, we will document the reasons for our decision.

SB will retain the following information in connection with each proxy vote:

- The Issuer's name;
- The security's ticker symbol or CUSIP, as applicable;
- The shareholder meeting date;
- The number of shares that SB voted;
- A brief identification of the matter voted on;
- Whether the matter was proposed by the Issuer or a security-holder;
- Whether SB cast a vote;
- How SB cast its vote (for the proposal, against the proposal, or abstain); and
- Whether SB cast its vote with or against management.

Any attempt to influence the proxy voting process by Issuers or others not identified in these policies and procedures should be promptly reported to the CCO. Similarly, any Client's attempt to influence proxy voting with respect to other Clients' securities should be promptly reported to the CCO.

Form N-PX

Rule 14Ad-1 requires institutional investment managers to file reports under Section 13(f) of the Exchange Act to report their "say-on-pay" votes on Form N-PX.

"Institutional investment manager" is defined as "any person, other than a natural person, investing in or buying and selling securities for its own account, and any person exercising investment discretion with respect to the account of any other person."

Rule 14Ad-1 requires institutional investment managers to report "say-on-pay" votes on Form N-PX. "Say-on-pay" refers to shareholder voting relating to: (1) approval of the compensation of a company's named executive officers; (2) the frequency of such votes; and (3) approval of "golden parachute" compensation in connection with a merger or acquisitions. The rule provides a two-part test for determining whether an institutional investment manager "exercised voting power" over a security and must therefore report a say-on-pay vote on Form N-PX:

- The institutional investment manager has the power to vote, or direct the voting of, a security.
- The institutional manager "exercises" this power to influence a voting decision for the security.

The Final Rule states that "voting power could exist or be exercised either directly or indirectly by way of a contract, arrangement, understanding, or relationship." Further, the rule states that "multiple parties could both have and exercise voting power over the same securities even where the institutional investment manager is not the sole decision-maker." An institutional investment manager would have no reporting obligation with respect to a voting decision that is entirely determined by its client or another party.

Class Actions

As a fiduciary, SB always seeks to act in Clients' best interests with good faith, loyalty, and due care. SB participates in class actions when provided the authority. SB generally does not serve as the lead plaintiff in class actions because the costs of such participation typically exceed any extra benefits that accrue to lead plaintiffs.

Disclosures to Clients

SB includes a description of its policies and procedures regarding proxy voting and class actions in Part 2 of Form ADV, along with a statement that Clients can contact the CCO to obtain a copy of these policies and procedures and information about how SB voted with respect to the Client's securities.

Any request for information about proxy voting or class actions should be promptly forwarded to the CCO, who will respond to any such requests.

As a matter of policy, SB does not disclose how it expects to vote on upcoming proxies. Additionally, SB does not disclose the way it voted proxies to unaffiliated third parties without a legitimate need to know such information.

EXHIBIT C – CREDIT RATING DEFINITIONS

S&P Global RATINGS

A S&P Global Ratings issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The opinion reflects S&P Global Rating's view of the obligor's capacity and willingness to meet its financial commitments as they come due, and may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default.

LONG-TERM ISSUE CREDIT RATINGS

Issue credit ratings are based, in varying degrees, on the following considerations:

1. Likelihood of payment: capacity and willingness of the obligor to meet its financial commitment on an obligation in accordance with the terms of the obligation;
2. Nature of and provisions of the obligation and the promise S&P imputes;
3. Protection afforded by, and relative position of, the obligation in the event of bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

The issue rating definitions are an assessment of default risk, but may incorporate an assessment of relative seniority or ultimate recovery in the event of default. Junior obligations are typically rated lower than senior obligations, to reflect the lower priority in bankruptcy, as noted above. (Such differentiation may apply when an entity has both senior and subordinated obligations, secured and unsecured obligations, or operating company and holding company obligations.)

AAA	An obligation rated "AAA" has the highest rating assigned by S&P Global Ratings. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.
AA	An obligation rated "AA" differs from the highest rated obligations only in small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.
A	An obligation rated "A" is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.
BBB	An obligation rated "BBB" exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

Obligations rated "BB," "B," "CCC," "CC" and "C" are regarded as having significant speculative characteristics. "BB" indicates the least degree of speculation and "C" the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB	An obligation rated "BB" is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.
B	An obligation rated "B" is more vulnerable to nonpayment than obligations rated "BB," but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.
CCC	An obligation rated "CCC" is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.
CC	An obligation rated "CC" is currently highly vulnerable to nonpayment. The "CC" rating is used when a default has not yet occurred but S&P expects default to be a virtual certainty regardless of the anticipated time to default.

C	An obligation rated "C" is currently highly vulnerable to nonpayment and the obligation is expected to have lower relative seniority or lower ultimate recovery compared to obligations that are rated higher.
D	An obligation rated "D" is in default or in breach of an imputed promise. For non-hybrid capital instruments, the "D" rating category is used when payments on an obligation are not made on the date due unless S&P believes that such payments will be made within the next five business days in the absence of a stated grace period or within the earlier of the stated grace period or the next 30 calendar days. The "D" rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. A rating on an obligation is lowered to 'D' if it is subject to a distressed debt restructuring.

Plus (+) or Minus (-): The ratings from "AA" to "CCC" may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

Moody's Investors Service, Inc.

A brief description of the applicable Moody's Investors Service, Inc. ("*Moody's*") rating symbols and their meanings (as published by Moody's) follows.

Ratings assigned on Moody's global long-term and short-term rating scales are forward-looking opinions of the relative credit risks of financial obligations issued by non-financial corporates, financial institutions, structured finance vehicles, project finance vehicles, and public sector entities. Long-term ratings are assigned to issuers or obligations with an original maturity of one year or more and reflect both on the likelihood of a default on contractually promised payments and the expected financial loss suffered in the event of default. Short-term ratings are assigned to obligations with an original maturity of thirteen months or less and reflect the likelihood of a default on contractually promised payments.

LONG-TERM OBLIGATION RATINGS

Aaa	Obligations rated Aaa are judged to be of the highest quality, subject to the lowest level of credit risk.
Aa	Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.
A	Obligations rated A are judged to be upper-medium grade and are subject to low credit risk.
Baa	Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.
Ba	Obligations rated Ba are judged to be speculative and are subject to substantial credit risk.
B	Obligations rated B are considered speculative and are subject to high credit risk.
Caa	Obligations rated Caa are judged to be speculative of poor standing and are subject to very high credit risk.
Ca	Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.
C	Obligations rated C are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Note: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Fitch Ratings

A brief description of the applicable Fitch Ratings ("*Fitch*") ratings symbols and meanings (as published by Fitch) follows:

Fitch's credit ratings provide an opinion on the relative ability of an entity to meet financial commitments, such as interest, preferred dividends, repayment of principal, insurance claims or counterparty obligations. Credit ratings are used by investors as indications of the likelihood of receiving the money owed to them in accordance with the terms on which they invested. The agency's credit ratings cover the global spectrum of corporate, sovereign (including supra-national and sub-national), financial, bank, insurance, municipal and other public finance entities and the securities or other obligations they issue, as well as structured finance securities backed by receivables or other financial assets.

The terms "investment grade" and "speculative grade" have established themselves over time as shorthand to describe the categories 'AAA' to 'BBB' (investment grade) and 'BB' to 'D' (speculative grade). The terms "investment grade" and "speculative grade" are market conventions, and do not imply any recommendation or endorsement of a specific security for

investment purposes. "Investment grade" categories indicate relatively low to moderate credit risk, while ratings in the "speculative" categories either signal a higher level of credit risk or that a default has already occurred.

A designation of "Not Rated" or "NR" is used to denote securities not rated by Fitch where Fitch has rated some, but not all, securities comprising an issuance capital structure.

Credit ratings express risk in relative rank order, which is to say they are ordinal measures of credit risk and are not predictive of a specific frequency of default or loss.

Fitch's credit ratings do not directly address any risk other than credit risk. In particular, ratings do not deal with the risk of a market value loss on a rated security due to changes in interest rates, liquidity and other market considerations. However, in terms of payment obligation on the rated liability, market risk may be considered to the extent that it influences the ability of an issuer to pay upon a commitment. Ratings nonetheless do not reflect market risk to the extent that they influence the size or other conditionality of the obligation to pay upon a commitment (for example, in the case of index-linked bonds).

In the default components of ratings assigned to individual obligations or instruments, the agency typically rates to the likelihood of non-payment or default in accordance with the terms of that instrument's documentation. In limited cases, Fitch may include additional considerations (i.e. rate to a higher or lower standard than that implied in the obligation's documentation). In such cases, the agency will make clear the assumptions underlying the agency's opinion in the accompanying rating commentary.

INTERNATIONAL LONG-TERM RATINGS

Issuer Credit Rating Scales

AAA	Highest credit quality. 'AAA' ratings denote the lowest expectation of default risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.
AA	Very high credit quality. 'AA' ratings denote expectations of very low default risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.
A	High credit quality. 'A' ratings denote expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.
BBB	Good credit quality. 'BBB' ratings indicate that expectations of default risk are currently low. The capacity for payment of financial commitments is considered adequate but adverse business or economic conditions are more likely to impair this capacity.
BB	Speculative. 'BB' ratings indicate an elevated vulnerability to default risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial flexibility exists which supports the servicing of financial commitments.
B	Highly speculative. 'B' ratings indicate that material default risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is vulnerable to deterioration in the business and economic environment.
CCC	Substantial credit risk. Default is a real possibility.
CC	Very high levels of credit risk. Default of some kind appears probable.
C	Exceptionally high levels of credit risk. Default is imminent or inevitable, or the issuer is in standstill. Conditions that are indicative of a 'C' category rating for an issuer include: <ul style="list-style-type: none"> • the issuer has entered into a grace or cure period following non-payment of a material financial obligation; • the issuer has entered into a temporary negotiated waiver or standstill agreement following a payment default on a material financial obligation; or • Fitch otherwise believes a condition of 'RD' or 'D' to be imminent or inevitable, including through the formal announcement of a distressed debt exchange.

RD	<p>Restricted default. 'RD' ratings indicate an issuer that in Fitch's opinion has experienced an uncured payment default on a bond, loan or other material financial obligation but which has not entered into bankruptcy filings, administration, receivership, liquidation or other formal winding-up procedure, and which has not otherwise ceased operating. This would include:</p> <ul style="list-style-type: none"> • the selective payment default on a specific class or currency of debt; • the uncured expiry of any applicable grace period, cure period or default forbearance period following a payment default on a bank loan, capital markets security or other material financial obligation; • the extension of multiple waivers or forbearance periods upon a payment default on one or more material financial obligations, either in series or in parallel; or • execution of a distressed debt exchange on one or more material financial obligations.
D	<p>Default. 'D' ratings indicate an issuer that in Fitch's opinion has entered into bankruptcy filings, administration, receivership, liquidation or other formal winding-up procedure, or which has otherwise ceased business.</p>

Default ratings are not assigned prospectively to entities or their obligations; within this context, non-payment on an instrument that contains a deferral feature or grace period will generally not be considered a default until after the expiration of the deferral or grace period, unless a default is otherwise driven by bankruptcy or other similar circumstance, or by a distressed debt exchange.

"Imminent" default typically refers to the occasion where a payment default has been intimated by the issuer, and is all but inevitable. This may, for example, be where an issuer has missed a scheduled payment, but (as is typical) has a grace period during which it may cure the payment default. Another alternative would be where an issuer has formally announced a distressed debt exchange, but the date of the exchange still lies several days or weeks in the immediate future.

In all cases, the assignment of a default rating reflects the agency's opinion as to the most appropriate rating category consistent with the rest of its universe of ratings, and may differ from the definition of default under the terms of an issuer's financial obligations or local commercial practice.
